CHAIRPERSON'S MESSAGE

DEAR SHAREHOLDERS.

It seems like yesterday when we started our operations in 1993. Starting with a few farmers, Heritage Foods Limited (HFL) is now one of the leading dairy companies in India. We enjoy the respect of 3 lakhs strong farmer community, engaging in milk procurement of 10.6 lakhs litres on a daily basis. The journey has been a long and winding one – there have been moments of glory as well as despair – but in the end we have managed to not just survive, but thrive.

Stakeholder focus

Since inception, we have sincerely believed that our dairy farmers form the backbone of our business. Our 25 year-long journey is filled with instances where we have constantly empowered our farmers and would continue to do so with a renewed focus. But, with growing business comes increasing responsibilities - the responsibilities of taking care of steadily increasing dairy farming community and keeping ourselves acquainted with incipient market trends. As a means to this end, the Company has undertaken a number of measures like providing free veterinary care, supplying high-quality cattle feed at subsidised rates, mitigating risks through insurance policies (farmer and cattle) and facilitating financial support for purchase of cattle.

We intend to undertake many such measures, which I believe, would address the challenges faced by the dairy farmers and keep them secure in what's a highly cyclical business. Farmer's empowerment is our core value at this celebratory moment and would remain so forever at Heritage.

66 Our dairy revenues grew by 5.73% from ₹ 17,688 million in 2015-16 to ₹ 18,701 million in 2016-17, while the value-added segment reported a 14.77% y-o- y growth in revenues.

Environment focus

At Heritage, we recognise our responsibility towards protecting the environment with utmost importance. As a forward-looking enterprise, we are strongly committed for extending our green footprint. In line with this thinking, we embarked on a clean energy initiative with an 8.2 megawatt renewable energy facility (4 megawatts of solar power and 4.2 megawatts of wind power) at multiple sites in Andhra Pradesh, Telangana. Maharashtra and Karnataka. The result is that 55% of our processing facilities are powered by renewable energy. These eco-friendly initiatives of Heritage haven't gone unnoticed - a fact vindicated by the array of energy conservation awards we have won recently.

Year in review

From a macro perspective, we have seen massive transformations transpiring across India. With the advent of modernised cities and new avenues of trade, there has been a growing demand for quality packaged products everyday, which earlier were largely homemade. The result: consistent growth for the industry in the last few years. A decade back a similar trend was observed in demand for ghee in Southern India, where households moved from making ghee at home to buying it in the packaged format. Today, we are witnessing a similar trend with curd. We believe this will become the norm for other dairy products as well; for example, flavoured milk.

This favourable industry scenario led to a satisfactory financial performance. Our dairy revenues grew by 5.73% from ₹ 17,688 million in 2015-16 to ₹ 18,701 million in 2016-17, while the value-added segment reported a 14.77% y-o- y growth in revenues.

In celebration of our 25 years of existence, at Heritage Foods we took a bold decision of rebranding ourselves. Here I would like to assure our customers that it's only the packing that has changed but our promise of 'Health and Happiness' still remains the same in every product that we produce.

Over the last few years, the industry has seen cattle yields rising with the adoption of new diets and arrival of cutting-edge cattle maintenance systems. Furthermore, with India being billed as one of the most attractive global opportunities from a consumption perspective, the country's dairy sector is expected to see a larger quantum of private investment and a significant increase in entrepreneurial interest. With disposable incomes rising, the industry is expected to see a renewed focus among Indian players to venture into thus far uncharted territories. Thus, I believe the sector is perched atop the crest of a long U-curve and the years ahead would prove to be really fruitful for us in terms of revenues as well as profits.

Way forward

Staying true to the Company's mission of reaching the ₹ 6,000 crore - mark in revenues by 2022, we aim to enhance the contribution of value-added products from the current levels of 24% to 40% over the next five years. Heritage has already made inroads into Western parts of India like Pune and Mumbai and Northern Indian markets like Delhi NCR. Punjab and Haryana. The management is confident of achieving these numbers via organic and inorganic means. Case in point: we recently acquired the dairy business of Reliance Retail Limited. thereby cementing our status as a pan-India player.

Besides, we are continuously adding high-end products to our portfolio. Similarly, we also aim to foray into the beverages segment. This will widen our current portfolio of value-added products and brighten our growth prospects in the years that lie ahead.

