MANAGEMENT DISCUSSION AND ANALYSIS

OVERVIEW OF THE ECONOMY

During the year under review (2014-15) uncertainty continued to grip the world economy. Barring the US, which reported a strong growth, most economies including the Euro Zone, China and Japan reeled under slow down. With the new government in place and with the focus on turnaround there are hopes of revival of the fortunes.

The economy was insulated from "external shocks" and macro-economic conditions improved considerably raising hopes for regaining the growth momentum. Global commodity and crude prices considerably cooled helping the country to cut current account deficit.

Both core and retail inflation rates also eased prompting RBI to cut rates twice.

However, on the domestic front, the expected pick-up in demand and investment recovery did not materialise. This along with sluggish exports, huge debt, high interest cost, higher freight and power charges affected core industry growth.

GDP Growth, Industrial output

During 2014-15, GDP growth improved to 7.4% (2011-12 basic year). On the same basis farm sector growth was below normal at 1.1% against 3.7% in 2013-14. With stagnation in manufacturing activity, Industrial growth marginally improved to 5.9% (4.5%). While the services sector posted a strong growth of 10.6% (9.1%).

Core Sector growth, IIP with 2004-05 as base year

According to figures released by Ministry of Commerce & Industry, the eight core sectors recorded a growth of 3.5% (2004-05 base year) which is lower than 4.2% posted in 2013-14 and the index of industrial production grew marginally at 2.8% during 2014-15 from a contraction of 0.1% in 2013-14.

Fiscal deficit

With the NDA Government firm on fiscal consolidation, the fiscal deficit was at 4% against target of 4.1% of GDP and the level of 4.4% in 2013-14. It was made possible by curtailing expenditure and mopping up revenue from Telecom auction.

Inflation

Last year, the inflationary pressure considerably eased due to the softening in oil, commodity and food prices. The average rate of inflation in terms of WPI declined to two per cent compared to six per cent in 2013-14. The average rate of inflation in terms of CPI also eased to 5.9% (9.5%).

CEMENT INDUSTRY

According to the information published by Department of Industrial Policy and Promotion (DIPP), the cement production in the country was up by a meagre 5% for the year under review. Even this increase in production was witnessed due to better growths in east and west. While there was a subdued growth in north and central regions of India, south registered

practically negative growth. The industry with the capacity of over 370 Mn. Tns had to be content with a capacity utilisation of around 70% only for the successive year on an all India basis. The woes of the industry was compounded further with an annual bout of cost increases in the form of input material cost increase, increase in freight charges, increase in royalty and further dosage by way of contribution to District Mineral Foundation Fund as per the new MMDR ordinance. The industry had some relief in the form of reduction in the prices of petroleum products and thereby the price of coal. The industry also had to bear the brunt of non availability of essential construction materials like sand, bricks, water in various states.

As mentioned elsewhere, there seems to be some prospects of improvements in the situation with a turnaround of the Infrastructure and Realty sectors backed by various initiatives and announcements which could augur well for the industry in the medium term.

COMPANY PERFORMANCE

Given such a poor market condition, the performance of the company can be considered to be satisfactory with a clinker production of 8.68 Lakh Tons (8.82 Lakh Tons) while the cement grinding was maintained at 12.10 Lakh Tons (12.19 Lakh Tons) and the cement sales was at 12.22 Lakh Tons compared to 12.13 Lakh Tons in the previous year. On the sales front the price of cement which showed signs of improvement in the first two quarters went down in the last two quarters of the year resulting in substantial erosion of the bottom line as mentioned elsewhere.

OPPORTUNITIES, THREATS, RISKS AND CONCERNS

The biggest risk today facing the industry in general is the very poor demand for cement - The impact of the poor economic growth in the previous year and which has gone up only marginally in the year under review. The industry had to wait for longer time in this cycle than usual for the fortunes to reverse. However, as mentioned elsewhere, based on the projections by various agencies and experts, reasonable economic growth is expected in the medium term of over 7% and given the strong fundamentals of the country, the industry can expect the revival shortly. The containment of the fiscal deficit and reasonable reduction in the interest rates could favourably pave way for further growth of the industry. This will address the poor capacity utilisation of the industry hovering 70% only currently to normative utilisation levels as in the previous decade.

The second major challenge facing the industry is the ever changing infrastructure regulations calling for stringent pollution control norms and regulations covering land acquisition and clearances for mining. The Company on its part has also proposed to address the recently announced stringent pollution control norms through investments at its plant. However, the impact of amendments to granting of mining leases has to be seen in reality.

TRINETRA CEMENT LIMITED

Another risk facing the industry is the availability of key materials like coal, Gypsum, etc. together with variation in their quality. To overcome this, the company has gradually reduced its portion of high cost indigenous/imported coal through various alternate routes like Petcoke, etc.

To ensure availability of adequate fly ash, the company has installed Collecting systems at the nearby state owned Thermal Power plant but the risk being associated is the volatility in the price of fly ash charging by such thermal power stations.

Another risk is the volatility in the dollar rate which affects the input materials cost. This is partially addressed through taking steps at appropriate time.

The company is fully insulated with the installation of captive Thermal Power Plant.

Logistics cost is also an area of concern impacting the industry in general and this unit located at a corner in particular. The impact was partially nullified with the steep fall in the diesel price during the year but the volatility in the prices of petroleum products is likely to have an impact on the logistics cost.

OUTLOOK

Most growth forecasts have upgraded Indian economic growth rate while downgrading global growth. The Economic Survey and the Union Budget for 2015-16 have expect GDP growth to accelerate to over 8% in 2015-16 on the back of macro economic stability, pick up in domestic demand and revival in domestic savings and investment.

RBI expects the growth to be slightly lower at 7.8% while IMF and World Bank are upbeat on the growth prospects for India and raised the growth target to 7.5% in the current year. RBI and Government have also moved to limit retail inflation to below 6% and the Central Bank is expected to further ease interest rates.

The Government is striving hard to build a consensus on implementing major reforms like land acquisition law and GST and engaging the States in the growth story. Steps have been taken in right direction through unblocking of coal mines and allocation of telecoms spectrum. The two bifurcated States- Andhra Pradesh and Telangana are engaged in resurrecting their economies and triggering growth.

With increased allocation for infrastructure, roads and housing plus initiatives like "ease of doing business", "Make in India", promoting 100 smart cities, housing for all by 2022 and building cement concrete roads an optimistic view can be taken for accelerating economic growth, which will augur well for the industry.

VALUE ENHANCING STRATEGIES:

As earlier mentioned, your company has taken pro-active measures in containing cost and securing the basic materials and services:

- The company has invested in installing a collection system for fly ash at the electricity power station to ensure uninterrupted supply of fly ash.

- For the continuous power availability, a 20 MW captive power plant has been installed and the Company also has registered as a user in the National Power Exchange for availing power at cheaper rates depending upon the demand and supply.
- Petcoke is extensively used in the fuel mix ensuring substantial cost saving and it has also been extended for usage in the power plant based on cost consideration.
- The blended cement proportion has also been raising over the last two years ensuring cost reduction.
- With the state of art technology in place, the company uses least manpower with multi-tasking for staff and workers.
- The location also been a strategic one as it caters to the needs of the ever deficit northern region.
- The Company has also been constantly improving the parameters of energy consumption which has further improved during the year under review.

HUMAN RESOURCES & INDUSTRIAL RELATIONS

The industrial relations remained cordial throughout the year.
