## FROM THE DESK OF MANAGING DIRECTOR

Dear Fellow Shareholders,

It gives me great pleasure to share with you the highlights of our Company's performance for the financial year ended March 31, 2017.

As stated in last Annual Report, it gives us immense pleasure to inform our shareholders that we have successfully shifted our business activity from diamond trading to organic agro based business and allied activities (viz. farming, cultivation, retailing and marketing).

White organic agro started farming and cultivation activity on leased basis on 108 acres of land near Rajkot, Gujarat. We have further increased it to a total of 530 acres. The additional 422 acres of land is located at Surendranagar, Gujarat. Multi locational farming and cultivation goes with our strategy of de-risking the effects of climatic disasters or natural calamities. We have been able to bring together excellent team of professionals with wide experience on the organic farming front, their expertise will help us to introduce new products and increase our geographical reach going ahead. Our plan is to further increase our leased farming activity across the country.

**Shri Darshak M. Rupani,  
Managing Director**

Along with farming we have our own processing facility that gives us an edge over competitors, with retail and distribution under one roof resulting in forward integration over farming activity. Our Company commenced its retail venture with its first flagship store at Chembur, Central Mumbai. Currently we have over 220 products in our portfolio in different segments. We also have our fully integrated website as our e-commerce platform to cater to the widespread demand. We have recently received the license for production of medicinal and nutritional products at our manufacturing unit.

Our Company's ability to offer complete product portfolio and the right product mix through our own farming and cultivation activities has made the brand "White Organics" a preferred choice amongst customers. The team has been constantly engaging in educating the farmers by conducting various seminars and knowledge sharing programs for various farming and cultivation related activities. Our focus is to increase the visibility of our brand not only domestically but also globally.

The management has been committed towards building a healthy society. In this regards we are constantly spreading the awareness amongst people for "Healthy Eating and Healthy Living", as we go by the philosophy that "Our Food is Our Medicine". We are confident that, India will see a strong shift towards the organic food with growth driven by acceleration in health consciousness, customer spending and huge opportunity lying within the unexploited organic sector.

Today, the Company has emerged as:

- The only listed entity in the organic food industry
- Amongst the leading organic player to run on both owned and franchise model on a broader scale
- Only Company positioned strongly in the farming as well as retailing of organic products
- Among very few Indian companies with specialized and dedicated team in the farming, retailing and distribution
- Plans of having a pan India as well as global presence under owned brand, backed by our own farming and cultivation activities

Our focus will continue to deliver value to the customers; to add value to our farmers; stay in businesses which will ultimately lead to maximization of shareholder value & return.

We are also amongst the first few to foray into the organic food industry. Soon we will have our retail and farming presence in other parts of the country where we will introduce our brand "White Organics". We are currently evaluating to

develop this in phased manner. Our plan is to cater to the entire range of organic food products and other organic products. In the last year, we also acquired 5 new stores under our franchise model in Tier 2 cities of Gujarat (i.e. Surat, Anand, Vadodara & Morbi).

Our plan is to continue our expansion in the current year. Our focus remains to enhance our brand image, revenue & profit, ROCE and cash flows across all our businesses.

We are confident that in the coming years, along with the growth in domestic consumption & growth in economy, we will not only capture higher market share but also grow across India and abroad.

The idea is to increase the presence and recall of the White Organic brand in the target segments. Our motive of serving healthy and non-poisonous unadulterated food products, significantly contributes towards the making of a healthy India, which lies at the center of our principles and values. We plan to tap different marketing and sales media for our brand penetration.

At an industry level, as per current available data and projections, the sector that the Company operates in is expected to deliver exponential positive growth. As we are the only listed pure play organic food Company, we have first mover advantage and an additional responsibility of setting the industry benchmark. Reports indicate that the domestic organic food consumption will grow by leaps and bounds riding on increased consumer awareness and will double in India by next decade driven by Government initiatives and increased consumption. We will strive to lead this growth and create a deep routed brand out of "White Organic".

Barring unforeseen circumstances, the Company is confident of performing better in the current year.

