A large English-speaking population with a vast workforce of educated and tech-savvy personnel is a boon for rapid and high growth of ITES. The manpower cost constitutes major ingredient of cost in ITES companies. The Cost effective manpower in ITES is required to increase profitability of ITES companies. In India, the manpower cost is a approximately one-tenth of what it is overseas. In India about 100,000 engineers graduate each year. These can be used in ITES for troubleshooting /technical support, as the salaries are comparatively lower than in Europe or the US. The Government of India has recognized the potential of IT enabled services and has taken positive steps by providing numerous incentives. The presence of most international technology vendors and solutions would enable creation of most advanced set-ups in this technology-intensive segment.

The Government of India in partnership with private infrastructure corporations is working on bringing all around development and providing robust infrastructure all over the nation in the field of Agriculture, Medical Transcription, Banking Payment Process, Call Centre and Back Office Operation etc. However, as the confidence level posed by international companies in Indian Market is soaring and attracting international companies to outsource their jobs to India.
