Item No. 9

The Board of Directors is of the opinion that the Company requires additional funds to meet with the needs of growing business, in addition to the funds raised internally and through debt from banks and financial institutions/NBFC. While it is expected that the internal generation of funds would partially finance the need for capital and debt raising would be another source of funds, it is thought prudent for the Company to have enabling approvals to raise a part of the funding requirements for the said purposes as well as for such other corporate purposes as may be permitted under applicable laws through the issue of Securities as defined in the resolution from the capital markets.

Section 62(1)(c) of the Companies Act, 2013 ("Act") provides that, inter-alia, such further Securities may be offered to any

STEEL STRIPS WHEELS LIMITED

persons whether or not such persons are existing holders of Equity Shares of the Company as on the date of offer, by way of a Special Resolution passed to that effect by the Company in General Meeting. Further, as per Regulation 82 of the Securities and Exchange Board of India (Issue of Capital and Disclosure Requirements) Regulations, 2009 ("SEBI Regulation") it is necessary to obtain approval of Shareholders through Special Resolution for issuing Securities through Qualified Institutional Placement ("QIP"). Accordingly, consent of the Shareholders is being sought, pursuant to the provisions of Section 62(1)(c) and other applicable provisions of the Act, SEBI Regulation and Listing Agreement and such other approvals as may be necessary to issue and allot Securities as stated in the Special Resolution.

The securities issued pursuant to the QIP Issue shall rank pari passu in all respects with the existing securities of the Company. These Securities will be allotted only to Qualified Institutional Buyers (QIBs) as per the SEBI Regulations and there will be no issue to retail individual investors and existing retail shareholders. The resolution proposed is an enabling resolution and the exact price, proportion and timing of the issue of the securities will be decided by the Board based on an analysis of the specific requirements after consulting all concerned. Therefore the proposal seeks to confer upon the Board the absolute discretion to determine the terms of issue in consultation with the Lead Managers to the Issue.

As per Chapter VIII of the SEBI Regulations, an issue of securities on QIP basis shall be made at a price not less than the average of the weekly high and low of the closing prices of the related shares quoted on the stock exchange during the two weeks preceding the "relevant date". The Board may, at its absolute discretion, issue Equity Shares at a discount of not more than 5 percent or such other discount as may be permitted under applicable regulations to the 'floor price' as determined in terms of the SEBI Regulations, subject to Section 53 of the Act.

As the pricing of the offer cannot be decided except at a later stage, it is not possible to state the price of shares to be issued. However, the same would be in accordance with the provisions of the SEBI Regulations, the Companies Act, 2013, or any other guidelines/regulations/consents as may be applicable or required.

The Stock Exchange for the pricing purpose is the BSE Limited/National Stock Exchange of India Limited.

The above mentioned special resolution has a validity period of 12 months before which allotments under the authority of said resolution should be completed.

The Special Resolution also seeks to give the Board the powers to issue securities in one or more tranche or tranches, at such time or times, at such price or prices and to such QIB as the Board/Committee of the Board in its absolute discretion deem fit. The detailed terms and conditions for the issue(s)/offering(s) will be determined by the Board or its committee in its sole discretion in consultation with the advisors, lead managers, underwriters and such other authority or authorities as may be necessary considering the prevailing market conditions and in accordance with the applicable provisions of law and other relevant factors.

As and when the Board / Committee of the Board does take a decision on matters on which it has the discretion, necessary disclosures will be made to the stock exchanges as may be required under the provisions of the Listing Agreement.

In connection with the proposed issue of Securities, the Company is required, inter alia, to prepare various documentations and execute various agreements. Accordingly, it is proposed to authorize the Board/committee of the Board (including certain directors and / or officers of the Company) to negotiate, finalize and execute such documents and agreements as may be required and do all such acts, deeds and things in this regard for and on behalf of the Company.

The Special Resolution, if passed, will have the effect of allowing the Board to offer issue and allot securities to the Investors, who may or may not be the existing shareholders of the Company.

The Board recommends the resolution mentioned at item No.9 of the accompanying Notice, for the approval of Shareholders of the Company as a Special Resolution.

None of the Directors or Key Managerial Personnel (KMP) of the company or their respective relatives, to whom the resolution relates, are concerned or interested, financially or otherwise in the Resolution mentioned at item no.9 of the accompanying Notice.

Discussion & Analysis

Indian economy has completed its first year under the new government and the performance of the economy is clearly showing that the initiatives taken by government are bringing in success in lifting the GDP growth. The economy has started to roll and the momentum pickup is underway which will gather steam in coming quarters. The Indian economy grew by 7.3% in FY 14-15 and the momentum of the growth will gather pace with the initiative taken by the government towards infrastructure, FDI and project clearances. We expect that Indian economic growth will continue to be strong and become the fastest growing economy in the world in FY 15-16. The GDP growth vectors are indicating that the growth is broad based and we will continue to see the improvement in respective sectors of manufacturing, mining & services. The global environment is still uncertain with the support coming from EU, US & Japan and to counter it China is continuing to make structural adjustment and balance the world economic matrix. The improvement is underway and the quality of growth is indicating that the growth is slower than expected but indeed broad based to benefit wider section of society.

The basic assumptions taken by us for FY 15-16 are listed below.

1. The Indian economy has come a long way from what it was doing in last 5 years and has all the ingredients to grow at amongst the fastest pace in the world for next 5 years. The stable government has ensured that the political logjam will be kept to minimum and strategic decisions can be passed to implement them on ground. Capex cycle is still weak and it takes 6-9 months to build confidence to go ahead with the capex, which by now is coming to reality and will yield better throughput in FY 15-16.
2. The Government is having a great focus on "MAKE IN INDIA" concept which will kick start large project implementation of capacity expansion as well as new investment from global players to set up manufacturing setups in India. This activity will surely add a lot of delta to the GDP growth. The ground breaking is already in progress which is getting reflected in the overall growth archived in last fiscal. We expect the similar momentum to continue giving support to GDP factor in FY 15-16.

Auto Industry & Segment Analysis

The auto industry reversed some of the lost growth in the second half of the year to close the year with some respectable number. The second half was helped by policy initiatives by the government along with easing in the interest rates and the fuel prices across the globe. The growth momentum was carried over to all segments of the auto industry barring the tractor segment which was hit due to acute shortfall in rainfall and a sharp fall in cash crops. The highlight of the year was a very good growth pickup in Commercial vehicles sales in second half which indicates that green shoots have emerged and now need nurturing to continue with them.

The passenger car market grew 4.28% for the FY 14-15 after de-growing for almost 7% in first half of the year indicating the momentum was very strong and the similar momentum is visible in FY 15-16. There is a lot of churn in models being launched by the auto makers to keep the consumers engaged and bringing the best value for money for the end user. The Segment is expected to grow very close to double digit growth in FY 15-16 bringing in some cheer for the segment players.

We expect the PV industry to register healthy double digit volume growth over the next three years as we factor a decline in car ownership costs, benign inflation, improving disposable income, existing pent-up demand, stable pricing environment, trickle down effect of economic revival and demand boosting factors like implementation of the 7th Pay Commission's recommendation

