The Lack of strategy and structure to aggregate technologies

In order to counter the above the Company addressed key questions such as
How do we sustain interest among OEM's to engage in every stage of development, validation and commercialization?

How do we engage OEM'S from convergent disciplines to

engage in collaborative development and translational validation?

How do we make "go" / "no go" decisions for validated technologies?

The Company has already adapted best technologies in the manufacturing processes and the same shall continue to be upgraded with time.

The Company's engineering centre at Gurgaon with modern Testing and Validation Equipments has facilitated undertaking various validation tests for the auto control cables and Gear Shifters produced by the Company. REPORT ON MANAGEMENT DISCUSSION AND ANALYSIS

1. BUSINESS OVERVIEW:

In the Financial Year 2016-17, the auto industry continued the growth momentum from the Financial Year 2015-16, which was a turnaround year for the Indian Automotive industry. Passenger Vehicle (PV) and Two Wheeler (2W) segments reported the highest ever sales, with PV sales crossing the three million mark and the 2W sales crossing the 17 million mark. The CV industry grew 4.2% with the LCV 2-3.5T (PU segment) posting the highest ever sales of 0.2 million and taking 29% share of total CV industry. However, the MHCV segment remained flat at a volume of 0.3 million.

The Indian auto industry is one of the largest in the world. The industry accounts for 7.1 per cent of the country's Gross Domestic Product (GDP). In April-March 2016, overall automobile exports grew by 1.91 per cent. Passenger Vehicle (PV), Commercial Vehicles (CV), and Two Wheelers (2W) registered a growth of 5.24 per cent, 16.97 per cent, and 0.97 per cent respectively in April-March 2016 over April-March 2015. The sales of PVs, CVs and 2Ws grew by 9.17 per cent, 3.03 per cent and 8.29 per cent respectively, during the period April-January 2017. In addition, several initiatives by the Government of India and the major automobile players in the Indian market are expected to make India a leader in the 2W and Four Wheeler (4W) market in the world by 2020.

The Government of India plans to introduce a new Green Urban Transport Scheme with a central assistance of about Rs 25,000 crore (US\$ 3.75 billion), aimed at boosting the growth of urban transport along low carbon path for

substantial reduction in pollution, and providing a framework for funding urban mobility projects at National, State and City level with minimum recourse to budgetary support by encouraging innovative financing of projects. Government of India aims to make automobiles manufacturing the main driver of 'Make in India' initiative, as it expects passenger vehicles market to triple to 9.4 million units by 2026, as highlighted in the Auto Mission Plan (AMP) 2016-26. The Government plans to promote eco-friendly cars in the country i.e. CNG based vehicle, hybrid vehicle, and electric vehicle and also made mandatory of 5 per cent ethanol blending in petrol. The government has formulated a Scheme for Faster Adoption and Manufacturing of Electric and Hybrid Vehicles in India, under the National Electric Mobility Mission 2020 to encourage the progressive induction of reliable, affordable and efficient electric and hybrid vehicles in the country. The Government of India encourages foreign investment in the automobile sector and allows 100 per cent FDI under the automatic route. However while there are encouraging signs, the policy of your Company will remain cautious and thoughtful.

2. INDUSTRY STRUCTURE & DEVELOPMENTS.

In spite of the challenges, the domestic automobile industry should perform well in view of expected increase in Government's budget for infrastructure, building national highways and widening of roads at cities and rural areas too. Increasing foreign investments under 'Make in India' may provide better employment opportunities with higher pay scales. This should not only increase the purchasing power of the public, but should also result in higher GDP and overall economic growth of the Country.

3. OPPORTUNITIES AND THREATS

Opportunities

All major global automotive OEMs as well as Tier 1 and Tier 2 companies are making their presence felt in India. Most of these companies are constantly trying to source requirements for their global operations from India. This offers an excellent opportunity to all auto component

suppliers who are well equipped to produce volumes with committed focus on product and system quality.

Positive approach and efforts on the part of the Central Government may generate fresh demand for the passenger and commercial vehicles and thereby the demand for the auto ancillaries.

Threats

Inflationary pressures may push up prices of all commodities besides impacting the cost of manufacturing. Steel products, Non Ferrous Metals, Engineering Plastics & Engineering Plastic & Rubber Components are some of the major raw material inputs of the company and though the steel prices have remained stable during the year, the other major raw material inputs like non ferrous metals, plastics and rubber have been rising constantly. It has always been difficult to pass on the increase in cost to the Company's customers in this hugely competitive market and hence the margins are constantly being squeezed. Recent decline in overall commodity prices at China, however may bring down the cost of raw materials for the Company.

High increase in cost of labor will have to be countered with increased automation and higher productivity. Higher automation will require major capital investment thereby increasing the interest cost.

Higher interest cost is another major threat. It not only slows down the growth of the Automobile Industry in general, but puts tremendous pressure on the profitability of the company.

Warranties, stoppages, and quality problems have to be monitored very carefully or else they could become major threat to the company's operations.

4. OUTLOOK

Despite the present slowdown in the economy, it is expected that the Indian automobile Industry as well as auto component industry will continue to grow once conditions improve.

5. RISK AND CONCERNS

A general slowdown in the economy coupled with rising costs which cannot be altogether passed on to the customers, puts continuous pressure on the margins of the company. Though power is not a major cost in the total manufacturing cost of the company, constantly rising power & fuel prices largely affect the overall inflation which results in overall increase in all input costs.

6. PRODUCT WISE BUSINESS REVIEW

During the year under review the Company produced 24.66 million Auto Control Cables as against 24.20 million in the previous year.

7. INTERNAL CONTROL SYSTEMS AND THEIR ADEQUACY.

The Company has adequate systems of internal control meant to ensure proper accounting controls, monitoring cost-cutting measures, efficiency of operation and protecting assets from their unauthorized use. The internal audit department of the company reviews control measures in the management of risks and opportunities and ensures adherence to operating guidelines and compliance with regard to regulatory and legal requirements.

The Company's budgetary control system aims to ensure adequate control on the expenditure. The management reviews the actual performance with reference to the predetermined norms and standard on monthly basis.

The Company has to work hard to maintain its market share without compromising on the quality of its products.

ANNEXURE B TO THE AUDITORS' REPORT**Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")**

We have audited the internal financial controls over financial reporting of **REMSONS INDUSTRIES LIMITED** ("the Company") as of 31 March 2017 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's Board of Directors are responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and issued by the Institute of Chartered Accountants of India.

Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the

company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31 March 2017, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.
