FROM THE DESK OF CHAIRMAN

Dear Members,

I have always started this letter by sharing with you the operational and financial achievements of Company during the year. But the past year has been a particularly challenging one for India and its people. Let me begin by wishing all of you good health and safety in these challenging times of COVID-19, series of waves of Covid during the Financial Year 2021-22 has affected us all in some way or the other and many of us lost our loved ones in the unprecedented times.

It's a pleasure to share with you the highlights of the progress being made by the Company since we met approximately twelve months back.

Business Performance

FY 2021-22 was a challenging year, attributed to external and internal factors. The COVID-19 pandemic continued disrupting several lives and dealt a severe blow to the economic health of the nation. In these challenging times, the most remarkable and satisfying achievement of the Company has been its humanitarian efforts in strengthening the nation's fight against the pandemic.

While the war against COVID is far from over, we are confident that in the end we will prevail. We care for each one of our stakeholders including employees, shareholders, vendors, customers and local communities. I will now update you on your Company's operating and financial performance.

While achieving Company objectives and maximising stakeholders' value, we stayed true to the ethical values that our organisation is founded upon. Our businesses and their operations continue to remain entirely transparent.

Amidst a challenging scenario, our strong portfolio, distribution network and brand equity enabled us to deliver a steady performance. It gives me great pleasure to share with you an update on the overall performance of your Company which performed well and delivered another year of profit. I am glad to inform you that your Company continues to perform well on a sustained basis. Your Company achieved a turnover of ₹1316.79 crores registering an increase of about 19.80% over previous year turnover of ₹1099.12 crores and earned a Profit before Tax (PBT) of ₹234.82 crores and Profit after Tax (PAT) of ₹177.13 crores.

We are making the right investments to scale this business higher. We have already made investments towards expanding our manufacturing capacities, setting up new capacities for critical inputs as part of backward integration, acquiring more product registrations and thrust on R&D for developing relevant products for key markets.

Agro Economy Overview

Indian agriculture is on a growth path, with an increase in investments and private funding in the past few years. In India, Agriculture accounts for a fifth of the gross value added and more than half the population engages in agricultural and related activities. Growth in agricultural products like fertilizers are bolstered by a favourable policy environment. The sector is expected to grow with better momentum in the next few years, owing to an increase in investment in agricultural infrastructure such as irrigation facilities, warehousing and cold storage. Factors such as reduced transaction costs, time, better port gate management and fiscal incentives will also contribute to this upward trend. Furthermore, the increased use of genetically modified crops is also expected to better the yield of the Indian farmers.

Following Covid, there was a shift in consumer preferences toward vegetarian foods, which boosted agricultural yields and boosted the agrochemical business.

The global and Indian crop protection industry has been aiming for geographic diversification of supplies to mitigate associated risks emerging out of geopolitical developments. Your Company is partnering with industry peers and the Government for appropriate policy support in building a supportive ecosystem and making India a global agrochemicals powerhouse.

Dividend

Considering the consistent profits being made by the Company, your Directors have recommended a dividend of ₹1.50 (i.e. 15%) per equity share for the financial year 2021-22.

Health, Safety and Environment

Your Company continues to conduct business with a strong commitment for environment preservation, sustainable development, safe workplaces and enrichment of the quality of life of its stakeholders and the community at large by maintaining the required ISO standards Certification.

Closing Remarks

As we passionately strive for a better future, we continue to set new paradigms every single day. In an unpredictable and challenging environment, agility and innovation are key to staying consistently successful. As technology becomes a driving force in all businesses and facets of life, the future belongs to organisations that can lead and leverage the digital revolution. I would like to place on record my sincere appreciation to the Board of Directors for their guidance. I would also like to express my gratitude to all our stakeholders for their unwavering faith. I am confident that we are going to ultimately win the fight against COVID-19. With our collective effort, India will eventually triumph over the crisis and emerge stronger, bigger and better than ever.

We believe that business priorities co-exist with social commitments and our activities support inclusive growth. While we work towards achieving our goals, we see the need to meet the society's evolving expectations. And therein lies the need to form enriching partnerships that will help us create a sustainable future.

I also take it upon myself to show my gratitude towards all stakeholders for their unwavering support and trust towards the Company.

Thanking you all.

