MANAGEMENT DISCUSSION AND ANALYSIS

INDUSTRY STRUCTURE & DEVELOPMENTS

Tourism plays an important role for a developing country like India which is growing. The value-added effect of tourism is increasing. Tourism's sustainability depends upon vast scope by convergence of landscapes with financescapes, technoscapes and mediascapes. Tourism facilitates in generating more foreign exchange in India. This industry employs a large number of people, both skilled and unskilled. Hotel, travel agencies, transport including airlines benefit a lot from this industry. Tourism paves the way for national integration. Further, it promotes cultural activities and the traditional handicrafts sector. The tourist gets an insight into the rich and diverse cultural heritage of India. India is one of the popular tourism destinations in Asia. India offers a wide array of places to see and things to do.

The Indian hospitality industry has emerged as one of the key industries driving the growth of the services sector and, thereby, the Indian economy. At the close of FY17-18, the country saw macroeconomic stability owing to a decline in inflation, fiscal deficit and current account deficit. Going forward, the Union Budget FY18 has identified some major pillars that will support economic growth for the country that includes tax reforms, fiscal discipline, investment in infrastructure, ease of doing business, agriculture and farmer welfare, rural sector, social sector, education and job creation. This is said to have translated into an overall pick up in the economic activities, thereby having a positive impact on the demand for hotels industry in the country. Going forward, CARE expects the industry to register an overall healthy growth in revenue on back of economic growth and consistently growing middle class along with increasing disposable income. There are various other key factors that drive the market, including India's attractiveness as a medical tourism destination; steadily growing Meetings, Incentives, Conferences and Exhibitions (MICE) segment; and, an increasing fondness among millennial to travel.

Further the Indian travel and tourism industry is likely to see a spurt in growth this year on the back of new visa reforms, according to a report by the World Travel and Tourism Council. India's travel and tourism economy is poised to grow 7.5% in last year, exceeding the 6.9% growth that the global forum has predicted for the South Asian region. India has an excellent opportunity to benefit from visa reforms and infrastructure improvements under the government new avenues," president and chief executive of WTTC, said in an one interview, adding that India's projected tourism growth was the highest for any major economy. India continues to be among the world's fastest growing major economies, despite temporary hiccups caused by demonetisation and goods and services tax (GST) implementation. GST implementation may help reduce internal barriers to trade, enhance efficiency, and improve tax compliance over the medium term. The Government of India's continued emphasis on wide-ranging reforms is aimed at improving productivity and incentivising private investments. Going forward, these initiatives will be among the prominent growth enablers for India. Lowering constraints on job creation by liberalising labour market norms, reducing infrastructure bottlenecks and strengthening the educational framework are key enablers to drive India's inclusive growth.

Indian economy though will continue to witness gradual improvement, amid increasing output. Other commodity importing economies could also witness healthy traction in this period.

Global economic growth is likely to be healthy in 2018 and 2019, despite unpredictable headwinds. As the world's second largest economy, China, undergoes transformation from being investment-driven to being driven by private consumption; and from industries to services, its growth could witness slight moderation.

OPPORTUNITIES AND FUTURE OUTLOOK

Opportunities :

Domestic tourist arrivals (DTA) are the tourists within India who travel to different places both for business and leisure purposes. The high growth in the domestic tourist arrivals can be attributed to the, rising disposable income, popularizing weekend culture, the eagerness to spend amongst the youth, government campaigns, introduction of low-cost airline services, increased trade and booming service sector.

Foreign Demand, on the other hand, has remained stable, contributing 20.6% between the Business, Leisure and Tour Groups segments as per Federation of Hotels & Restaurant Associations of India (FHRAI) and HVS South Asia. Going forward, with the rise in spending by domestic travellers, domestic demand is also likely to grow at a healthy pace

Over the next decade ending 2028, investments in the sector are expected to grow at a compounded annual growth rate (CAGR) of 6.7% to USD 85.2 billion. Foreign tourist arrivals as well as the proportion of domestic travellers grew significantly during financial year 2017 – 18. According to the Ministry of Tourism, India's foreign tourist arrivals grew 15.6% over the preceding year to 101.77 lakh tourists.

Rising influx of foreign visitors via the e-visa facility was a key growth enabler. Implementation of a host of measures like extension of e-visa facility to 173 countries from 161 countries earlier, increase in the window for application of e-visa from 30 days to 120 days, increase in duration of stay on e-visa from 30 days to 60 days and allowing of double entry on e-tourist and e-business visa and triple entry on e-medical visa propelled this segment significantly.

These developments reflect the improving prospects and start of the upcycle and will bolster prospects of the Travel and Tourism sector in India. The Company is looking at various revenue enhancement and cost containment measures so that it can take advantage of the upswing, as the business and economy recovers and the demand supply imbalance gets corrected.

