Chairman Message:

Dear Member,

I, welcome you to the 26th Annual General Meeting of Your Company.

We have come a long way since the Sub-Prime crises in the US economy, which has been steadily growing. The recent Federal Reserve forecast for 2015 upgrading growth from 3.0% to 3.2% as compared to 2.30% for the year 2014 have been extremely favorable. The continued steady growth in US economy will pave way for more outsourcing opportunities to emerging markets like India & China; two of the world strongest emerging markets.

HOVS will be moving ahead in emerging opportunities both in global and domestic markets alike and continue to deliver services by combining domain expertise and technology. We believe by leveraging our domain experience and significant presence in the rapidly growing health care services, banking and transaction processing services will provide good opportunity to enhance our business spread. The Company believes that such operational structure is fundamental to our value proposition for our future success.

Further, we are very optimistic about our investment made during 2011 via the merger of our indirect subsidiary HOV Services LLC with SOURCE CORP., whereby, HOVS owns 26.2 % of the combined entity called SourceHOV, a provider of end-to-end business process outsourcing solutions with highly customized services as well as specialized knowledge based processing and consulting solutions.

HOV Environment Solutions Private Limited (HOVESPL) is another portfolio company of HOVS, aiming to design and develop advanced solutions for erosion control, environment conservation and infrastructure construction projects. Since 2011, HOVESPL has been executing its project of building artificial reef at Mirya beach, Ratnagiri and at Cochin. Further, HOVESPL has been exploring new projects including prevention of soil erosion on the sideways of the highways in Bangalore and Chandigarh.

On behalf of Company's Board of Directors, I would like to acknowledge and appreciate each and every one of our HOVS family member for their relentless efforts and support.

Management Discussion and Analysis Report

Industry Overview-Business Process

The FY 2013-14 was a year where the Indian IT-BPM industry entirely accepted the changing business paradigms, and transformed its business models thoroughly to embark on the growth path of the future. The Decisive elections in India with new Government expected to strengthen the IT-BPM industry in the country.

The business world is rapidly changing, with socio-economic, business and technological megatrends presenting an altered business landscape, and creating significant new opportunities. Global boundaries are rapidly disappearing, and as a result competition for the same set of consumers is intensifying. Winners in this hyper competitive world are increasingly defined by their ability to go digital i.e., leverage data to the fullest to transform into innovative, responsive, agile, creative and customer focused organisations. Client, employee and partner demands are increasingly converging, resulting in new dynamics and in today's business environment, volatility is the new normal.

In FY2014, the Indian IT-BPM industry is estimated to account for revenues of USD 118 billion, with IT-BPM exports are estimated to cross USD 86 billion in FY2014, growing at 13 per cent. While US continues to be the largest geographic market for India, accounting for ~62 per cent, the highlight for the year was revival in demand from Europe, which grew at ~14 per cent in FY2014. BFSI continues to be the largest vertical segment, accounting for over 41 per cent of industry exports; however, emerging verticals such as retail, healthcare, utilities are estimated to grow faster.

At an estimated 1,910 billion, the IT-BPM domestic market is likely to grow by 9.7 per cent in FY2014, at the slowest pace in last 12 years. Slowing economic growth, inflation, rupee volatility, and looming national elections has created an uncertain environment and prompted delayed decision-making from customers, thus impacting IT spending. BPM services growth could be at 11.9 per cent in FY2014 boosted by demand from select customers reverting to outsourcing business process, especially from the BFSI, automotive and retail sectors

Coastal Erosion and Sea Habitat

The near shore water of India along the 8060 km coastline support lucrative fisheries contributing about 90% of the total marine fish landings of the country. The brackish water ecosystems comprises of 1.7 million hectare in the adjoining coastal zone. However, the same coastline is succumb to soil erosion and is critical to ecosystem of sea habitat. It endangers life of coastal habitat in the form of sea erosion on one end; it also is a source of sea food resource on the other end. Artificial reef installation addresses both these issues with ease. It curtails sea current much ahead of sea shore preventing soil erosion. In addition the high wave created due to reef installation attracts foreign tourists generating revenue to the state.

Soil erosion along road side

Soil erosion protection along the road is basically initiated by the state government on sporadic basis. One of the measures for preventing soil erosion along the road side is plugging of grass. Grasses plugged along the road side holds the soil on which it is grown thus preventing erosion. It also beautifies the stretch by making it greener.

Threats & Risks

- HOVS challenge is to leverage its domain experience and success in current markets it serves, to other rapidly growing markets where HOVS have significant presence.
- The anti-outsourcing legislation in US will impact Indian IT BPO industry at large as companies with significant percentage of visa holding employees will no longer be able to send those employees to work in their customer’s office. Visa fees would also be higher increasing service cost.
- The appreciation/depreciation of the Indian Rupee against the US Dollar can affect margins. The rising inflation and salaries along with high attrition among associates is a threat. This is planned to be offset with increased productivity and increased use of technology to reduce the dependence on manpower.
- Other global companies emerging in India, China and Mexico could have edge on cost factor, a threat by price and margin erosion. Competition from other developing Countries is also a threat. However, HOVS’ root in technology and adherence to existing and emerging standards, delivering the highest quality, global delivery platform enable HOVS to compete well against some deeply entrenched companies.
