PERFORMANCE

Year 2015-16 encompassed mixed fortunes for the Indian economy. In the initial months it showed good prospects of growth but in the later part of the year it started showing gloomy signals for growth.

Persistently rising inflation started taking draconian shape that prompted RBI to take stern steps to check its impact on the economic growth of India. Interest rates started climbing upwards at almost every RBI policy meet. This in turn dampened the financial market sentiments. At the global scenario, US got into clutches of double-dip depression fears and Euro zone never could get out of the sovereign debt crisis as such. The uncertainty again started gripping the global financial market.

All these factors had adverse impact on the business environment in general and as a result the Company could not maintain its profitability.

MANAGEMENT DISCUSSION AND ANALYSIS REPORT

However in the year 2015-16 amidst the rising inflation, fluctuation in rate of interests, higher commodity prices and volatility in the global commodity markets dampened the overall outlook of several economies. Despite all these the Indian economy is still expected to grow at around 6%.