Heritage at 25 is inundated with talented personnel who are eager to explore new opportunities and come up with new ideas. Thus, at 25, we are no less excited than what we were at the beginning. The only difference is that today we are much more confident and enjoy the support of a blossoming stakeholder community.

With best regards

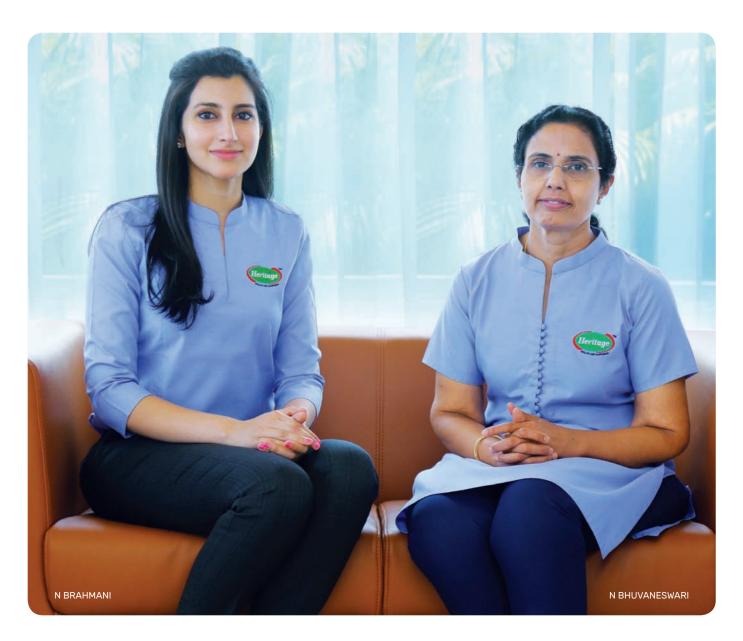

D Seetharamaiah Chairperson

MESSAGE FROM THE MANAGEMENT

"Looking ahead, we intend to cement our identity as the best supporter of the Indian dairy farmer."

N Bhuvaneswari, Vice Chairperson and Managing Director, and N Brahmani, Executive Director, review the Company's performance for FY2016-17

66 The average industry growth rate of fresh milk volumes is ~6%.99

Q: Were you pleased with the Company's performance during the fiscal gone by?

N Bhuvaneswari: Without a doubt. There were a number of reasons why I say so. The year FY2016-17 marked our 25th year in business, a milestone which we couldn't have achieved without the help of our dairy farming community. The fact that we have been able to come this far irrespective of sectoral crests and troughs is a vindication of our mutually beneficial existence.

Q: What were some of the financial highlights of FY2016-17?

N Brahmani: The turnover for FY2016-17 stood at ₹ 26,429 million, 11% higher than the corresponding fiscal year.

Our EBITDA reached ₹ 1,466 million in FY2016-17, a 7.40% spike compared to the previous financial year and dairy segment contributed nearly 99%. Our PAT for the year stood at ₹ 668 million, a 20.58% improvement over the last year and the dairy segment revenue contributed nearly 79%. We continued to maintain our debts at low levels.

Q: What were some of the operational highlights of FY2016-17?

N Bhuvaneswari: The average industry growth rate of fresh milk volumes is ~6%.

The fiscal gone by was no different. While the bulk of our sales come from Southern India, we are expanding our footprint to markets like Western and Northern India where the demand for packaged dairy products has shot up in the recent past. The scale of procurement of the Reliance dairy business is ~2 lakhs litres per day and that will bolster our existing business in terms of procurement itself by additional ~15%. We made sure that our key procurement centres are in proximity to our markets. This ensures the freshness of the milk by cutting down lead times.

N Brahmani: As a means to this end, Heritage Foods has made sizeable investments in production hubs. Today, we have 15 well-distributed, state-ofthe-art production hubs which process milk of the most immaculate quality.

Another major event that transpired in the last financial year was the slump sale/demerger of the retail business from Heritage Foods. This decision to restructure the organisation was in line with the need to focus all the more on the dairy segment. With the sales from the value-added segment really picking up in the last few years, we felt a decisive and focused strategy for dairy and its byproducts would help create sustainable wealth for stakeholders. Following this restructuring, two entities have emerged under the Company's banner, each

55 The acquisition of Reliance Dairy allows us to make the most of the established brand names of Dairy Life and Dairy Pure along with giving us access to five new states.

focused on their individual areas of operations. Going forward, this will allow each business entity to be evaluated on its own merit and enable the respective managements to take a long-term view in capitalising on opportunities.

