MANAGEMENT DISCUSSION AND ANALYSIS REPORT**Cautionary Statement**

The Management Discussion and Analysis Report may contain certain statements that might be considered forward looking. These statements are subject to certain risks and uncertainties. Actual results may differ materially from those expressed in the statement as important factors could influence Company's operations such as Government policies, economic development, political factors and such other factors beyond the control of the Company.

Overview and brief Background

Crafted to perform, USG Tech is more than a singular avenue for payment processing system, it represents the ambition to connect, the ability to integrate and the freedom to move beyond the hassles of prior systems. USG Tech was brought to life by individuals who imagine a seamless system that allows complete freedom and guarantees a greater performance capability.

Bringing together the merchants, banks, financial institutions, corporate companies and other modes of transaction activities on a singular platform, USG Tech is a one stop destination for a secure network for growth oriented services. Combining state-of-the-art technology with the ambition to streamline the business processes throughout the country, USG Tech equips businesses and organizations to stay in control of payment processing, point of sale systems, reward and loyalty programs and all other related business processes.

The multi-functional feature of USG Tech payment systems allow product manufacturers to stay linked to the traders, the banks to their customers, the government to the various trading points, the corporate houses to their branched processes and merchants to their customers.

Spread across multiple channels USG Tech's strategic solutions are capable of communicating across broadband, GPRS, Wi-Fi and dial-up along with supporting several third-party VAA's (Value Added Applications).

IT Industry Scenario

The IT Industry is facing major challenges and opportunities, and currently undergoing a metamorphosis. Protectionist policies arising out of a highly weakened economic environment, stringent visa regulations, intense competition amongst vendors, and emergence of other low cost destinations are challenging the current business models. Further, with the end of the tax holiday, application of MAT on SEZs and spiraling inflation, the industry has to literally reinvent itself in order to remain relevant and continue to provide the returns expected.

It had seen an increased preference for onshore locations and other lower cost centers in past year, primarily to tap into the local talent, as well as to provide customers with more options and stronger capabilities.

The next decade is expected to be vastly different from the previous one, in which business models will undergo transformation and new models will emerge. The labor arbitrage may not be sustainable beyond a few more years. The business model of the future will be driven by the need to change the profit per employee equation and increasingly bring in "non-linearity". Building capabilities in new technologies like smart computing, cloud computing, mobility and analytics, and investing in the creation of delivery accelerators and IP will enable vendors to rapidly deliver business-impacting solutions and value to their clients. To remain competitive and profitable, organisations must increase operational efficiencies, and reinvent and embrace new business models which will offer customers a transformed business proposition.

Financial Performance

"USG is a place for people to discover what's important, make it happen, share your progress."

The financial statements have been prepared in compliance with the requirements of the Companies Act, 1956, guidelines issued by the Securities and Exchange Board of India (SEBI) and the Generally Accepted Accounting Principles (GAAP) in India. Our Management accepts responsibility for the integrity and objectivity of these financial statements, as well as for the various estimates and judgments used therein. The estimates and judgments relating to the financial statements have been made on a prudent and reasonable basis, so that the financial statements reflect in a true and fair manner the form and substance of transactions, and reasonably present our state of affairs, profits and cash flows for the year.

During the year under review, the Company's Gross turnover reduced marginally from 2029.59 Lacs previous year to 644.88 Lacs current year. The main reason for fall in turnover is devotion of Company's all resources toward development software which resulted into drop in turnover. The Current years working resulted into a profit of Rs 3.36 Lacs has compared to Rs 26.78 Lacs in the immediately preceding previous year. Your Directors are putting in their best efforts to improve the performance of the Company.

As there is a substantial growth in IT Sector and Software Projects development, Your Directors are hopeful that in forthcoming years, Company will definitely perform up to the mark, achieve good profitability and Earning per share will be increased. On a generic note, given the current economic and industry environment, prospects in our business segments look attractive and we look forward to 2013-14 with sustained growth and excitement.

Opportunities Lying Ahead and our Outlook

As your Company keeps on exploring various avenues, your Management proposes to have a singular avenue for payment processing system, representing the ambition to connect, with an ability to integrate and the freedom to move beyond the hassles of prior systems. They imagine a seamless payment system that allows complete freedom and guarantees a greater performance capability.

Bringing together the merchants, banks, financial institutions, corporate companies and other modes of transaction activities on a singular platform, The Company will be one stop destination for a secure network for growth oriented services. Combining state-of-the-art technology with the ambition to streamline the business processes in throughout the country.

The multi-functional feature of the payment systems will allow product manufacturers to stay linked to the traders, the banks to their customers, the government to the various trading points, the corporate houses to their branched processes and merchants to their customers. However it is not our ability to connect trading processes that is revolutionary, it is our ability to provide you with a customized solution based on your objective and the instant software updates across all POS terminals in India that sets us apart.

It would help customers to stay in control of payment processing, point of sale systems, reward and loyalty programs and all other related processes. Spread across multiple channels the proposed strategic solutions are capable of communicating across broadband, GPRS, Wi-Fi and dial-up along with supporting several third-party VAA's (Value Added Applications).

The Management's mission is

"To eternally adapt, create & innovate to deliver an open payments processing platform that seamlessly integrates with banks, business systems and consumers. USG Tech's applications are built on state-of-art infrastructure and technology with one key ambition, to drive value for your business and for your customers"

Human resource / Industrial relations

Management is keen on following the best practices for attracting, retaining and enhancing human resources of the Company. The company's Industrial relations continued to be harmonious during the year under review. The Company continue to invest in people through various initiatives which enable the work force to meet out the production requirements and challenges related thereto and to infuse positive enthusiasm towards the organization.

Internal Control Systems and Adequacy

The Internal Control Systems and procedure are adequate and commensurate with the size of the Company. The company has implemented suitable controls on ongoing basis to assure that all resources are utilized optimally, financial transactions are reported with the accuracy and all applicable laws and regulations are strictly complied with.
