PERFORMANCE REVIEW:

During the year under review, your Company has achieved a total revenue and net profit of Rs. 14191.95 lacs and Rs. 136.39 lacs respectively as against total revenue and net profit of Rs. 13776.33 lacs and Rs. 227.60 lacs respectively in the previous year. The financial year 2015-16 was marked by excess steel capacity globally, falling demand and steep drop in prices in Indian Steel industry. Despite these challenging conditions, the operations resulted in a higher profit before interest, depreciation and tax of Rs. 646.68 lacs as compared to Rs. 547.08 lacs of the last year.

Even as the economy has started on the progress path, this has yet to show a positive impact on the market demand revivals and improved corporate earnings. The Company continued to face numerous challenges due to slow economy growth with debottlenecking of capacity constraints. However the Company expects to show better financial performance during the current year as compared to that of the year under report.

INDUSTRY AND ECONOMIC SCENARIO:

India is the largest steel producer in the world. In 2015-16, India produced 91.46 Million Tonnes (MT) of finished steel. Driven by rising infrastructure development and growing demand for automotives, steel consumption is expected to reach 104 MT by 2017. The Government of India has allowed 100 percent Foreign Direct Investment (FDI) in the steel sector under automatic route. Due to adverse Global conditions, there has been a large inflow of imports. This has also manifested in a series of price cuts for the domestic steel industry during the year, leading to a squeeze on margins earned by steel producers.

India's prospects are brightening due to low oil prices, the reform momentum and policies to increase infrastructure manufacturing output. India's steel demand will increase by 5.4 percent in both 2016 and 2017 reaching 88.3 MTs in 2017. Going forward, implementation of policy measures already announced, structural reforms and government investment in infrastructure will be critical to India's economy.

EVENTS SUBSEQUENT TO THE DATE OF FINANCIAL STATEMENTS:

There are no material changes or commitments or events affecting the financial position of the Company which have occurred after March 31, 2016 till the date of this report.

ANNEXURE - I TO THE DIRECTORS' REPORT MANAGEMENT DISCUSSION AND ANALYSIS REPORT

(a) Industry Structure and Development:

The management of Vallabh Steels Limited presents its analysis report covering performance and outlook of the Company. The Indian Steel Industry remains one of the most competitive steel industries in the world. However, there is a need to create a fair level playing field amidst supply glut caused by surplus capacities in steel surplus countries. India has emerged as one of the brightest spots in the world grappling with economic turbulence and fragile growth. It is expected that in the financial year 2016-17 growth rate is estimated between 7.5% to 8.0% driven by the fundamentals of strong consumption and the government's push for streamlining the business processes. Focus on infrastructure creation, extensive urbanization/ Smart Cities, Make in India, startups and promoting affordable housing policy initiatives by the Government of India augers well for the pick up in Steel demand in India considerably.

Besides the strong adverse impact of global economic meltdown, the Indian economy also faced major headwinds during the year in the form of: a) slow agricultural growth due to the two consecutive years of poor monsoons, b) disappointing manufacturing output owing to weak demand and low commodity prices, c) sharp contraction in exports due to weak global demand and low commodity prices and d) growing NPA's and stressed assets. Despite multiple headwinds, India produced 89.8 million tonnes crude steel in financial year 2015-16, an increase of 0.9% over last year. In financial year 2015-16, the country consumed 80.5 million tonnes of finished steel, a growth of 4.5% over last year. The industry growth is driven by an availability of raw materials such as iron ore and cost-effective labour.

India has been the only major steel consuming market globally which continued to witness increasing demand environment. Growth in finished steel demand stood at 4.5% in financial year 2015-16. However, the country suffered from an unprecedented, unbridled and unfair inflow of steel imports from countries like China, Japan, South Korea and Russia which continued to sell their surplus steel production at predatory prices. South Korea and Japan, especially, benefited due to the free trade agreement with India. Consequently, the consumption of domestically produced steel fell by 0.6% during the financial year. The domestic steel industry was forced to take a series of price cuts – leading to a severe margin squeeze for the Indian steel companies. Indian steel demand in India is expected to grow by 5.4 percent to 83.8 million tons (MT) this year on the back of low oil prices, reform momentum in India that remains better than in many countries. The construction industry is expected to rise further due to government's stimulus plan. The automotive sector is doing well. Hence, it is expected that domestic steel demand is going to recover soon and for the long time as well.

The consumption demand is expected to benefit from the recently announced Pay Commission award, continued low commodity prices, recent interest rate cuts and measures announced in the Union Budget financial year 2016-17 to transform the rural sector. The consumer confidence remains upbeat, while the corporate sector's expectations of business conditions also remain positive. Overall, the Indian economy is poised to realize the benefits of higher government spending, policy initiatives, rural demand and continuing reforms.

(b) Company's Performance:

i) Product Portfolio:

Your Company is mainly engaged in the manufacturing and marketing of Steel Pipes and Cold Rolled Steel Strips & Coils which fall within the single segment of "Iron & Steel Industry."

ii) Highlights: The highlights of financial year 2015-16 have been as under:

- The Company recorded a total revenue of Rs. 14,191.95 Lacs as compared to Rs. 13,776.33 Lacs in the previous year.
- Various measures launched during the year to improve the quality of cut ends in final products.
- The Company has been able to meet its raw material requirement without compromising on quality and production schedules.