**MANAGEMENT DISCUSSION AND ANALYSIS REPORT***Pursuant to Regulation 34(2) & 53(F) along with Schedule V of the SEBI (Listing Obligations and Disclosure Requirements) regulations, 2015*

White Organic Agro (BSE: WHITEORG) is Mumbai based only listed entity in organic farming and retail, with a vision to empower the farmers and tap ever-expanding market for organic food. The Company's flagship store is located in the central suburb of Mumbai i.e; Chembur, selling over 220 organic products in 12 major categories and 17 sub categories, from cereals to pulses, grains to vegetables, fruits to health supplements and skincare products to snacks (by following strict quality checks at each level of activity), it has become a preferred place for people who are health conscious and look for chemical-free food items.

White Organic Agro is the first listed pure play entity in the Indian organic food sector. Darshak Rupani, Managing Director of White Organic Agro, who took over the Company in 2010, initially was into diamond trading activity. He, however, realized diamond trading business was losing its sheen and soon led the Company to diversify into organic food business, being from the farming background. The Company has also hired few experienced professionals who were into the business of organic farming for over 10 to 12 years. Also, signed an additional pact for leasing 422 acres of land in Gujarat for organic farming and cultivation, currently the Company has 530 acres of land on leased basis.

Currently the Company grows Moringa, Aloe Vera, Dragon Fruit, Nilgiri, Ashwagandha and some medicinal herbs. The Company has also tied-up with over 3,500 farmers practicing organic methods of farming in 530 acres of fertile land of Gujarat, our aim is to expand to 3,500 acres in one year. We are exploring models like Company- owned stores, franchisee stores, online e-store and tie ups with e-marketplaces, like Grofers, Big Basket and Amazon, and the export channel with strategic tie-ups with international companies. Our plan is to open 30 to 40 stores in the near future with about 8 to 10 stores in Mumbai and 20 to 30 stores in Gujarat, mostly in the franchise model.

**➔ Organic Food Industry Structure, Development & Opportunities:**

The organic products industry has shown consistent growth over the last 25 years. The organic industry earned \$35 billion in 2014, which was just \$1 billion in 1990. Credited with being the primary market force drivers, food safety and health concerns have been driving the industry since the end of 2009 recession. Our targets are core customers with its "eating well and living well" theme.

Consistent growth is a global trend for organic products. Land area under organic management continues to increase. Production volumes are rising; Sales value continues to grow globally. Organics is now the USA's fastest growing sector in retail food. The European market also experienced strong growth of 13% between 2014 and 2015 – the first double digit expansion since the global financial crisis. There was even higher growth in individual European countries: Spain, Ireland, Sweden, Belgium, Norway, Italy and France. In some select European countries with strong government support and a highly-educated consumer base, market share is close to double digits, highlighting the potential for this market segment. For particular products penetration of organic options into the food market is even higher.

Global increases in the area of organic farmland, and production volumes are not keeping up with global demand, signaling the potential for even greater growth for organic producers, processors and handlers witnessed undersupplies of organic primary produce in many sectors, including organic grains, fruit and vegetables, livestock feeds, and red meat.

India will see strong improvement in growth driven by acceleration in construction spending and expansion in its manufacturing sector. India's prospects are bright due to low oil prices.

There is a need for continuous consumer education on the meaning and value of organic production and certification. This requires an ongoing explanation of the costs of producing and certifying organic products: Organically approved seed, learn to manage fertility and pests through natural methods, and locate their own market. Continued awareness raising of the benefits of organic production and certification is imperative, to overcome consumer confusion and the possibility of fraud.

#### → **Threats**

- Competition from local and multinational players
- Execution risk
- Regulatory changes
- Attraction and retention of farmers

#### → **Economic Overview**

India recorded a growth rate of 7.1% during 2016-17 and declined to 5.7% in 2017-18. China's overall output is expected to slow to 6.5% in 2017 and 6.2% in 2018, down from 2016's 6.7%.

In the last few years, India has taken a host of economic reforms, such as liberalization of the FDI regime, to improve business climate and promote growth and Goods and Services Tax (GST), which has expected to roll out soon. Proposed goods and services tax (GST) will help Companies reduce logistics cost by 1.5% to 2.5% as they reconfigure their supply chains.