Future Outlook :

Online travel booking and hotel selection websites, apps that help travellers plan their entire tour, and similar platforms are gaining prominence among customers. From booking flight tickets to selecting the hotels and planning the entire tour, these platforms deliver benefits like convenience and best deals to customers. A new generation of passionate, millennial travellers and increasing competitive intensity are changing the rules of the industry rapidly. Hotels now design destination-specific experiences to enhance customer delight.

Enhanced use of technologies are acting as the key differentiators for hotels. Hotels are also looking to provide apps that will allow guests to adjust their room lighting, temperature and other features from their smartphones. Most leading hotels are looking to make their rooms tech-savvy to drive customer convenience and experiences.

Over the recent years, the term customer-centricity has assumed a whole new meaning. Hotels are doing everything they can to improve customer experiences and delight their customers. These moves are aimed not just at customer acquisition, but also to achieve higher customer loyalty.

With a positive outlook of the Indian hospitality sector your Company is well poised to make its presence felt by catering to some of the growing requirements of the modern traveler and benefit from the growing prospects of hospitality business in India.

THREATS, RISKS & CONCERNS

Major issues for most of the industries in India are related to multiple windows of clearances, even for the hotel industry. The process of identifying new land parcels as per the requirement for hotels is a tedious task in India. Compared to international standards, where land costs accounts for 15-20% of the total project cost, in India this is often in the range of 40-50%. As a remedy to the problem, hoteliers have started mixed-use development projects comprising of hospitality, commercial, residential and retail components.

Indian hotels face the continual challenge of shortage of trained employees, especially at the manager and supervisor levels. Most of the companies are falling short of skilled employees for their hotels. Major reason for this shortage is absence of organized training and educational institutes for development of skilled employees like in aviation and other service sectors. Retaining the workforce even through training and development in the hotel industry is a tedious task as attrition levels are too high. One of the reasons for this is unattractive wage packages. Though the industry has been growing at a fast pace, hotel management graduates opt to join other sectors like aviation and catering services where they are paid higher.

Performance clause in management contracts is one of the most debated clauses between owners and operators of the hotel. It is most often the only clause that provides a window for an owner to terminate the management contract with the brand. However, unlike in other industries where a client has the choice to reject/ discontinue a product/ service if he/she is dissatisfied with the performance, hotel owners do not enjoy such a privilege and in turn have to pay a hefty termination fee to disengage with the operator.

A significant portion of your Company's revenues are realised from its Indian operations, making it susceptible to domestic, socio-political and economic conditions. Moreover, within India, the operations and earnings are primarily concentrated in South India with key properties located in Chennai. The industry in general has a high operating leverage, which has further increased with increased staff costs and cost of light, power and fuel. However, your Company has been able to earn higher revenues with acceptance of its products and improved RevPAR (revenue per available room) in the markets it operates in.

In spite of the above the success of your company will be dependent upon its ability to compete in areas such as Average Room Rent, superiority of accommodation, brand, premium services, location importance and to a lesser extent, the quality and scope of other amenities. These amenities include food and beverage facilities, along with cost-reduction ability.

INTERNAL CONTROL SYSTEMS AND ADEQUACY

Your company has in place an adequate internal control system. The internal controls are designed to provide reasonable assurance regarding the effectiveness and efficiency of

operations, the adequacy of safeguards for assets, the reliability of financial controls, and compliance with applicable laws and regulations, protecting the assets from unauthorized use of losses. The internal controls are supplemented by the programme of internal audit.

ANNEXURE 'B' TO INDEPENDENT AUDITORS' REPORT

(referred to in paragraph 2 under the heading 'Report on Other Legal & Regulatory Requirements' of our report of even date to the Ind AS financial statements of the Company for the year ended 31st March, 2018)

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of M/s. Savera Industries Limited ("the Company") as of March 31, 2018 in conjunction with our audit of the Ind AS financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Board of Directors of the Company is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditor's Responsibility

Our responsibility is to express an opinion on the internal financial controls over financial reporting of the Company based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") issued by the Institute of Chartered Accountants of India and the Standards on Auditing prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgments, including the assessment of the risks of material misstatement of the Ind AS financial statements, whether due to fraud or error. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls Over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of Ind AS financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that:

- 1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;
- 2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of Ind AS financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and
- 3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2018, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

(v) There were no significant reconciliation between cash flows prepared under IGAAP and those prepared under Ind AS.

(vi) Exemption availed on first time adoption of Ind AS 101 as at transition date:

- As per para D7AA of Ind AS 101, Property, Plant and Equipments and Intangible assets were carried in the statement of financial position prepared in accordance with previous GAAP on 31st March, 2016. The Company has elected to regard such carrying values as deemed cost at the date of transition.
- As per para D19B of Ind AS 101, Investment in equity instruments can be measured at fair value through other comprehensive income. The Company has elected to fair value through other comprehensive income its equity instruments.

