Annexures to Board's Report

Risk Management Policy And Strategy

Clause 49 of the Listing Agreement relating to Corporate Governance requires listed companies to institute risk management frame work comprising a process for riskassessment and minimization with roles and responsibilities for monitoring and reporting risks and controls.

This document therefore tries to identify the key events/ risk impacting the business objectives and attempts to develop risk policies and strategies to ensure timely evaluation, reporting and monitoring key business risks.

This Risk Management Policy will be evaluated and reviewed from time to time and requisite changes will be made to this document.

Our risk management approach is composed of mainly three components:

1. Risk Governance
2. Risk Identification
3. Risk Assessment and Control

1. Risk Governance:

- ✓ The Board is responsible for managing risk on various parameters, at the corporate level.
- ✓ The functional heads have to ensure implementation of the risk mitigation measures.

External and internal risk factors that must be managed are identified in the context of business objectives.

3. Risk Assessment and Control

This is composed of

- (a) Risk assessment and reporting
- (b) Risk control
- (c) Capability development

On a periodic basis risk due to external and internal factors are assessed by responsible managers across the organization. Norms aimed at limiting exposures are integral to this frame work. The risks are identified and formally reported through mechanism such as operation reviews and committee meetings. Internal control is exercised through policies and systems to ensure timely availability of information that facilitate pro-active risk management.

The first step for formulating Risk Management Policy is therefore to define the business objectives on various parameters. The business objectives of the Company can be enumerated as follows:

 - ✓ improve quality and productivity
 - ✓ control operations costs
- d) Organizational Development

- e) Growth
 - ✓ To diversify into new revenue streams

The risk factors which may impact the business objectives and measures to be taken for managing/mitigation these risks are:

- i. External Risk Factors
- ii. Internal Risk Factors

i. External Risk Factors

- ✓ Macro economic factors
- ✓ Exchange rate fluctuations
- ✓ Raw material price fluctuations
- ✓ Political environment

2.12	<p>Earnings per share</p> <p>Basic earnings per share is computed by dividing the profit / (loss) after tax (including the post tax effect of extraordinary items, if any) by the weighted average number of equity shares outstanding during the year. Diluted earnings per share is computed by dividing the profit / (loss) after tax (including the post tax effect of extraordinary items, if any) as adjusted for dividend, interest and other charges to expense or income relating to the dilutive potential equity shares, by the weighted average number of equity shares considered for deriving basic earnings per share and the weighted average number of equity shares which could have been issued on the conversion of all dilutive potential equity shares. Potential equity shares are deemed to be dilutive only if their conversion to equity shares would decrease the net profit per share from continuing ordinary operations. Potential dilutive equity shares are deemed to be converted as at the beginning of the period, unless they have been issued at a later date. The dilutive potential equity shares are adjusted for the proceeds receivable had the shares been actually issued at fair value (i.e. average market value of the outstanding shares).
