2. Inventories:

Dividend income is recognized when the shareholder's right to receive payment is established by the balance sheet date.

4. Depreciation on Fixed Assets:

Depreciation on Fixed Assets has been provided based on useful life assigned to each asset prescribed in accordance with Part - "C" of Schedule-II of the Companies Act, 2013.

5. Fixed Assets:

Fixed Assets are stated at cost less accumulated depreciation and impairment losses, if any. Cost comprises the purchase price and any attributable cost of bringing the asset to its working condition for its intended use.

6. Impairment of Assets:

- III. The carrying amounts of assets are reviewed at each balance sheet date if there is any indication of impairment based on internal/external factors. An impairment loss is recognized wherever the carrying amount of an asset exceeds its recoverable amount. The recoverable amount is the greater of the asset's net selling price and value in use. In assessing the value in use, the estimated future cash flows are discounted to their present value at the weighted average cost of capital.
- IV. After impairment, depreciation is provided on the revised carrying amount of the assets over its remaining useful life.

7. Investment:

In accordance with Accounting Standard (AS 13) on "Accounting for Investment" and the quidelines Issued by Reserve Bank of India, Investment are either classified as current or long term based on management's intention at the time of purchase. Investments that are readily realizable and intended to be held for not more than a year are classified as Current Investments. All other Investments are classified as non-Current / long term Investments. Current Investments are stated at lower of cost and market rate on an individual investment basis. Non-Current / Long term investments are considered 'at cost' on individual investment basis, unless there is a decline other than temporary in the value, in which case adequate provision is made against such diminution in the value of investments.

8. Earnings per share:

- > Earnings per share are calculated by dividing the net profit or loss for the year attributable to equity shareholders, by the weighted average number of equity shares outstanding during the year.
- > For the purpose of calculating diluted earnings per share, the net profit or loss for the year attributable to equity shareholders and weighted average number of shares outstanding during the year is adjusted for the effects of all dilutive potential equity shares.

9. Tax on Income:

Tax expenses comprises of current and deferred tax. Current income tax is measured at the amount expected to be paid to the tax authorities in accordance with the Indian Income Tax Act, 1961. This liability is calculated at the applicable tax rate or minimum alternate tax rate u/s 115JB of the Income Tax Act, 1961 as the case may be for current taxes on Income. Deferred income tax reflect the impact of timing differences between taxable income and accounting income for the year and reversal of timing differences of earlier years. Deferred tax is measured based on the tax laws enacted or substantively enacted at the balance sheet date.

Deferred Tax resulting from "timing difference" between book and taxable profit is accounted for using the tax rates and laws that have been enacted or substantially enacted as on the Balance Sheet date. Deferred tax assets are recognized only to the extent that there is a reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realized. Deferred tax assets are recognized on carry forward of unabsorbed depreciation and tax losses only if there is virtual certainty that such deferred tax assets can be realized against future taxable profit.

MAT credit is recognized as an asset only when and to the extent there is convincing evidence that the company will pay normal income tax during the specified period. In the year in which the Minimum Alternative Tax (MAT) credit becomes eligible to be recognized as an asset in accordance with the recommendations contained in guidance note issued by the Institute of Chartered Accountants of India, the said asset is created by way of a credit to the profit and loss account and shown as MAT Credit Entitlement. The Company reviews the same at each balance sheet date and writes down the carrying amount of MAT Credit Entitlement to the extent there is no longer convincing evidence to the effect that Company will pay normal income tax during the specified period.

NOTE - 1

SIGNIFICANT ACCOUNTING POLICY:

1. Basis of Accounting:

These financial statement have been prepared in accordance with the Generally Accepted Accounting Principles in India ('Indian GAAP') to comply with the Accounting Standards specified under Section 133 of the Companies Act, 2013, read with Rule 7 of the Companies (Accounts) Rules, 2014 and the relevant provisions of the Companies Act, 2013. The financial statements have been prepared under the historical cost convention on Accrual basis. The accounting policies adopted in the preparation of the financial statements are consistent with those followed in the previous year.

Further, the Company follows prudential norms for Income Recognition, assets classification and provisioning for Non-performing assets as well as contingency provision for Standard Assets as prescribed by the Reserve Bank of India (RBI) for Non-Banking Financial Companies.

