MANAGEMENT DISCUSSION AND ANALYSIS

ECONOMY - AN OVERVIEW

The GDP growth for the year 2012-13 recorded the decade's low of 5% as compared to 6.2% in the previous year. The crisis in the Euro zone, the downturn in the US market and a host of disturbing developments on the domestic front like high commodity prices, high inflation, sovereign downgrading by S&P's, high interest cost, higher fiscal deficit, dip in Rupee value, infrastructure constraints and uncertainty in politics and policies all of which crippled the economic activity.

The industry growth has come down to a mere 1.1%, farming sector growth at a low of 1.8% while the service sector is estimated to have clocked a marginal growth of 6.6%.

While the exports came down to US\$ 300 billion from the US\$ 306 billion in the previous year, the imports grew marginally resulting in the increase in trade deficit. However, the year 2013-14 has begun on a promising note for the economy and a host of favourable macro economic data in the recent weeks augur well for reversing the slowdown and regaining the growth momentum.

CEMENT INDUSTRY

While the capacity addition of the industry has slowed down over the last year, the supply side pressures mounted resulting in subdued selling prices caused by poor demand. As per the data released by Department of Industrial Policy and Promotion (DIPP), the industry is estimated to have grown by 5.6% during the year 2012-13 much lesser than the close to double digit growth recorded for years before. This situation has forced the industry to operate at a lower capacity on an all India level of around 65% to 70% only. The slowing down of construction sector with an uneven monsoon at various parts of the country resulting in surplus and deficiencies and drought like situation in certain states coupled with high interest costs affected the industry resulting in this sluggish growth. The industry also faced shortages of essential construction material like sand, bricks and water. On the infrastructure front, the power supply situation worsened further in many of the states in India however with a respite in northern states. The industry also has to bear the brunt of escalating costs of inputs and services

through increased freight cost on account of petroleum products hike, higher pay outs to workers on account of increase in cost of living index. The industry as such have to operate on this background of higher operating cost and lower demand in the market.

COMPANY PERFORMANCE

Given the situation as explained above, your company has performed better with a growth in clinker production of 14% to 8.92 lakh tons (7.8 lakh tons), cement grinding up by 13% at 11.38 lakh tons (10.07 lakh tons) and a sales volume of 11.28 lakh tons as opposed to 10.08 lakh tons in the previous year.

OPPORTUNITIES, THREATS, RISKS AND CONCERNS

Cement business is a long term play and the industry has witnessed the cycles of low and high growths before. With the latest indications given by the RBI as well as PM's Economic Advisory Council (PMEAC) regarding the revival of economy, the industry can be expected to bounce back to its normal growth level of 8% to 10% in the short term. Even now there are regions of deficits for cement in the North and North East but movement bottlenecks are a deterrent. With the thrust being given in the latest budget, the industry can hope for better growth of the economy thereby the relevant sectors.

To overcome the constraints, if any, during summer months for the power availability, the Company has installed a 20 MW power plant.

In order to reduce the cost of fuel, the Company has taken proactive steps in using alternate fuels like pet coke which has given significant savings in cost of operations.

Transport of cement from this kind of new location was also an area of concern which the Company addressed through deployment of dedicated trucks which has helped it despatch over 1.1 million tons in its second year of operation.

The ever raising cost of inputs in the form of increase in the petroleum products, increase in the service charges of fly ash by the state electricity boards are also areas of concern but with more thermal plants in

the anvil in the government and private sectors, the availability of fly ash could soften the prices and it is expected with further marginal growth in the cement demand, the impact of increase in petroleum prices can be negated through a pass on to customers.

OUTLOOK

The prospects for economic recovery appear to be good with PMEAC stating that even existing rates of investment should enable us to grow at around 7% and IMF has also pegged our GDP growth to 6% for the current year and World bank has expressed its views on India regaining economic momentum and growing at 6.1% this year. The government also appears to be focussed on development through fast track clearances for projects and FDI and RBI measures in reducing the lending rates together with the predicted normal monsoon can pave way for a revival of the economy which will augur well for the industry.

VALUE ENHANCING STRATEGIES

- The plant has been installed at a strategic location to cater to the ever deficit areas of north and central India which has not seen any let up in demand.
- The company has installed collection systems for fly ash at the State Electricity Power station for ensuring uninterrupted supply of fly ash.
- To ensure continuous availability of power, a captive power plant has been installed.
- To reduce the cost of fuel, petcoke is used upto 100% in the overall fuel mix and the Company is also exploring the possibility of using it in the power plant to ensure cost savings.
- The Company is also gradually increasing the proportion of blended cement in the overall mix to ensure cost reduction.
- The manpower at this unit is also one of the lowest in the industry with multi tasking for various staff and workers.

HUMAN RESOURCES & INDUSTRIAL RELATIONS

The industrial relations remained cordial throughout the year.

NOTES TO THE FINANCIAL STATEMENTS

1. BASIS OF PREPARATION OF FINANCIAL STATEMENTS

The financial statements have been prepared in accordance with Generally Accepted Accounting Principles (GAAP), includes generally under the historical cost convention on accrual basis and exceptions to this basis, if any, are herein specifically mentioned. GAAP comprises of mandatory Accounting Standards issued by the National Advisory Committee on Accounting Standards (NACAS) and The Institute of Chartered Accountants of India (ICAI), the provisions of the Companies Act, 1956 and the Guidelines issued by ICAI and Securities and Exchange Board of India (SEBI). Accounting policies have been consistently adopted except where a change in existing GAAP requires a change in accounting policy hitherto in use.

During the year ended 31.03.2012, the revised Schedule VI notified under the Companies Act, 1956, has become applicable to the Company for preparation and presentation of its Financial Statements. The adoption of revised Schedule VI does not impact recognition and measurement principles followed for preparation of Financial Statements. However, it has significant impact on presentation and disclosure made in the Financial Statements.

2. SIGNIFICANT ACCOUNTING POLICIES

2.1 Use of estimates

The preparation of financial statements in conformity with Generally Accepted Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent liabilities at the date of the financial statements and the results of operations during the reporting period. Although these estimates are based upon management's best knowledge of current events and actions, actual results could differ from these estimates.

2.2 Fixed Assets

- (a) Fixed assets are stated at cost of acquisition or construction. All costs including financing and applicable overheads incurred on specific projects are capitalised.
- (b) Expenditures and outlays of money on uncompleted projects of a capital nature are shown as capital works-in-progress until such time these projects are completed and put into commercial operation.
- (c) Depreciation on fixed assets is provided in the following manner:
