MACRO - ECONOMIC SCENARIO

Indian Economy has placed heavy hopes on the newly elected government. At its core, India is facing a difficult economic situation on the growth, asset quality, inflation and fiscal deficit fronts. However, GDP growth is expected to recover slightly during the current fiscal year.

INDUSTRY OUTLOOK

The Indian financial sector consists of a wide variety of institutions which cater to different market segments. At the apex level are scheduled commercial banks which follow universal banking model. Next, there is the cooperative banking sector with two different strands. While the three Tier rural co-operative structure (State/District/grass root level outfits), takes care predominantly of agriculture and allied activities; the urban co-operative banking structure provides succor mainly to the small customers at the bottom of pyramid in urban areas. On the other hand, Non-Bank Financial Companies (NBFCs) are largely involved in serving those classes of borrowers who are generally excluded from the formal banking sector. However, progressively over the years, the exclusiveness between the banks and NBFCs has somewhat blurred. More recently, NBFCs are competing with banks in providing financial services such as infrastructure finance and housing finance among others. The NBFCs sector is undergoing a significant transformation at present and has come to be recognized as an important element of the financial system. The recent issues in financial sector have highlighted the necessity, importance and significant role, the NBFCs play in development of nation's infrastructure.

NBFCs can truly become game changers provided they exhibit the requisite nimbleness and innovative zeal in reaching a complete suite of financial products such as shares, mutual funds, depository services etc., as also insurance products – both life and non-life together with their current product offerings, to the common man.

In respect of MSMEs, NBFCs can become game changers by providing factoring and bill payment services which are of crucial importance at the present juncture of financial sector development. Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. NOTE NO. 1 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**1) Basis of Preparation of Financial Statements**

The financial statements of the company have been prepared in accordance with generally accepted accounting principles in India (Indian GAAP) to comply with the accounting standards specified under section 133 of the Companies Act, 2013, read with Rule 7 of the Companies (Accounts) Rules, 2014 and the relevant provisions of the Companies Act, 2013 and guidelines issued by the Reserve Bank of India ('RBI') as applicable to a Non Banking Finance Company. The financial statements have been prepared on an accrual basis and under the historical cost convention.

The accounting policies adopted in the preparation of financial statements are consistent with those of previous year

2) Use of Estimates

The preparation of financial statements in conformity with Indian GAAP requires the management to make judgments, estimates and assumptions that affect the reported amounts of revenue, expenses, assets and liabilities and the disclosure of contingent liabilities, at the end of the reporting period. Although these estimates are based on the management's best knowledge of current events and actions, uncertainty about these assumptions and estimates could result in the outcomes requiring a material adjustment to the carrying amounts of assets or liabilities in future periods.

3) Revenue Recognition

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the company and the revenue can be reliably measured. The following specific recognition criteria are met before revenue is recognized:

(a) Sale of Traded Goods

Sale of Traded Goods Revenue from sale of traded goods is recognized when all the significant risks and rewards of ownership of the traded goods have been passed to the buyer.

(b) Income from Consultancy service

Income from consultancy service are accounted for as and when the relevant services are rendered and revenue is recognized using completed service contract method except where the recovery is uncertain in which case it is accounted for on receipt.

(c) Interest

Interest income is recognized on a time proportion basis taking into account the amount outstanding and the applicable interest rate. Further, in accordance with the guidelines issued by the Reserve Bank of India for Non-Banking Finance Companies, income on business assets classified as Non-performing Assets, is also recognized on receipt basis.

4) Inventories

The inventories held as stock-in-trade under current assets are valued at lower of cost or market value.

5) Cash and Cash Equivalents

Cash and Cash Equivalents for the purposes of cash flow statement comprise cash at bank and in hand and short term investments with an original maturity of three months or less, as per Accounting Standard 3 “Cash Flows”.

6) Tangible Fixed Assets

Tangible Fixed Assets are stated at cost less accumulated depreciation and impairment losses, if any. The cost of fixed assets comprises purchase price and any attributable cost of bringing the asset to its working condition for its intended use.

7) Depreciation on Tangible Fixed Assets.

The Company has worked depreciation with reference to the Useful life of Fixed Assets prescribed by the PART C of Schedule II to the Act. The carrying values have been depreciated over the remaining useful life of the Asset using Written Down Value Method and the same is recognized in the Statement of Profit and Loss.

8) Employee Benefits

Provident fund is accounted for on actual basis.

9) Earnings Per Share

The Company reports basic and diluted earnings per share in accordance with Accounting Standard 20 – Earning per Share. Basic earnings per share are calculated by dividing the net profit or loss for the period attributable to equity shareholders (after deducting preference dividends and attributable taxes) by the weighted average number of equity shares outstanding during the period. Partly paid equity shares are treated as fraction of an equity share to the extent that they are entitled to participate in dividends relative to a fully paid equity share during the reporting period. The Weighted average number of equity shares outstanding during the period is adjusted for events such as bonus issue, bonus element in a rights issue, share split, and reverse share split (consolidation of shares) that have changed the number of equity shares outstanding, without a corresponding change in resources.

For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

10) Taxes on Income

Income tax expenses comprises of current tax (i.e. amount of tax for the period determined in accordance with the income-tax law) & the deferred tax charge or benefit (reflecting the tax effect of timing differences between accounting income and taxable income for the period).

The deferred tax charge or benefit and the corresponding deferred tax liabilities and assets are recognized using the tax rates that have been enacted or substantially enacted as at the balance sheet date. Deferred tax assets are recognized only to the extent there is reasonable certainty that the asset can be realized in future; however, where there is unabsorbed depreciation or carried

forward loss under taxation laws, deferred tax assets are recognized only if there is a virtual certainty of realization of the assets. Deferred tax assets are reviewed as at each balance sheet date and written down or written up to reflect the amount that is reasonable/virtually certain (as the case may be) to be realized.

11) Provisions

The company creates a provision when there is present obligation as a result of a past event that probably requires an outflow of resources and a reliable estimate can be made of the amounts of the obligation. Provisions are not discounted to their present value and are determined based on the best estimate required to settle the obligation at the reporting date. These estimates are reviewed at each reporting date and adjusted to reflect the current best estimates. If it is no longer probable that the outflow of resources would be required to settle the obligation, the provision is reversed.

12) Contingent Liabilities / Assets

A contingent liabilities is a possible obligation that arise from past events whose existence will be confirmed by the occurrence or non occurrence of one or more uncertain future events beyond the control of the company or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognized because it cannot be measured reliably. The company does not recognize a contingent liability but discloses its existence in the financial statements.

Contingent assets are not recognized in the financial statements. However contingent assets are assessed continually and if it is virtually certain that an economic benefit will rise, asset and related income are recognized in the period in which the change occurs.