The economic survey said "demonetization" would bring long-term benefits to the economy. It also said structural reforms and a proposed Goods and Service Tax could boost growth rate to 8%-10%. GST will create a common Indian market, improve tax compliance and governance, and boost investment and growth. It is also a bold new experiment in the governance of India's cooperative federalism.

The International Monetary Fund forecasts a more favorable outlook for the global economy in 2017 and 2018 compared to 2016. IMF sees a positive short-term outlook on the horizon, tainted by the risk that still prevails. The two major concerns that IMF has is, persistent low productivity and excessive inequalities that grow with low productivity.

World Trade Organization (WTO) expects global trade to grow 2.4% in 2017 compared to 1.3% in 2016 but only if the global economy recovers as expected and governments pursue the right policy mix.

Global GDP growth is projected to increase, rising from just below 3% in 2016 – the slowest pace since 2009 – to 3.3% in 2017 and around 3½ percent in 2018. While the modest pick-up is welcome, it would still leave global GDP growth below the historical average of around 4% in the two decades prior to the crisis. (Source- OECD Interim Economic Outlook)

#### → **Product-wise Performance**

Our performance of the organic agro business activity has started reflecting tremendous response from the market in almost a year of our operations. We have completely migrated to a pure play organic agro activity providing our services though the entire value chain of the organic activity (i.e. farming, cultivation, harvesting, processing, wholesale, retail and exports) following strict quality checks at each level of activity.

The Management is very happy to share that we have been able to break into this niche and largely unexplored market and have emerged as the only pure play organic agro Company in the listed space. Over the last six months we have been concentrating on building a strong backend that will not only enable us to cater to the expected explosive demand but also equip us to penetrate deeper and spread our geographical reach in the coming years. We are seeing a strong traction in demand for our products. Currently we have over 220 products in our portfolio and planning to add 40-50 more in the near future.

We are not only targeting the commercial aspect of this fast-emerging concept of organic food, but we are also making all efforts to educate the larger society to understand and adapt to better and healthier ways of livelihood.

Our overall performance shows the acceptance of products of the Company. We are continuously working to take the brand "White Organics" to the target population. For this we have planned different promotional, marketing and advertising activities. We are also working towards enhancing our existing product portfolio and bring more niche products in our basket. We have witnessed great demand that is coming for our products. This gives us tremendous confidence to move up the value chain and keep introducing new products.

We will continue to strive towards providing the best possible services through quality products and help build a stronger and healthier India. Our efforts will always be to win over the "Trust and Loyalty" of the consumers thereby build a great brand "White Organics".

## ➔ **Outlook**

The Company constantly endeavors to increase its product portfolio so that it can cater to different consumption needs and thereby evolve as a one stop solution for the consumers. The idea is to increase the presence and recall of the White Organic brand in the target segments. Our motive of serving healthy and non-poisonous food products and significantly contribute to the making of a healthy India lies at the centre of our principles and values.

At an industry level, as per current available data and projections, the sector that the Company operates in is expected to deliver exponential positive growth. Our diversified portfolio across food products and health and beauty provides a wide range of products for increasing client engagement. As the only listed pure play organic food Company, we have first mover advantage and an additional responsibility of setting the industry benchmark. Reports indicate that the domestic organic food consumption will grow by leaps and bounds riding on increased consumer awareness and will double in India by next decade driven by Government initiatives and increased consumption.

## ➔ **Risks and Concerns:**

The Company faces the following Risks and Concerns:

### **Economic Risk**

Any business is in a way or other, dependent on the prevailing global economic conditions. Inflation, changes in tax, trade, fiscal and monetary policies, scarcity of credit etc. However, we do not expect to be significantly affected by this risk.

### **Risks in Organic Agriculture**

Risks that are similar to those in conventional farming, though they may be managed in different ways in organic farming;

Risks that are different between organic farming and conventional farming, but that may only be temporary, due to the recent rapid growth in the organic sector;

Risks that greatly differ from those of most conventional farmers because of the different nature of the production and marketing systems.

