ENFORCEMENT OF CIVIL LIABILITIES

The Company is a Public Limited (Listed) Company under the laws of India and all the Directors and all Executive Officers are residents of India. It may not be possible or may be difficult for investors to affect service of process upon the Company or these other persons outside India or to enforce against them in courts in India, judgments obtained in courts outside India. India is not a party to any international treaty in relation to the automatic recognition or enforcement of foreign judgments.

However, recognition and enforcement of foreign judgments is provided for under Sections 13, 14 and 44A of the Code of Civil Procedure, 1908, as amended (the “Civil Procedure Code”). Section 44A of the Civil Procedure Code provides that where a certified copy of a decree of any superior court (within the meaning of that section) in any country or territory outside India which the Government of India has by notification declared to be a reciprocating territory, is filed before a district court in India, such decree may be executed in India as if the decree has been rendered by a district court in India. Section 44A of the Civil Procedure Code is applicable only to monetary decrees or judgments not being in the nature of amounts payable in respect of taxes or other charges of a similar nature or in respect of fines or other penalties. Section 44A of the Civil Procedure Code does not apply to arbitration awards even if such awards are enforceable as a decree or judgment. Among others, the United Kingdom, Singapore, Hong Kong and the United Arab Emirates have been declared by the Government of India to be reciprocating territories within the meaning of Section 44A of the Civil Procedure Code.

The United States has not been declared by the Government of India to be a reciprocating territory for the purposes of Section 44A of the Civil Procedure Code. Under Section 14 of the Civil Procedure Code, an Indian court shall, on production of any document purporting to be a certified copy of a foreign judgment, presume that the judgment was pronounced by a court of competent jurisdiction unless the contrary appears on the record; but such presumption may be displaced by proving want of jurisdiction.

A judgment of a court in any non-reciprocating territory, such as the United States, may be enforced in India only by a suit upon the judgment subject to Section 13 of the Civil Procedure Code, and not by proceedings in execution. Section 13 of the Civil Procedure Code, which is the statutory basis for the recognition of foreign judgments (other than arbitration awards), states that a foreign judgment shall be conclusive as to any matter directly adjudicated upon between the same parties or between parties under whom they or any of them claim litigating under the same title except where:

- The judgment has not been pronounced by a court of competent jurisdiction;
- The judgment has not been given on the merits of the case;
- The judgment appears on the face of the proceedings to be founded on an incorrect view of international law or a refusal to recognize the law of India in cases where such law is applicable;
- The proceedings in which the judgment was obtained are opposed to natural justice;
- The judgment has been obtained by fraud; and/or
- The judgment sustains a claim founded on a breach of any law in force in India.

A suit to enforce a foreign judgment must be brought in India within three years from the date of the judgment in the same manner as any other suit filed to enforce a civil liability in India. It is unlikely that a court in India would award damages on the same basis as a foreign court if an action is brought in India. In addition, it is unlikely that an Indian court would enforce foreign judgments if it considered the amount of damages awarded as excessive or inconsistent with public policy or if the judgments are in breach of or contrary to Indian law. A party seeking to enforce a foreign judgment in India is required to obtain prior approval from the Reserve Bank of India to repatriate any amount recovered pursuant to execution of such judgment. Any judgment in a foreign currency would be converted into Rupees on the date of such judgment and not on the date of payment and any such amount may be subject to income tax in accordance with applicable laws. The Company cannot predict whether a suit brought in an Indian court will be disposed of in a timely manner or be subject to considerable delays.

SECTION II - RISK FACTORS

An investment in equity shares involves a high degree of risk. Prospective Investors should carefully consider all the information disclosed in this Draft Letter of Offer, including the risks and uncertainties described below and the "Financial Statements" on page 87, before making an investment in the Equity Shares. The risks described below are not the only risks relevant to us or the Equity Shares or the industries in which we currently operate. Additional risks and uncertainties, not presently known to us or that we currently deem immaterial may also impair our business, cash flows, prospects, results of operations and financial condition. In order to obtain a complete understanding about us, investors should read this section in conjunction with "Our Business", "Industry Overview" and "Management's Discussion and Analysis of Financial Condition and Results of Operations" on pages 72, 53 and 118, respectively, as well as the other financial information included in this Draft Letter of Offer. If any of the risks described below, or other risks that are not currently known or are currently deemed immaterial actually occur, our business, cash flows, prospects, results of operations and financial condition could be adversely affected, the trading price of the Equity Shares could decline, and investors may lose all or part of the value of their investment. The financial and other related implications of the risk factors, wherever quantifiable, have been disclosed in the risk factors mentioned below.

However, there are certain risk factors where the financial impact is not quantifiable and, therefore, cannot be disclosed in such risk factors. You should consult your tax, financial and legal advisors about the particular consequences to you of an investment in this Issue. The following factors have been considered for determining the materiality: (1) some events may not be material individually but may be found material collectively; (2) some events may have material impact qualitatively instead of quantitatively; and (3) some events may not be material at present but may have material impact in future.

This Draft Letter of Offer also contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Draft Letter of Offer. Any potential investor in, and purchaser of, the Equity Shares should pay particular attention to the fact that our Company is an Indian company and is subject to a legal and regulatory environment which, in some respects, may be different from that which prevails in other countries. However, there are risk factors where the impact may not be quantifiable and hence, the same has not been disclosed in such risk factors. The numbering of the risk factors has been done to facilitate ease of reading and reference and does not in any manner indicate the importance of one risk over another.

In this Draft Letter of Offer, any discrepancies in any table between total and sums of the amount listed are due to rounding off.

The risk factors are classified as under for the sake of better clarity and increased understanding.

