OVERVIEW OF ECONOMY

Indian economy has weathered many challenges successfully in recent times and is currently placed on a cyclical upturn, on the back of strong policies and a whiff of new optimism. In the recent past, the economy faced testing times with issues like lower growth, high levels of inflation and widening current account deficit; escalated by an unsupportive external environment. Growth is back, with its desirable concomitants of mild inflation and manageable current account balance with stable rupee and rising foreign exchange reserves, signaling improvements in macro-economic stability. The growth rate of the economy, measured by the growth in GDP at constant (2011-12) market prices, improved from 5.1 per cent in 2012-13 to 6.9 per cent in 2013-14 and is projected to clock 7.4 per cent in 2014-15, according to the Advance Estimates released by the Central Statistics Office. India is one of the very few countries for which IMF and World Bank have raised their growth assessment. The ongoing revival is remarkable against the fact that it happened despite a highly tentative global economic conditions and a below-par domestic agricultural season.

The year 2014-15 has witnessed key policy reforms, aimed at aiding growth revival and surmounting the structural constraints in the economy. The policy action has combined the needs of short term economic management with focus on taming inflation and external sector imbalances with a medium to long-term vision for transformation and development, manifested in significant reforms aimed at rationalizing administered pricing policies in petroleum and natural gas, stirring infrastructure development and de-bottlenecking the economy with initiatives to unshackle land acquisition for development (along with rehabilitation requirements therein) and to ensure adequate availability of key inputs like coal and power. The growth agenda of the Government has been tethered to the revival of manufacturing, unleashed in the "Make in India", initiative, accompanied by liberalization of foreign direct investment, a large array of investment facilitation measures and steps to improve saving.

Management Discussions & Analysis

MACRO ECONOMIC ENVIRONMENT

The Indian economy is reviving, helped by positive policy actions that have improved confidence and by lower global oil prices, says the IMF in its annual assessment of the Indian economy. To continue on this trend, India needs to revitalize the investment cycle and accelerate structural reforms, says the report.

The Indian economy is the bright spot in the global landscape, becoming one of the fastest-growing big emerging market economies in the world.

“Growth numbers are now much higher and the current account deficit is comfortable, in part due to the fall in gold imports and lower oil prices,” said Paul Cashin, IMF Mission Chief for India. “New investment project announcements have started to pick up, particularly in the power and transport sectors.” He also noted that bolstering financial sector health and further financial inclusion would support growth going forward.

India’s economic profile recently got a lift as the country improved the way it measures economic output. (The IMF staff report, however, was prepared before the release of these new growth numbers.) The revised national accounts series incorporates numerous conceptual and methodological improvements that make them more consistent with international best practices.

Based on revised GDP, the IMF forecasts growth will strengthen to 7.2 percent in 2014/15 and rise to 7.5 percent in 2015/16, driven by stronger investment following improvements to the business climate.

“The revised growth figures support our view that economic recovery in India is under way, albeit pointing to a somewhat faster pace than we, and others, previously believed,” Cashin says. “These GDP revisions portray a more resilient performance of the services and manufacturing sectors of the economy.”

But while public and private consumption look stronger, he added, investment activity continues to be held back by structural and supply-side constraints.

The IMF will continue to examine the improved GDP methodology and its implications for its growth forecasts, and further details on the compilation methodology will enable a deeper understanding of India’s near-term and medium-term growth.

REVIEW OF OPERATIONS

Gross Revenue from Operations remained at ₹ 4435.02 Lac in comparison to last years’ figure of ₹ 4048.62 Lac. In term of Net Profit, the same was of ₹ 62.37 Lac in comparison to last years’ net Profit of ₹ 65.40 Lac.

In term of segment results, the Company has earned profit of ₹ 169.04 Lac from its treasury operations, but has suffered loss of ₹ 36.81 Lac from textile business, loss of ₹ 4.25 Lac from Share transactions and loss of ₹ 37.39 Lac from other activities.

BUSINESS SEGMENT

During the year, the Company was operating into following Business Segments -

- Trading of Textile goods
- Trading in Electrical goods
- Finance & Investments

However, the Company has decided to discontinue its trading activities in electrical goods due to high rate of competition and lack of ample demand.

OPPORTUNITIES

Textile Industry

The Indian textiles industry, currently estimated at around US \$108 billion, is expected to reach US \$ 141 billion by 2021. The industry is the second largest employer after agriculture, providing direct employment to over 45 million and 60 million people indirectly. The Indian Textile Industry contributes approximately 5 per cent to GDP, and 14 per cent to overall Index of Industrial Production (IIP).

The textiles sector has witnessed a spurt in investment during the last five years. The industry (including dyed and printed) attracted foreign direct investment (FDI) worth US\$ 1,522.51 million during April 2000 to December 2014. Indian government has also come up with a number of export promotion policies for the textiles sector. It has also allowed 100 per cent FDI in the Indian textiles sector under the automatic route.

The future for the Indian textile industry looks promising, buoyed by both strong domestic consumption as well as export demand. With consumerism and disposable income on the rise, the retail sector has experienced a rapid growth in the past decade with the entry of several international players like Marks & Spencer, Guess and Next into the Indian market. The organised apparel segment is expected to grow at a compound annual growth rate (CAGR) of more than 13 per cent over a 10-year period.

