The debt-equity ratio of the Company has been worsening since the last couple of years. In the last financial year, the Company had raised a sum of Rs. 27.24 crores by way of a Rights Issue primarily to address this matter. However, inspite of such infusion, the debt-equity ratio has not improved.

Your Company has now received an offer from an investor subscribing to Cumulative Redeemable Non Convertible Preference Shares of Rs. 100/- each to the tune of Rs. 15 crores at a coupon rate of 9% for a term of 5 years, with an option to redeem the preference capital by the Company at any time after 18 months from the date of allotment. It is felt that by infusing preference capital, the Company will be able to repay part of its

unsecured loan and strengthen its net worth.

The Directors recommend the resolution appearing under the Item No. 8 of the accompanying Notice for your approval.

None of the Directors of the Company are deemed to be concerned or interested in the above mentioned resolution.

Item No. 9

The Company is engaged in the business of manufacture of premium cotton fabric and high end fashion printed fabric. In the course of its operations, the Company has incurred losses. The Company has now turned around and has started generating profits. However, the Company will not be in a position to declare dividend in the near future unless and until the entire debit balance in the Profit and Loss Account is completely wiped off.

Accordingly, the Company is now proposing to undertake a financial restructuring exercise whereby it is proposed that a sum of Rs. 41,58,73,807/- (Rupees Forty One Crores Fifty Eight Lacs Seventy Three Thousand Eight Hundred and Seven only) presently standing to the credit of the Securities Premium Account of the Company be utilized for adjusting the debit balance in Profit and Loss Account. The adjustment of the debit balance in the Profit and Loss Account against the balance lying to the credit of Securities Premium Account would result in clean up of the balance sheet of the Company and would also result in better presentation of the balance sheet of the Company.

The utilization of the Securities Premium Account in the above manner as permissible under Section 78 of the Companies Act, 1956 would have to be implemented through a Capital Reduction process under Sections 100 to 103 of the Companies Act, 1956 and is subject to the approval of the Hon'ble High Court of Judicature at Bombay. Article 46 of the Articles of Association of the Company permits utilization / reduction of balance in the Securities Premium Account.

The proposed restructuring will not cause any prejudice to the creditors of the Company since it does not involve any financial outlay / outgo on the part of the Company. For the sake of clarity, it is specified that the reduction of capital does not involve either the diminution of any liability in respect of unpaid capital or the payment to any shareholder of any paid up capital. The creditors of the Company are in no way affected by the proposed

reduction of the Securities Premium Account as there is no reduction in the amount payable to any of the creditors, no compromise or arrangement is contemplated with the creditors and there is no reduction in the security, which the creditors may have in the Company. Further, the proposed restructuring would not in any way adversely affect the ordinary operations of the Company or the ability of the Company to honor its commitments or to pay its debts in the ordinary course of business.

The above restructuring will have no impact on the shareholding pattern and the capital structure of the Company. The pre and post restructuring capital structure and shareholding pattern is as under:

Description	No. of Shares	
	Pre	Post
Promoters	2,32,07,635	2,32,07,635

MANAGEMENT DISCUSSION & ANALYSIS

Indian Textiles: Holding steady

Indian textiles, and indeed the broader economy, faced one of its biggest challenges last year thanks to the continuing fallout of the global economic slowdown. However, despite the tough market conditions, India's textile exports in 2009-10 increased by 1.9% as compared to the previous year.

Indian garment exports dropped by 2.6% to \$10.64 billion in 2009-10, compared to \$10.93 billion in the previous year. The last few months of 2009-10 saw a sharp increase in cotton and yarn prices, and this trend is only likely to intensify in the medium term.

Nevertheless, the future looks promising. The recent revival of demand in the EU and, particularly, the USA, holds promise for the India's textile exports, which are forecast to grow up to \$24 billion in 2010-11, up from an estimated \$20 billion in the 2009-10. Apart from established markets, exporters are also actively evaluating new markets such as Africa and Latin America.