1. ***The novel coronavirus pandemic (COVID-19 Pandemic) outbreak and steps taken to control the same have significantly impacted our business, results of operations, financial condition and cash flows and further impact will depend on future developments, which are highly uncertain.***

The rapid outbreak of the COVID-19 Pandemic resulted in an unpredictable chain of events across the globe. With reduced production and consumption, every economy witnessed a fiscal crunch like never before. The pandemic shook the Indian economy, which was already under the effects of demonetisation and GST enforcement. As Covid-19 Pandemic swiftly made its way into the nation, the Indian Government imposed a strict nationwide lockdown. Trade and travel restrictions along with shutdown of business activities led to a GDP contraction of 23.9%.

The financial year 2020-21 that led to nationwide lockdown. The lockdown was relaxed in a phased manner depending upon the severity and magnitude of the spread of the pandemic. The cases started declining after the ongoing COVID-19 Pandemic reached peak levels in September 2020. With revival of economic activities due to easing of lockdown, the economy rebounded. However, the resurgence of COVID-19 Pandemic impacted the nascent economic revival that was taking shape.

At this point of time, our Company cannot predict by when our Company's operation shall resume to normalcy, or at all. Further if in case due to any third or consequent wave of Coronavirus, or surge in new and deadly variants of the Virus if another lockdown is imposed in the country, we may face huge losses and our business operations could be severely impacted. Any such interruptions or disruptions could cause delays in the completion of our orders and commitments made to clients, or cause damage to the goods in transit. Any of these consequences may result in loss of business and/or claims for compensation from our clients, which may have an adverse effect on our results of operations and financial condition.

2. ***The management and control of the Company has changed pursuant to the Share Purchase Agreement dated March 31, 2021 and Open Offer which closed on June 25, 2021.***

Under the Share Purchase Agreement dated March 31, 2021, the then Promoter and Promoter group of our Company transferred the entire shareholding aggregating to 2,30,90,657 Equity Shares to Mr. Vishesh Gupta, the acquirer, making him the promoter of the Company. Hence, the control of our Company was shifted to Mr. Vishesh Gupta and our management was re-constituted.

Our business operations depend on the experience and expertise of our Management. Our Management may not hold adequate experience in the specific spheres of businesses we are carrying or have recently ventured into. This may affect functioning, and thereby our operational activities. Consequently, our business, revenue generation and profitability may adversely affected.

3. ***Our Management has recently ventured into new segments.***

We started our journey with carrying the business of trading and garment manufacturing businesses. However, after the change of the control of the Company, our Company recently ventured into four business segments namely agro products, clothing, infrastructure, and energy. Entering into new segment requires strategic planning and efficient use of resources. Due to our limited experience in such segments, we may face unanticipated hurdles with respect to such new initiatives. We may lack sufficient expertise and experience in these segments and this may impose additional strain on our resources and consume additional time and attention of our senior management. Further, some of these initiatives may fail to commence or may have to be abruptly discontinued at their early stages, due to regulatory, commercial or other reasons such as unavailability of adequate infrastructure for operations. We may also fail to initiate or choose to discontinue the new initiatives if we do not attract significant revenue for continuous years.

The commencement of operations in new business segments and industry verticals is subject to various risks including unfamiliarity with pricing dynamics, competition, service and operational issues as well as our ability to implement strategies, retain key management and employees. There can also be no

assurance that we will not experience issues such as capital constraints, difficulties in expanding our operations and challenges in training an increasing number of personnel to manage and operate our expanded business, or that we will be able to successfully manage the impact of our growth on our operational and managerial resources and control systems. We may not be able to successfully manage some or all of the risks associated with such entry into new segments and new industry verticals, which may place us at a competitive disadvantage, limit our growth opportunities and materially and adversely affect our business, results of operations and financial condition.

4. ***Presently, our manufacturing facilities for the manufacturing of garments are inoperative.***

Presently, our company is not carrying manufacturing of textiles and garments on its own but has engaged third parties such as contract manufactures etc. We solely depend upon third parties to cater to the requirements of our customers. Presently the success of our clothing segments depends on, among other things, the ability of these third parties to cater to such requirements. We typically engage these parties for the manufacturing on the basis of the purchase orders received by us. The absence of long-term contracts with such third parties may subject us to risks such as price volatility, unavailability of our products in the short term and failure to deliver on time, which could result in customer dissatisfaction. Further, we cannot assure you that we will be able to enter into new arrangements with third party manufacturers on terms acceptable to us, which could have an adverse effect on our ability to cater to our products in a commercially viable and timely manner, if at all, which may impact our business and profitability.

5. ***Our business requires us to obtain and renew certain registrations, licenses and permits from the Government and regulatory authorities and any failure to obtain and renew them in a timely manner may adversely affect our business operations.***

Our business operations require us to obtain and renew from time to time, certain approvals, licenses, registrations and permits, some of which may have expired and we may have either made or are in the process of making an application to obtain such approval or its renewal. Further, we cannot assure that we will be able to obtain the approvals for which applications have been made including renewals in a timely manner or at all. The approvals, licenses, registrations and permits obtained by us may contain conditions, some of which could be onerous. If our Company fails to comply with, or unable to comply with any of these conditions stipulated under the licenses, our certificate of registration / licenses for carrying on a particular activity may be suspended and / or cancelled and we will not be able to carry on such activity, which would adversely impact our business and results of operations. Additionally, we will need to apply for renewal of certain approvals, licenses, registrations and permits, which expire or seek fresh approvals, from time to time, as and when required in the ordinary course of our business.

