MANAGEMENT DISCUSSION AND ANALYSIS REPORT

A. INDUSTRY STRUCTURE AND DEVELOPMENT:

The socks and accessories market in India has grown tremendously over the past 6 years. This has led to various opportunities as well and created a huge market for accessories in India. Metros have the largest business potential at the moment, because of the increasing demand of products influenced by global trends and styles as well as the global brand penetration in the Indian fashion industry. The next wave of growth in this industry will be seen in the tier I and II markets; where brands have achieved significant awareness but limited availability. The sock and accessories being the unorganized and fragmented sector the entire industry size and figures cannot be estimated. Although, Indian socks and accessories market is still customizing and nurturing, socks are graduating from a simple accessory to a more sophisticated product largely supported by continued innovations.

The Indian textiles industry is set for strong growth, buoyed by strong domestic consumption as well as export demand.

Fashion Trends in the India are evolving at a faster pace. Socks have come to become an integral part of the daily clothing as well as a fashion statement. Textiles and apparels exported from India consume mainly indigenous inputs and are, therefore, big earners of net foreign exchange. This helps the country reduce its current account deficit.

B. OPPORTUNITIES AND THREATS:

Your Company is well poised to seize opportunities available in the sock knitting industry on account of its state-of-the-art production facilities, technical expertise, good quality culture and emphasis on product innovation and growth potential.. We feel that socks are such a versatile accessory that brings innovation into, it is inevitable progression. The demand for socks has been increasing gradually for the last few decades particularly in India and other developing countries. The flow of orders has been progressively increasing with each passing year. As there are large and potential Domestic and International Market available, your Company has an opportunity to widen production base, with increasing turnover, which will result in economies of scale and advance processing capabilities. Market is gradually shifting towards Branded Readymade Garment and due to greater Investment and FDI opportunities availability your Company is expected to grow at a high rate with huge demand creation in the market.

With the era of domination of the world's textiles, including hosiery items, originating in China, decreasing slowly, the base is shifting to India and other Emerging/Developing Countries. This augurs well for Indian Companies in the textile and hosiery sector. Continuous Quality improvement is need of the hour as there are different demand patterns all over the world, to balance the demand and supply, to make balance between price and quality, changing consumer preferences, locational disadvantage, and geographical disadvantages. Continuation of these adverse factors will result into potential threats to our industry.

C. SEGMENT-WISE OR PRODUCT WISE PERFORMANCE:

The Company has one segment activity namely socks, in line with the definition of "segment" as per Accounting Standard 17 issued by the Institute of Chartered Accountants of India. The performance of the Company is discussed separately in the Directors' Report.

D. OUTLOOK:

The Business will continue to focus on increasing the premium and fashion quotient of its offerings on the basis of a deep understanding of consumer preferences and delivering products of world-class quality. Further investments are being made in to enhance reach and accessibility to its target audience, enhancing product vitality, improving supply chain responsiveness and delivering superior customer service to delight the customer with better quality product.

Expectations are high, prospects are bright, but capitalizing on the new emerging opportunities will be a challenge for the socks manufacturing Companies. The Company's Socks Division is optimistic of growth through continued network expansion and innovation.

The industrial relations remained cordial throughout the year. The employees of the Company have extended a very productive co-operation in the efforts of the management to carry the Company to greater heights. Continuous training down the line is a normal feature in the Company to upgrade the skills and knowledge of the employees and workmen of the Company.

H. CAUTIONARY STATEMENT:

Statements in the Management Discussion and Analysis describing the Company's objectives, projections, estimates, expectations may be 'forward-looking statements' within the meaning of applicable securities laws and regulations. Actual results could differ materially from those expressed or implied. Important factors that could make a difference to the company's operations include economic conditions affecting demand/supply and price conditions in the domestic and overseas markets in which the Company operates, changes in the Government regulations, tax laws and other statutes and other incidental factors.

F. RISK'S AND CONCERNS:

The Indian cotton textile sector that has not been faring quite well for the past few years could see some stability in the current financial year as per the report by India Ratings and Research. The sector is expected to maintain an overall stable outlook led by stable spinning margins in the cotton yarn segment, range-bound cotton prices and favorable domestic and export demand. However, the outlook for cotton yarn exporters is negative due to a slowdown in demand for yarn particularly from China, leading to softer yarn realizations and lower capacity utilization. Last year the EBITDA margins for the textile firms were affected after a 20 per cent decline in cotton prices. As a result inventory held by the textile firms too saw lower profit margins. In the current financial year the margins could recover in the range of 10-13 per cent, the report said. Currently India has a small share in the global textile trade. Industry trackers say that India is well positioned to gain from weak input prices and growing demand for apparels. It is also expected that the outlook for the synthetic textile sector shall revise for financial year 2016 from 'negative to stable'. Unfavorable cotton-polyester staple fibre spreads have hurt substitution demand for synthetic fibres and synthetic yarn. Lower export competitiveness of Indian synthetic yarn also contributes to the subdued outlook as import and central excise duty continue on man-made fibres.