Morarjee Textiles: Recovery on track

Reacting swiftly to the slowdown, Morarjee Textiles has adopted a result-driven strategy. This has resulted in the Company beating its previous year's performance. The company registered growth, both in terms of turnover and increase in PBIDT.

On a consolidated basis, total revenue increased by 3.7% from Rs. 327.8 crores to Rs. 340.1 crores. The year ended with a loss of Rs. 6.77 crores as against a loss of Rs. 47.66 crores in 2008-09.

On standalone basis, Morarjee Textiles Limited ended the year with a net loss of Rs. 3.75 crores as against a loss of Rs. 38.07 crores in 2008-09. Total revenue increased by 31.3%, from Rs. 199.4 crores to Rs. 261.9 crores.

PBIDT stood at Rs. 31.6 crores as against Rs. 0.9 crores loss in 2008-09.

There has been a significant improvement in the performance of the company. All our major export markets, such as the USA and Europe, registered a healthy increase in sales. We also entered several new markets such as Australia, Russia, Colombia and China for both the print & yarn dyed businesses.

On the other hand, focus on the domestic market has resulted in sales going up by 35% over the previous year. The company has particularly increased its focus on the Indian retail segment, where turnover grew by almost 48% over the previous year.

The company also upgraded its product range by introducing a super premium shirting fabric collection.

Integra Apparels: Consolidation

Total revenue at the garment business, *Integra Apparels*, fell by 22.8% to Rs. 73 crores due to difficult conditions in the global market. The company suffered a net loss due to pricing pressure. However, the loss was significantly reduced compared to the loss for the previous year.

The company began the process of consolidating its manufacturing facilities during the year in order to make optimum use of space and to save cost. The company has also improved its operational performance, which has seen several old customers showing renewed confidence and the addition of several prestigious new customers.

We expect a further improvement in operating performance of Integra in the coming year.

Just Textiles

During the year, *Just Textiles Limited* recorded a sales growth of 7.7%. The company has started contributing to Morarjee's consolidated sales and profitability, and we expect this trend to continue in the future.

Outlook

During the economic recession of 2008-09, there was a significant shift of textile and garment manufacturing to newly emerging or low cost countries, such as Vietnam and Bangladesh. Both these countries have witnessed significant acceleration in their exports, with a CAGR of over 16% over the last five years.

However, with India's strengths of an established cotton source and existing supply chain from spinning to garments, the outlook for the Indian textile and apparel industry remains cautiously optimistic.

Risks & Concerns

With cotton prices hovering at almost US\$0.92 per pound and fears that the price will persist or rise even higher

in the near future, some experts predict that textile manufacturers could shift to competing fibres such as polyester. The International Cotton Advisory Committee (ICAC) predicts that prices will average US\$0.89 per pound this year due to a number of factors:

- Low cotton stocks worldwide
- Export restrictions for some of the world's top cotton producers
- Recovering demand for textile and garments

The appreciating rupee could affect textile and garment exports.

Internal control systems & their adequacy

The Company has proper and adequate systems of Internal Control to ensure that all the assets are safeguarded from loss, damage or disposition. Checks & balances are in place to ensure that transactions are adequately authorised and recorded, and that they are reported correctly. The internal control system is further supplemented by a rigorous programme of internal audit conducted by an independent firm of chartered accountants.

The Board of Directors considers internal controls as adequate.

(i) Short Term Employee Benefits:

All employee benefits payable wholly within twelve months of rendering the service are classified as short term employee benefits and they are recognized in the period in which the employee renders the related service. The Company recognises the undiscounted amount of short term employee benefits expected to be paid in exchange for services rendered as a liability (accrued expense) after deducting any amount already paid.

(ii) Post-Employment Benefits:

(a) Defined contribution plans

Defined contribution plans are Government administered Provident Fund Scheme and Government administered Pension Fund Scheme for all employees and Superannuation scheme for eligible employees. The Company's contribution to defined contribution plans are recognized in the profit and loss account in the financial year to which they relate.

The interest to the beneficiaries every year is being notified by the Government.

(b) Defined benefit plans

(i) Defined benefit gratuity plan

The Company operates a defined benefit gratuity plan for employees.