6. ***Our Company has reported certain negative cash flows from its Operating, investing and financing activities, details of which are given below. Sustained negative cash flow could impact our growth and business in the future.***

Our Company had reported certain negative cash flows from its investing and financing activities in the previous years as per the restated financial statements and the same are summarized as under:

Particulars	For the year ended March 31	
	2022	2021
Net Cash from Operating Activities	30.92	(14.49)
Net Cash Generated in Investing Activities	(0.78)	Nil
Net Cash Generated in Financing Activities	8.16	14.30

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from

external resources. If our Company is not able to generate sufficient cash flows, it may adversely affect our business and financial operations.

7. ***Our ability to pay dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures.***

We have not paid any dividends in the last three Financial Years. Our ability to pay future dividends will depend on our earnings, financial condition and capital requirements. There can be no assurance that we will generate sufficient income to cover the operating expenses and pay dividends to the shareholders. Our ability to pay dividends will also depend on our expansion plans. We may be unable to pay dividends in the near or medium term, and the future dividend policy will depend on the capital requirements and financing arrangements for the business plans, financial condition and results of operations.

8. ***Our Company has incurred losses in the past.***

Our Company has incurred losses in the past as set out below:

Particulars	Period ended June 30, 2022	FY ended March 31, 2022	FY ended March 31, 2021
Total Comprehensive Income	54,48,639	(60,55,026)	(13,39,64,230)

There can be no assurance that our Company will not incur losses in the future, or that there will not be any adverse effect on our reputation or business as a result of such losses. For details, please see "***Restated Financial Statements***" on page 87 of this Draft Letter of Offer.

9. ***Substantial portion of our revenues has been dependent upon our few clients. The loss of any one or more of our major clients would have a material effect on our business operations and profitability.***

Our customers include various distributors that market our products and direct sellers. For the financial year ended 2021-22- and three-months period ended June 30, 2022, our top ten clients accounted for approximately 100% and 100% of our total income. The loss of any significant client would have a material effect on our financial results. We cannot assure you that we can maintain the historical levels of business from these clients/distributors or that we will be able to replace these clients/distributors in case we lose any of them. Furthermore, major events affecting our clients, such as bankruptcy, change of management, mergers and acquisitions could impact our business. If any of our major clients becomes bankrupt or insolvent, we may lose some or all of our business from that client and our receivable from that client would increase and may have to be written off, impacting our income and financial condition.

10. ***Our Company has not yet applied for the registration of the logo or any of the intellectual property that it uses with the registrar of Trademarks.***

Our Company has not yet applied for the registration of any of the intellectual property that it uses. Any failure to get the same registered in our name may cause any third-party claim and may lead to litigation and our business operations could be affected. Even if our trademarks are registered, we may not be able to detect any unauthorized use or infringement or take appropriate and timely steps to enforce or protect our intellectual property, nor can we provide any assurance that any unauthorized use or infringement will not cause damage to our business prospects.

11. ***We have in the past entered into related party transactions and may do so in the future. We cannot assure you that we could not have achieved more favourable terms if such transactions had not been entered into with related parties.***

We have entered into various transactions with related parties. While we believe that all such transactions have been conducted on an arm's length basis and contain commercially reasonable terms, we cannot assure you that we could not have achieved more favourable terms had such transactions been entered into with unrelated parties. It is likely that we may enter into related party transactions in the future. Such

related party transactions may potentially involve conflicts of interest. We cannot assure you that such transactions, individually or in the aggregate will not have an adverse effect on our business, results of operations, cash flows and financial condition resulting from potential conflict of interest or otherwise.

12. ***Our operations are subject to high working capital requirements. Our inability to maintain sufficient cash flow, credit facilities and other sources of funding, in a timely manner, or at all, to meet requirement of working capital or pay out debts, could adversely affect our operations.***

Our business requires significant amount of working capital. Major Portion of our working capital is utilized towards debtors and inventory. Our growing scale and expansion, if any, may result in increase in the quantum of current assets. Our inability to maintain sufficient cash flow, credit facility and other sourcing of funding, in a timely manner, or at all, to meet the requirement of working capital or pay out debts, could adversely affect our financial condition and result of our operations.

Further, we have high Debtors which may result in a high risk in case of non-payment by these Debtors. In the event we are not able to recover our dues from our Debtors, we may not be able to maintain our sales level and thus adversely affecting our financial health. If this situation persists, we may not be able to pay our lenders / creditors which may result in adversely affecting our operations and future prospects.

13. ***Non-compliance with and changes in, safety, health, labour and environmental laws and other applicable regulations, may adversely affect our business, results of operations and financial condition. If we fail to obtain, maintain or renew our statutory and regulatory licenses, permits and approvals required to operate our business, our business and results of operations may be adversely affected.***

Our operations including manufacturing activities undertaken by our third- party manufacturers are subject to extensive laws and government regulations, including in relation to safety, health and environmental protection. There is a risk that we may inadvertently fail to comply with such regulations, which could lead to enforced shutdowns and other sanctions imposed by the relevant authorities. We are also subject to the laws and regulations governing relationships with employees in such areas as minimum wages and maximum working hours, overtime, working conditions, hiring and termination of employees, contract labour and work permits and maintenance of regulatory and statutory records and making periodic payments.

In addition, we are governed by various laws and regulations for our business and operations. We are required, and will continue to be required, to obtain and hold relevant licenses, approvals and permits at state and central government levels for doing our business. The approvals, licenses, registrations and permits obtained by us may contain conditions, some of which could be onerous. Additionally, we have applied and require to apply for renewal of certain approvals, licenses, registrations and permits, which expire or need to update pursuant to conversion of company from private to public Company and change in address in registered office of the Company. Furthermore, we cannot assure you that the approvals, licenses, registrations and permits issued to us will not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. Any suspension or revocation of any of the approvals, licenses, registrations and permits that has been or may be issued to us may affect our business and results of operations.

