FINANCIAL AND OPERATIONAL REVIEW

The financial data for the current year should not be compared with the previous year (2011-2012) as there was an exceptional income of Rs. 2779.98 Lacs from the non business items. Although the current years figures are influenced by lower economic growth, persistent high inflation, global economic slow down and high fiscal deficit which have significantly impacted domestic industrial production, foreign investment inflows and overall market sentiments yet the current year results have a little improvement in the reduction of operational loss. The emerged industrial structure of our unit is financially challenging. The increasing cost and decreasing revenue has badly effected the profitability and cost competitiveness.

REHABILITATION OF THE COMPANY UNDER THE AEGIS OF BIFR:

The OA (SASF) has submitted the Revised DRS to the Hon'ble BIFR. The examination of the DRS by the office of the BIFR is still under process & thereafter It shall be circulated as per laid down procedure of BIFR.

FUTURE PROSPECTS OF THE COMPANY:

We can foresee the coming public private investments in the infrastructure sector to drive out the slowed down Indian economy. The structure of our industry has a positive co-relation with the growth of infrastructure. The channelization of scarce resources for the development activities carrying, storage, circulation and distribution of scarce natural water to alternative uses is on the preferred agenda for the economic development of the country. From this, we have reason to deduce that our industry has a good future inspite of present slow down by domestic and global factors.

MANAGEMENT DISCUSSION AND ANALYSIS REPORT :

The company's assessment performance for the period ended 31.03.2013 and the outlook for the current year are based on the current environment and business situation. However, unforeseen circumstances and those arising from external factors could affect the performance and the results.

(i) Industry Structure and Business Overview:

Infrastructure is the key driver of the Steel Tubes Industry. Liberalization scenario promoted competition and acceptability of the products of the industry which was a net exporter before the international recession. At present, our industrial unit, given its technology, scale of production and location, mainly operates in the Northern region of the country and supply its products to small and medium contracts which are related to water carriage schemes. Fiscal incentives and transport charges are the main external economies to face competition at the location from big players.

(ii) Opportunities and Threats:

India has emerged as one of the largest steel producers in the world. However, the per capita consumption of steel in India is still low as compared to developed countries, providing huge opportunity for growth.

The Company remains alert and updated on the latest technology and product development processes and best practices applied in the area of business risks to control and mitigate the risk of intense market competitive pressure and product liability risks.

(iii) Segment-wise Performance:

The Company has business activity within a single primary business segment viz " Longitudinal & Helical Pipes" and is a single geographical segment.

(iv) Financial & Operational Performance**Financial Highlights**
