13th Annual Report
2014-15

FIRST WINNER

Message from Managing Director

Global economy is not growing as expected. However, Indian economy is signaling some signs of recovery which is a positive factor. Due to substantial reduction in crude oil prices, there has been some relief from continuing high inflation which has led to adoption of easy monetary policy by Reserve Bank of India by reducing interest rates. It is expected that interest cost will decline in the near future leading to revival of investment in industry and infrastructure. With the new stable government at the centre which is committed to several reforms, our economy in the coming years should grow at a rapid pace.

During 2014-15, our Company had to face several challenges in terms of higher input costs and pressure on selling prices of almost all the products manufactured by the Company which are reflected in the results given in the Annual Report. The expected demand push did not happen and un-seasonal monsoon in many parts of the country has placed adverse pressure on consumer demand in general. With the new Government committed to the revival of business sentiments in the country, the outlook of the Company may remain stable.

I would like to extend my gratitude to all our stakeholders including the staff members and customers for their unstinted support in shaping the performance of the Company.

Thank You

Yours' Sincerely
Rinku Patodia

MANAGEMENT DISCUSSION AND ANALYSIS REPORT

Overall review of the economy

The year 2014-15 was challenging for the Indian Textile Industry. Relative to the year 2014, the outlook for advanced economies is improving in the year 2015, while growth in emerging market and developing economies is projected to be lower, primarily reflecting weaker prospects for some large emerging market economies and oil-exporting countries. Overall, global growth is projected to be 3.5% in the year 2015. In long term the demand for textile and clothing is on rise globally and the Indian market is in the forefront. Despite the weak sentiments which we have witnessed last year within India and globally, the Indian textile and clothing Industry is expected to continue to grow due to growing domestic market and the opportunities in the global market.

Industry Structure and Developments

Raw material costs have been increasing globally, coupled with a shortage of skilled workers. While a shift is taking place of textiles industries from China and Bangladesh to India, the industrial climate in India has also become adverse due to regular increases in input costs. Any further appreciation of the Rupee will adversely affect exports from India. Though the spinning industry has fared somewhat better those with a presence in weaving, processing or even composite businesses are facing the heat due to increases in input cost without being able to pass on such higher costs to customers as the market is simply unable to absorb the same.

Opportunities and Threats

The company mainly deals in trading and manufacturing of Textile Fabric. The company uses its consolidated resources for committing capital for its future business activities. Increasing operational efficiency and improvement in asset resolution has been the company's objective. The company will continue to search and pursue all new opportunities of growth. Improvement in capital adequacy and debt equity ratios, also raising new financial resources at competitive cost on a regular basis is extremely important for the company to be able to fully utilize the opportunities which come in future. Although, risk is an inevitable part of any business, your company's efforts are always directed towards earning maximum returns with minimum possible risk involved.

Opportunities:-

- Indian companies need to focus on Product Development.
- Increased use of CAD to develop designing capabilities.
- Government policy is favorable for textile Industries.
- The branded companies of the overseas market have entered Indian market.
- Investing in Trend forecasting to enable the growth of industry.

Threats:-

- Competition in the Domestic Market.
- Need to revamp consumer consciousness.
- Natural calamities beyond control.
- Under the new patent regime Indian Companies cannot duplicate the MNCs processes and procedures.
- General market competition especially from established Indian Companies and MNCs.
- Tackle Chinese Aggression over the International Market.

Segment wise Performance

Trading and manufacturing of Textile Fabric is the main business activity of your Company. Segment reporting as required under Accounting Standards-17 is not applicable as all the revenue income comes from a single segment.

Internal Control

The Company maintains a system of internal control, including suitable monitoring procedures and the adequacy of the same has been reported by its auditors in their report as required under the Companies (Auditor's Report) Order, 2015. The Internal Audit Department regularly conducts a review to assess the financial and operating controls of the Company. Any significant issue is required to be brought to the attention of the audit Committee of the board.

Human Resources/ Industrial Relations Front

The Company continues to have the cordial and harmonious relations with its employees and there has been no material development on the Human Resource/ Industrial Relations front during the year. The Company considers the quality of its human resources to be most important asset and constantly endeavors to attract and recruit best possible talent.