### **Production Risks**

Our business can be affected by the weather and climatic risks that are similar for organic and conventional farming. According to an organic farmer; harsh climate, bad weather such as hail or wind can destroy a crop, whether organic or conventional, very quickly. Others pointed out that any farmer without irrigation faces the risk of drought, but that organic farmers' investment in soil quality allows their soils to hold water and withstand drought better than those of their conventional counterparts. Protecting against insects by late planting increases the risk of an early frost. Organic

producers face less risk than conventional producers because they use non-chemical controls. Organic farming is less restricted in their choice of crops for rotation than conventional farmers, who risk damage to certain crops from previously applied pesticides.

Thus, we believe we have adequate mitigation in place for trade risk.

### **Input Risks**

Organic farming may face shortages of certified organic seeds, biological pesticides, specialized farm equipment designed for organic cultural practices and other inputs because the market they offer to suppliers may be too small to be profitably served by agribusiness. Concern about the availability of good quality compost that has not been contaminated by GMOs. The flow of credit to organic producers is limited and can be difficult to obtain.

### **Transition Risk**

The process of transitioning from conventional to organic agriculture may also pose production and market risks that do not persist over time. During the transition process, it faces a steep learning curve as they learn to control pests biologically, manage nutrient cycles, produce different crops, and tap new markets. Crop yields may drop initially on some farms as the soil is being rebuilt and beneficial insect populations are restored. Farmers are unable to command organic premiums until after they have acquired organic certification, which usually requires a three-year waiting period and which commands high value of money.

### **→ Internal Control Systems and their adequacy**

In view of the changes in the Companies Act, the Company has taken additional measures to strengthen its internal control systems. Additional measures in this regard are fraud risk assessment, mandatory leave for employees, strengthening background verification process of new joiners, whistle blower policy and strengthening the process of risk management. The Company maintains a system of internal controls designed to provide a high degree of assurance regarding the effectiveness and efficiency of operations, the adequacy of safeguards for assets, the reliability of financial controls, and compliance with applicable laws and regulations.

The organization is well structured and the policy guidelines are well documented with pre-defined authority. The Company has also implemented suitable controls to ensure that all resources are utilized optimally, financial transactions are reported with accuracy and there is strict adherence to applicable laws and regulations.

The Company has put in place adequate systems to ensure that assets are safeguarded against loss from unauthorized use or disposition and that transactions are authorized, recorded and reported. The Company also has an exhaustive budgetary control system to monitor all expenditures against approved budgets on an ongoing basis.

Recognizing the important role of internal scrutiny, the Company has an internal review and assessment function which is empowered to examine the adequacy of, and compliance with, policies, plans and statutory requirements. It is also responsible for assessing and improving the effectiveness of risk management, control and governance process.

Periodical audit and verification of the systems enables the various business groups to plug any shortcomings in time. As stated earlier the Company has improved effectiveness of the risk management process wherein it evaluates the Company's risk management system and suggests improvement in strengthening risk mitigation measures for all key operations, controls and governance process. In addition, the top management and the Audit committee of the Board periodically review the findings and ensure corrective measures are taken.

## **Annexure 2 to the Independent Auditors' Report**

(Referred to in paragraph 2 under 'Report on Other Legal and Regulatory Requirements' section of our report of even date)

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of WHITE ORGANIC AGRO LIMITED ("the Company") as of 31<sup>st</sup> March, 2017 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

### Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ("ICAI"). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

### Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing specified under section 143(10) of the Act to the extent applicable to an audit of internal financial controls, both issued by the ICAI. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness.

Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

### Meaning of Internal Financial Controls Over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

### Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

### Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31<sup>st</sup> March, 2017, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the ICAI.

## **Annexure to the Independent Auditor's Report**

(Referred to under 'Report on Other Legal and Regulatory Requirements' in the Independent Auditor's Report of even date)

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

In conjunction with our audit of the consolidated financial statements of WHITE ORGANIC AGRO LIMITED ("the Company") as of 31st March, 2017, we have audited the internal financial controls over financial reporting of the Group as of that date.

### **Management's Responsibility for Internal Financial Controls**

The respective Board of Directors of the Group are responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India (ICAI). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the respective company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

### **Auditor's Responsibility**

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing specified under section 143(10) of the Act, to the extent applicable to an audit of internal financial controls, both issued by the ICAI. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

### **Meaning of Internal Financial Controls Over Financial Reporting**

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

### Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

### Opinion

In our opinion, the Group has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31<sup>st</sup> March, 2017, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the ICAI.