Q: How is the Company planning to strengthen its dairy farmer base?

N Bhuvaneswari: Strengthening our farmer's base has been an ongoing process. We undertake some key initiatives which strengthen our farmer relationship, some of them being:

Making timely and accurate payments to our dairy farmers: This has been our measurement of milk motto since inception and we have stuck to this unswervingly this far. Consequently, Heritage Foods payment policy is being considered as benchmark in the industry.

Facilitating dairy farmers with the required financing: Since lack of adequate institutional credit has been the single

biggest factor hindering sectoral development, Heritage Foods facilitates tie-ups with banks to provide farmers with access to credit for buying cattle.

Going the extra mile: Additionally, we mitigate risks by offering cattle insurance and strive to reduce overheads by providing cattle feed at subsidised rates.

Giving dairy farmers the respect they deserve: We have always believed that the farmers have been the kingpin behind our success. Hence, they have consistently been treated as members of the Heritage family.

N Brahmani: To add to the above, at Heritage the entirety of our milk is sourced directly from 0.3 million dairy farmers from villages across 7 states. While this is arduous, the benefits are innumerable. Direct sourcing ensures better control over the quality of the milk procured. It also ensures that the benefits are directly passed on to the stakeholders. Looking ahead, we intend to cement our identity as the best supporter of the Indian dairy farmer.

Q. How are you planning to ramp up capacity and reinforce your infrastructural platform?

N Brahmani: As a company we definitely want to be a pan-India player by riding on the booming demand for value- added products. We would continue to grow organically by leveraging the brand equity of Heritage. The acquisition of Reliance Dairy allows us to make the most of the established brand names of Dairy Life and Dairy Pure along with giving us access to five new states.

The bedrock of the procurement process involves creating a seamless chain of cold storage networks and milk collection centres. Over the past 25 years, we have done precisely that, and more. We have made concerted efforts towards guaranteeing qualitative consistency capability at different stages. At the processing level, it's not just about building capacity but also improving our processing excellence.

Last but not the least, there's packaging which is critical towards heightening sales by grabbing the customer's attention effectively. Consequently, we have made farsighted, front-end investments in building a franchise network and building a smooth cold chain network. The logic behind this approach is that if we build a strong supply chain then the quality of our products will be good enough to drive sales.

Q: What initiatives were undertaken by the Company to expand its network?

N Bhuvaneswari: At Heritage Foods, we recognise that the packaged dairy products segment is marked by extensive under-penetration. Therefore, our principal challenge lies in widening our market coverage. In view of this, we increased the number of distributors in a number of markets. This deep coverage is expected to garner higher revenues for the Company from 2017-18 onwards.

Q: What are your plans for the future?

N Bhuvaneswari: Our mission revolves around becoming a ₹ 6,000 crore company by 2022. We are looking to ramp up the share of value-added products from 24% to 40% during the same period and expecting to clock a CAGR growth rate of around 25% in the next five years to reach the revenue target. This is because the EBIDTA margin for milk is only half of that of value-added products (8% versus 16%). Over the next five years, we also plan to set up five processing plants each entailing an investment of ₹20 crore - ₹30 crore, which would enable the Company to handle 30 Lakhs litres of milk per day by 2022 as against 18.90 Lakhs litres at present.

N Brahmani: We will not only continue to consolidate our operations but also look for any relevant acquisition opportunities that come our way. Thus, our expansion plans will leverage both organic and inorganic means. Overall, we will also focus on boosting our extant capacity utilisation levels, which will allow us to rake in incremental annual revenues in the years ahead. We also plan to introduce a new range of beverage offerings to bolster the portfolio of value-added products.

ACQUISITION OF DAIRY BUSINESS OF RELIANCE RETAIL - OUR PAN INDIA STRATEGY

In our endeavour to emerge as a leading national player of dairy products, the acquisition of Reliance Retail is a key moment in corporate journey. There are some key reasons which make this acquisition a logical extension to our business model:

- We get direct access to North India (which we were absent until now) in states like Punjab, Uttarakhand, Himachal Pradesh, Haryana and Rajasthan.
- We add another 2 lakhs litres per day of procurement capacity (that's almost 15% addition to our existing capacity) with excellent infrastructure
- We add to our portfolio their existing two brands 'Dairy Life' and 'Dairy Pure'.
- Some of their procurement units are within 200 kms to Delhi NCR market (a large and growing dairy market) a winwin situation to supply fresh milk to the end user
- We add 1.5 lakhs households across five states and widen our consumer base

RRL operates a pan India dairy procurement, processing and distribution platform under two brands 'Dairy Life' and 'Dairy Pure' with wide variety of products such as packaged milk, flavored milk, butter, ghee, curd, dairy whitener, sweets and skimmed milk powder. This acquisition augurs well for your company as it gives new opportunities in states like Punjab, Uttarakhand and Rajasthan where your company is not present and strong synergies in markets like Mumbai and Delhi-NCR where your company already commenced its operation.

