During the year under review, the Company entered into a Composite Scheme of Arrangement including amalgamation and demerger ('the Scheme') between the Company and its two wholly owned subsidiaries, Anusha Investments Limited (AIL) and Sundaram Investment Limited (SIL) and their respective shareholders (the Scheme).

The Scheme was approved by the equity shareholders of the respective companies at the Court convened meetings held on 18<sup>th</sup> May 2012.

The Hon'ble High Court of Madras sanctioned the Scheme without any modification as approved by the shareholders by its order dated 3<sup>rd</sup> August 2012 and it was filed with the Registrar of Companies, Chennai on 21<sup>st</sup> August 2012 i.e., the Effective Date.

This increase in the authorised share capital of the Company as approved by the shareholders in terms of the Scheme, has been sanctioned by the Hon'ble High Court of Madras.

With effect from the Appointed Date, viz., 7<sup>th</sup> July 2011, the entire non-automotive business of SCL comprising of the investments and current assets relating to traded goods as has been indicated under the heading non-automotive business in the annual reports of the Company in the earlier years got demerged from the Company and transferred and vested or deemed to have been transferred and vested into SIL as a going concern and have been recorded in the books of SCL at their respective book values satisfying the ingredients of Section 2(19AA) of the Income Tax Act, 1961, on demerger.

The board of directors of the Company do not recommend any further dividend for the year under consideration.

### 4. PERFORMANCE

The year 2011 witnessed volatile economic developments that were marked by large swings in investor sentiment alongwith, fluctuating oil and commodity prices. Continuing crisis of confidence in the Eurozone and the first ever downgrading of US treasury securities had significant impact on the global economic growth. There was a beginning of slowdown in growth in emerging markets combined with volatility in currency rates and commodity prices. Overall there was a slowing trend in the global economy in 2011.

India's economy grew at its weakest pace in recent years and ended up with GDP growth of 6.5%. The main reason for the slowdown was sharp contraction in growth in manufacturing.

During 2011, GDP in US grew by 1.7% as against 3% in 2010. (Source: FTR). GDP growth in the European Union was at 1.5% in 2011 compared to 2% in 2010 (Source: Eurostat / IMF)

In this background, North American class 8 truck segment witnessed a growth of 65% (Source FTR). Similarly, the Europe medium and heavy trucks witnessed a growth of 37% (Source ACEA).

## 5. MANAGEMENT DISCUSSION AND ANALYSIS REPORT

### I. Industry Structure and Development:

#### Domestic

The Indian economy, grew by 8.6% in FY 2010-11 but began showing signs of softening in second half of FY 2010-11. This was mainly due

to inflationary pressures and monetary policy that was targeted at controlling this.

India's GDP growth declined to 6.5% in FY2011-12, with GDP growth in Q4 of FY 2011-12 at 5.3%. (CSO).The Industrial growth (IIP) decelerated from 8.2% in FY 2010-11 to 2.8% in FY2011-12. Inflation continued to remain at higher levels with Wholesale Price Index (WPI) at 8.8% during FY12 compared to 9.6% in the previous year.

Indian currency was adversely affected by higher crude oil prices, lower net capital inflows and lower export growth in the last six months of the FY2011-12 figures. The global oil prices continued to remain above US\$85 per barrel for FY2012 and were above US\$100 per barrel for large part of the year. Such high energy costs had put severe pressure on operating margins.

The unfavorable macroeconomic conditions and higher interest rates had a significant impact on the growth of the automotive industry. Further, sharp increases in petrol prices adversely impacted growth of vehicles sales. As a result, the Indian auto industry grew at a moderate rate of 7.2% in FY 2011-12, with 20% growth in Commercial Vehicles (M&HCV & LCV) and 5% growth in Passenger Vehicles.

Category	2010-11 Nos.	2011-12 Nos.	Growth %
Medium and Heavy Commercial Vehicles (M & HCV)	3,51,229	3,76,618	7
Light Commercial Vehicles (LCV)	3,99,225	5,25,577	32
Buses - M & HCV	57,539	58,704	2
Cars & MUVs (Multi Utility Vehicles)	29,73,296	31,29,250	5
Two wheelers	1,33,24,714	1,53,82,967	15

### Exports

The US economy has recovered more favourably than other mature economies since the economic downturn. However, with falling GDP growth and rising unemployment, the position remains fragile.

The Euro debt crisis intensified over the course of 2011. The economic situation and the results of the recent national elections in a few member countries have increased uncertainty around the stability of the Euro zone. Credit continues to be difficult to obtain for customers and the outlook remains volatile.

The following table highlights the North American and Europe truck industry production figures in vehicle units.

Market	Category	2011	2010	Growth%
North America	Class 8 Trucks	254,727	153,969	65%
North America	Class 4-7 Trucks	129,488	95,782	35%
Europe	Medium & Heavy trucks	236,063	172,080	37%

### II. Business outlook and overview

Going forward, growth expected to remain moderate in 2012-13 unless substantive policy measures are undertaken to boost investment sentiments. Administrative obstacles and the practical halt to

## Sundaram-Clayton Limited

implementation of key structural reforms have acted as a serious constraint on growth. It has also had a negative impact on sentiments of domestic businesses as well as on the investors, both domestic and foreign.

The three major concerns would be high inflation, high current account deficit and fiscal consolidation.

In view of weakness in foreign investment inflow and deteriorating macroeconomic conditions, the rupee continues to depreciate and likely to be above Rs.53 per dollar during 2012-13.

### III. Opportunities & Threats

The Company supplies raw aluminium castings and machined castings for the commercial vehicle, passenger car and two wheeler segments of the automotive industry.