SAT NARAIN GUPTA

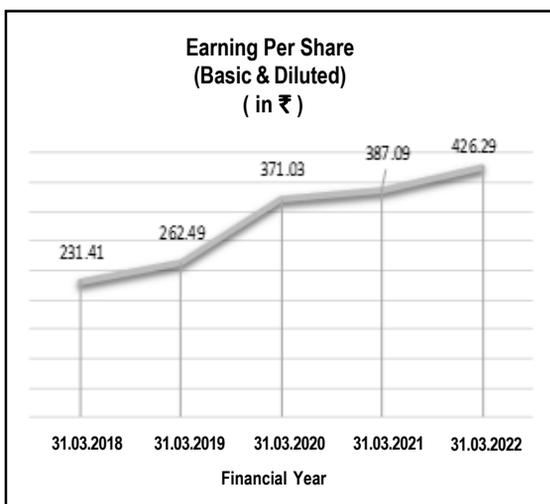

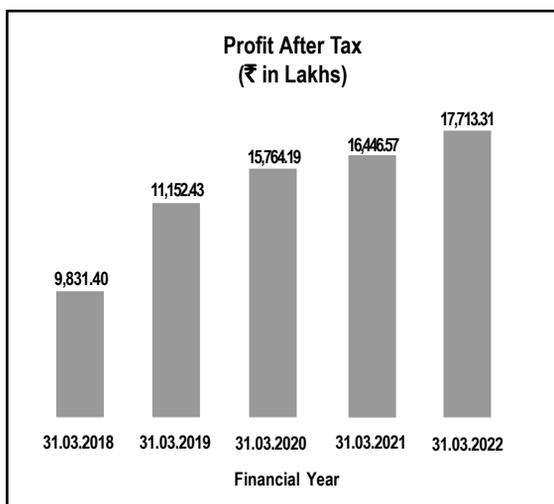

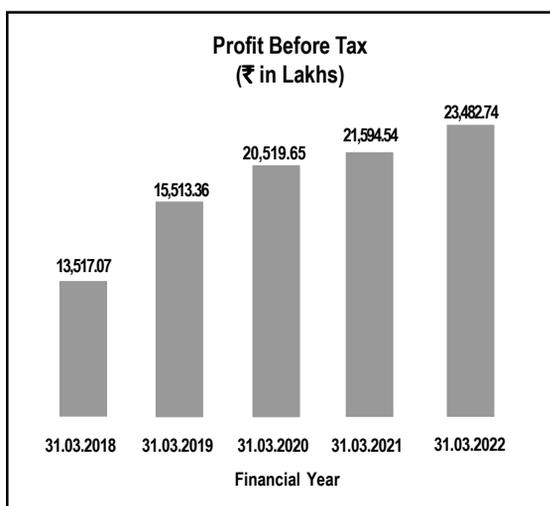

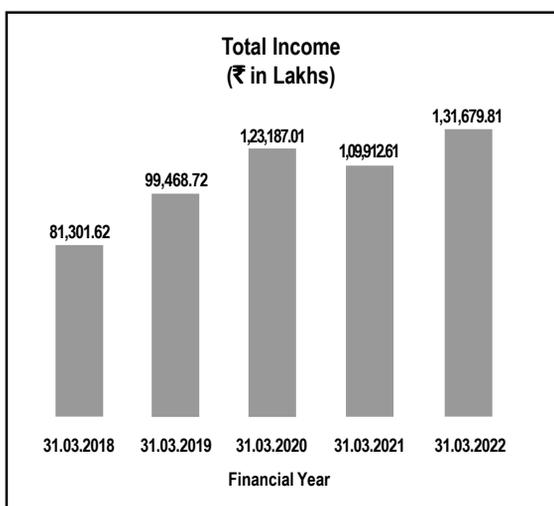

Chairman & Managing Director

Item No. 8: To approve existing as well as new material related party transaction(s) with M/s. B R Agrotech Limited

The Securities and Exchange Board of India ("SEBI"), vide its notification dated November 9, 2021, has notified SEBI (Listing Obligations and Disclosure Requirements) (Sixth Amendment) Regulations, 2021 ("Amendments") introducing amendments to the provisions pertaining to the Related Party

Transactions under the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 ("SEBI Listing Regulations"). The aforesaid amendments inter-alia included replacing of current threshold i.e. 10% (ten percent) of the listed entity's consolidated turnover, for determination of material Related Party Transactions requiring prior Shareholders' approval with the threshold of lower of ₹1,000 Crore (Rupees One Thousand Crore) or 10% (Ten Percent) of the annual consolidated turnover of the listed entity as per the last audited financial statements of the listed entity. Accordingly, the threshold for determination of material Related Party Transactions under Regulation 23(1) of the SEBI Listing Regulations has been reduced with effect from April 1, 2022.

The Company in its ordinary course of business and/or on arm's length basis sources material from different Agro chemical companies including M/s. B R Agrotech Limited in India and outside India. The purchase of materials from these companies is dependent on the requirement of the Company for its products from time to time and the ability of supply of specified material by these companies. During the course of its business the Company also sells its products to these companies.

The Company has noted that M/s. B R Agrotech Limited fall under the category of a related party of the Company in terms of the provisions of Regulation 23(4) of the Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015 (Listing Regulations).

The provisions of the Listing Regulations consider a transaction with a related party material if the transaction / transactions to be entered into individually or taken together with previous transactions during a financial year, exceeds ten percent of the annual consolidated turnover of the Company as per the last audited financial statements of the Company. Further, the Listing Regulations requires all material related party transactions to be approved by the shareholders through Special Resolution and the related parties shall abstain from voting on such resolutions.

