The Management’s views on the Company’s Performance and outlook are discussed below:

Economic Outlook:

Global growth has eased but remains robust and is projected to reach 3.1 percent in 2018. It is expected to edge down over the next two years as global slack dissipates, trade and investment moderate, and financing conditions tighten. Growth in advanced economies is forecast to decelerate toward potential rates as monetary policy is normalized and the effects of U.S. fiscal stimulus wane. In emerging market and developing economies (EMDEs), growth in commodity importers will remain strong, while the rebound in commodity exporters is projected to mature over the next two years. For the first time since 2010, the long-term (10-year-ahead) consensus forecast for global growth appears to have stabilized. Although this development could signal that the legacies of the global financial crisis are fading, past experience cautions that long-term forecasts are often overly optimistic. While well below levels expected a decade ago, these forecasts also remain above potential growth estimates. Moreover, risks to the outlook are tilted to the downside. They include disorderly financial market movements, escalating trade protectionism, and heightened geopolitical tensions. EMDE policymakers should rebuild monetary and fiscal policy buffers and be prepared for rising global interest rates and possible episodes of financial market turbulence. In the longer run, adverse structural forces continue to overshadow long-term growth prospects implying that EMDEs need to boost potential growth by promoting competitiveness, adaptability to technological change, and trade openness. These steps will help mitigate an expected growth slowdown over the next decade, especially if long term growth forecasts fall once again short of expectations.

A cyclical recovery is underway in most EMDE regions that host a substantial number of commodity exporters. Over the next two years, the upturn in these regions is expected to mature, as commodity prices plateau. Robust economic activity in EMDE regions with large numbers of commodity importers is forecast to continue. However, risks to the growth outlook continue to tilt to the downside in many regions.

Rapid Growth among the major emerging markets over the past 20 years has boosted global demand for commodities. The seven largest emerging markets (EM7) accounted for almost all of the increase in global consumption of metals and two-thirds of the increase in energy consumption over this period. As these economies mature and shift towards less commodity-intensive activities, their demand for most commodities may level off. While global energy consumption growth may remain broadly steady, global metals and foods demand growth could slow by one-third over the next decade. This would dampen global commodity prices. For emerging market and developing economies that depend on raw materials for government and export revenues, these prospects reinforce the need for economic diversification and the strengthening of policy frameworks.

Average corporate debt in emerging market and developing economies has increased over the past decade, raising concerns about their financial stability and growth prospects. Debt service costs of EMDE firms are expected to rise as advanced economies normalize monetary policy, and debt is increasingly held by firms with riskier balance sheets. Elevated debt may be associated with weak investment growth, especially in large firms. Countercyclical and macro prudential policies can address financial stability concerns that are raised by these trends. Structural policies, including the strengthening of bankruptcy regimes, are appropriate tools to address the investment implications of sizeable corporate debt.

INDIAN ECONOMY GROWTH

India’s economic growth will accelerate in the current and next fiscal years as per International Monetary Fund (IMF), consolidating the country’s position as the world’s fastest-growing major economy. India’s economy is forecast to grow 7.4% in the current fiscal from 6.7% in FY18 and accelerate further in FY20 to 7.8%. There will be a gradual increase in India’s growth rate as structural reforms raise potential output. “Growth in India is projected to increase from 6.7% in 2017 to 7.4% in 2018 and 7.8% in 2019 (unchanged from the October WEO), lifted by strong private consumption as well as fading transitory effects of the currency exchange initiative and implementation of the national goods and services tax,” the IMF said in the report. “Over the medium term, growth is expected to gradually rise with continued implementation of structural reforms that raise productivity and incentivise private investment.”