Milk Production & Consumption in India: India has come a long way since the milk-deficit days to becoming the world's largest producer as well as consumer of milk. Globally, the EU, India and the United States are currently the largest milk and dairy product producers and consumers. These countries account for 20.3%, 18.3% and 11.9% shares respectively in global dairy production.

There are two structural themes that are expected to pan out in the Indian dairy industry owing to favourable demographics which will drive multi-year growth in the industry. The tailwinds arising with the shift from 'unorganized' to 'organized' market and consumer up gradation from 'pouch milk/ powders' to 'value-added dairy products' (VADP) will provide strong growth opportunities.

In India, the unorganized segment comprising of 'local vendors' and 'self-consumption' commands a lion's share of 80% by value. The organized segment is divided between 'cooperatives' and 'private dairy companies'. The share of organized segment has gradually inched up from 16.7% in FY10 to 20.7% in FY17.

Shift from raw milk/ milk powders to Value Added Dairy Products (VADP): Raw milk, skimmed milk powders (SMP) and dairy whiteners (DW) are classified as traditional commodities with low margin dairy products. However, with rising disposable incomes and bourgeoning proportion of working women, there will be greater consumption of branded VADP like cheese, table butter, flavoured milk, UHT milk, shrikhand, paneer, buttermilk, etc.

Your Company procures 1.03mn litres of milk daily from 3 lakh farmers across 8 states which are chilled in 144 bulk coolers and further processed and packaged in 15 packaging plants. 90% of milk is directly procured from farmers which ensures greater consistency in milk quality and consistency in supply. The Financial statements are prepared in accordance with accounting principles generally accepted in India, including the Accounting Standards notified under the Companies Act, 2013 ("the Act") read with Section 133 of the Companies Act, 2013. Your Management accepts responsibility for the integrity and objectivity of the financial statements, as well as for the various estimates and judgments used therein. These estimates and judgments relating to financial statements are prudently made to reflect in a true and fair manner the form and substance of transactions. This also enables in reasonably presenting the Company's state of affairs and profits and cash flows for the year ended March 31st, 2017.

ECONOMY OVERVIEW

The India's Economic performance in 2016-17 has moderated as shown in the Economic Survey. The Economic growth is expected to revive in 2017-18 with the expected normalization in the economy as the cash crunch eases. This is indicative of the relative stability of the economy. There has been an improvement in the government's fiscal management in 2016-17 aided by the buoyancy in revenue collections.

INDUSTRY STRUCTURE AND DEVELOPMENTS

The Indian dairy industry is one of the fastest growing dairy segments across the world and it is also a dependable pillar of the Indian economy. It catalyses India's economic growth through large rural and semi-urban employment opportunities, creating an alternative livelihood means for millions otherwise dependant on monsoon-reliant agriculture. The success of this national industry has been driven by the integration of milk collection, transportation, processing and the distribution networks.

India is the world's largest consumer of dairy products, consuming almost 100% of its own milk production. Dairy products are a major source of economical and nutritious food to millions of Indians and the main source of protein for the large vegetarian segment of the Indian population.

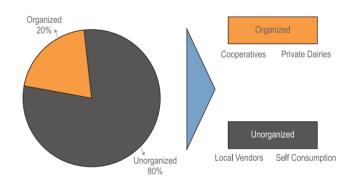

In India, milk consumption mainly consists of buffalo milk at 49% followed by cow milk at 48%. However, cow milk is growing at a faster pace than buffalo milk due to its lower fat content and is

expected to account for a majority of the total milk consumed in line with the trend in developed nations.

Opportunities in Indian Dairy Industry: There are two structural themes that are expected to pan out in the Indian dairy industry owing to favourable demographics which will drive growth in the industry. The tailwinds arising with the shift from 'unorganized' to 'organized' market and consumer up gradation from 'pouch milk/ powders' to 'value-added dairy products' (VAP) will provide strong growth opportunities.