The Company envisages that the transaction(s) entered into with M/s. B R Agrotech Limited whether individually and/or in aggregate may exceed the stipulated threshold of ten percent of the annual consolidated turnover of the Company as per the last audited and financial statements of the Company during a financial year of the Company. The Company therefore requires approval of the shareholders through Special Resolution for entering into contract(s)/ arrangement(s)/ transaction(s) with M/s. B R Agrotech Limited upto a maximum amount as mentioned in the respective resolution for the financial year 2022-2023.

The Board of Directors in their meeting held on August 9, 2022, therefore decided to refer the proposed resolutions for the consideration and approval of shareholders through Special Resolution.

The transactions that the Company has had with its related parties for the last three years is given below:

Financial Year	₹ in Crores
2021-22	170.68
2020-21	192.35
2019-20	128.34

In view of the changes in the threshold for determining the related party transactions that require prior shareholder approval and considering the fact that the list of related parties will change dynamically with no action on the part of the Company and to facilitate seamless contracting and rendering/availing of product and services between the Company and "related parties", the Company seeks the approval of the shareholders to approve entering into contracts/arrangements within the thresholds and conditions mentioned in the resolution. All the contracts/arrangements and the transactions with "related parties" are reviewed and approved by the Audit Committee. Further, the transactions that require testing of arm's length pricing are certified by our Statutory Auditors for being at arm's length.

Although approval of the shareholders would not be required under the provisions of Section 188 of the Companies Act, 2013 and the rules framed thereunder for the specified transactions with these two companies, the same is being sought as an abundant precautionary measure.

The relevant information is as follows:

1.	Name of related parties	M/s. B R Agrotech Limited

B R Agrotech Limited is dependent on the requirement of the Company for its products from time to time and ability of supply of specified material by M/s. B R Agrotech Limited. However, such transactions would at all times be on arm's lengths basis and in the ordinary course of the Company's business.
6.	Any advance paid or received for the arrangement, If any	As per industry norms, custom and uses.

As per SEBI Listing Regulations all entities/persons that are directly/indirectly related parties of the Company shall abstain from voting on resolution wherein approval of material related party transaction is sought from the shareholders. Accordingly, all related parties of the Company, including Promoters, entities forming part of Promoter Group, Directors and Key Managerial Personnel of the Company including their relatives shall not vote on this resolution.

It is pertinent to note that no related party shall vote to approve this Resolution whether the entity is a related party to the particular transaction or not.

The Board of Directors recommends the resolution for shareholders' approval at Item No. 8.

None of the Directors and Key Managerial Personnel of the Company and their relatives are concerned or interested, financially or otherwise except Shri Sat Narain Gupta, Shri Mahabir Prasad Gupta and Shri Rajender Prasad Gupta, in the resolution set out at Item No. 8.

Item No. 9: Approval for material related party transaction(s) with M/s. Bharat Certis Agriscience Limited

The Securities and Exchange Board of India ("SEBI"), vide its notification dated November 9, 2021, has notified SEBI (Listing Obligations and Disclosure Requirements) (Sixth Amendment) Regulations, 2021 ("Amendments") introducing amendments to the provisions pertaining to the Related Party Transactions under the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 ("SEBI Listing Regulations"). The aforesaid amendments inter-alia included replacing of current threshold i.e. 10% (ten percent) of the listed entity's consolidated turnover, for determination of material Related

Party Transactions requiring prior Shareholders' approval with the threshold of lower of ₹1,000 Crore (Rupees One Thousand Crore) or 10% (Ten Percent) of the annual consolidated turnover of the listed entity as per the last audited financial statements of the listed entity. Accordingly, the threshold for determination of material Related Party Transactions under Regulation 23(1) of the SEBI Listing Regulations has been reduced with effect from April 1, 2022.

The Company in its ordinary course of business and/or on arm's length basis sources material from different Agro chemical companies including M/s. Bharat Certis Agriscience Limited in India and outside India. The purchase of materials from these companies is dependent on the requirement of the Company for its products from time to time and the ability of supply of specified material by these companies. During the course of its business the Company also sells its products to these companies.

The Company has noted that M/s. Bharat Certis Agriscience Limited fall under the category of a related party of the Company in terms of the provisions of Regulation 23(4) of the Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015 (Listing Regulations).

The provisions of the Listing Regulations consider a transaction with a related party material if the transaction / transactions to be entered into individually or taken together with previous transactions during a financial year, exceeds ten percent of the annual consolidated turnover of the Company as per the last audited financial statements of the Company. Further, the Listing Regulations requires all material related party transactions to be approved by the shareholders through Special Resolution and the related parties shall abstain from voting on such resolutions.

The Company envisages that the transaction(s) entered into with M/s. Bharat Certis Agriscience Limited whether individually and/or in aggregate may exceed the stipulated threshold of ten percent of the annual consolidated turnover of the Company as per the last audited and financial statements of the Company during a financial year of the Company. The Company therefore requires approval of the shareholders through Special Resolution for entering into contract(s)/ arrangement(s)/ transaction(s) with M/s. Bharat Certis Agriscience Limited upto a maximum amount as mentioned in the respective resolution for the financial year 2022-2023.

