MANAGEMENT DISCUSSION AND ANALYSIS REPORT

The Management Discussion and Analysis Report has to be read in conjunction with the Company's financial statements, covering overall performance and outlook of its activities which read as follows-

ECONOMY AND MARKETS

The global economy grew at a slightly faster pace in 2014, as a modest revival in the eurozone and a pickup in India helped offset slowdowns in China. According to the OECD, the combined gross domestic output of the largest G-20 economies expanded by 3.4% in 2014, up slightly from 3.2% in 2013. The G-20 accounted for about 90% of global economic output. The pickup was aided by a resurgence in the eurozone, where economic output rose by 0.9%, having contracted by 0.5% in 2013. Economic growth in the US remained flat, while China's rate of expansion slowed to 7.4% from 7.7%. India and the UK recorded significant pickups in economic growth, while Japan came to a grinding halt.

Global growth is projected to be 3.5% in 2015, in line with forecasts in the January 2015 World Economic Outlook update. Compared to last year, the outlook for advanced economies has improved, while growth in emerging markets and developing economies is projected to be lower, primarily reflecting weaker prospects for some large emerging markets and oil exporting countries.

Indian economy - Overview

The Indian economy grew at a rate of 7.3% during 2014-15 due to an improvement in the performance of both services as well as manufacturing sectors. The decline in inflation by over 6 percentage points since late 2013 and also reduction of current account deficit from a peak of 6.7% of the GDP in the third quarter of 2012-13 to about 1% in the current fiscal year has reasserted India's reputation as an attractive investment destination compared to other emerging countries.

Financial, real estate and professional services showed an improvement by registering a growth of 11.5% as against 7.9% in the previous fiscal. Also per capita income at current prices during 2014-15 rose by 9.2% to reach Rs. 87,748 as against Rs. 80,388 in the previous fiscal.

NBFCs in India

The year 2014-15 has been a tough year for the NBFCs on account of the subdued environment. NBFCs have steadily grown in number and have enhanced their market share, indicating the strength of their business models. The share of NBFCs has steadily grown from 10.7% of banking assets in 2009 to 14.3% in 2014, thus gaining systemic importance.

NBFCs have emerged as vital intermediaries and have competed strongly with banks and financial institutions. However, the last two years have been challenging for the NBFC sector with asset growth rates moderating, delinquencies rising and profits plummeting. However, ample capital adequacy, a shift towards secured lending and lowered ALM risks have helped the sector absorb cyclical stresses on asset quality and profitability.

The NBFC sector has been engaged in steady consolidation during the past few years and has been witness to weaker NBFCs gradually exiting, paving the way for a stronger sector. The number of NBFCs registered with the RBI went down to 12,134 in 2014 from 12,630 in 2010. However, the current decline in the number of registered NBFC is mainly due to cancellation of certificates of registration.

The financial statements of SFL are prepared in compliance with applicable provision of the Companies Act, 2013 and Generally Accepted Accounting Principles in India (GAAP). The Company has earned income in the form of interest and dividend. The Company will extend the business further through identification of promising investment opportunities, through leveraging its resources. Company

Nearly 100 percent of the operating profits were contributed by core businesses viz., lending, trading in securities and investments.

CAPABILITIES AND STRATEGY

Non-Banking Finance Companies (NBFCs) have become an integral part of the Country's financial system. NBFCs have emerged as lenders to both Corporates and Non-Corporates. Few NBFC Companies have upheld their position in this market. However, intense competition, dynamic environment, compliance framework and stricter regulations are forcing companies to change its framework. SFL is helping enterprises to rationalize and making business operationally efficient and remain cost competitive in market. SFL is in process of creating a separate niche in market.

The Company's strategy for long term profitable growth is based on continuous scaling and updated to its core businesses, while investing in new customers, services, markets and industries. The Company's strategy of strengthening the current business and investing in future revolves around:

- ▶ Customer centricity
- ▶ Proximity to client's location
- ▶ Transparent communication
- ▶ Flexible control systems

OPPORTUNITY AND THREATS

India is an attractive investment destination. With the innovative marketing strategies, the company is able to add new customers and retain existing clientele.

However due to continuing recession throughout world markets, a slowdown in financial flows into the economy, lingering impact of global credit crunch and also due to increased competition are seen as greatest risk faced by NBFCs. Further the volatility in the Indian equity markets and huge liquidity crunch due to global financial melt down would be a threat for the Company's business growth. The company has always maintained sufficient liquid funds so that their operations are not affected.

Constantly, sticking on to the traditional values and ethics and with the support of efficient and dedicated resources, we are able to phase out any difficulties in our area of operation.

RISKS AND CONCERNS

Sarvottam Finvest Ltd. is exposed to specific risks that are particular to its businesses and the environment within which it operates, which include market risk, interest rate volatility, economic cycle and risk of competition from others operating in similar business.

The company can be adversely affected by volatility in interest rates in India, which could cause its margins to decline and profitability to shrink. Earnings from interest income are one of the important businesses of the Company. It is therefore exposed to interest rate risk principally as a result of lending to its customers at interest rates, in amounts, and for periods which may differ from those of its funding sources. The company is hedged to some extent against this risk through the reset clause in its advances portfolio.