Shift from Unorganized to Organized Market: In India, the unorganized segment comprising of 'local vendors' and 'self-consumption' commands a lion's share of 80% by value. The organized segment is divided between 'cooperatives' and 'private dairy companies.

Structure of Dairy Industry in India - Largely Unorganized

Source: Emkay Research

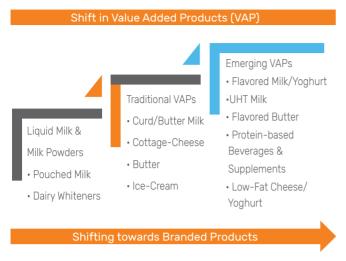

The organized segment is expected to grow at a CAGR of 19.5% over 2015-20, and account for ~25.5% of the Indian dairy industry by 2020. The unorganized segment is expected to grow at a CAGR of 13.2% during the same period and is expected to account for 74.5% of the total Indian dairy industry by 2020.

Organized segment growth to outpace that of unorganized segment

Shift from raw milk/ milk powders to Value Added Dairy Products (VADP)

Raw milk, skimmed milk powders (SMP) and dairy whiteners (DW) are classified as traditional commodity-like low margin dairy products. However, with rising disposable incomes and bourgeoning proportion of working women, there will be greater consumption of ready-to-eat, branded VADP like cheese, table butter, flavored milk, UHT milk, shrikhand, paneer, buttermilk, etc. VADP – The New White Renaissance

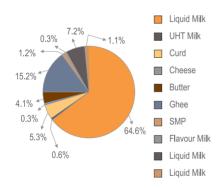

Source: Emkay Research

Owing to conventional dietary habits, around 65% of milk is consumed in the liquid form while ghee is the second largest consumed dairy product having a 15% share of the dairy market. Traditional value added dairy products like paneer, curd and butter, together constitute 32% of India's total dairy market. The emerging VADP account for a meagre 2.3% of the total dairy industry.

As your Company celebrate Silver Jubilee of its business operations, your company is getting into a consolidation mode both in the dairy and retail space so that Company can focus on its strengths and grow to the next level.

On the dairy front, your company have grown by leaps and bounds since inception. From a milk procurement level of 20,000 liters per day, today your Company have crossed 1 Million liters per day mark. Your Company had also successfully forayed into value added products and have established an enviable position in curd, butter milk, paneer, and flavoured milk segments.

The dairy business of RRL does a milk procurement of about 2.25 lakh liters per day. The move strengthens not only in distribution but also milk procurement levels too. This apart, the acquisition gives an opportunity to add five new states to the fold are Punjab, Haryana, Himachal, Uttarakhand and Raiasthan.

Yet another consolidation that has happened during the year that has gone by is in the Retail space. All the assets and liabilities of four business verticals (Retail, Agri, Bakery, and VetCa) have been transferred as a slump sale (on a going concern basis) to Heritage Food Retail Limited (HFRL), a wholly owned subsidiary and subsequently HFRL shall transfer three business verticals (Retail, Agri, and Bakery) to Future Retail Ltd (FRL) by way of demerger. All the above two process has consolidated through the Composite Scheme of Arrangment..

ANNEXURE - B TO THE AUDITORS' REPORT

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of Heritage Foods Limited ("the Company") as of 31 March 2017 in conjunction with our audit of the standalone financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ('ICAI').

These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Date: May 25, 2017

Place: Hyderabad

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether

adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company: (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31 March 2017, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

Annexure to the Auditors' Report

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

In conjunction with our audit of the consolidated financial statements of the Company as of and for the year ended 31 March 2017, we have audited the internal financial controls over financial reporting of Heritage Foods Limited ("the Holding Company"), its subsidiary companies and its associate company which are companies incorporated in India, as of that date.

Management's Responsibility for Internal Financial Controls

The Respective Board of Directors of the Holding Company, its subsidiary companies and its associate company, which are companies incorporated in India, are responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ("ICAI"). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the "Guidance Note") issued by ICAI and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that

- (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;
- (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and
- (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate

because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Audit of Internal Financial Controls Over Financial Reporting issued by the ICAI.

Opinion

In our opinion, the Holding Company, its subsidiary companies and its associate company, which are companies incorporated in India, have, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31 March 2017, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on