The cost of providing defined benefits is determined using the Projected Unit Credit Method with actuarial valuations being carried out at each balance sheet date. Past service cost is recognized immediately to the extent that the benefits are already vested, else is amortised on a straight-line basis over the average period until the amended benefits become vested.

The defined benefit obligations recognized in the balance sheet represents the present value of the defined benefit obligation as adjusted for unrecognized actuarial gains and losses and unrecognized past service costs and as reduced by the fair value of plan assets, if applicable. Any defined benefit

asset (negative defined benefit obligations resulting from this calculation) is recognized representing the unrecognized past service cost plus the present value of available refunds and reductions in future contributions to the plan.

(iii) Other long term employee benefits

Entitlements to annual leave and sick leave are recognized when they accrue to employees. Sick leave can only be availed while annual leave can either be availed or encashed subject to a restriction on the maximum number of accumulation of leaves. The Company determines the liability for such accumulated leaves using the Projected Accrued Benefit Method with actuarial valuations being carried out at each balance sheet date.

10. Provision for Taxation

Income tax expense comprises of current tax (i.e. amount of tax for the period determined in accordance with the Income Tax Act, 1961), deferred tax charge or credit (reflecting the tax effects of timing differences between accounting income and taxable income for the period) and fringe benefit tax (computed in accordance with the relevant provisions of the Income tax Act, 1961).

The deferred tax charge or credit and the corresponding deferred tax liabilities or assets are recognized using the tax rates that have been enacted or substantively enacted by the balance sheet date.

Deferred tax assets are recognized only to the extent there is reasonable certainty that the assets can be realised in future; however, where there is unabsorbed depreciation or carry forward loss under taxation laws, deferred tax assets are recognized only if there is a virtual certainty of realisation of such assets. Deferred tax assets are reviewed as at each balance sheet date to reassess realisation.

11. Provisions and Contingencies

The company creates a provision when there exists a present obligation as a result of a past event that probably requires an outflow of resources and a reliable estimate can be made of the amount of the obligation. A disclosure for a contingent liability is made when there is a possible obligation or a present obligation that may, but probably will not require an outflow of resources. When there is a possible obligation or a present obligation in respect of which likelihood of outflow of resources is remote, no provision or disclosure is made.

12. Earnings per share

The basic and diluted earnings per share ("EPS") is computed by dividing the net profit after tax for the year by weighted average number of equity shares outstanding during the year.

13. Proposed Dividend

Dividend if any recommended by the Board of Directors is provided for in the accounts, pending approval at the Annual General Meeting.

The comparison of cost and net realisable value is made on an item-by-item basis. Damaged, unserviceable and inert stocks are suitably depreciated.
- b) In determining cost of raw materials, packing materials, traded goods, stores, spares and consumables, weighted average cost method is used. Past service cost is recognized immediately to the extent that the benefits are already vested, else is amortised on a straight-line basis over the average period until the amended benefits become vested.

The defined benefit obligations recognized in the balance sheet represents the present value of the defined benefit obligation as adjusted for unrecognized actuarial gains and losses and unrecognized past service costs, and as reduced by the fair value of plan assets, if applicable. Any defined benefit asset (negative defined benefit obligations resulting from this calculation) is recognized representing the unrecognized past service cost plus the present value of available refunds and reductions in future contributions to the plan.

Entitlements to annual leave and sick leave are recognized when they accrue to employees. Sick leave can only be availed while annual leave can either be availed or encashed subject to a restriction on the maximum number of accumulation of leaves. The deferred tax charge or credit and the corresponding deferred tax liabilities or assets are recognized using the tax rates that have been enacted or substantively enacted by the balance sheet date.

Deferred tax assets are recognized only to the extent there is reasonable certainty that the assets can be realised in future; however, where there is unabsorbed depreciation or carry forward loss under taxation laws, deferred tax assets are recognized only if there is a virtual certainty of realisation of such assets. Deferred tax assets are reviewed as at each balance sheet date to reassess realisation.

When there is a possible obligation or a present obligation in respect of which likelihood of outflow of resources is remote, no provision or disclosure is made.
