The Board of Directors thanks all the investors for fully subscribing the Rights Issue. The basis of allotment was finalized in consultation with National Stock Exchange of India Limited. The funds raised through the rights issue were mainly utilized towards reducing the borrowings of the Company.

Management Discussion and Analysis

In the year 2013, the global economy continued to struggle with GDP growth estimated to be only 2.5%. While western economies remained sluggish throughout the year, the year also saw a marked slowdown in India and China. In India, the economy grew at its slowest rate in a decade with GDP growth estimated to be 4.7%. This was compounded by persistently high inflation, a slowing down of capital formation and stagnant industrial production, affecting demand in your Company's key industry segments.

The poor sentiment in the market resulted in negative growth of 6% in the passenger car market, for the first time in decades. The year saw the Government systematically reduce the gap in price between petrol and diesel which resulted in a shift in demand towards petrol cars. The market was driven by new product launches and saw a shift in volume towards

the premium B segment. There was a double digit decline in the utility vehicle market that was affected by both the increasing diesel prices and the slowing of economic activity.

The slowing down of the economy in the last year resulted in less goods movement and under utilization of trucks by fleets. This took place at a time when fuel costs increased on a monthly basis affecting the viability of operations for truck operators, with no prospects for improving conditions. These business prospects for good carriage operators resulted in a decline of more than 25% in the commercial vehicle industry. The decline was across the board from small trucks to heavy commercial vehicles.

A good monsoon resulted in record levels of agricultural output and a buoyant growth of the agricultural tractor industry in the last year. The tractor industry grew by 19% in the last financial year as farmers increasingly looked at mechanization to overcome labour availability issues. The construction and mining equipment industry continued to be adversely affected through the year and registered negative growth.

There was delay in implementation of the JNNURM scheme for buses, which resulted in the demand for air suspension systems to be stagnant in the last year. The power equipment sector was badly affected by slow execution of projects on account of land acquisition, coal linkages, environmental clearances, social issues and funding and declined by 20% in the last year.

Your Company saw sales decline by 5.3% in the last financial year, largely affected by the steep decline in volumes across the commercial vehicle industry. The decline in our sales to the passenger car and

utility vehicle industry was made up by our increased sales to the agricultural tractor industry. There was a marginal improvement in our exports. The Company was affected by inflationary headwinds that resulted in significant hikes in government controlled power tariffs and minimum wages. At the same time, the steel price increased in the second half of the year increasing our input cost. There was an effective review mechanism within the Company with a focus on controlling and reducing costs that enabled the Company to manage in these difficult times.

While the last year saw low levels of growth, the government had improved the current account deficit and fiscal deficit levels by the year end. The current year is filled by the prospects of some improvement in economic activity with a new government coming to power. This should in time result in improved sentiments and an uptick in infrastructural and industrial activity in the country. It is expected that this could positively impact the automotive and commercial vehicle segments towards the latter part of the current year. The agricultural tractor industry is likely to see muted growth in the current year, following year of record production and high growth. Further, there is some uncertainty regarding the impact of global climatic patterns on our monsoons that could dampen growth in the sector. It is expected that in the latter part of the current year that economic activity and infrastructure development pick up, resulting in growth of construction and mining equipment market. Similarly, we expect that there will be some improvements in the power sector with the new government in place. There are orders from state transport undertakings for buses with air suspension which would result in some growth in the air suspension business of your Company. While the business environment remains difficult, it

is expected that prospects could improve in the latter part of the current year.

Your Company received major awards for its performance in the year under review as a supplier from key customers like Ashok Leyland, Caterpillar, Hyundai, John Deere, Mahindra & Mahindra, Maruti Suzuki, TAFE, Toyota and Volvo-Eicher.

between the forward rate and the exchange rate at the date of inception of the contract is recognized as income or expense over the period of the contract. Any profit or loss arising on cancellation or renewal of such forward exchange contracts is recognized as income or expense for the year.

ix) Export Incentives:

Export incentives are recognised as revenue as and when exports are made.

x) Derivative Contracts:

The profit/loss arising on derivative contracts is accounted for as income/expenditure on the date of settlement of the contract.

The outstanding derivative contracts are revalued at the end of the year and while the net loss arising there from is debited to profit and loss account, the net unrealised gain is ignored, except in case where they relate to borrowing costs that are attributable to the acquisition of Fixed Assets, in which case they are adjusted to the carrying cost of such fixed assets.

xi) Operating Leases:

Leases where the lessor effectively retains substantially all the risks and benefits of ownership of the leased assets are classified as operating leases. Operating lease payments are recognised as an expense in the revenue account as per the lease terms.

xii) Earnings per share:

Earnings per share (EPS) is computed by dividing the net profit / (loss) after tax for the year attributable to the equity shareholders by weighted average number of equity shares outstanding during the year.

xiii) Taxes on Income:

Current tax is the amount of tax payable on the taxable income for the year and is determined in accordance with the provisions of the Income Tax Act, 1961.

Deferred tax is recognised on timing differences; being the differences between taxable income and accounting income that originate in one period and are capable of reversal in one or more subsequent periods.

Deferred tax assets in respect of unabsorbed depreciation and carry forward of losses are recognised only if there is virtual certainty that there will be sufficient future taxable income available to realise such assets. Other deferred tax assets are recognised if there is reasonable certainty that there will be sufficient future taxable income available to realise such assets.

xiv) Provisions and Contingencies:

The Company creates a provision when there is a present obligation as a result of past event that probably requires an outflow of resources and a reliable estimate can be made of the amount of obligations. A disclosure of contingent liability is made when there is a possible obligation or a present obligation that will probably not require outflow of resources or where a reliable estimate of the obligation cannot be made.
