MANAGEMENT DISCUSSION AND ANALYSIS REPORT

1) Industry Structure & Developments and Outlook

India possesses world's most competitive gems and jewellery market due to its low cost of production and availability of skilled labor. As per the research report "Indian Gems and Jewellery Market Forecast to 2013", highly skilled and low cost manpower, along with strong Government support in the form of incentives and establishments of SEZs, have been major drivers for the Indian gems and jewellery market. Presently, although, Indian market is highly fragmented, it is rapidly transforming into an organized sector.

Gems and jewellery form an integral part of Indian tradition. A legacy passed from one generation to another. The components of jewellery include not only traditional gold but also diamond & platinum accompanied by a variety of precious and semi-precious stones. In India, the gems and jewellery industry has been growing at a good pace and it accounted for 14% of India's total merchandise exports in 2011-2012. India is also world's largest diamond processing (cutting and polishing) country with an 80 percent share in world market.

Worldwide diamond jewellery retail sales came to \$70.8 billion. The market share of America in diamond consumption was reduced to 38 percent from well over 40 percent last year. The other major traditional market, Japan, declined further to merely 8 percent share. In a neck-to-neck race to be the second-largest diamond-consuming nation is India, with 12 percent market share, followed by China (mainland) with 11 percent. Amongst other markets, Hong Kong accounts for 2 percent.

Neogem India Limited is engaged in manufacturing and export of gold studded jewellery. It has a well-equipped manufacturing facility with technically advanced machines to carry out production efficiently. Our skilled workforce is trained to deliver high quality products of international standards. We commit ourselves to offer the best and look forward to developing long-term business relationships.
