MANAGEMENT DISCUSSION AND ANALYSIS REPORT

This Management Discussion and Analysis Report addresses the expectations and Projections of the company for its future, about its Market Position, Market Development and Penetration, Expenditure, Financial Results, Risks and Concerns etc. However, the expectations shared herein are not limited to the Company' s Growth. The Company' s actual results, performance or achievements could differ from those shared herein.

Along with this noticeable acceleration in the growth rate of the Indian economy, India' s per capita income has increased at a rapid pace, levitating India into the middle-income category thus strengthening the economy even further from its roots. Simultaneously, the rising consumer demand has provided a further growth avenue for Indian firms making the domestic economy more robust.

However, while the long-term story remains positive, there are challenges in the short-term that will need to be addressed. These include high inflation, rising commodity prices, all time high oil prices, increasing fiscal deficits, global uncertainties and a variable domestic political scenario. However, given the structural shifts that have already taken place across the economy, we believe that we today stand on a strong foundation that will support sustained growth despite the short-term challenges that may emerge time and again.

On the other hand, our Management declares that, the financial statements have been prepared in compliance with the requirements of the Companies Act, 2013 guidelines issued by the Securities Exchange Board of India (SEBI) and the Generally Accepted Accounting Principles (GAAP) in India.

Capital Market

The Indian financial sector is demonstrating sustained momentum. In recent years, reforms in the equity capital markets including continuous strengthening of the regulatory environment by SEBI, market-determined prices and allocation of resources, screen-based nation-wide trading, T+2 settlement, scripless settlement and electronic transfer of securities, rolling settlement and derivatives trading have greatly improved the efficiency of trading and settlement. The industry is also becoming more vibrant, with new categories of products and services being offered to meet the needs of an emerging economy.

In addition, the growth of the economy and Indian corporations has coincided with a sharp increase in foreign direct investment, including significant participation from private equity firms, a marked increase in investment in the real estate sector, increasing M&A activity, strong equity IPO market and a growing demand for credit from both corporations and consumers. With it, there has been a proliferation in the presence of intermediaries such as investment banks and securities firms that closely monitor the performance of the markets and provide extensive fundamental and technical research on the economy, sectors and companies. All of this has contributed significantly to the growth of the Indian capital markets.

Equity Market

The equity market comprising Private Equity, Primary Offerings and Secondary Offerings has emerged as one of the most preferred mode of fund mobilization for India Inc. Real estate, infrastructure, banking and financial services were the dominant sectors attracting about 55% of the total private equity investments.

The Indian equity markets have witnessed a strong rally since 2003 with the benchmark BSE Sensex crossing the 21,000 mark in January 2008 from 12,500 in March 2007 setting a historical high. Though the markets have seen some correction since then, the underlying drivers for the market, viz. strong domestic economic growth and growing corporate profitability remain intact, leading to committed international and domestic investor interest.

Industry Overview

The Company with its full capacity is venturing in to the business of Investment. The Company is carrying out business of Investment & Financial Services and to invest in and acquire and hold and deal in Shares, stocks, debenture stocks, bonds, obligations and securities issued or guaranteed by any company constituted or carrying on business in India or elsewhere.

All our established businesses continued to grow well and the new businesses have secured a strong foundation. We believe that our presence in diverse lines of business across asset classes enables us to reduce risks arising market cyclicalities. We have built a diversified operating model where some of the services are naturally hedged against each other, limiting the impact of cyclical market movements, allowing us to be poised to deliver strong growth in improved market conditions.

Outlook

We continue to remain optimistic about the long-term India story and the opportunities that it will offer across sectors. The financial services sector is expected to grow rapidly in an expanding economic environment. However, in the short-term from time-to-time there will be challenges that will temper the outlook in the interim term. The economic environment and the capital markets in India have done extremely well over the last five years and some level of moderation is likely to take place in the short-term given the current macro-economic trends in both domestic and international markets.

Human Resources

The Company recognizes that its people have played a big role in making what the Company is today and therefore it accords top priority to attract and retain talent. The Company puts great emphasis on training and development of its employees to enhance efficiency. Meaning of Internal Financial Controls over Financial Reporting

A Company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A Company's internal financial control over financial reporting includes these policies and procedures that (1) pertain to the maintenance of records that, in reasonable detailed, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted principles, and that receipts and expenditures of the company are being made only in accordance with authorization of management and directors of the Company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company's assets that could have a material effect on the financial statements.

Inherent Limitation of Internal Financial Controls over Financial Reporting

Because of the inherent limitation of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, Projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31st, 2017, based on the internal control over financial reporting criteria established by the company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

TAXES ON INCOME:

Tax expense for the year comprises of current tax and deferred tax.

Income taxes are computed using the tax effect accounting method, where taxes are accrued in the same period in which the related revenue and expenses arise. A provision is made for income tax annually based on the tax liability computed, after considering tax allowances and exemptions. Provisions are recorded when it is estimated that a liability due to disallowances or other matters is probable. Minimum Alternate Tax (MAT) paid in accordance with the tax laws, which gives rise to future economic benefits in the form of adjustments of future income tax liability, is considered as an asset if there is convincing evidence that the Company will pay normal tax after the tax holiday period. Accordingly, it is recognized as an asset in the balance sheet when it is probable that the future economic benefit associated with it will flow to the Company and the asset can be measured reliably.

The differences that result between the profit considered for income taxes and the profit as per the financial statements are identified, and thereafter a deferred tax asset or deferred tax liability is recorded for timing differences, namely the differences that originate in one accounting period and reverse in another, based on the tax effect of the aggregate amount being considered. The tax effect is calculated on the accumulated timing differences at the end of the accounting period based on prevailing enacted or substantially enacted regulations. Deferred tax assets are recognized only if there is virtual certainty that they will be realized and are reviewed for the appropriateness of their respective carrying values at each balance.

PROVISIONS, CONTINGENT LIABILITIES AND CONTINGENT ASSETS:

The company creates the provisions where there is a present obligation as a result of past event that probably requires an outflow of resources and a reliable estimate can be made for the amount of the obligation.