The Board of Directors in their meeting held on August 9, 2022, therefore decided to refer the proposed resolutions for the consideration and approval of shareholders through Special Resolution.

The transactions that the Company has had with its related parties for the last three years is given below:

Financial Year	₹ in Crores
2021-22	6.60
2020-21	25.90
2019-20	60.88

In view of the changes in the threshold for determining the related party transactions that require prior shareholder approval and considering the fact that the list of related parties will change dynamically with no action on the part of the Company and to facilitate seamless contracting and rendering/availing of product and services between the Company and "related parties", the Company seeks the approval of the shareholders to approve entering into contracts/arrangements within the thresholds and conditions mentioned in the resolution. All the contracts/arrangements and the transactions with "related parties" are reviewed and approved by the Audit Committee. Further, the transactions that require testing of arm's length pricing are certified by our Statutory Auditors for being at arm's length.

Although approval of the shareholders would not be required under the provisions of Section 188 of the Companies Act, 2013 and the rules framed thereunder for the specified transactions with these two companies, the same is being sought as an abundant precautionary measure.

The relevant information is as follows:

1.	Name of related parties	M/s. Bharat Certis Agriscience Limited

5.	Nature, material terms and particulars of arrangement	Purchase of material by the Company from and the Sale of Company's product(s) to M/s. Bharat Certis Agriscience Limited is dependent on the requirement of the Company for its products from time to time and ability of supply of specified material by M/s. Bharat Certis Agriscience Limited. However, such transactions would at all times be on arm's lengths basis and in the ordinary course of the Company's business.
6.	Any advance paid or received for the arrangement, If any	As per industry norms, custom and uses.

As per SEBI Listing Regulations all entities/persons that are directly/indirectly related parties of the Company shall abstain from voting on resolution wherein approval of material related party transaction is sought from the shareholders. Accordingly, all related parties of the Company, including Promoters, entities forming part of Promoter Group, Directors and Key Managerial Personnel of the Company including their relatives shall not vote on this resolution.

The said transaction(s)/contract(s)/arrangement(s) have been recommended by the Audit Committee and Board of Directors of the Company for consideration and approval by the Members.

MANAGEMENT DISCUSSION AND ANALYSIS REPORT

INDIAN ECONOMY

Indian Economy saw a strong growth momentum with an estimated growth rate of 8.9% in FY22. This was on the account of a positive business environment, robust industrial output and rapid vaccination coverage. Both goods and service exports have been very robust so far in 2021-22, while imports have rebounded significantly as a result of increasing local demand and higher international commodity prices. The industrial sector expanded by 22.9% in the first half of 2021-22 compared to the same period in the previous fiscal year, and it is expected to grow by 11.8% this fiscal year. There are multiple factors like climate-related challenges, new Covid variants, and the ongoing issues of poverty and healthcare but the underlying economic fundamentals of India are strong.

GLOBAL ECONOMY

The geopolitical crisis unfolded while the global economy was on a recovery path from the Covid-19 pandemic, with a significant divergence between the economic recoveries of advanced economies, emerging market and developing ones. During the last two years of the pandemic, the global economy continues to be plagued by uncertainty, with resurgent waves of mutant variants, supply chain disruptions and a return of inflation in both advanced and emerging economies. For goods trade, the recovery has been swift. But growth momentum slowed considerably by the end of 2021 in large economies like China, the European Union (EU), and the United States (US), as the effects of fiscal and monetary stimuli evaporated and major supply chain disruptions emerged. Innovative digital solutions have enabled economic transformation around the world and put the global economy on a path towards green, resilient, and inclusive growth. The digital drive offers an opportunity to strengthen social protection systems, health and education services. The Russia-Ukraine conflicts have dented the global growth prospects and imposed inflationary pressure as they account for a large share of global energy exports, as well as exports of range of metals, food staples and agricultural inputs. Additional fiscal support in advanced economies and the continued rapid adoption of digital technologies could help sustain a more robust global economic recovery than projected.

INDIAN AGROCHEMICAL INDUSTRY

Despite the decline, it continues to be the largest source of livelihood for about 58% of India's population and its growth ensures inclusive economic growth of the country. The Indian agrochemical sector has risen at an annual rate of 7.6% over the last six years. Although the Pandemic has affected the economy in all walks of life, the Indian agrochemical industry is considered to be one of the industries which has successfully fought the wrath of the pandemic.

Crop protection chemicals are a type of pesticide that are used to protect crops against insects and pests. Crop protection chemicals are an important part of the chemical industry. Many crops would suffer significant losses if they did not exist. Plant diseases and pests have become more common as a result of changing environmental conditions. Also, climate fluctuations have a substantial impact on crop productivity.

