ITEM NO. 6 & 7:

The Board of Directors of the Company proposes to consolidate the Equity Shares of the Company by which the face value of each equity share would be Rs. 10/- (Rupees Ten only). Accordingly, 1 (one) equity shares of face value of Rs. 2/- (Rupees Two only) each fully paid-up, of the Company existing on the Record Date shall stand consolidated into 1 (One) equity share of face value of Rs. 10/- (Rupee Ten only) each fully paid-up.

The Board considers that the proposed consolidation would benefit shareholders as follows:

Greater Investor Interest: The proposed share consolidation will result in a trading price that better reflects its maturity and also increase the profile of the Company amongst the institutional investors and the coverage of the Company amongst research houses and fund managers as the trading price per share is expected to be higher than the trading price per existing share.

No effect of Consolidation on the Shareholders' Funds: The proposed share consolidation will not involve payment to any shareholder of any paid-up capital of the Company, and has no effect on the shareholders' funds of the Company. Shareholders will not be required to make any payment to the Company in respect of the proposed share consolidation. Each consolidated share will rank *pari passu* in all respects with each other.

Stable market cap in the interest of shareholders: The proposed share consolidation will generally be beneficial to its Shareholders as it may serve to reduce the fluctuation in magnitude of the Company's market capitalization. This may, in turn, increase market interest in the shares and generally make the shares more attractive to investors.

Rationalization of the share capital of the Company: The proposed share consolidation will also rationalize the share capital of the Company by reducing the number of shares outstanding. As a result of the proposed share consolidation, there would be an immediate reduction in the number of shares. Hence, the Company shall benefit from easier management of a smaller number of shares. Further, it believes that overhead costs incurred on servicing the fragmented minority shareholding will be reduced significantly post consolidation.

No impact on dividend yield: The share consolidation will have no impact on the effective dividend yield of the Company's shares, all else being equal. The proposed consolidation of equity shares of the Company from Rs. 2/- (Rupees Two only) per equity share to Rs. 10/- (Rupee Ten only) per equity share, requires consequential amendment to the Memorandum of Association of the Company. Accordingly, Clause V of the Memorandum of Association is proposed to be altered in the manner set out in the Resolution at Item No. 7, to reflect the alteration in the authorized equity share capital of the Company as reproduced herewith:

V. The Share Capital of the company is Rs. 50,00,00,000/- (Rupees Fifty Crores only) divided into 5,00,00,000 (Five Crores) Equity Shares of Rs. 10/- each with the rights, privileges and conditions attaching thereto as are provided by the Articles of Association of the Company for the time being with power to increase or reduce the capital and to consolidate or to divide and sub-divide the shares into several classes and to attach thereto respectively such preferential, deferred qualified or special rights, privileges or conditions as may be determined by or and in accordance with the Articles of Association of the Company for the time being and to vary, modify or abrogate any such rights, privileges or conditions in such manner as may be for the time being permitted by the Articles of Association of the Company or the legislative provisions for the time being in force in that behalf.

The Record Date for the aforesaid consolidation of the equity shares will be fixed by the Board after the approval of the Members. On the record date all fractional entitlements resulting from the consolidation shall be aggregated into whole shares and the number of shares so arising shall be held by a trustee appointed by the Board who shall dispose off the said shares in the market at the best available price in one or more lots and the decision of the Trustee in this regard shall be final and binding to all concerned. The

Trustee shall hold the net sale proceeds of all such shares after deducting therefrom all costs, charges and expenses of such sale and shall thereafter distribute such sale proceeds to the members of the Company in proportion to their fractional entitlements.

The Board is of the opinion that the aforesaid resolutions for consolidation of 1 (One) equity shares of face value of Rs. 2/- (Rupees Two only) each fully paid-up of the Company into 1 (One) Equity Share of Rs. 10/- (Rupees Ten only) each fully paid-up and the consequent amendments to Clause V of the Memorandum of Association of the Company are in the best interest of the members and hence recommends the special resolution as set out at Item No. 6 and 7 of the Notice for your approval.

A copy of Memorandum of Association of the Company along with the proposed amendments is available for inspection for the members of the Company at the Registered Office of the Company on all working days between 11.00 a.m. to 1.00 p.m. upto Friday, 27th September, 2019.

None of the Directors or Key Managerial Personnel of the Company or their relatives are, in any way, concerned or interested, financially or otherwise, in the said resolution.