These laws and regulations governing us are increasingly becoming stringent and may in the future create substantial compliance or liabilities and costs. While we endeavour to comply with applicable regulatory requirements, it is possible that such compliance measures may restrict our business and operations, result in increased cost and onerous compliance measures, and an inability to comply with such regulatory requirements may attract penalty.

14. ***Inventories and trade receivables form a major part of our current assets and net worth. Failure to manage our inventory and trade receivables could have an adverse effect on our net sales, profitability, cash flow and liquidity.***

Our Company's business is working capital intensive and hence, inventories and trade receivables form a major part of our current assets and net worth. The results of operations of our business are dependent

on our ability to effectively manage our inventory (raw material and finished goods) and trade receivables. To effectively manage our inventory, we must be able to accurately estimate customer demand and supply requirements and purchase new inventory accordingly. However, if our management misjudges expected customer demand, it could cause either a shortage of products or an accumulation of excess inventory. Further, if we fail to sell the inventory we manufacture or purchase, we may be required to write-down our inventory or pay our suppliers without new purchases, or create additional vendor financing, all of which could have an adverse impact on our income and cash flows.

15. ***We are dependent on third party transportation providers for the delivery of our products.***

We use third party transportation providers for the delivery of our products to our customers. Transportation strikes could have an adverse effect on our ability to deliver our products to our customers. Non-availability of trucks and railway could also adversely affect our delivery of products. While usually the end consumer bears the cost, we may not always be able to pass on these costs to our customers. Continuing increases in transportation costs or unavailability of transportation services for our products may have an adverse effect on our business, financial condition, results of operations and prospects.

16. ***The success of our business operations depends largely upon our Promote, Directors, and Key Managerial Personnel, the loss of any of them may negatively impact our business operations and financial conditions.***

Our success is highly dependent on the expertise and services of our Promoter Directors, Vishesh Gupta, and other key managerial personnel. Our ability to successfully function and meet future business challenges partly depends on our ability to attract and retain these key managerial personnel. We believe that our relation with our Promoters, who have rich experience in setting up business, developing markets, managing customers and handling overall businesses, has enabled us to experience growth and profitability. We benefit from our relationship with our Promoters and our success depends upon the continuing services of our Promoters who have been responsible for the growth of our business and are closely involved in the overall strategy, direction and management of our business. Further, our Promoters have also promoted other companies / firms / ventures and may continue to do so. If they divert their attention to the other companies, we may not be able to function as efficiently and profitably as before. We may have to incur additional costs to replace the services of our promoters or we may not be able to do so at all, which could adversely affect our business operations and affect our ability to continue to manage and expand our business.

Further, we also depend significantly on our Key Managerial Persons for executing their day-to-day activities. If our Promoters / Directors or any member of the senior management team is unable or unwilling to continue in his present position, we may not be able to replace him easily or at all, and our business, financial condition, results of operations and prospects may be materially and adversely affected.

17. ***In the event our marketing initiatives do not yield intended result, our business and results of operations may be adversely affected.***

We believe that the recognition and reputation of our brands has contributed to the growth of our business. We intend to continue to enhance the brand recall of our products through the use of targeted marketing and public relations initiatives. In order to maintain and enhance such recognition and reputation, we may be required to invest significant resources towards marketing and brand building exercises, specifically with respect to new products we launch or for geographic markets where we intend to expand our operations. We incur advertising and marketing expenses to increase brand recall and capture additional demand, and in the event, they do not yield their intended results, or we are required to incur additional expenditures than anticipated, our business and results of operations may be adversely affected.

18. ***Our Company, if not able to manage our growth or to successfully implement our business plan could have an adverse effect on our business, results of operations and financial conditions.***

The success of our business will depend greatly on our ability to effectively implement our business and growth strategy. If our Company is not able to execute our strategy on time and within our estimated budget, or that our expansion and development plans fail to generate the required results, it may adversely impact our profitability. Further, our growth strategies could place significant demand on our management team and other resources and would require us to continuously develop and improve our operational, financial and other controls, none of which can be assured. Any failure on our part to scale up our infrastructure and management could cause disruptions to our business and could be detrimental to our long-term business outlook. Further, we operate in a highly dynamic industry, and on account of changes in market conditions, industry dynamics, technological improvements or changes in trends and fashions and any other relevant factors, our growth strategy and plans may undergo changes or modifications, and such changes or modifications may be substantial, and may even include limiting or foregoing growth opportunities if the situation so demands. Our inability to implement our business strategies and sustain our growth may impair our financial growth and thus result in an adverse impact on our Company's share price.

19. ***There is an outstanding legal proceeding involving our Company***

There is an outstanding legal proceeding involving our Company. Decisions in such proceeding, adverse to our interests, may have a material adverse effect on our business, cash flows, financial condition, and results of operations. Failure to successfully defend these or other claims, or if our current provisions prove to be inadequate, our business and results of operations could be affected.

20. ***We have financial indebtedness which could adversely affect our financial condition and results of operations and further we may not be able to meet our obligations under the debt financing***

agreements.

