MANAGEMENT DISCUSSION AND ANALYSIS REPORT

INDUSTRY STRUCTURE & DEVELOPMENTS

Worldwide Gelatin consumption forecast to reach new heights, fuelled by aging population, focus on healthcare and increasing demand from end-use industries such as food & beverage, nutraceutical and pharmaceuticals. Additionally, rising standards of living, shift to vegetarian gelatin options, easy affordability and greater awareness in emerging economies such as China and India will promote further growth. However, despite the bright outlook, consumer concerns related to the safety and social aspects of using products derived from animal body parts continue to haunt industry prospects.

Gelatin represents an omnipresent element in foods, drugs, and supplements used as a thickener, plasticizer, emulsifier, foaming agent, moisture retainer, texture enhancer, and binding agent. As a rich source of protein, Gelatin finds application in numerous end-use sectors including pharmaceuticals, food and beverage, photographic supplies, cosmetics, explosives, electroplating, dyes, papermaking and printing, among others. Rising standards of living, easier access to healthcare services, increase in disposable incomes and rapidly aging world population represent key factors driving growth in demand for gelatin. Improving lifestyles in developing economies of India and China are also expected to promote market expansion. Lack of availability of competitive substitutes in the market makes gelatin one of the most indispensable feedstock in various end-use industries.

India ranks topmost in the world in livestock holding and has the potential to utilize slaughterhouse by products to partly meet the growing requirement of animal feeds.

OUTLOOK ON OPPORTUNITIES

The rapid growth of the Pharmaceutical, and Health & Nutrition market in India and across the world, has resulted in stable demand for Gelatin. Your company shall seize this opportunity and increase its market spread.

The Pharma industry meets around 70% of the Country's demand for bulk drugs, drug intermediates, pharmaceutical formulations, chemicals, tablets, capsules, orals & injectables. The domestic pharmaceutical market is expected

to register a strong double digit growth of 15% on the back of increasing sales of generic medicines, continued growth in chronic therapies and a greater penetration in rural markets.

Your Company is also planning to optimum utilization of the Capacities available in the Plant from next year.

OUTLOOK ON THREATS, RISKS AND CONCERNS

With the increasing demand for Gelatin in India, the last few years have witnessed an unprecedented shortage for its key raw material i.e. crushed Bone. The impact of the global economic recession and the export of Bone/meat from the country resulted in a lower availability of crushed bones in India. This resulted in a steep increase in the raw material costs.

The meat industry is now on a recovery path with the demand in the export as well as domestic markets picking up and we expect the raw material shortage situation to ease in the near term.

NOTE -22 - NOTES ON ACCOUNTS:**A. Significant Accounting Policies and Practices:****1. Accounting Convention and Concepts:**

- a. The Financial Statements of the Company have been prepared in accordance with generally accepted accounting principles in India (Indian GAAP). The Company has prepared these financial statements to comply in all material respects with the accounting standards notified under section 133 of the Companies Act, 2013, read together with paragraph 7 of the Companies (Accounts) Rules, 2014. The financial statements have been prepared on an accrual basis and under the historical cost convention. The accounting policies adopted in the preparation of financial statements are consistent with those of previous year.
- b. The Company generally follows mercantile system of accounting and recognizes significant items of income and expenditure on accrual basis.

2. Use of Estimates:

The preparation of financial statements are in conformity with generally accepted accounting principles require estimates and assumptions to be made that affect the reported amount of assets and liabilities on the date of the financial statement and the reported amount of revenues and expenses during the year. Difference between the actual results and estimates are recognized in the period in which the results are known / materialized. Although these estimates are based upon management's best knowledge of current events and actions, actual results could differ from these estimates.

3. Tangible Fixed Assets and capital work in progress:

Fixed assets are stated at cost, less accumulated depreciation and impairment losses if any. Cost comprises the purchase

price and any attributable cost of bringing the asset to its working condition for its intended use. Capital work in progress comprises cost of tangible fixed assets not ready for intended use at the balance sheet date.

Subsequent expenditure related to an item of fixed asset is added to its book value only if it increases the future benefits from the existing asset beyond its previously assessed standard of performance. All other expenses on existing fixed assets, including day to day repair and maintenance expenditure and cost of replacing parts, are charged to the statement of profit and loss for the period during which such expenses are incurred.

Gains or losses arising from de-recognition of fixed assets are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the statement of profit and loss when the asset is derecognized.

4. Depreciation on tangible fixed assets:

Depreciation on fixed assets is provided using straight line method based on rates specified in Schedule II of the Companies Act, 2013.

Till the year ended March 31, 2014, Schedule XIV of the Companies Act, 1956, prescribed requirements concerning depreciation on fixed assets. From the financial year 2014-15, Schedule XIV has been replaced by Schedule II of the Companies Act, 2013. The applicability of Schedule II has resulted in the following changes related to depreciation of fixed assets.

a. Useful Lives / Depreciation Rates:

Till the year ended March 31, 2014, depreciation rates prescribed under Schedule XIV were treated as minimum rates and the company was not allowed to charge depreciation at lower rates even if such lower rates were justified

by the estimated useful life of the asset. Schedule II to the Companies Act 2013, prescribes useful lives for fixed assets which, in many cases, are different from lives prescribed under the erstwhile Schedule XIV. However, Schedule II allows companies to use higher / lower useful lives and residual values if such useful lives and residual values can be technically supported and justification for difference is disclosed in the financial statements.

The management believes that the useful lives / depreciation rates specified under Schedule II of the Companies Act, 2013 would fairly reflect the estimate of the useful lives of the existing fixed assets and hence would comply with the provisions of Schedule II commencing from April 1, 2014.

b. Depreciation on assets costing less than Rs.5000/- :

Till the year ended March 31, 2014, to comply with the requirements of Schedule XIV to the Companies Act, 1956, the company was charging 100% depreciation on assets costing less than Rs.5000/- in the year of purchase. However, Schedule II to the Companies Act, 2013, applicable from the financial year 2014-15, does not recognize such practice. Hence, to comply with the requirement of Schedule II to the Companies Act, 2013, the company has changed the accounting policy for depreciation of assets costing less than Rs.5000/- . The management has decided to apply the revised accounting policy prospectively from the accounting period commencing from April 1, 2014. The change in the accounting for depreciation of assets costing less than Rs.5000/- did not have any material impact on the financial statements of the company for the financial year 2015-16.

5. Inventories:

Finished products are valued at lower of cost or net realizable value, stock in

process, raw material, stores and spares at cost and these are in conformity with Accounting Standards.

6. Sales / Revenue:

Sale of goods is recognized at the point of dispatch to customers. The Excise Duty collected on sales is added in Sales.

7. Excise Duty:

Excise Duty on manufactured goods is accounted for at the time of their clearance from the factory. The above policy however, has no impact on the operating results of the Company.

8. Retirement Benefits:

Company's contribution to Provident Fund are charged to Statement of Profit & Loss. Gratuity and Leave encashment benefits at the time of retirement are charged to Profit & Loss Account on the basis of actual payment.

9. Contingent Liabilities:

Contingent liabilities are determined on the basis of available information and are disclosed by way of other notes given herein below.

B. Other Notes:

1. For details related to Contingent liabilities refer Note no.10.

The non-provision of this duty will not affect the profitability or otherwise of the year, being revenue neutral.

b. As per amended provisions, (1) Dues of excise duty on clearance of finished goods wherever applicable is payable in monthly installments w. e. from 01.02.2004 and (2) Statutory records under Excise Rules are dispensed with effect from 01.07.2000. The Company has acted on these amendments.