Additionally, India climbed 23 points in the World Bank's ease of doing business Index to 77th place, becoming the top ranked country in South Asia, raking in a more positive image for the country. The total FDI investments stood at ~\$33.50 Bn for April-December 2018. Interestingly, India overtook France in 2018 to become the world's 6th largest economy. It is now on its course to achieve 5th position from the United Kingdom this year on way to \$3 Tn GDP by 2020. Since 2000, India's share in the global economy has doubled from 1.5% to 3.2%. Per capita income is now nearing \$2,000, which is twice the level 10 years ago.

During the year, the Reserve Bank of India (RBI) took measures to ease the liquidity squeeze by injecting a total of ~`500 Bn in the month December 2018. Other regulatory measures such as increased concentration limits for banks' exposure and priority-lending norms were also taken in order to release pressure. During April 2019, the RBI further announced another `250 Bn liquidity injection through purchase of government securities. The purchase, called as open market operations (OMOs), will be undertaken in two equal tranches with the first one in May 2019. As per the RBI estimates, GDP growth for 2019-20 is projected at 7.2% – (6.8-7.1% in first half of 2019-20 and 7.3-7.4% in the second half). The assumptions are largely on the back of resilient private consumption, fillip from public spending in rural areas and an increase in disposable incomes of households due to tax benefits.

The Goods and Services Tax (GST) collection in March 2019 rose 15.6% from a year ago to hit `1.06 Tn, the highest since the new indirect tax system took effect on 1 July 2017. The GST mop-up for the whole of 2018-19 stands at `11.77 Tn. The revenue growth was observed, despite several rate cuts by the GST council during the year. The growth is a clear indication of expansion in manufacturing and consumption.

The Indian rupee has witnessed high volatility this year, falling nearly 14% between April to October 2018. The Indian currency had hit its all-time intra-day low of `74.45 against the US dollar on 11 October, 2018, making it one of the Asia's worst performers. The investors dumped the local currency in the wake of global developments such as strengthening of the US dollar, high commodity prices especially of crude oil, tighter monetary conditions in the US, coupled with domestic factors such as expanding current account deficit, inflationary pressures and likely fiscal slippages. Besides that, strong demand for the US currency from the importers and foreign fund outflows also weighed on rupee movement. Depreciation in rupee against the US dollar so far is at a five-year high. However in the later half of FY 2019, there were upward spiral signals indicating that the worst might be over for Asia's third-largest economy (for now). The recovery was largely on the ground of softening crude oil prices, sustained selling of the greenback by exporters and banks, and recovery in the Indian equity markets, giving impetus to the local currency.

The growth in the credit offload to different segments reflects the subsiding fear of NPAs in both private and public sector banks. Quicker turnaround in credit to NBFCs, despite the temporary liquidity crunch, speaks about the confidence the financial system has on India's key growing segments.

The Government of India's consistent monitoring of the economic progress and its proactiveness has been reflected through its implementation of various structural reforms

(Demonetisation, GST and RERA), Bankruptcy Code, ease of doing business and relaxation of FDI norms, among others. On the basis of an assessment of the current and evolving macroeconomic, the Monetary Policy Committee (MPC) decided to reduce the policy rate under the Liquidity Adjustment Facility (LAF) by 25 basis points from 6.5% to 6.25%, in February 2019.

This was further reduced by 25 basis points to 6% in April 2019. During the interim budget in February 2019, there was an enhanced focus on providing impetus to rural industrialization, aiding consumption growth and efforts to revive the ailing real estate sector in the coming years.

All these efforts are aimed towards improving financial liquidity, reducing public debt and maintaining controlled fiscal deficit to secure the economy's growth prospects. In the near term, fiscal consolidation will be further supported by strengthening goods and services tax compliance and further reducing subsidies. Driven by strong manufacturing-led industrial expansion and consumption demand from the private sector, coupled with strong consumption spurred by rising incomes, subdued inflation, and robust remittances should boost economic activity in India. According to the Asian Development Bank, India's growth is set to improve in FY 2020 surpassing a mark of 7.2%.

The Company's performance is highly depended on the functioning of different macro-economic parameters as stated above.

NBFC Industry Review

Current Scenario

The banking system has recorded a robust pace of annual loan growth at ~15% in 2018. The pick-up in the pace of bank credit has been driven by a sharp spike in retail loans and lending to NBFCs. The relative tightening of liquidity is resulting in an increase in the borrowing cost of alternative sources like commercial papers and debentures. This has made bank funding for NBFCs an important medium to maintain liquidity, leading to robust growth of lending to NBFCs at ~50% as of January 2019. Most NBFCs witnessed a 50-100 bps rise in incremental cost of market borrowings led by rising rates of CPs and NCDs and have reverted to bank borrowings to fuel growth.