Finance & Investments

NBFCs' growth had been constrained due to lack of adequate capital. Going forward, we believe capital infusion and leverage thereupon would catapult NBFCs' growth in size and scale. A number of NBFCs have been issuing non-convertible debentures (NCDs) in order to increase their balance sheet liquidity. Also to address this purpose, especially in the infrastructure financing space, a new category of NBFCs was formed called Infrastructure financing companies (IFCs).

NBFCs are not required to maintain cash reserve ratio (CRR) and statutory liquid ratio (SLR). Priority sector lending norm of 40% (of total advances) is also not applicable for them. While this is to their advantage, they do not have access to low-cost demand deposits. As a result their cost of funds is always high, resulting in thinner interest spread.

On the other front, Indian stock market turned out to be among the world's best performers in 2014 with the Bombay Stock Exchange (BSE) Sensex rising 29% from 21,140 on January 1 to 27,312 on December 19. Most market players believe this stellar run will continue in 2015 on the back of reforms, strong foreign fund inflows, revival of manufacturing, improvement in the macro-economic situation and rise in corporate earnings growth.

Despite the sharp rise, the valuation of the Indian stock market is still attractive. Yogesh Nagaonkar, vice-president, Institutional Equities, Bonanza Portfolio, says Indian stocks are an attractive investment if the person's horizon is three-five years. One reason is that the return on equity of BSE 200 companies is bottoming out. "Revival of growth of Indian companies, which were facing tough times for the past five years, is still at a nascent stage. Nifty 50 companies can see 16-17% earnings growth in the next one year. This may rise to 19-20% two years from now," he says.

THREATS & CONCERNS

The Textile sector needs a long term road-map for sustainable growth and increasing competitiveness across each node of the textile value chain. National Textiles Policy should provide such a roadmap and stable policy framework for the sector.

India has 22% of world's spindle capacity and is the No. 2 textile maker in the world. Further it has 61% world's loom capacities (including handlooms). The strategy should be to exploit our strengths and increase exports in new markets such as Latin American countries, Eastern European Countries, Middle East. With China's Textile and Garment export growth rate projected to slow down in the next 10 years due to rising cost of production and increasing domestic demand, the export space that would be ceded by China would be open for other Asian countries including India to grab.

It is a necessity to have an integrated policy, since as a country we need to move forward with higher value addition in exports. We are quite a geographically diverse country with different skill sets developed in each cluster. We have about 113 clusters – each one of them brilliant in a few product groups.

The industry could not achieve the envisaged growth rate during the last few years mainly due to various policies relating to cotton, cotton yarn, export incentives etc. There is a need for an integrated textile policy to support the domestic textiles and clothing industry to make it globally competitive by easing the regulatory burden, removing infrastructural bottlenecks, providing adequate raw materials and supporting exports.

Rising NPA are big concerns for financing business in India and that needs to be addressed by the Indian Government. Other challenges are the cha

In regard to the Capital market, in recent past, the Indian stock market, as reflected by the S&P BSE Sensex, has fallen by at least 2,100 points or 7.1% from its highs and is adjusting to the reality of subdued earnings. Company results for the January-March 2015 quarter, so far, have not been encouraging, though analysts expect things to improve by the second half of the current financial year. The street expects earnings to get better with the improvement in business environment and pick-up in economic activity. Put differently, in the medium term, market movement will largely depend on the pace of expansion in the economy, which, to a large extent, will be determined by government action and implementation of ideas such as increasing capital expenditure.

High degree of volatility, lack of participation by retail investors and range bound zone for NIFTY and SENSEX at the most of the times; are additional risk which can be a cause of concerns for the Company.

HUMAN RESOURCES

The Company recognizes that its success is deeply embedded in the success of its human capital. During 2014-2015, the Company continued to strengthen its HR processes in line with its objective of creating an inspired workforce. The employee engagement initiatives included placing greater emphasis on learning and development, launching leadership development programme, introducing internal communication, providing opportunities to staff to seek inspirational roles through internal job postings, streamlining the Performance Management System, making the compensation structure more competitive and streamlining the performance-link rewards and incentives.

CORPORATE SUSTAINABILITY AND SOCIAL RESPONSIBILITY

The Company constantly strives to meet and exceed expectations in terms of the quality of its business and services. The Company commits itself to ethical and sustainable operation and development of all business activities according to responsible care and its own code of conduct. Corporate Social Responsibility is an integral part of the Company's philosophy and participates in activities in the area of education and health.

The Compliance Department of the Company is continued to play a pivotal role in ensuring implementation of compliance functions in accordance with the directives issued by regulators, the Company's Board of Directors and the Company's Compliance Policy. The Audit Committee of the Board reviews the performance of the Compliance Department and the status of compliance with regulatory/internal guidelines on a periodic basis.

New Instructions/Guidelines issued by the regulatory authorities were disseminated across the Company to ensure that the business and functional units operate within the boundaries set by regulators and that compliance risks are suitably monitored and mitigated in course of their activities and processes. New products and process launched during the year were subjected to scrutiny from the Compliance Standpoint and proposals of financial services were screened from risk control prospective.

The Company has complied with all requirements of regulatory authorities. No penalties/strictures were imposed on the Company by stock exchanges or SEBI or any statutory authority on any matter related to capital market during the last three years.