Our total outstanding debt is ₹ 2872.03 Lakhs consisting of unsecured loans (including unsecured loan of ₹ NIL from Directors & other related parties). If we fail to meet our debt servicing obligations under our financing documents, the relevant lenders could declare us to be in default, accelerate the maturity of our obligations or takeover our Company's movable and immovable assets. We cannot assure investors that in the event of any such acceleration we will have enough resources to repay these borrowings. Failure to meet obligations under debt financing agreements may have an adverse effect on our cash flows, business and results of operations. Our ability to meet our debt service obligations and to repay our outstanding borrowings will depend primarily upon the cash flows generated by our business. We cannot assure you that we will generate enough cash to enable us to service existing or proposed borrowings. Incurring significant indebtedness may limit our flexibility in planning for or reacting to changes in our business & industry and limit our ability to borrow additional funds.

21. ***We have not obtained the insurance coverage to protect against any business risks and this may have an adverse effect on the business operations.***

Operations in our business carry inherent risks of personal injury, damage to or destruction of property, plant and equipment and damage to the environment, and are subject to risks such as fire, theft, flood, earthquakes and terrorism. However, we have not obtained any insurance coverage and are in the process of obtaining the same. The occurrence of any event for which we are not insured, could have an adverse effect on our business, reputation, results of operations, financial condition and cash flows.

22. ***In addition to normal remuneration, other benefits and reimbursement of expenses some of our Promoter Director, Vishesh Gupta is interested in our Company to the extent of their shareholding and dividend entitlement in our Company.***

Our Promoter Director, Vishesh Gupta is interested in our Company to the extent of his shareholding and dividend entitlement in our Company, in addition to normal remuneration or benefits and reimbursement of expenses. We cannot assure you that our Promoter Director would always exercise their rights as Shareholders to the benefit and best interest of our Company. As a result, our Promoter Director will continue to exercise significant control over our Company, including being able to control the composition of our board of directors and determine decisions requiring simple or special majority voting, and our other Shareholders may be unable to affect the outcome of such voting. Our Promoter Director may take or block actions with respect to our business, which may conflict with our best interests or the interests of other minority Shareholders, such as actions with respect to future capital raising or acquisitions. We cannot assure you that our Promoter Director will always act to resolve any conflicts of interest in our favour, thereby affecting our business and results of operations and prospects.

23. ***Our funding requirements and deployment of the issue proceeds are based on management estimates and actual cost may vary compared with the estimated amount.***

Our funding requirement and deployment of the proceeds of the issue are based on management estimates and our current business plan. The fund requirements and intended use of proceeds have not been appraised by banks or financial institutions and are based on our estimates. In view of the highly competitive nature of the industry in which we operate, we may have to revise our management estimates from time to time and, consequently, our funding requirements may also change as a result of various factors which may not be within the control of our management. This may entail rescheduling, revising or cancelling the planned expenditure and fund requirement and increasing or decreasing the working capital limits maintained from time to time at the discretion of our board. In addition, schedule of implementation as described herein are based on the management's current expectations and are subject to change due to various factors some of which may not be in our control. The deployment of the funds towards the objects of the issue is entirely at the discretion of the Board of Directors and is not subject to monitoring by external independent agency. However, the deployment of funds is subject to monitoring by our Audit Committee.

While we have requested all the shareholders to provide an address in India for the purposes of distribution of Issue Materials, we cannot assure you that the regulator or authorities would not adopt a different view with respect to compliance with the Companies Act, 2013 and may subject us to fines or penalties.

25. ***SEBI has recently, by way of circulars dated January 22, 2020, May 6, 2020 and January 19, 2021, streamlined the process of rights issues. You should follow the instructions carefully, as stated in such SEBI circulars and in this Draft Letter of Offer.***

The concept of crediting Rights Entitlements into the demat accounts of the Eligible Equity Shareholders has recently been introduced by the SEBI. Accordingly, the process for such Rights Entitlements has been recently devised by capital market intermediaries. Eligible Equity Shareholders are encouraged to exercise caution, carefully follow the requirements as stated in the SEBI circulars dated January 22, 2020, May 6, 2020 and January 19, 2021 and April 22, 2021, and ensure completion of all necessary steps in relation to providing/updating their demat account details in a timely manner. 26. ***The Rights Entitlement of Eligible Equity Shareholders holding Equity Shares in physical form ("Physical Shareholder") may lapse in case they fail to furnish the details of their demat account to the Registrar.***

In accordance with the SEBI Circular SEBI/HO/CFD/DIL2/CIR/P/2020/13 dated January 22, 2020, the credit of Rights Entitlement and Allotment of Equity Shares shall be made in dematerialised form only. effect from April 1, 2019, a transfer of listed Equity Shares cannot be processed unless the Equity Shares are held in dematerialized form (except in case of transmission or transposition of Equity Shares).

27. ***Failure to exercise or sell the Rights Entitlements will cause the Rights Entitlements to lapse without compensation and result in a dilution of shareholding.***

The Rights Entitlements that are not exercised prior to the end of the Issue Closing Date will expire and become null and void, and Eligible Equity Shareholders will not receive any consideration for them. The proportionate ownership and voting interest in our Company of Eligible Equity Shareholders who fail (or are not able) to exercise their Rights Entitlements will be diluted. Even if you elect to sell your unexercised Rights Entitlements, the consideration you receive for them may not be sufficient to fully compensate you for the dilution of your percentage ownership of the equity share capital of our Company that may be caused as a result of the Issue. Renouncees may not be able to apply in case of failure in completion of renunciation through off-market transfer in such a manner that the Rights Entitlements are credited to the demat account of the Renouncees prior to the Issue Closing Date. Further, in case, the Rights Entitlements do not get credited in time, in case of On Market Renunciation, such Renouncee will not be able to apply in this Issue with respect to such Rights Entitlements. For details, see “Terms of the Issue” on page [●].

