3. Management Discussions and analysis Report –

(i) Financial Performance:

Your Company has posted a net profit after tax of Rs.428.22 lakhs during the current year as compared to the net profit after tax of Rs.787.94 lakhs during the previous year. The drop in profit level was mainly due to volatility in the markets especially during the last 2 quarters coupled with the global uncertainties leading to the downward trend in the valuation of stocks.

(ii) Trend in Indian Economy & Financial Markets:

The uncertainties in the global market continued to haunt the financial markets all over the world. Though the Indian economy recovered during the last year, it could not sustain the same momentum during the current financial year due to variety of factors. The increasing inflation consequent to the sudden jump in the price of crude oil and industrial and agricultural inputs and the deficit governance at the Macro level in the Government levels created uncertainties especially for the foreign investors who turned cautious leading to a slowdown in fresh investments. The GDP though posted an increase in excess of 8.5% (thanks to the stimulus package) during the previous year as against the projected growth of 8% gradually came down marking slow down in the economy. Agricultural and industrial sector though maintained the previous year's levels could not keep up the momentum for a sustained growth level during the current year.

The capital market witnessed an increase in the trading volumes in the beginning of the year and gradually started sliding in terms of volumes and foreign investments resulting in lower valuations and slump in the market index. The termination of the stimulus package by the Government of India, increase in the inflation which went up by 17% leading to hike in lending rates and the inability to bring down the food inflation cumulatively contributed to uncertainties in the capital market and as a result the market witnessed a lower turnover and reduced growth during the last two quarters of the financial year.

(iii) Business Review :

As a result of the uncertainties that prevailed during the year under report, your company also could not sustain the growth momentum achieved during the previous year. Notwithstanding the same, your company yet managed to post a positive result as reflected in the financial statement for the year under report. Your associate company, Antique Finance Private Limited also managed to achieve commendable results and thus continued to maintain the positive trend in their working results.

(iv) Opportunities and Threats:

The Government of India has taken measures to reduce the food inflation on a sustained basis which appears to be yielding some results during the ensuing year although the volatility in the oil price has been a major cause of worry globally. The economic slump faced by some of the European countries coupled with political uncertainties in the neighborhood countries have created an air of uncertainty in the foreign investors who have turned cautious in their investments in the Indian capital market. However, the silver lining has been the continuing improved performance by some of the segments in the Indian corporate sector like, automobiles, banking, health care and retail distribution of goods and services that should contribute for better valuations and market capitalizations during the ensuing year also.

As stated already, the capital market activities in which your company predominantly is engaged could face aberrations depending on domestic and global trend and hence the performance of your company will be dependent on such factors in the ensuing year also.

(v) Segment-wise – Product-wise reporting:

Your company is mainly engaged in the business of investment activities and all other activities are revolving around the main activity and as such there are no separate reportable segments.

(vi) Outlook:

Your company will spare no efforts to improve the profitability and the shareholders' wealth though there is a heavy dependency on the market trend in the equity segment of the capital market. Your company expects the general market conditions to improve and would strive hard to take advantage of the situation and also when opportunities arise.

(vii) Risks and Concerns:

Your company's activities which are essentially in the capital market segments is fraught with inherent risk and the downward trend in the growth of global economy resulted in significant erosion in the value of the investment. While all efforts will be made to safeguard further erosion, your company will exercise due caution and care to ensure that all these concerns are addressed while taking future investment decisions.

(viii) Internal Control Systems and their Adequacy:

Company has in place adequate interest control measures. The requisite Management Information System is already in place to take corrective measures when required.

(ix) Human Resources:

Your company has adequate trained professionals to manage the affairs of the company in the most prudent manner.

(x) Cautionary Statement:

Actual results may differ materially from those expressed in the statements as Government policies local political and economic development, etc.