NBFC's today account for more than one-third of incremental credit in India, and thus, play a vital role in the economy's growth. Over the past few years, NBFCs have been playing an important role in bridging the gap between organized and unorganized lending sphere. In fact, the 5-year CAGR for NBFC credit growth stands at 17.3% vs 10.4% for banks. As a result, the market share of NBFCs in the systemic credit space (non-food) has moved up from 13% in FY 2013 to 18% (excluding FIs and Government owned NBFCs) in FY 2018. If the Government-owned NBFCs are also included, the share of NBFC shot upto more than 25% in FY 2018.

Liquidity Crisis & Impact

The NBFC segment had a challenging fiscal. A liquidity crisis ensued when the NBFCs went on reckless credit expansion, without taking into account the asset-liability scenario. While some of them went bust and out of business in no time, and most others had to run helter-skelter seeking bail-out funds from investors.

As a consequence of this default, markets turned cautious on bond financing. Questions were raised on the ability of financial institutions in repaying their short-term commitments. This resulted in a sharp decline in usage of commercial papers, NCDs and other short-term money market instruments as a source of borrowing for NBFCs. A large proportion of borrowings suddenly moved to the banking sector, causing tightening of liquidity and a higher cost of funds. In fact, the gap between bank lending rates and the borrowing rates from the bond market narrowed considerably. According to the data collected by ICRA, the rates for commercial papers for highly-rated NBFCs were closer to 8%, while for others, it was above 9%. Additionally, this liquidity squeeze was accompanied by news of defaults of large corporate groups across various industries in India.

Regulatory changes

RBI has mandated certain policy measures in the recent past for the NBFC sector ranging from partial credit enhancement to harmonization and co-origination. This has been done to reinforce the view that the NBFCs are crucial for the economy. It also makes it clear that the regulator will keep on taking proactive measures to boost the confidence of the stakeholders in this sector. Even during the turbulent times witnessed in the third quarter, the RBI relaxed liquidity norms to ease the strain in the financial markets and allowed more bank lending to NBFCs.

Under the new Governor, the RBI recently released a dispensation that incentivises banks lending to NBFCs by easing liquidity norms. To counter the liquidity crunch, the incentives further extended as the RBI increased the

ceiling for lending to a single NBFC. Amid this evolving regulatory environment, NBFCs that already have a higher proportion of borrowings from the banking sector and strong asset-liability matches are expected to shine through, especially in the coming tenure of FY 2020.

Outlook

The last quarter of FY 2019 was tad better with improved liquidity for reputed NBFCs. While loan growth picked up in selected retail segments, there was a muted growth in the wholesale lending business. ICRA expects the credit growth to remain moderate at about 15-17% till H1 FY 2020 and revive only in H2 FY 2020. It is further expecting NBFC-retail credit to cross `10 Tn mark, depending on the improvement of liquidity.

According to the India Ratings and Research (Ind-Ra), NBFC space has a stable outlook, driven by their ability to pass on the rise in funding cost. Ind-Ra further believes that the recent liquidity crisis has given rise to funding challenges. This may prompt NBFCs to overhaul their balance sheets, at least partially, by replacing short-term borrowings with long-term funds. Ind-Ra also predicts some margin pressure for NBFCs, especially the wholesale focused ones, if RBI does increase the rates in FY 2020.

However, lending to the priority sector and social schemes are more likely to sustain their strong growth rates.

ANNEXURE B TO THE INDEPENDENT AUDITOR'S REPORT OF EVEN DATE ON THE STANDALONE FINANCIAL STATEMENTS OF ARNOLD HOLDINGS LIMITED**Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")**

We have audited the internal financial controls over financial reporting of ARNOLD HOLDINGS LIMITED ("the Company") as of March 31, 2019 in conjunction with our audit of the standalone financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's Management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditor's Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing as specified under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that;

1. Pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;

2. Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and
3. Provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2019, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

(b) Fair value hierarchy

To provide an indication about the reliability of the inputs used in determining fair value of financial instruments measured at amortised cost for which fair value is being disclosed, the company has classified these into the three levels prescribed under Ind AS 113, 'Fair value measurement'.

Fair values are categorised into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows.

Level 1: Level 1 hierarchy includes financial instruments measured using quoted prices.

Level 2: The fair value of financial instruments that are not traded in an active market is determined using valuation techniques which maximise the use of observable market data and rely as little as possible on entity specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

Level 3: If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3. The fair value of financial assets and liabilities included in Level 3 is determined in accordance with generally accepted pricing models based on discounted cash flow analysis using prices from observable current market transactions and dealer quotes of similar instruments.