28. ***Any future issuance of Equity Shares, or convertible securities or other equity-linked securities by our Company may dilute your shareholding and any sale of Equity Shares by our Promoter or members of our Promoter Group may adversely affect the trading price of the Equity Shares.***

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by our Company may dilute your shareholding in our Company; adversely affect the trading price of the Equity Shares and our ability to raise capital through an issue of our securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. We cannot assure you that we will not issue additional Equity Shares. The disposal of Equity Shares by any of our Promoter and Promoter Group, or the perception that such sales may occur may significantly affect the trading price of the Equity Shares. We cannot assure you that our Promoter and Promoter Group will not dispose of, pledge or encumber their Equity Shares in the future.

29. ***Investors may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.***

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares of an Indian company are generally taxable in India. Accordingly, you may be subject to payment of long-term capital gains tax in India, in addition to payment of STT, on the sale of any Equity Shares held for more than 12 months. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short-term capital gains tax in India. Capital gains arising from the sale of the Equity Shares may be partially or completely exempt from taxation in India in cases where such exemption is provided under a treaty between India and the country of which the seller is a resident. Generally, Indian tax treaties do not limit India’s ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on gains made upon the sale of the Equity Shares.

30. ***Applicants to this Issue are not allowed to withdraw their Applications after the Issue Closing Date.***

In terms of the SEBI ICDR Regulations, Applicants in this Issue are not allowed to withdraw their Applications after the Issue Closing Date. Occurrence of any such events after the Issue Closing Date could also impact the market price of our

Equity Shares. The Applicants shall not have the right to withdraw their applications in the event of any such occurrence. We cannot assure you that the market price of the Equity Shares will not decline below the Issue Price. To the extent the market price for the Equity Shares declines below the Issue Price after the Issue Closing Date, the shareholder will be required to purchase Equity Shares at a price that will be higher than the actual market price for the Equity Shares at that time. Should that occur, the shareholder will suffer an immediate unrealized loss as a result. We may complete the Allotment even if such events may limit the Applicants' ability to sell our Equity Shares after this Issue or cause the trading price of our Equity Shares to decline

31. ***You may not receive the Equity Shares that you subscribe in the Issue until fifteen days after the date on which this Issue closes, which will subject you to market risk.***

The Equity Shares that you subscribe in the Issue may not be credited to your demat account with the depository participants until approximately 15 days from the Issue Closing Date. You can start trading such Equity Shares only after receipt of the listing and trading approval in respect thereof. There can be no assurance that the Equity Shares allocated to you will be credited to your demat account, or that trading in the Equity Shares will commence within the specified time period, subjecting you to market risk for such period.

32. ***There is no guarantee that our Equity Shares will be listed in a timely manner or at all which may adversely affect the trading price of our Equity Shares.***

In accordance with Indian law and practice, final approval for listing and trading of the Equity Shares will not be granted by the Stock Exchanges until after those Equity Shares have been issued and allotted. Approval will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on Stock Exchanges. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares. Further, historical trading prices, therefore, may not be indicative of the prices at which the Equity Shares will trade in the future which may adversely impact the ability of our shareholders to sell the Equity Shares or the price at which shareholders may be able to sell their Equity Shares at that point of time.

33. ***Holders of Equity Shares could be restricted in their ability to exercise pre-emptive rights under Indian law and could thereby suffer future dilution of their ownership position.***

Under the Companies Act, any company incorporated in India must offer its holders of equity shares pre-emptive rights to subscribe and pay for a proportionate number of shares to maintain their existing ownership percentages prior to the issuance of any new equity shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by holders of three-fourths of the shares voted on such resolution, unless our Company has obtained government approval to issue without such rights. However, if the law of the jurisdiction that you are in does not permit the exercise of such pre-emptive rights without us filing an offering document or registration statement with the applicable authority in such jurisdiction, you will be unable to exercise such pre-emptive rights unless we make such a filing. We may elect not to file a registration statement in relation to pre-emptive rights otherwise available by Indian law to you. To the extent that you are unable to exercise pre-emptive rights granted in respect of the Equity Shares, your proportional interests in us would be reduced.

34. ***Fluctuation in the exchange rate between the Indian Rupee and foreign currencies may adversely affect the value of our Equity Shares, independent of our operating results.***

On listing, our Equity Shares will be quoted in Indian Rupees on the Stock Exchanges. Any dividends in respect of our Equity Shares will also be paid in Indian Rupees and subsequently converted into the relevant foreign currency for repatriation, if required. Any adverse movement in currency exchange rates during the time that it takes to undertake such conversion may reduce the net dividend to foreign investors. In addition, any adverse movement in currency exchange rates during a delay in repatriating outside India the proceeds from a sale of Equity Shares, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the proceeds received by equity shareholders. For example, the exchange rate between the Rupee and the U.S. dollar has fluctuated substantially in recent years and may continue to fluctuate substantially in the future, which may

adversely affect the trading price of our Equity Shares and returns on our Equity Shares, independent of our operating results.

35. ***Sale of Equity Shares by our Promoter or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.***

Any instance of disinvestments of equity shares by our Promoter or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

36. ***Investors will not have the option of getting the allotment of Equity Shares in physical form.***

In accordance with the SEBI ICDR Regulations, the Equity Shares shall be issued only in dematerialized form. Investors will not have the option of getting the allotment of Equity Shares in physical form. The Equity Shares Allotted to the Applicants who do not have demat accounts or who have not specified their demat details, will be kept in abeyance till receipt of the details of the demat account of such Applicants. For details, see "Terms of the Issue" on page 136. This may impact the ability of our shareholders to receive the Equity Shares in the Issue.