KEY DEMOGRAPHIC ASPECTS

India is the second most populous country in the world and is expected to see its population grow at the rate of 1.14% over the next five years. The urban population as a percentage of India’s total population is estimated to increase from the current 32.8%, in 2017 to 35% by 2020, thereby increasing the number of people that access premium facilities. The middle class population in India has doubled from 300 million to 600 million between 2004 and 2012, according to World Economic Forum, and is likely to overtake that of US and China by 2027. India’s urban population has increased from 27.8% of total population (per census 2001) to 31.2% of the total population (per Census 2011). Estimates by PwC indicate that by 2020, the average age of an Indian will be 29 years, compared with average age of 37 and 48 years, respectively, for China and Japan. This young population will help constitute a large working population, with an estimated 64% of India’s population to be in the working age population by the fiscal year 2021

(Source: Union budget and economic survey 2013). The high economic growth and increasing opportunities in the cities have led to urbanization. The rate of urbanization during 2017 over 2016 was recorded at 2.5%.

Indian Economy:

The Indian economy posted a growth of 6.6% in FY 2017-18 compared to 7.1% in FY2016-17, as the first round of effects of demonetisation and the implementation of GST played out. However, a host of other policies, implemented during and before FY 2017-18 – such as the Insolvency and Bankruptcy Code, reforms in the real estate sector in the form of RERA, allowing of FDI in various industries, fast-tracking of project clearances, various measures for financial inclusion, etc. - are expected to propel growth upwards, going forward. While the IMF projects that India's GDP will increase at 7.4% in FY2019 and 7.8% in FY2020, the World Bank expects growth to reach 7.3% in FY2019 and rise further to 7.5% in FY 2020.

Business cycle in India is now strongly in a trough to peak phase and will remain for at least 4-5 quarters before potential is hit. Growth outlook ahead remains even better on account of aggregation on account of reforms, formalization of the economy, aided by a low base. Successive sequential growth gains of more than 50bps over previous two quarters reflect tangibility of the turnaround and FY2018 should see headline growth of 7.5% .

Industry Structure and Developments:

The real estate sector is one of the most globally recognized sectors. In India, real estate is the second largest employer after agriculture and is slated to grow at 30 per cent over the next decade. The real estate sector comprises four sub sectors - housing, retail, hospitality, and commercial. The growth of this sector is well complemented by the growth of the corporate environment and the demand for office space as well as urban and semi-urban accommodations. The construction industry ranks third among the 14 major sectors in terms of direct, indirect and induced effects in all sectors of the economy.

It is also expected that this sector will incur more non-resident Indian (NRI) investments in both the short term and the long term. Bengaluru is expected to be the most favoured property investment destination for NRIs, followed by Ahmedabad, Pune, Chennai, Goa, Delhi and Dehradun.

The Centre's announcement to build 2 crore houses by 2022, launch 100 smart cities and Atal Mission for Rejuvenation and Urban Transformation ("AMRUT") of 500 cities are the preeminent things to be welcomed in Real Estate Industry. These initiatives will throw a plethora of opportunities for the industry and will offer solutions to today's unplanned urbanization and prove instrumental in developing, planning and providing infrastructure solutions from a futuristic perspective. Slum rehabilitation will be an integrated part of urban redevelopment, which will be highly beneficial for the Company. The road map is expected to entail fast track approvals for project clearances, ease land conversion rules, encourage affordable housing and to bring additional credit linked subsidies to weaker sections of the society and to encourage low cost housing.

Opportunities and Threats:

Opportunities:

The announcement by the Central Government on Housing for all by 2022, 100 Smart Cities and AMRUT are expected to tremendously benefit the players of the Real Estate Industry and the Company is eyeing to clutch the opportunities arising thereon. The Favorable Government policies on urban infrastructure and real estate development is expected to give boost to the sale of residential, retail, commercial and Floor Space Index ("FSI").

The Securities and Exchange Board of India (SEBI) has given its approval for the Real Estate Investment Trust (REIT) platform which will help in allowing all kinds of investors to invest in the Indian real estate market. It would create an opportunity worth Rs 1.25 trillion (US\$ 19.65 billion) in the Indian market over the years. Responding to an increasingly well-informed consumer base and, bearing in mind the aspect of globalisation, Indian real estate developers have shifted gears and accepted fresh challenges. The most marked change has been the shift from family owned businesses to that of professionally managed ones. Real estate developers, in meeting the growing need for managing multiple projects across cities, are also investing in centralised processes to source material and organise manpower and hiring qualified professionals in areas like project management, architecture and engineering.

The growing flow of FDI into Indian real estate is encouraging increased transparency. Developers, in order to attract funding, have revamped their accounting and management systems to meet due diligence standards.

Threats:

At present, in Ahmedabad, the number of real estate players has grown up substantially leading to competition in the market. Apart from this, overall unsold properties in both residential and commercial have also increased in Ahmedabad during last few years. This is mainly due to liquidity related issues of consumers who actually wants to buy property; and on other hand holding of inventories by investors expecting price rise. This led to shrinkage in margin & longer gestation to complete the project by the Developers in the city. In the environment as stated above, the Company is cautiously taking up new projects & emphasizes on quality, timely completion of project and customer satisfaction in general for the projects under execution.

Outlook:

The Indian real estate sector has witnessed high growth in recent times with the rise in demand for office as well as residential spaces. Private equity investments in real estate are estimated to grow to US\$ 100 billion by 2026 with tier 1 and 2 cities being the prime beneficiaries. Private equity investments in Indian real estate increased 15 per cent year-on-year in January-March 2018 to Rs 16,530 crore (US\$ 2.56 billion). According to data released by Department of Industrial Policy and Promotion (DIPP), the construction development sector in India has received Foreign Direct Investment (FDI) equity inflows to the tune of US\$ 24.67 billion in the period April 2000-December 2017.

Some of the major investments in this sector are as follows:

- In May 2018, Blackstone Group acquired One Indiabulls in Chennai from Indiabulls Real Estate for around Rs 900 crore (US\$ 136.9 million).
- In February 2018, DLF bought 11.76 acres of land for Rs 15 billion (US\$ 231.7 million) for its expansion in Gurugram, Haryana.

- In February 2018, Japanese conglomerate Sumitomo Corporation announced its US\$ 2 billion partnership with Krishna Group to develop real estate projects in the country.
- KKR India Asset Finance Pvt Ltd has invested over US\$ 500 million in residential real estate projects in India in 2017, taking its total investments in real estate projects in India to US\$ 1 billion.

Internal Financial Control Systems and their Adequacy:

The Company has a proper and adequate system of internal financial controls, commensurate with its size and business operation. It ensures timely and accurate financial reporting in accordance with applicable accounting standards, safeguarding of assets against unauthorised use or disposition and compliance with all applicable regulatory laws and Company policies. Internal Auditors of the Company review the internal financial control systems on a regular basis for its effectiveness, and necessary changes and suggestions are duly incorporated into the system. Internal audit reports are also reviewed by the Audit Committee of the Board.

Discussion on Financial Performance with respect to Operational Performance:

The Company is focusing on execution of its existing projects. The key strategy will be focused around:

1. Timely completion of Project
2. Financial strength & liquidity
3. Professional Management
4. Customer care
5. Brand Equity

ANNEXURE - B TO THE AUDITORS' REPORT

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013

We have audited the internal financial controls over financial reporting of RATNABHUMI DEVELOPERS LIMITED as of 31 March 2018 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31 March 2018, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

RATNABHUMI DEVELOPERS PRIVATE LIMITED

Note. 23

1. STATEMENT ON SIGNIFICANT ACCOUNTING POLICIES

1.1 BASIS FOR PREPARATION OF ACCOUNTS

These financial statements have been prepared to comply with all material aspects in respect with the notified Accounting Standards by Companies Accounting Standard Rules, 2006, standards issued by Institute of Chartered Accountants of India and the relevant provision of the Companies Act, 2013.

Accounting policies have been consistently applied by the Company

1.2 USE OF ESTIMATES

The preparation of financial statements is in conformity with the generally accepted accounting principles which requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent liabilities at the date of the financial statements and the results of operations during the reporting period end. Although these estimates are based upon management's best knowledge of current events and actions, actual results could differ from these estimates.

1.3 REVENUE RECOGNITION

- 1) Sale of shops/offices are recognized when the ownership and the final possession of the shops/offices is transferred to the buyers.
- 2) Revenue from services is recognized as the related services are performed. Where the ability to assess the ultimate collection with reasonable certainty is lacking at the time of rising any claim, revenue recognition is postponed to the extent of uncertainty involved. In such cases revenue recognized only when it is reasonably certain that ultimate collection will be made.
- 3) Interest income is recognized on a time proportional basis taking into account the amount outstanding and the rate applicable
- 4) Dividend income from investment is recognized when the amount is received.

1.4 FIXED ASSETS

1.4.1 TANGIBLE ASSETS

- (i) Fixed assets are stated at cost of acquisition or construction less accumulated depreciation, including borrowing cost as specified in point (1.9) till such assets are ready for its intended use, less specific grants received and Cenvat Credit availed if any.
- (ii) Fixed assets in the course of Work-in-progress for production or administrative purposes are carried at cost less any impairment loss. Work in progress includes expenditure pending for capitalization.
Cost includes land and building improvement costs, related acquisition expenses and construction costs incurred during the period of construction. Depreciation of these assets, on the same basis as the other property assets, commences when the assets are ready for their intended use.
- (iii) The cost of self-constructed assets includes cost of materials plus any other directly attributable costs of bringing the assets to working condition for its intended use.
- (iv) Subsequent expenditure are added to the cost of existing asset only when such expenditure is expected to increase the future benefits from the existing asset beyond its standard of performance as on that date.
- (v) An item of fixed asset is eliminated from financial statements on disposal or discarding.
- (vi) Items of fixed assets that are retired from active use and are held for disposal are stated at the lower of their net book value and net realizable value and are presented separately in the financial statements. Any expected loss is recognized immediately in the statement of profit and loss.
- (vii) The gain or loss arising on the disposal or retirement of an asset is determined as the difference between sales proceeds and the carrying amount of the asset and is recognized in statement of profit and loss for the relevant financial year.

1.5 IMPAIRMENT OF ASSETS

At each balance sheet date, the Company reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss, if any. Where it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs. An intangible asset under development and intangible asset having amortization period of greater than ten years is tested for impairment annually and other intangible assets whenever there is an indication that asset may be impaired

Recoverable amount is the higher of net selling price and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. Impairment losses are recognized as an expense immediately.

Where an impairment loss subsequently reverses, the carrying amount of the asset (or cash generating unit) is increased to the revised estimate of its recoverable amount, but only to the extent that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognized for the asset (or cash generating unit) in prior years. A reversal of an impairment loss is recognized as income immediately.

1.6 DEPRECIATION

Except for Freehold Land, Leasehold Land and Capital Work-in-Progress depreciation is charged on Straight Line Method (SLM) as per rate and in the manner prescribed under Schedule II of the Companies Act, 2013. Any addition or extension to an existing asset which is of a capital nature and which becomes an integral part of the existing asset is depreciated over the remaining useful life of that asset.

Leasehold land is amortized over the available balance lease period.

Depreciation is not provided on Freehold Land and capital work-in-progress.

When assets are disposed or retired, their cost and accumulated depreciation are removed from the financial statements.

1.7 INVESTMENTS

Long term investments are stated at cost less amount written off, where there is a diminution in its value of other than temporary nature. Current investments are stated at lower of cost and fair value determined on an individual basis. Gain or loss arising from sale or disposal of such investment is accounted at the time of actual sale or disposal in the Statement of Profit and Loss.

1.8 INVENTORIES

Inventories are stated at the lower of cost and net realizable value.

Cost of Raw Material is determined on a monthly moving weighted average basis.

Stores and Consumables are valued at cost (net of CENVAT) or net realizable value whichever is lower.

Finished goods are valued at cost or net realizable value whichever is lower. Cost comprises direct materials and where applicable, direct labour costs, those overheads that have been incurred in bringing the inventories to their present location and condition and excise duty payable on finished goods.

