MANAGEMENT DISCUSSION AND ANALYSIS REPORT AS PER REGULATION 34(2) OF SEBI (LISTING OBLIGATIONS AND DISCLOSURE REQUIREMENTS) REGULATIONS, 2015

Overview of Economy

The Global economy disappointed in terms of growth, with deceleration of activity in key emerging and developing economies like China, Brazil, Russia overshadowing a modest recovery in major high income countries. The deceleration was accompanied by declines in commodity prices, subdued global trade, bouts of financial market volatility and weakening capital flows. India was a notable exception, growing at 7.6% as per Central Statistical Office (CSO) estimates, despite declines in exports. Inflation has come down, however industrial activity and consumption has not been buoyant. Three key transitions will influence the global outlook for growth – pace of rebalancing in China, commodity prices and monetary policy actions in the US and other major economies. For India, though the long term prospects for continued growth remain undiminished, actual pace will depend on revival in private investment and rural consumption, strengthening of bank balance sheets and continued implementation of economic reforms.

Industry Scenario

Textile and Apparel Industry Conditions

The Indian Textile manufacturing Sector is the second largest in the world after China. India is amongst few countries in the world which has manufacturing facilities across the entire value chain from fibre to finished product (in garments, home and technical textiles). Textile sector is estimated to be more than ₹ 7 lakh crores in size with domestic consumption accounting for more than 62%. The sector is expected to double in size by 2021. Various studies have estimated the overall potential for this sector to be at ₹ 35 lakh crores.

Textile Industry continues to be the second largest employer after agriculture, providing direct employment to 45-50 million people and indirect employment to another 55-60 million people. Labour forms a significant part of the cost of manufacture and hence the performance of this sector is very much dependent on various labour policies. The volume growth in the industry has been quite modest over the past few years. India's fibre production is estimated to be 11 million tons per annum and growing at 4% pa and the yarn production is at 7 million tons per annum and growing at 3% pa. Overall fabric output is around 65 billion square meters and growing at 2% p.a.

Opportunities, Threats and Challenges

Opportunities

- ❖ The company has inherent strength due to its prime location.
- ❖ Changes in economic legislations and rationalization of the tax structure and duty structure such as VAT, custom duty etc.
- ❖ VFY is emerging as a fiber with new applications. The general economic well being has resulted in the switch back to the use of this fiber for sarees and furnishing fabrics.
- ❖ More competitive strength due to the availability of captive power plant.
- ❖ Huge infrastructure facility to meet the current and future demand.
- ❖ 'Make in India' campaign is a testimony to the huge growth potential in the industry, both in terms of infrastructure and skill improvement.

Threats

- ❖ The goodwill of the company is decreased due to legal proceedings and labor disputes which are still going on.
- ❖ The Company is experiencing pressure on margins due to severe competition from other low-cost countries like China. Threat from PFY due to its lower price has been a factor that has been having a cyclical impact in the market.
- ❖ The Company perceives threat from imports and consequent pressure on domestic prices, apart from the increase in cost of raw materials and other inputs. Increase in coal prices has increased the cost of power.
- ❖ Rising input costs (wages, power and interest cost), restrictive labour laws and intensified competition from other low cost countries like China.

Risk & Concerns

The major risk is due to the globalization of the economy which could result in cheaper goods being dumped by China. Thus anti dumping duty is an important factor which has a major bearing on the perceived risk. The risk in terms of maintenance has been substantially addressed during the course of this year. The risk now shifts to

availability of skilled personnel as the industry is generally facing shortage of skilled manpower.

Internal Control System and their adequacy

Since the operational activities of the company became standstill since August'2008, there is no internal control procedures commensurate with the size of the Company and the nature of the Business. The company is planning to implement a full fledged computerized system which is likely to address most of the issues with respect to internal controls, as and when operations restart.

Discussion of the Financial Performance with respect to operational performance

The financial performance of the company is not so good during the year under review as there is no production activities carried on by the company and due to that there is no income from operations generated by the company. The operations of the company are totally stopped and which also affect the financial performance of the company.

Meaning of Internal Financial Controls Over Financial Reporting

6. A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. - (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion