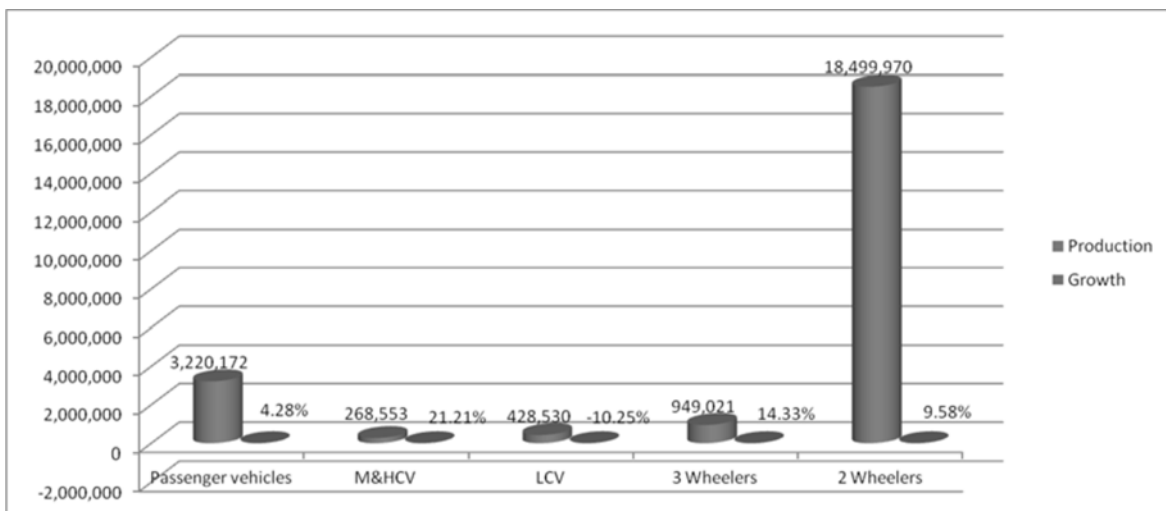

The CV segment ended with flat growth in FY 14-15 after reporting a 10% de-growth in first 6 months. The sector has shifted gears on the back of opening of mining activity and a lot of project clearances on infrastructure front. We expect that the momentum is very strong and the segment can report a growth of 10-12% in FY 15-16 with a lot of mining activity yet to open after ban and simultaneously the thrust on infrastructure by the government will help gain ground for the segment. Large MNC players are working to make India as an export hub towards EU as well as other Asian countries from India.

Our study of M&HCV tonnage capacity in the system along with mining sector headwinds and related tipper demand crash indicate a correction of haulage overcapacity and gradual recovery in tipper segment, which augurs well for the M&HCV segment. Average fleet utilisation (~75%) and freighter profitability has improved meaningfully in the last 6-9 months. Current shift to higher tonnage vehicle and fast replacement demand is expected to continue and is driven by poor operating economics of old trucks and lower tonnage vehicle. Replacement demand is also aided by the restriction imposed by large customers and enforcement of entry norms in New Delhi (population of 60k trucks) on vehicle age to improve the supply chain efficiency and city's air quality respectively.

The two wheeler market also had a good run in FY 14-15 with a growth of 9% but this growth got a little setback from rural spending that slowed considerably due to lower rainfall impacting the spending sentiment. The Bike sales had a rough patch in this year which is recovering slowly and is expected to heal in current year with normal monsoon predicted so far. We expect that this segment will report a 10% growth in FY 15-16 which will be in line with last year.

The export segment for all the vehicle segment is a great opportunity for all the players, as India is increasingly becoming conscious of the factor of Quality and

global auto makers are increasing their investment in India to make it an AUTO manufacturing hub to supply to the entire world due to various advantageous they are being offered by the Indian government. The "EASE TO BUSINESS" theme will also help bringing a lot of large players into India to expand or setup their franchise in the country.

Sectoral Outlook

Passenger Vehicle Segment:

We expect auto industry to consolidate further in FY 15-16 and volume growth to pick up meaningfully in FY17 backed by

- decline in ownership cost (fuel price drop and interest cost reduction),
- benign inflation,
- pick-up in economic activity
- big thrust on infrastructure investment.

We estimate these factors to drive domestic passenger vehicle and commercial vehicle volume CAGR of 14% and 19% over the next three years.

Commercial Vehicle Segment:

We expect M&HCV (goods) volume and tonnage to grow at CAGR of 15% over the next three years due to infrastructure spending push, better freighter profitability, GST-led warehousing rejig, pick-up in construction trucks demand (coal/bauxite mining and RMC trucks), obsolescence of old trucks due to rising entry restrictions in major cities and customer-driven switch to younger fleet. We also expect buses volume to grow at CAGR of 15% on renewed focus on urban transportation by entire country. Current shift to higher tonnage vehicle and fast replacement demand is expected to continue and is driven by poor operating economics of old trucks and lower tonnage vehicle. Replacement demand is also aided by the restriction imposed by large customers and enforcement of entry norms in New Delhi (population of 60k trucks) on vehicle age to improve the supply chain efficiency and city's air quality respectively.

Tractor Segment

Top eight states of India contributing 75% of the domestic tractor volume, is down by more than 25% since the last seven months cumulatively, impacted by hail storm, deficient monsoon and lower farm profitability on agri commodity price drop. Since all these uncertain events bunched up in FY15 and impacted industry tractor volume. Early signs of normal monsoon will most likely to revive the demand from 2HFY16. Further, revival of non-farm usage segment and replacement cycle (purchased in FY08-10) is likely to bring volume back with a vengeance in FY17. We expect 10% tractor segment CAGR for all the players for coming 3 three years.

Export Outlook

Total merchandise export of India contracted 1% YoY to \$310bn as compared to \$312bn in FY 2013-2014. The contraction came on the back of cross currency headwinds and the global moderation of growth. The government is keeping an ambitious target to become global hub for manufacturing in next 5 years. The country is finding newer avenues to increase its exports markets and competitiveness under new global currency environment which may take little more time to adjust. As the global major currencies are depreciating against the rupee it will hold the export growth for some more time till India adjusts itself to the new global norm. We expect that government is focused on making India a competitive place to manufacture and will ensure enough incentive under "MAKE IN INDIA" plan to reignite the export story of the country. The government in its five-yearly foreign trade policy announced on 1 April revamped the export subsidy regime and indicated its intention to phase out subsidies for overseas shipments in compliance with rules of the World Trade Organization (WTO) while setting an ambitious export target of \$900

STEEL STRIPS WHEELS LIMITED

billion to be met by 2019-20. If the target is met, India would grab a share of 3.5% of world exports, up from 2% in 2013-14.

Auto exports sales grew 15% in FY 14-15, better than the rest of product categories and we expect the same to continue in current year as well. Domestic car makers are making strong impression in emerging markets and are gaining strong foothold in those markets.

The passenger car segment saw an export growth of 4% on the back of product distribution mix of certain car makers and we expect the same going in for all cars major with demand picking up from emerging and developed markets for Indian cars. The CV segment grew by 11% with truck makers availing the low cost advantage of India and shipping Indian made trucks to global shores. In particular the M&HCV segment grew by 28% and this is definitely an encouraging sign of quality benchmark being established in our export markets.

Your company saw a degrowth of 7% in export volumes. Our export stood at 1.42Mn wheel rims in 2014-15 as against 1.53Mn wheel rims in FY2013-14. The degrowth primarily came due to strong currency headwinds from across the European continent creating fierce competition. To mitigate the impact your company is working aggressively to expand its reach in overseas markets with new product portfolio. Besides OEM's business, company is also focusing on after market opportunities overseas and efforts are expected to yield positive result in current financial year.

Financial Analysis

The Gross Income for the year under review increased by 9.12% to Rs. 12994.51 millions as compared to Rs. 11908.27 millions in FY 2013-14. In terms of Number of wheels, the Company has achieved sale of 12.47 millions wheels rims against sale of 11.03 millions wheel rims during the previous year, showing the increase in sales of 13.06% to previous year sales. Your Company managed to grow despite the turmoil in the automotive segment and your Company has now positioned itself to achieve bigger landmarks in FY2015-16. Your Company expects to see similar growth in current year as well.

The Earnings before interest and depreciation (EBIDTA) increase to Rs. 1281.95 millions in FY 2014-15 from Rs. 1186.60 millions in 2013-14, registering a growth of 8.03%.

The Depreciation and other amortization has decreased to Rs. 381.51 millions in FY 2014-15 from Rs. 525.76 millions in FY 2013-14. This is primarily due to new requirements of Companies Act 2013, wherein Company has technically reassessed the useful life of its Assets and depreciated these assets over the balance useful life of each asset.

Profit before tax during the year under review has increased to Rs. 486.72 million from Rs. 251.62 million in FY 2013-14 recorded a growth of 93.43%. The profit after tax has also been increased to Rs. 394.04 millions from 243.30 millions, showing growth of 61.96%.

The growth in bottomline is testimony to the efforts put in by your company in bringing in efficiencies across all the major cost heads with clear focus on adopting the best practices across all area of its operations. Your Company continues to embark on path of balance sheet deleveraging and last year repaid long term loan of Rs 70cr. Company is putting in ongoing effort to cut down on net debt in its books. This deleveraging exercise will start to yield results in terms of lower Financial leverage and reduced financial cost from current years onwards.

Keeping in view the financial performance and availability of funds the Directors have recommended a dividend of Rs. 2.00 (i.e 20%) per equity share of Rs. 10/- each (last year 1.50 per equity share) for the year ended 31st March, 2015. The total cash outflow on account of the proposed dividend for the Current year will

amount to Rs. 35.70 millions including dividend Distribution Tax of Rs. 5.18 millions as against Rs. 26.51 millions including dividend distribution tax of Rs. 3.70 millions in the previous year, which represents 9.06% of the Profit after Tax earned during the year.

