(a) **Current Tax**

Current income tax is measured at the amount expected to be paid to the tax authorities in accordance with the Income Tax Act, 1961 enacted in India and tax laws prevailing in the respective tax jurisdictions where the company operates. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date.

(b) **Deferred Tax**

Deferred tax is measured based on the tax rates and the tax laws enacted or substantively enacted at the balance sheet date. Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred tax assets and deferred tax liabilities relate to the taxes on income levied by same governing taxation laws. Deferred tax assets are recognised only to the extent that there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realised. In situations where the company has unabsorbed depreciation or carry forward tax losses, all deferred tax assets are recognized only if there is virtual certainty supported by convincing evidence that they can be realized against future taxable profits.

At each balance sheet date the Company re-assesses unrecognized deferred tax assets. It recognises unrecognized deferred tax assets to the extent that it has become reasonably certain or virtually certain, as the case may be that sufficient future taxable income will be available against which such deferred tax assets can be realised.

The carrying amount of deferred tax assets are reviewed at each balance sheet date. The company writes-down the carrying amount of a deferred tax asset to the extent that it is no longer reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available against which deferred tax asset can be realised. (b) **Operating Lease**

Leases other than finance lease, are operating lease, and the leased assets are not recognized on the Company's balance sheet. Payments under operating lease are recognized in the Profit and Loss Account as per the term of lease.

2.13 Earnings per Share

The earnings considered in ascertaining the company's EPS comprise the Net Profit or Loss for the period after tax. The basic EPS is computed on the basis of weighted average number of equity shares outstanding during the year. The number of shares for computation of diluted EPS comprises of weighted average numbers of equity shares considered for deriving basic EPS and also the weighted average numbers of equity shares, which could be issued on the conversion of all dilutive potential equity shares. Dilutive potential equity shares are deemed converted as of the beginning of the year unless they are issued at a later date. The diluted potential equity shares are adjusted for the proceeds receivable assuming that the shares are actually issued at fair value. The number of shares and potentially dilutive shares are adjusted for share splits/reverse share splits (consolidation of shares) and bonus shares, as appropriate.

2.14 Provisions, Contingent liabilities and Contingent assets

A provision is recognized when there is a present obligation as a result of past event and it is probable that an outflow of resources will be required to settle the obligation, in respect of which a reliable estimate can be made. Provisions are not discounted to its present value and are determined based on best estimate required to settle the obligation, at the balance sheet date. These are reviewed at each balance sheet date and adjusted to reflect the current best estimates. Contingent liabilities are not recognized in the financial statements but disclosure of the same is made in notes to accounts. A contingent asset is neither recognized nor disclosed in the financial statement.