The crop protection industry has been transforming over the years, with robust growth and changing crop mix trends and environmental regulations. Growing population, declining arable land, food security, trends of people shifting to vegetarian food and the need for augmented agricultural productivity are the significant factors driving the demand for higher agricultural output, thus boosting the growth of the crop protection industry globally. The market growth is dependent on pest attacks, crop yields, and agriculturists' awareness levels and capacity to buy products depending on their availability of credit. Increasing demand for insecticides across the globe is also a major factor driving the market growth.

Agriculture inputs play a decisive role in enhancing crop production. With arable land declining, production of crops can only be increased by using quality inputs through a scaled-up country-wide effort. Concerted

efforts are being taken to transform agriculture, improve farm productivity and farmer prosperity, achieve food security and environmental sustainability.

Agrochemicals are chemicals that help boost crop productivity through prevention of destruction of crops by pests such as insects, weeds, fungus, etc. The global economy, in general, and Indian is facing a multitude of challenges such as to feed an evergrowing population, reducing arable land bank and dealing with adverse climatic changes. Under such circumstances, the traditional methods of growing more crops are rendered inadequate. There is a growing acceptance to launch advanced agrochemical solutions to achieve higher field productivity.

The industry and policymakers are expected to work in the direction of bringing newer technologies, enhancing manufacturing infrastructure, and creating proper policy environment to help improve productivity as well as foreign investment in the country in order to increase the share of agrochemicals in the GDP of the country by utilizing the huge untapped market still available within India. The agrochemical sector is expected to emerge as a major global supply hub. To obtain a competitive edge, agrochemical companies will increasingly focus on incorporating next-generation formulations into their R&D capabilities and product mix.

IMPACT OF CLIMATIC CHANGES ON AGRICULTURAL PRODUCTION

Climate change is a global threat to the food and nutritional security of the world. As greenhouse-gas emissions in the atmosphere are increasing, the temperature is also rising due to the greenhouse effect. The average global temperature is increasing continuously and is predicted to rise by 2°C until 2100, which would cause substantial economic losses at the global level. The concentration of CO₂, which accounts for a major proportion of greenhouse gases, is increasing at an alarming rate, and has led to higher growth and plant productivity due to increased photosynthesis, but increased temperature offsets this effect as it leads to increased crop respiration rate and evapotranspiration, higher pest infestation, a shift in weed flora, and reduced crop duration. Climate change also affects the microbial population and their enzymatic activities in soil. Climate change is projected to have a deleterious impact on agricultural productivity. The raised temperature and altered precipitation are most likely to offset the positive impact of increased CO₂ on plants. The warmer and humid climate created due to climate change is creating more horizons for pest infestations. Those climate-resilient technologies that are technically sound and economically viable must be framed using an interdisciplinary approach to mitigate climate change. Climate change has the potential to increase the pest population and its migration, which can have an adverse impact on agricultural yields and even viability, as the pest population depends mainly on abiotic factors such as humidity and temperature.

OPPORTUNITIES AND OUTLOOK

The industry is closely working with the Government for necessary policy support and on making agriculture activities even more organized. The transformative agriculture reforms enacted will lead to faster adoption of necessary technologies across the agriculture value chain and improve the quantity and quality of the agriculture produce providing growth opportunities to seeds, crop protection and crop nutrition.

India is projected to be a key beneficiary of the global move towards 'China plus one' sourcing strategy of companies, which is expected to provide further momentum to India's crop protection sector. Industry is collaborating with the Government in building an enabling ecosystem to make India an agrochemical powerhouse.

EFFLUENT MANAGEMENT

We have installed effluent treatment plant. All effluents generated at plant are segregated into hazardous and non-hazardous categories and they are effectively treated, recycled and reused, wherever possible.

RESEARCH & DEVELOPMENT

Being actively engaged in product and process development activities across various segments of its businesses, Research & Development (R&D) is an integral part of the Company's operations. We have dedicated R&D plant at Bahadurgarh, Haryana is certified by the Ministry of Science and Technology, Government of India with pilot plant having a qualified team. We also have R&D Plant at Dahej, Gujarat having NABL Certification from National Accreditation Board for Laboratories as a certified research lab, alongwith Pilot plant. Both the plants are working round the clock working on new chemistries.

QUALITY

The Company is also registered with global mercantile data compiler and rating agency Dun & Bradstreet.

BUSINESS PERFORMANCE

Your Company has highly qualified and dedicated team of professionals in various work profile to focus on quality improvement in existing products, marketing the products to prevailing customers and exploring new domestic and overseas customers for the Company. Apart from loyal customer base that the Company is enjoying since last several years now, many newer domestic as well as overseas customers are added to the portfolio of the Company during the year & same is expecting to increase in near future due to Company's commitment of supplying high quality product in a time bound manner.

Moving ahead, the Company remains poised to implement key initiatives across functions to enable itself to face market challenges and leverage the emerging opportunities. It remains focused on improving revenue growth and profitability, driven by high growth segments such as seeds and nutrients.