(c) Outlook: Opportunity, Threats, Risks & Concerns:

The basic aim of the Company is to become capable to produce Iron and Steel products as per market requirements and thus be able to manage market trends to its advantage. Opportunities abound in growing economies and opening up of economy in India has created opportunities for Indian enterprise to move beyond national boundaries as well to create productive assets.

The Company is engaged in steel and steel related products activity. The outlook for the industry looks reasonable since India has good iron ore deposits, skilled manpower and growing demand for steel. In spite of downturn in the Global Steel demand, Indian Steel demand could survive showing an upward trend, setting a road ahead for the growth of the domestic steel industry in the years to come.

Competition in Steel industry is escalating and technological changes will spur or drag the forward march of individual units in steel industry. Supply side could also be an issue in next few years because of increase in production capacity by steel industry in India and expression of interest by foreign companies to set up new steel making units. However, coming years are also going to witness substantial additions particularly in the Asian regions. The Company's thrust on improving productivity and reducing cost of production will, in such a scenario, help in forging ahead in globally competitive environment. Global economic uncertainties have affected India's economy. Key risks synonymous to industry include the global recessionary trend, economic slow-down, increase in financial charges, non-availability of raw materials, such as iron-ore, coal and labour etc., coupled with market fluctuations. The Company does not apprehend any inherent risk in the long run. However following factors may pose threat, risk & concern for the Iron & Steel Industry in general and your company in particular:

1. Any adverse conditions of user sector to which it caters, thus adversely affecting the demand.
2. Underdeveloped infrastructure curtailing growth prospects.
3. The supply and demand imbalance due to new capacities coming on stream while the demand remains subdued which may have negative impact on the plant utilization and steel prices.
4. Subdued growth of the manufacturing sector impacting demand.
5. Quantitative restrictions and/or additional tariffs of exports from India by importing countries.
6. Unpredictable and sharp cyclical movements in the raw material and other input prices.
7. Any change in Govt. Policies pertaining to steel industry may affect the profitability.

The opportunities of growth for your company as detailed below are manifold in view of its Strengths which may also counter the above concerns:-

1. It is expected that better trends will emerge and may improve also in the times ahead. Your company by virtue of quality and market oriented specification of its products have posted profitable operations during the most trying times in the past notwithstanding minor declines. As such current conditions may pave a way for improved performance in future.
2. Well established customers base for the last over 35 years.
3. Your Company is fully poised to reap the benefits of economies of scale and it will be in a better position to negotiate raw material prices on long term bulk lifting basis & definite savings on overheads will bring down the cost per unit of production and lead to higher profitability.
4. Your Company has strategic advantage as its units are located in the industry friendly areas having all infrastructural amenities.

ANNEXURE – 'B' TO INDEPENDENT AUDITORS' REPORT

(Referred to in our report of even date)

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of VALLABH STEELS LIMITED as of 31st March, 2016 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of

internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India.

Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles.

A company's internal financial control over financial reporting includes those policies and procedures that:

- (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;
- (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with Authorizations of management and directors of the company; and
- (3) provide reasonable Assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31 March, 2016, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

Deferred tax asset/liability is created in accordance with the requirements of Accounting Standard 22 "Accounting for taxes on Income" issued by the Institute of Chartered Accountants of India. Deferred Tax Asset is created only to the extent there is virtual certainty that future taxable income will be available against which such deferred tax asset can be realized.
In terms of the Guidance Note on "Accounting for Credit available in respect of Minimum Alternate Tax (MAT) under the Income Tax Act, 1961" issued by the Institute of Chartered Accountants of India, MAT credit is recognized as an asset only to the extent there is a convincing evidence that the company will be paying regular income tax during the specified period.
- h) Employee Benefits**
- i) Short-term Employee Benefits**
Employee benefits payable wholly within twelve months of rendering services are classified as short term employee benefits and are recognized in the period in which the employee renders the related services.
- ii) Post-employment benefits**
- Defined Benefit Plans**
The employee gratuity scheme is a defined benefit plan. The present value of defined benefit obligation as at the end of the year is determined using the Projected Unit Credit method i.e. each period of service rendered by the employee is considered to give rise to an additional unit of benefit entitlement, gradually building up the final obligation. The liability on account of compensated absences i.e. leave with wages is accounted for on the basis of unutilized leave standing to the credit of the employee at the close of the year.
- Defined contribution Plans**
Contributions to the employees' provident fund, which is a defined contribution plan, are recognized as expense in the period in which the employee has rendered the services.
- i) Provisions and Contingencies:**
Provision is recognized in the balance sheet when, the company has a present obligation as a result of past events and it is probable that an outflow of economic resources will be required to settle the obligations, and a reliable estimate of the amount of the obligation can be made. A disclosure by way of contingent liability is made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. Where there is a possible obligation or a present obligation that the likelihood of outflow of resources is remote, no provision or disclosure is made. Contingent assets are neither recognized nor disclosed in the financial statements.
