1. REVIEW OF OPERATIONS

The income from operation on during the year was Rs.35.49 Lakhs (Previous Year 60.84 Lakhs). The company's turnover has decreased by about 41.67% on largely due to less favourable performance in the 4th quarter of this financial year on account of difficult business conditions. The profits have decreased by 51.52% due to low level of operations.

2. OUTLOOK & PROSPECTS

This fiscal, the Global growth has remained moderate, with uneven prospects across the main countries and regions. According to World Economic Outlook (Update-April, 2015) the global economy is projected to grow at 3.5 percent in 2015. Although there have been signs of improvement in the growth rates in some of the advanced economies but the uncertainties largely loomed over the financial and capital markets due to the Eurozone crisis and possibility of fed interest rate hike. There has been a slower growth in emerging market and developing economies and concerns were raised in particular, about slow down in the Chinese Economy. In India, although the economy has registered a growth rate of about 7.3% in 2014-2015 but it is largely not reflected in some of the major indicators of growth giving rise to perceptions that probably a hike in the projected rate of growth might partially be attributable to changes in the method of computation brought about this year. For instance the Bank credit growth dropped to a 18-year low while deposit growth fell to a 19-year low in 2014-15 with fresh investment proposals from corporates drying up completely and projects announced in the past remaining stuck because of several issues. Credit growth would have been substantially lower had it not been for the smart pick-up in personal loans.

Also this fiscal a large number of corporate have showed up weak balance sheets, with an upsurge in gross as well as net NPAs creating stress upon the banking system, slow rate of growth in industrial production and massive fall in exports from India. Also, there have been dramatic declines in savings and investment ratios. The gross fixed capital formation declined from 33.6 percent in 2011-12 to 29.7 percent in 2013-14 while gross domestic savings declined from 33.9 percent to 30.6 percent. As per the Economic Survey 2015, "...The data show that private corporate investment increased robustly in 2013-14 which seems at odds with stressed balance sheets and the phenomenon of stalled projects"

However, the Indian economy has shown greater resilience to the euro-zone crisis due to looming uncertainties on account of possibility of Greek default. Also the financial markets and capital markets have shown greater degree of preparedness for the possible hike in federal interest rates in the USA.

According to the reports/data released by several international financial institutions and rating agencies, it has been estimated that India is poised to be the world's fastest growing economy outpacing China soon. Besides, the Indian Economy is going through a policy reform regime marked by several steps taken to streamline legal, taxation and economic and environmental policies/procedures. There are other factors such as drop in oil prices in the international market, decline in the inflation rates, fiscal consolidation and a more favourable balance of payments amongst others, which may help prepare a sound base for accelerated overall growth in India.

With the outlook for the economy improving, the Company sees growth opportunities for its business in the year ahead.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31ST MARCH, 2015**NOTE 1 : SIGNIFICANT ACCOUNTING POLICIES:****a) System of Accounting:**

The accounts have been prepared on the basis of historical cost convention and on the basis of a going concern, with revenues recognized and expenses accounted on accrual basis.

b) Revenue Recognition and Expenses:

All expenses and income to the extent payable or receivable respectively are accounted for on accrual basis.

c) Fixed Assets:

Fixed Assets are stated at cost, inclusive of incidental expenses, less accumulated depreciation and Lease Terminal Adjustment.

d) Depreciation:

Depreciation on fixed assets is provided on the Straight Line Method at the rates and in the manner prescribed in Schedule II to the Companies Act, 2013.

e) Valuation of Investments and Stock-in-trade:

- i) Long Term Investments are valued at cost. However, provision for diminution is made to recognize a decline, other than temporary, in the value of investments, such reduction being determined and made for each investment individually.
- ii) Current investments are valued at cost.

f) Retirement Benefits:

Defined Benefit Plans: The present value of the obligation under such plan, is determined based on an actuarial valuation using the Projected unit Credit Method. Actuarial gains and losses arising on such valuation are recognized immediately in the Profit & Loss Account. In Case of funded defined benefit plans, the fair value of the plan assets is reduced from the gross obligation under the defined benefit plans, to recognize the obligation on net basis.

g) Taxation:

Income-tax expense comprises current tax and deferred tax charge or credit. Provision for Current tax is made on the basis of assessable income at the tax rate applicable to the relevant assessment year. The deferred tax asset and deferred tax liability is calculated by applying tax rate and tax law that have been enacted or substantively enacted by the Balance sheet Date. Deferred tax assets arising mainly on account of brought forward losses and unabsorbed depreciation under tax laws, are recognised, only if there is a virtual certainty of its realisation, supported by Convincing evidence. Deferred tax assets on account of other timing differences are recognised only to the extent there is a reasonable certainty of its realisation. At each Balance sheet date, the carrying amount of deferred tax assets is reviewed to reassure realisation.

h) Impairment of Assets:

The carrying amounts of assets are reviewed at each balance sheet date if there is any indication of impairment based on internal / external factors. An asset is impaired when the carrying amount of the asset exceeds the recoverable amount. An impairment loss is charged to the profit and loss account in the year in which an asset is identified as impaired. An impairment loss recognized in prior accounting periods is reversed if there has been change in the estimate of the recoverable amount.

i) Borrowing Cost:

Borrowing Costs attributable to acquisition and construction of respective assets are capitalized as a part of the cost of such assets upto date when such asset is ready for its intended use. Other borrowing costs are charged to Profit & Loss Account.

j) Provision, Contingent Liabilities and Contingent Assets:

Provision are recognised for when the company has at present, legal or contractual obligation as a result of past events, only if it is probable that an outflow of resources embodying economic outgo or loss will be required and if the amount involved can be measured reliably.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31ST MARCH, 2015

Contingent liabilities being a possible obligation as a result of past events, the existence of which will be confirmed only by the occurrence or non occurrence of one or more future events not wholly in control of the company are not recognised in the accounts. The nature of such liabilities and an estimate of its financial effect are disclosed in notes to the Financial Statements.

Contingent assets are neither recognised nor disclosed in the financial statements.

k) Earnings Per Share:

The Company reports basic and diluted earnings per share (EPS) in accordance with the Accounting Standard 20 as specified in the Companies (Accounting Standard) Rules 2006 (as amended). The Basic EPS has been computed by dividing the income available to equity shareholders by the weighted average number of equity shares outstanding during the accounting year. The Diluted EPS has been computed using the weighted average number of equity shares and dilutive potential equity shares outstanding at the end of the year.

l) Current and Non-Current Classifications:

All the assets and liabilities have been classified as current or non-current as per the respective company's normal operating cycle and other criteria set out in Revised Schedule VI to the Companies Act, 1956. Based on the nature of activities and time between the activities performed and their subsequent realisation in cash or cash equivalents, the respective companies have ascertained their operating cycle for the purpose of current / non-current classification of assets and liabilities and the same is consolidated on a line-by-line basis.

m) Cash Flow Statement:**(i) Cash & Cash Equivalents (For the purpose of cash flow statement):**

Cash equivalents are short-term balances (with an original maturity of three months or less from the date of acquisition), highly liquid investments that are readily convertible into known amounts of cash and which are subject to insignificant risk of changes in value.

(ii) Cash Flow Statement:

Cash flows are reported using the indirect method, whereby profit / (loss) before extraordinary items and tax is adjusted for the effects of transactions of non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from regular revenue generating, financing and investing activities of the company are segregated.