The Company foresees huge untapped growth potential for India's chemical industry and strives to bank on the growth opportunities by remaining committed to maximize its return on investment and create value for its esteemed stakeholders.

RISKS AND CONCERNS

Risk management comprises all the organizational rules and actions for early identification of risks while doing business and the management of such risks along with identification of opportunities.

Despite the strong growth drivers, Indian agrochemicals industry faces challenges in terms of low awareness among large number of end users spread across the geography. Managing inventory and distribution costs is a challenge for the industry players in the wake of volatility in business environment.

The agrochemical industry is highly dependent on weather conditions. The uneven rainfalls affect the overall business.

The changes and fluctuations in raw material prices due geopolitical tensions, supply chain disruptions, inflation etc. can be a challenge to growth of the Company.

The performance of the crop protection industry and other agri-inputs is dependent on monsoons, pest and disease incidences on crops. Auditor's Responsibility for the Audit of Standalone Financial Statements

Our objectives are to obtain reasonable assurance about whether Standalone Ind AS Financial Statements as a whole are free from material misstatement, whether due to fraud or error and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these Standalone Ind AS Financial Statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Company has an adequate internal financial controls system in place and the operating effectiveness of such controls.

- Evaluate the overall presentation, structure, and content of the financials including the disclosures, and whether Standalone Ind AS financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in Standalone Ind AS financial statements that individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of Standalone Ind AS financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and evaluating the results of our work; and (ii) evaluating the effect of any identified misstatements in the financial statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of Standalone Ind AS financial statements of the current period and are therefore the key audit matters. We describe these matters in our Auditor's Report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

These responsibilities included the design, implementation, and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors Responsibility

Our responsibility is to express an opinion on the Company's Internal Financial Controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls. With reference to financial statements (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143 (10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, essential components stated in Guidance Note issued by the Institute of Chartered Accountants of India. Our Audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial control system with reference to Standalone Financial Statements and their operating effectiveness. Our audit of internal financial controls with reference to Standalone Ind AS Financial Statements included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal controls based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risk of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidences we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of Standalone Ind AS Financial Statements in accordance with generally accepted accounting principles, and that receipts and expenditure of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls with reference to Standalone Ind AS Financial Statements to future periods are subject to the risk that the internal financial controls with reference to Standalone Ind AS Financial Statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Company measures certain financial instruments at fair value at each reporting date. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- i. in the principal market for the asset or liability, or
- ii. In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible to the company. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest. The company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

Assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or Indirectly observable.
- Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

All financial assets and liabilities are initially recognized at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities, that are not at fair value through profit or loss, are added to or deducted from the fair value measured on initial recognition of financial asset or financial liability.

a. Subsequent measurement

Financial Assets

Financial assets are classified in following categories:

a) At Amortized Cost

A financial asset shall be measured at amortised cost if both of the following conditions are met:

- (i) the financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows and
- (ii) The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets measured at amortised cost using effective interest rate method less impairment if any. The EIR amortisation is included in finance income in the statement of profit and loss.

b) At Fair Value Through Other Comprehensive Income (FVTOCI)

A debt instrument' is classified as at the FVTOCI if both of the following criteria are met:

- The objective of the business model is achieved both by collecting contractual cash flows and selling the financial assets, and
- The asset's contractual cash flows represent SPPI.

Debt instruments included within the FVTOCI category are measured initially as well as at each reporting date at fair value. Fair value movements are recognised in the other comprehensive income (OCI). However, the company recognizes interest income, impairment losses & reversals and foreign exchange gain or loss in the P&L. On de-recognition of the asset, cumulative gain or loss previously recognised in OCI is reclassified from the equity to P&L. Interest earned is recognised using the EIR method.

c) At Fair Value Through Profit and Loss (FVTPL)

FVTPL is a residual category for financial Assets. Any financial assets, which does not meet the criteria for categorization as at amortized cost or as FVTOCI, is classified as at FVTPL.

In addition, the company may elect to designate financial asset, which otherwise meets amortized cost or FVTOCI criteria, as at FVTPL. If doing so reduces or eliminates a measurement or recognition inconsistency. The company has not designated any financial asset as at FVTPL.

Financial assets included within the FVTPL category are measured at fair value with all changes recognised in the Profit & Loss.

Financial liabilities

a) Financial liabilities at Amortized Cost

Financial liabilities at amortised cost represented by trade and other payables, security deposits and retention money are initially recognised at fair value, and subsequently carried at amortized cost using the effective interest rate method.

b) Financial liabilities at FVTPL

The Company has not designated any financial liabilities at FVTPL.

(c) Derecognition

Financial Asset

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is derecognised only when the contractual rights to the cash flows from the asset expires or it transfers the financial assets and substantially all risks and rewards of the ownership of the asset.