Work in Progress is valued at cost or net realizable value whichever is less. Cost comprises direct materials and appropriate portion of direct labour costs, manufacturing overheads and depreciation.

1.9 BORROWING COSTS

Borrowing Costs that are attributable to the acquisition or construction of qualifying assets are capitalised as part of the cost of such assets, wherever applicable, till the assets are ready for their intended use. Such capitalisation is done only when it is probable that the asset will result in future economic benefits and the costs can be measured reliably. Capitalisation of borrowing costs commences when all the following conditions are satisfied:

1. Expenditure for the acquisition, construction or production of a qualifying asset is being incurred;
2. Borrowing costs are being incurred; and
3. Activities that are necessary to prepare the asset for its intended use are in progress.

A qualifying asset is one which necessarily takes substantial period to get ready for intended use. All other borrowing costs are charged to revenue account. Capitalisation of borrowing cost is suspended when active development is interrupted.

1.10 PRIOR YEAR EXPENSES AND INCOME

Transactions pertaining to period prior to current accounting year are adjusted through prior year adjustments, if any.

1.11 EMPLOYEE BENEFITS

Employee benefits payable wholly within twelve months of the end of the reporting period are classified as short term employee benefits and are recognized as the employee renders service on an undiscounted basis. Contribution to Defined Contribution Schemes such as Provident Fund, etc. are charged to the Statement of Profit and Loss as incurred. The Company also provides for retirement / post-retirement benefits in the form of gratuity and leave encashment. Such benefits (Defined Benefit Plans) are provided for based on valuations, as at the balance sheet date, made by independent Actuaries. Termination benefits are recognized as an expense as and when incurred. Actuarial gain and losses are recognized immediately in the Statement of Profit and Loss.

1.12 CENVAT

CENVAT Credit of raw materials and other consumables is accounted at the time of purchase and the same is being adjusted to the cost of raw materials and other consumables.

1.13 ACCOUNTING FOR TAXES ON INCOME

Current tax is determined as the amount of tax payable in respect of taxable income for the year.

Deferred tax is recognized, on timing difference, being the difference between taxable incomes and accounting income that originate in one period and are capable of reversal in one or more subsequent periods.

Where there is unabsorbed depreciation or carry forward losses, deferred tax assets are recognized, if there is virtual certainty that sufficient future taxable income will be available against which such assets can be realized. Other deferred tax assets are recognized only to the extent there is reasonable certainty of realization in future. Such assets are reviewed at each Balance Sheet date to reassess realization. Deferred tax assets and liabilities are measured using the tax rates and tax laws that have been enacted or substantively enacted by the balance sheet date.

Minimum Alternative Tax (MAT) credit is recognised as an asset only when and to the extent there is convincing evidence that the Company will pay normal income tax during the specified period. In the year in which the MAT credit becomes eligible to be recognised as an asset in accordance with the recommendations contained in guidance note issued by the Institute Of Chartered Accountants Of India, the said asset is created by way of a credit to the Statement of Profit & Loss and shown as MAT Credit Entitlement.

The company reviews the same at each Balance Sheet date and writes down the carrying amount of MAT Credit Entitlement to the extent there is no longer convincing evidence to the effect that the Company will pay normal income tax during the specified period.

1.14 PROVISIONS AND CONTINGENT LIABILITIES

A provision is recognized when it is more likely than not that an obligation will result in an outflow of resources.

Provisions are not discounted to their present value and are determined based on management's estimation of the obligation required to settle the obligation at the Balance Sheet date. These are reviewed at each Balance Sheet date and adjusted to reflect current management estimates.

Contingent Liabilities are disclosed for all possible obligations that are not remote and all present obligations of which outflow of economic resources is not estimable.

1.15 UTILIZATION OF IPO AND SECURITY PREMIUM

The company has raised money by way of initial public offer through BSE and it has been utilized for the purpose for which those were raised. "Statement of Utilization of Money raised through Initial Public offer of Equity Shares up to and as at March 31, 2018" is also provided in the Financial Statements. The company has issued security premium and expenses related to initial public offer has been written off against such security premium account.