(vii) Notes to Clause 1(i):

1. Reversal of Proposed Dividend:

Under IGAAP, the proposed dividend was recognized as liability for the period to which it relates. Under Ind AS, dividend is recognized in the period in which obligation to pay is established. Accordingly, the proposed dividend liability recognized in the year 2015-16 amounting to Rs. 43.07 lakhs (including dividend distribution tax) has been reversed and the same recognized as

an apportionment to in Other Equity of the year 2016-17 i.e. the year in which the obligation to pay was established.

2. Prior Period Adjustments:

Under IGAAP, the prior period errors and omissions were rectified prospectively by giving effect to the statement of profit and loss and by separately disclosing the nature and amount as prior period item, whereas Ind AS 8 requires retrospective adjustment of material prior period errors by restating the comparative amounts for periods presented. Accordingly, the Company has reversed the excess provision created prior to 01st April 2016 on account of income tax amounting to ₹ 8.42 lakhs by adjusting respective assets, liabilities and equity as on 01st April 2016.

3. Fair Value Adjustments of Equity Instruments:

As per IGAAP, long-term investments are usually carried at cost, however if there is decline in the value of the investments (other than temporary) such decline is recognized and carrying amount of the investments is reduced to that extent. Under Ind AS 109, the equity instruments are measured at fair value through Other Comprehensive Income. Accordingly, the gain on fair valuation of equity instruments on 01st April 2016 amounting to ₹ 145.19 lakhs and ₹ 20.16 lakhs as on 31st March 2017 is recognized under Other Comprehensive Income of Other Equity. The tax effect on the net gain recognized in OCI, amounting to ₹ 6.66 lakhs is considered as charge to OCI.

4. Fair Value Adjustment of Deposits:

As per IGAAP, the rental deposits were carried at historical cost until the completion of tenure and were adjusted for any credit losses at the time of receipt. As per Ind AS 109, deposits being classified as financial assets are to be initially recognized at fair value by discounting the cash flows over the expected life using effective interest rate and are subsequently measured at amortized cost. Accordingly, Fair value loss as on 01st April 2016 amounting to ₹ 89.73 lakhs is adjusted to respective assets, liabilities and equity as on 01st April 2016 and Fair value Gain on account of amortization as on 31st March 2017 amounting to ₹ 48.29 lakhs is recognized in Statement of Profit and Loss.

5. Deferred Tax effect on temporary differences under Ind AS:

Under IGAAP deferred tax was accounted using income approach, which focuses on timing differences between taxable profits and accounting profits for the period. Ind AS 12 requires entities to account for deferred taxes using the Balance Sheet approach, which focus on temporary differences between the carrying amount of an asset or liability in the balance sheet and its tax base. The application of Ind AS has resulted in an additional deferred tax liability of ₹ 62.45 lakhs as on 01st April 2016 and reversal of deferred tax liability of ₹ 1.52 lakhs as on 31st March 2017.

6. Gain/Loss on Net Defined Benefit Liability/Asset:

As per IGAAP, gains and losses on remeasurement of net defined benefit liability/asset are recognized in the Statement of Profit and Loss, whereas under Ind AS the same has been recognized in Other Comprehensive Income by accumulating in a separate component of equity. Accumulated loss (excluding tax) on remeasurement of net defined benefit liability amounting to ₹ 13.60 lakhs as on 31st March 2017 have been transferred to a separate component of Equity. The tax effect on the net gain recognized in OCI, amounting to ₹ 4.50 lakhs is considered as charge to OCI.

7. Gratuity Expense:

The cost of the defined benefit plans and the present value of the defined benefit obligation are based on actuarial valuation using the projected unit credit method. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases and mortality rates. Due to the complexities involved in the valuation and its long term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. Accordingly, the effect of such changes in assumptions as on 01st April 2016 resulted in additional provision of ₹ 15.85 lakhs and reversal of excess provision as on 31st March 2017 ₹ 25.85 lakhs.

8. Depreciation on Revalued Asset:

An amount equivalent to depreciation on revalued portion of an asset is transferred from revaluation reserve under IGAAP. Under Ind AS since the company has opted the option of deemed cost on the date of transition i.e. as on 01st April 2016, the depreciation on revalued portion is to be charged to Statement of Profit and Loss. Consequently, an amount of ₹ 4.57 lakhs being depreciation on the revalued portion is charged to Statement of Profit and Loss.

(viii) Others:

Under IGAAP, actuarial gains and losses related to the defined benefit schemes for Gratuity and liabilities towards employee leave encashment were recognised in the statement of profit or loss. Under Ind AS, the actuarial gains and losses form part of re-measurement of the net defined benefit liability / asset which is recognised in the Other Comprehensive Income (OCI). Consequently, the tax effect of the same has also been recognised in OCI instead of statement of profit or loss.