Financial Liability

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a de-recognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognised in the income statement.

d) Impairment of financial assets:

Company applies expected credit loss (ECL) model for measurement and recognition of impairment loss. The Company follows 'simplified approach' for recognition of impairment loss allowance on trade receivable. The application of simplified approach does not require the Company to track changes in credit risk. Rather, it recognises impairment loss allowance based on lifetime ECLs at each reporting date, right from its initial recognition.

Company assesses on a forward-looking basis the expected credit losses associated with its assets carried at amortised cost and FVTOCI debt instruments. The impairment methodology applies on whether there has been significant increase in credit risk.

ECL impairment loss allowance (or reversal) recognised during the period is recognised as income/expense in the statement of profit and loss.

2.23 Non Current Assets held for Sale

Non-current assets (or disposal groups) are classified as assets held for sale when their carrying amount is to be recovered principally through a sale transaction and a sale is considered highly probable. The sale is considered highly probable only when the asset or disposal group is available for immediate sale in its present condition, it is unlikely that the sale will be withdrawn and sale is expected within one year from the date of the classification. Disposal groups classified as held for sale are stated at the lower of carrying amount and fair value less costs to sell. Property, plant and equipment and intangible assets are not depreciated or amortised once classified as held for sale. Assets and liabilities classified as held for sale are presented separately in the statement of financial position.

If the criteria stated by IND AS 105 “Non-current Assets Held for Sale and Discontinued Operations” are no longer met, the disposal group ceases to be classified as held for sale. Non-current asset that ceases to be classified as held for sale are measured at the lower of (i) its carrying amount before the asset was classified as held for sale, adjusted for depreciation that would have been recognized had that asset not been classified as held for sale, and (ii) its recoverable amount at the date when the disposal group ceases to be classified as held for sale.

2.24 Events Occurring after Balance Sheet Date

Events occurring after Balance Sheet date are considered in the preparation of financial statements in accordance with Ind AS 10 (Contingencies and Events Occurring After Balance Sheet Date).

On 17th May, 2022 an unfortunate incident of fire occurred in one Block of our Plant situated at Plot No. 42/4, Amod Road, GIDC, Dahej, District Bharuch, Gujarat-392130. - a. Employee defined benefit plan.
- b. Certain financial assets and liabilities measured at fair value.

2.3 Use of Estimates and Judgement

The preparation of financial statements in conformity with Ind AS requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, disclosure of contingent assets and liabilities at the date of financial statements and the reported amount of income and expenses. Examples of such estimates includes future obligations under employee retirement benefit plans and estimated useful life of property, plant and equipment, Employee benefit expenses, provisions etc. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on a periodic basis. Future results could differ due to changes in these estimates and difference between the actual result and the estimates are recognised in the period in which the results are known /materialized.

2.4 Basis of Consolidation

Joint Ventures

A Joint venture is a joint arrangement whereby parties that have joint control of the arrangement have rights to the net assets of the arrangement. Interests in joint ventures are initially recognised at cost and thereafter accounted for using the equity method.

Equity Method

Under the equity method of accounting, the investments are initially recognised at cost and

adjusted thereafter to recognise the group's share of the post-acquisition profits or losses of the investee in profit and loss, and the group's share of other comprehensive income of the investee in other comprehensive income. Dividends received or receivable from joint ventures are recognised as a reduction in the carrying amount of the investment.

When the group's share of losses in an equity-accounted investment equals or exceeds its interest in the entity, including any other unsecured long-term receivables, the group does not recognise further losses, unless it has incurred obligations or made payments on behalf of the other entity.

Unrealised gains on transactions between the group and its joint ventures are eliminated to the extent of the group's interest in these entities. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred.

The carrying amount of equity accounted as investments are tested for impairment in accordance with the Group's policy.

Any gain or loss on dilution arising on a reduced stake in the joint venture, but still retaining the joint control, is recognized in the Statement of Profit and Loss.

The adoption of amendment did not have any material effect on the financial statements.

to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.

- (ii) The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the earlier of the end of the useful life of the right-to-use-asset or the end of the lease term. The estimated useful life of the right-to-use asset is determined on the same basis as those of property, plant and equipment. In addition, the right-to-use asset is periodically reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability.
- (iii) The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Company's incremental borrowing rate.
- (iv) The lease liability is measured at amortized cost using the effective interest method, it is remeasured when there is a change in future lease payments from a change in an index or rate. When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or is recorded in the profit and loss if the carrying amount of the right-of-use asset has been reduced to zero.
- (v) The Company presents right-of-use asset that do not meet the definition of Investment property in the "Property plant and equipment" and lease liabilities in "other financial liabilities" in the Balance Sheet.

The Company recognizes the lease payments associated with these leases as an expense on a straight-line basis over the lease term.

(b) As a lessor

When the Company acts as a lessor, it determines at lease inception whether each lease is a finance lease or an operating lease. To classify each lease, the Company makes an overall assessment of whether the lease transfers substantially all the risk and rewards incidental to the ownership of the underlying asset. If this is the case, then the lease is a finance lease, if not then it is an operating lease. As part of the assessment, the Company considers certain indicators such as whether the lease is for the major part of the economic life of the asset.