The dividend payout is subject to approval of members at the ensuing Annual General Meeting.

The Basic earnings per share and diluted earning per share stood at Rs. 25.89 and 25.81 respectively

Performance Analysis

In FY 14-15, the automobile industry cheered the new federal government with expectation of all round transformation of the country. The capex cycle contraction happening for last 5 yrs slowed down with corporate becoming more confident of reforms and sustained pickup in the Indian GDP. The capex cycle is beginning to expand and still lagging the pace that we expected but with the ground reality improving this data will improve going forward in FY 15-16.

The infrastructure bottlenecks were eased by the government in last year and a lot of projects are back on stream all across the country. The approval process has started due to which the benchmark sectors of automobiles have started giving positive growth.

In FY 2014-15 your company did a volume growth of 13% to 12.46mn Vs 11.03mn in FY 2013-14 on the back of overall traction in the automobile market and SSWL gaining market share across the vertical to stage a volume growth which is clearly better than the industry growth. SSWL gain significant market share in passenger vehicle segment along with M&HCV segment. The company expects to carry the momentum to the next FY to put up a good show. Your company expects a 10-12% volume growth in FY 2015-16 with all its manufacturing facilities working at very high utilization rates.

Our export volumes shrunk 7% to 1.42Mn wheels from 1.53Mn wheels in FY 2013-14. The de-growth primarily came due to strong currency headwinds from across the European continent creating fierce competition. Your company is adopting the product and customer broadening strategy in this continent and has got some initial success in securing after market orders and is aggressively pitching to gain traction in this segment.

The domestic passenger volumes grew 20% YoY far exceeding the industry growth indicating strong market share increase in the last FY and we are expecting this momentum to continue in the next FY as well. In the current FY SSWL will be present in 60% of the new launches in the passenger vehicle segment indicating strong momentum continuing for the company.

The company grew 24% in 2 & 3 vehicle segment with the increase in its foot print with the existing customers due to extreme quality conscience towards the customers in a highly competitive market. The company is in talks with 2-3 more domestic players for initiating business and we are hopeful of getting some inroads in the current FY.

The domestic tractor volumes witnessed contraction on the back of deficient rainfall last year and an extremely muted cash crop price movement. This resulted in across the board contraction for the sector, which slowed down by approx 18% in the FY 2014-15. We expect that the growth will kick start from 2nd half of FY 2015-16 on the back of good rainfall and severe inventory control by the domestic manufacturers in last 6 months. With decent rainfalls expected, we expect the segment to show a slow but steady trend for the FY. The export volumes for the tractor segment saw a growth of 26% with introduction of a new customer and new developments coming on stream for the company. We expect a double digit growth for tractor exports for the current FY.

The CV & OTR segment saw a growth of 38% and was thrice the industry growth with a lot of new development coming for mass supplies. This helped your company gain market share by more than 10% and we expect to gain the similar market share going into the next FY. For the next FY we expect your company to grow by 30-35% in CV segment which should be atleast double the industry growth.

Domestic Sales Forecast for FY 2015-2016 by SIAM

SIAM expects the auto industry to have a better year on the back of economic revival in the country and reduced cost of ownership of vehicle on account of drop in fuel price and interest rates. The fastest GDP growth in the world is expected to give a push to the automotive growth this year. SIAM expects the 4 wheels segment to grow at an annual pace of 4% in FY 2015-16 and we are hopeful that Indian car makers will beat these expectations on the back of variety of factors turning positive for the owners. SIAM also expects the 2 wheeler segment to grow at 10% and the industry is well poised to attain this parameter so far. The surprise is expected from the M&HCV segment which is expected to grow by 15% on the back of overall infrastructure development in the country. A lot of emphasis is laid on environment clearances for stalled projects to kick start the capex cycle, which should boost the consumption for this segment.

Tractor segment is expected to show a modest growth of 5% after a dull year and this will come to reality with the help of food security plan implementation as well as a healthy monsoon in the country. We expect the tractor segment to improve slowly towards the second half of the year and make a firm base for the next year.

As a strategy we will continue to make efforts towards increasing our share of business with existing as well as new customers to benefit from the India growth story. SSWL is also making efforts to enter strategic sector like OTRs to participate the global infrastructure story. SSWL will continue to spend on R&D initiative to broaden the product offering to target maximum bandwidth of customers globally.