2. Inventories:

Inventories of shares and other trading goods are valued at cost computed on FIFO Basis or fair value, which ever is lower.

3. Recognition of Income and Expenditure:

Income and expenditure are accounted for on accrual basis. Interest income is recognized on a time proportion basis taking into account the amount outstanding and the rate applicable. Dividend income is recognized when the shareholder's right to receive payment is established by the balance sheet date.

4. Depreciation on Fixed Assets:

Depreciation on Fixed Assets has been provided based on useful life assigned to each asset prescribed in accordance with Part - "C" of Schedule-II of the Companies Act, 2013.

5. Fixed Assets:

Fixed Assets are stated at cost less accumulated depreciation and impairment losses, if any. Cost comprises the purchase price and any attributable cost of bringing the asset to its working condition for its intended use.

6. Impairment of Assets:

- III. The carrying amounts of assets are reviewed at each balance sheet date if there is any indication of impairment based on internal/external factors. An impairment loss is recognized wherever the carrying amount of an asset exceeds its recoverable amount. The recoverable amount is the greater of the asset's net selling price and value in use. In assessing the value in use, the estimated future cash flows are discounted to their present value at the weighted average cost of capital.
- After impairment, depreciation is provided on the revised carrying amount of the assets IV. over its remaining useful life.

7. Investment:

In accordance with Accounting Standard (AS 13) on "Accounting for Investment" and the quidelines Issued by Reserve Bank of India, Investment are either classified as current or long term based on management's intention at the time of purchase. Investments that are readily realizable and intended to be held for not more than a year are classified as Current Investments. All other Investments are classified as non-Current / long term Investments. Current Investments are stated at lower of cost and market rate on an individual investment basis. Non-Current / Long term investments are considered 'at cost' on individual investment basis, unless there is a decline other than temporary in the value, in which case adequate provision is made against such diminution in the value of investments.

8. Earnings per share:

- > Earnings per share are calculated by dividing the net profit or loss for the year attributable to equity shareholders, by the weighted average number of equity shares outstanding during the year.
- > For the purpose of calculating diluted earnings per share, the net profit or loss for the year attributable to equity shareholders and weighted average number of shares outstanding during the year is adjusted for the effects of all dilutive potential equity shares.

9. Tax on Income:

Tax expenses comprises of current and deferred tax. Current income tax is measured at the amount expected to be paid to the tax authorities in accordance with the Indian Income Tax Act, 1961. This liability is calculated at the applicable tax rate or minimum alternate tax rate u/s 115JB of the Income Tax Act, 1961 as the case may be for current taxes on Income. Deferred income tax reflect the impact of timing differences between taxable income and accounting income for the year and reversal of timing differences of earlier years. Deferred tax is measured based on the tax laws enacted or substantively enacted at the balance sheet date.

Deferred Tax resulting from "timing difference" between book and taxable profit is accounted for using the tax rates and laws that have been enacted or substantially enacted as on the Balance Sheet date. Deferred tax assets are recognized only to the extent that there is a reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realized. Deferred tax assets are recognized on carry forward of unabsorbed depreciation and tax losses only if there is virtual certainty that such deferred tax assets can be realized against future taxable profit.

MAT credit is recognized as an asset only when and to the extent there is convincing evidence that the company will pay normal income tax during the specified period. In the year in which the Minimum Alternative Tax (MAT) credit becomes eligible to be recognized as an asset in accordance with the recommendations contained in guidance note issued by the Institute of Chartered Accountants of India, the said asset is created by way of a credit to the profit and loss account and shown as MAT Credit Entitlement. The Company reviews the same at each balance sheet date and writes down the carrying amount of MAT Credit Entitlement to the extent there is no longer convincing evidence to the effect that Company will pay normal income tax during the specified period.

10. Contingencies:

These are disclosed by way of notes on the Balance sheet. Provisions is made in the accounts in respect of those contingencies which are likely to materialize into liabilities after the year end , till the finalization of accounts and material effect on the position stated in the Balance Sheet .

11. Provisioning of Standard Assets:

Accordingly the Company has made provision @ 0.30% on Standard Assets in accordance therewith.