The Company recognizes lease payments received under operating lease as income on a straight-line basis over the lease term as part of "Other Income".

2.20 Fair Value Measurement

Company measures certain financial instruments at fair value at each reporting date. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- i. in the principal market for the asset or liability, or
- ii. in the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible to the company. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest. The company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

Assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or Indirectly observable.
- Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

2.21 Dividend to Equity Shareholders

Dividend paid/payable is recognized in the year in which the related dividends are approved by shareholders and recommended by board of directors.

2.22 Financial Instruments

Initial recognition and measurement

Financial assets and liabilities are recognized when the Company becomes a party to the contractual provisions of the instrument. All financial assets and liabilities are initially recognized at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial

assets and financial liabilities, that are not at fair value through profit or loss, are added to or deducted from the fair value measured on initial recognition of financial asset or financial liability.

a. Subsequent measurement

Financial Assets

Financial assets are classified in following categories:

a) At Amortized Cost

A financial asset shall be measured at amortised cost if both of the following conditions are met:

- (i) The financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows and
- (ii) The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets measured at amortised cost using effective interest rate method less impairment if any. The EIR amortisation is included in finance income in the statement of profit and loss.

b) At Fair Value Through Other Comprehensive Income

A debt instrument' is classified as at the FVTOCI if both of the following criteria are met:

- The objective of the business model is achieved both by collecting contractual cash flows and selling the financial assets, and
- The asset's contractual cash flows represent SPPI.

Debt instruments included within the FVTOCI category are measured initially as well as at each reporting date at fair value. Fair value movements are recognised in the other comprehensive income (OCI). However, the company recognizes interest income, impairment losses & reversals and foreign exchange gain or loss in the P&L. On de-recognition of the asset, cumulative gain or loss previously recognised in OCI is reclassified from the equity to P&L. Interest earned is recognised using the EIR method.

c) At Fair Value Through Profit and Loss

FVTPL is a residual category for financial Assets. Any financial assets, which does not meet the criteria for categorization as at amortized cost or as FVTOCI, is classified as at FVTPL.

In addition, the company may elect to designate financial asset, which otherwise meets amortized cost or FVTOCI criteria, as at FVTPL. If doing so reduces or eliminates a measurement or recognition inconsistency. The company has not designated any financial asset as at FVTPL.

Financial assets included within the FVTPL category are measured at fair value with all changes recognised in the P&L.

Financial liabilities

a) Financial liabilities at Amortized Cost

Financial liabilities at amortised cost represented by trade and other payables, security deposits and retention money are initially recognised at fair value, and subsequently carried at amortized cost using the effective interest rate method.

b) Financial liabilities at FVTPL

The company has not designated any financial liabilities at FVTPL.

c) Derecognition

Financial Asset

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is derecognised only when the contractual rights to the cash flows from the asset expires or it transfers the financial assets and substantially all risks and rewards of the ownership of the asset.

Financial Liability

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a de-recognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognised in the income statement.

d) Impairment of financial assets

Company applies expected credit loss (ECL) model for measurement and recognition of impairment loss. The Company follows 'simplified approach' for recognition of impairment loss allowance on trade receivable. The application of simplified approach does not require the Company to track changes in credit risk. Rather, it recognises impairment loss allowance based on lifetime ECLs at each reporting date, right from its initial recognition.

Company assesses on a forward-looking basis the expected credit losses associated with its assets carried at amortised cost and FVTOCI debt instruments. The impairment methodology applies on whether there has been significant increase in credit risk.

ECL impairment loss allowance (or reversal) recognised during the period is recognised as income/expense in the statement of profit and loss.

2.23 Non Current Assets held for Sale

Non-current assets (or disposal groups) are classified as assets held for sale when their carrying amount is to be recovered principally through a sale transaction and a sale is considered highly probable. The sale is considered highly probable only when the asset or disposal group is available for immediate sale in its present condition, it is unlikely that the sale will be withdrawn and sale is expected within one year from the date of the classification. Disposal groups classified as held for sale are stated at the lower of carrying amount and fair value less costs to sell. Property, plant and equipment and intangible assets are not depreciated or amortised once classified as held for sale. Assets and liabilities classified as held for sale are presented separately in the statement of financial position.

If the criteria stated by IND AS 105 "Non-current Assets Held for Sale and Discontinued Operations" are no longer met, the disposal group ceases to be classified as held for sale. Non-current asset that ceases to be classified as held for sale are measured at the lower of (i) its carrying amount before the asset was classified as held for sale, adjusted for depreciation that would have been recognized had that asset not been classified as held for sale, and (ii) its recoverable amount at the date when the disposal group ceases to be classified as held for sale.

2.24 Events Occurring after Balance Sheet Date

Events occurring after Balance Sheet date are considered in the preparation of financial statements in accordance with Ind AS 10 (Contingencies and Events Occurring After Balance Sheet Date).