In the medium to long term, the projected growth of the domestic auto industry, the ambitious export plans of OEMs and increase in sourcing of components by Global OEMs are likely to benefit the Company.

In view of stringent emission norms, more and more global customers are going for light weight metals resulting in increasing aluminium content per vehicle. This provides growth opportunities since the Company is already a preferred source for aluminium castings to major customers in India and abroad.

Our country is continuing to emerge as one of the major hub for global manufacturing because of lower input costs, availability of talent and local supplier base. The Company is perfectly placed to leverage the above and continue pursuing international business.

However, many Indian die casting companies and new manufacturers are continuing to either set up new capacities or expanding existing capacities to cater to this new demand, resulting in increased competition in the future.

OEM customers across the world are continuing their pressure on price reduction from their suppliers and the Company also will have to pass on some of the productivity benefits in the form of annual price reductions.

The Company's supply contracts provide for periodic price adjustments indexed to the international prices of aluminum and this should offer some protection from volatility of commodity prices.

### IV. Risks and concerns

#### Economy

In the short term, the instability in global economic recovery is continuing to be a major concern. Apart from the political unrest in some countries, tight monetary stance, volatile crude and commodity prices in international markets are expected to impact Indian economy significantly.

More than 40% of revenues come from the US and Europe. Global market uncertainties remain cause of concern and any slowdown or delay in recovery of US and European economies would adversely affect the Company's revenues.

Any failure of monsoon would trigger further inflation and increase of interest rates. Hardening of interest rates and fuel prices will have adverse impact on sales of the automobiles in domestic industry. It will have negative impact on margins of the Company owing to volume reduction and increased interest and energy cost.

#### Industry specific

The Company caters to the requirements of the automotive industry. The revenue of the Company is largely dependent on global commercial vehicle industry. WTO, Free Trade Agreements and other similar policies could make the market, less competitive for local manufacturers.

The Indian commercial vehicle Industry has strong correlation with the economy of the country and is cyclical. The Company has placed itself as one of the important suppliers to passenger cars and two wheelers industry also to minimize the impact of this risk.

Competition has increased significantly in the Indian market due to entry of new players and expansion plans of existing ones. The Company is aware of the increasing competition and is taking measures to remain competitive in the market place.

Power crisis continues to be a cause of concern in the State of Tamil Nadu. This will have a negative effect on operating margin of the Company. The Company is resorting to purchase of power from alternate sources and captive power generation using diesel generators to meet the shortfall.

#### Sourcing

While the Company continues to pursue cost reduction initiatives, increase in price of input materials could impact the Company's profitability to the extent that the same are not compensated by customers. However, no shortage of aluminium is expected.

#### Forex

With significant exports & foreign currency liabilities, the Company is always exposed to global currency fluctuations. However, the Company has a well-defined forex hedging policy to mitigate the risks.

#### Contractual

The stipulation and requirements of the automobile industry demands high quality products. Quality is, therefore, key and monitored closely. Although every reasonable precaution is taken, defects may lead to incurring considerable expenses for rework or product recall in rare cases. Appropriate recall and product liability insurance in line with standard industry practice have been taken to minimize the risks. Just-in-time delivery is another important contractual obligation. The Company may incur premium freights to overcome delays in deliveries due to quality issues or project implementation delays. Robust quality and project management systems are in place to minimize these risks.

#### Capacity utilization

The Company continuously steps up capacities to meet the projected demand of customers. The capacity utilization will be adversely affected if the programs of the customers are delayed or postponed. The Company closely monitors the progress of customer projects to minimize the risk of under-utilization of capacities.

### V. Internal control system and their adequacy

The Company has effective and adequate internal control systems covering all areas of operations. The internal control system provides for well documented policies / guidelines, authorisations and approval procedures. The internal control system stipulates a reasonable assurance with regard to maintaining of proper accounting controls, protecting assets from unapproved use and compliance of statutes.

The Company, through its own Internal Audit Department, carries out periodic audits at all locations and functions based on the plan approved by the Audit Committee. The observations, arising out of audit, are

In terms of this policy, the Company has carried out the verification last during the year 2010-2011. The next verification of assets is planned to be undertaken shortly. In our opinion, the interval is reasonable having regard to the size of the Company and the nature of its assets.

- (ii) (a) The inventory other than overseas inventory has been physically verified at reasonable intervals during the year by the management. In our opinion, the frequency of such verification is adequate. In respect of inventory with third parties, which have not been physically verified, there is a process of obtaining confirmation from such parties.

- (b) In our opinion, the rate of interest and other terms and conditions on which such loans and advances are made are not prima facie prejudicial to the interest of the Company.
- (c) The loan amount of Rs.1485 lakhs along with the interest thereon was recovered by the Company on 3<sup>rd</sup> April, 2012.

Current investments are carried at lower of cost or realisable value determined on individual basis. Long term investments are carried at cost. Provision for diminution in value, if any, is made to recognise a decline other than temporary in the value of investments.

Investment in TVS Shriram Growth Fund, Scheme 1 of TVS Capital Funds Limited, Chennai viz., 97,443 units are carried at par value of Rs.1000/- per unit aggregating to Rs.974.43 lakhs. However, the Fund has declared its Net Asset Value as at 31<sup>st</sup> March 2012 at Rs.943/- per unit. Thus there is a diminution in value to the extent of Rs.57/- per unit aggregating to Rs.55.54 lakhs. This diminution is not provided for in the accounts as the management opines that the portfolio is relatively younger in its investment horizon of 4-5 years with life of the Fund of 7 years with returns commencing from year 4 onwards and hence the fall in value is only temporary. This opinion is based on the fact that the fund returns will start to rise steeply and the growth fund will make positive returns soon.