37. ***Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.***

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

External Risk Factors

38. ***Significant differences exist between Ind AS, Indian GAAP and other accounting principles, such as US GAAP and International Financial Reporting Standards ("IFRS"), which investors may be more familiar with and consider material to their assessment of our financial condition.***

Summary statements of assets and liabilities as at March 31, 2022 and summary statements of profit and loss (including other comprehensive income), cash flows and changes in equity for the Fiscal 2022 have been prepared in accordance with the Indian Accounting Standards notified under Section 133 of the Companies Act, 2013, read with the Ind AS Rules and, the SEBI Circular and the Prospectus Guidance Note.

We have not attempted to quantify the impact of US GAAP, IFRS or any other system of accounting principles on the financial data included in this Draft Letter of Offer, nor do we provide a reconciliation of our financial statements to those of US GAAP, IFRS or any other accounting principles. US GAAP and IFRS differ in significant respects from Ind AS and Indian GAAP. Accordingly, the degree to which the Financial Information included in this Draft Letter of Offer will provide meaningful information is entirely dependent on the reader's level of familiarity with Ind AS, Indian GAAP and the SEBI ICDR Regulations. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Draft Letter of Offer should accordingly be limited.

39. ***Political, economic or other factors that are beyond our control may have adversely affect our business and results of operations.***

The Indian economy is influenced by economic developments in other countries. These factors could depress economic activity which could have an adverse effect on our business, financial condition and results of operations. Any financial disruption could have an adverse effect on our business and future financial performance.

We are dependent on domestic, regional and global economic and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent to a large extent on the health of the economy in which we operate. There have been periods of slowdown in the economic growth of India. Demand for our services may be adversely affected by an economic downturn in domestic, regional and global economies.

Economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports, global economic uncertainty and liquidity crisis, volatility in exchange currency rates, and annual rainfall which affects agricultural production.

Consequently, any future slowdown in the Indian economy could harm our business, results of operations and financial condition. Also, a change in the government or a change in the economic and deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margins.

40. ***A slowdown in economic growth in India could cause our business to suffer.***

We are incorporated in India, and all of our assets and employees are located in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations are significantly affected by factors influencing the Indian economy. A slowdown in the Indian economy could adversely affect our business, including our ability to grow our assets, the quality of our assets, and our ability to implement our strategy.

Factors that may adversely affect the Indian economy, and hence our results of operations, may include:

- Any increase in Indian interest rates or inflation;
- Any scarcity of credit or other financing in India;
- Prevailing income conditions among Indian consumers and Indian corporations;
- Changes in India's tax, trade, fiscal or monetary policies;
- political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighbouring countries;
- Prevailing regional or global economic conditions; and
- Other significant regulatory or economic developments in or affecting India

Any slowdown in the Indian economy or in the growth of the sectors we participate in or future volatility in global commodity prices could adversely affect our borrowers and contractual counterparties. This in turn could adversely affect our business and financial performance and the price of our Equity Shares.

41. ***Changing laws, rules and regulations and legal uncertainties, including adverse application of corporate and tax laws, may adversely affect our business, prospects and results of operations.***

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes, including the instances mentioned below, may adversely affect our business, results of operations and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy.

The Government of India has issued a notification dated September 29, 2016 notifying Income Computation and Disclosure Standards ("ICDS"), thereby creating a new framework for the computation of taxable income. The ICDS became applicable from the assessment year for Fiscal 2018 and subsequent years. The adoption of ICDS is expected to significantly alter the way companies compute their taxable income, as ICDS deviates from several concepts that are followed under general accounting standards, including Indian GAAP and Ind AS. In addition, ICDS shall be applicable for the computation of income for tax purposes but shall not be applicable for the computation of income for minimum alternate tax. There can be no assurance that the adoption of ICDS will not adversely affect our business, results of operations and financial condition.

- The General Anti Avoidance Rules ("**GAAR**") have been made effective from April 1, 2017. The tax consequences of the GAAR provisions being applied to an arrangement could result in denial of tax benefit amongst other consequences. In the absence of any precedents on the subject, the application of these provisions is uncertain. If the GAAR provisions are made applicable to our Company, it may have an adverse tax impact on us.
- A comprehensive national GST regime that combines taxes and levies by the Central and State Governments into a unified rate structure, which came into effect from July 1, 2017. We cannot provide any assurance as to any aspect of the tax regime following implementation of the GST. Any future increases or amendments may affect the overall tax efficiency of companies operating in India and may result in significant additional taxes becoming payable.

In addition, unfavorable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations including foreign investment laws governing our business, operations and group structure could result in us being deemed to be in contravention of such laws or may require us to apply for additional approvals. We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may affect the viability of our current business or restrict our ability to grow our business in the future.

Any increase in taxes and levies, or the imposition of new taxes and levies in the future, could increase the cost of production and operating expenses. Taxes and other levies imposed by the central or state governments in India that affect our industry include customs duties, excise duties, sales tax, income tax and other taxes, duties or surcharges introduced on a permanent or temporary basis from time to time. The central and state tax scheme in India is extensive and subject to change from time to time. Any adverse changes in any of the taxes levied by the central or state governments may adversely affect our competitive position and profitability.

42. ***Financial instability in both Indian and international financial markets could adversely affect our results of operations and financial condition.***

The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the United States and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have an adverse effect on the securities of companies in other countries. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in the Indian economy in general. Any global financial instability, including further deterioration of credit conditions in the U.S. market, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our results of operations and financial condition.

The Indian economy is also influenced by economic and market conditions in other countries. This includes, but is not limited to, the conditions in the United States, Europe and certain economies in Asia. Financial turmoil in Asia and elsewhere in the world in recent years has affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and its business.

Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Financial instability in other parts of the world could have a global influence and thereby impact the Indian economy. Financial disruptions in the future could adversely affect our business, prospects, financial condition and results of operations. The global credit and equity markets have experienced substantial dislocations, liquidity disruptions and market corrections.

There are concerns that a tightening of monetary policy in emerging markets and some developed

markets will lead to a moderation in global growth. In response to such developments, legislators and financial regulators in the United States and other jurisdictions, including India, have implemented a number of policy measures designed to add stability to the financial markets. However, the overall long-term impact of these and other legislative and regulatory efforts on the global financial markets is uncertain, and they may not have had the intended stabilizing effects. Any significant financial disruption in the future could have an adverse effect on our cost of funding, loan portfolio, business, future financial performance and the trading price of the Equity Shares.

43. ***Inflation in India could have an adverse effect on our profitability and if significant, on our financial condition.***

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of salaries, and other expenses relevant to our business.

High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to pass on to our customers, whether entirely or in part, and the same may adversely affect our business and financial condition. In particular, we might not be able to reduce our costs or increase our rates to pass the increase in costs on to our customers. In such case, our business, results of operations, cash flows and financial condition may be adversely affected.

Further, the GOI has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

44. ***Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.***

As an Indian Company, we are subject to exchange controls that regulate borrowing in foreign currencies, including those specified under FEMA. Such regulatory restrictions limit our financing sources and hence could constrain our ability to obtain financing on competitive terms and refinance existing indebtedness. In addition, we cannot assure you that the required approvals will be granted to us without onerous conditions, or at all. Limitations on foreign debt may adversely affect our business growth, results of operations and financial condition.

Further, under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

45. ***Any downgrading of India's debt rating by an independent agency may harm our ability to raise financing.***

Any adverse revisions to India's credit ratings international debt by international rating agencies may adversely affect our ability to raise additional overseas financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our ability to fund our growth on favourable terms or at all, and consequently adversely affect our business and financial performance and the price of our Equity Shares.

46. ***The occurrence of natural or man-made disasters could adversely affect our results of operations, cash flows and financial condition. Hostilities, terrorist attacks, civil unrest and other acts of violence***

could adversely affect the financial markets and our business.

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tsunamis, tornadoes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations, cash flows or financial condition. In addition, any deterioration in international relations, especially between India and its neighbouring countries, may result in investor concerns regarding regional stability which could adversely affect the price of the Equity Shares. In addition, India has witnessed local civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business.

Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

47. ***We are subject to regulatory, economic, social and political uncertainties and other factors beyond our control.***

We are incorporated in India and we conduct our corporate affairs and our business in India. Consequently, our business, operations, financial performance will be affected by interest rates, government policies, taxation, social and ethnic instability and other political and economic developments affecting India.

Factors that may adversely affect the Indian economy, and hence our results of operations may include:

- Any exchange rate fluctuations, the imposition of currency controls and restrictions on the right to convert or repatriate currency or export assets;
- Any scarcity of credit or other financing in India, resulting in an adverse effect on economic conditions in India and scarcity of financing for our expansions;
- Prevailing income conditions among Indian customers and Indian corporations;
- epidemic or any other public health in India or in countries in the region or globally, including in India's various neighbouring countries;
- Hostile or war like situations with the neighbouring countries;
- Macroeconomic factors and central bank regulation, including in relation to interest rates movements which may in turn adversely impact our access to capital and increase our borrowing costs;
- Decline in India's foreign exchange reserves which may affect liquidity in the Indian economy;
- Downgrading of India's sovereign debt rating by rating agencies; and
- Difficulty in developing any necessary partnerships with local businesses on commercially acceptable terms and/or a timely basis.
- Any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy or certain regions in India, could adversely affect our business, results of operations and financial condition and the price of the Equity Shares.

48. ***Financial instability in other countries may cause increased volatility in Indian financial markets.***

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, particularly emerging market countries in Asia. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss of investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our business, our future financial performance and the prices of the Equity Shares.

The recent outbreak of Novel Coronavirus has significantly affected financial markets around the world. Any other global economic developments or the perception that any of them could occur may continue to have an adverse effect on global economic conditions and the stability of global financial markets, and

may significantly reduce global market liquidity and restrict the ability of key market participants to operate in certain financial markets. Any of these factors could depress economic activity and restrict our access to capital, which could have an adverse effect on our business, financial condition and results of operations and reduce the price of our Equity Shares. Any financial disruption could have an adverse effect on our business, future financial performance, shareholders' equity and the price of our Equity Shares.

GOLBAL ECONOMY

The global economy enters 2022 in a weaker position than previously expected. As the new Omicron COVID-19 variant spreads, countries have reimposed mobility restrictions. Rising energy prices and supply disruptions have resulted in higher and more broad-based inflation than anticipated, notably in the United States and many emerging market and developing economies. The ongoing retrenchment of China's real estate sector and slower-than-expected recovery of private consumption also have limited growth prospects.

Global growth is expected to moderate from 5.9 in 2021 to 4.4 percent in 2022—half a percentage point lower for 2022 than in the October World Economic Outlook (WEO), largely reflecting forecast markdowns in the two largest economies. A revised assumption removing the Build Back Better fiscal policy package from the baseline, earlier withdrawal of monetary accommodation, and continued supply shortages produced a downward 1.2 percentage-points revision for the United States. In China, pandemic-induced disruptions related to the zero-tolerance COVID-19 policy and protracted financial stress among property developers have induced a 0.8 percentage-point downgrade. Global growth is expected to slow to 3.8 percent in 2023. Although this is 0.2 percentage point higher than in the previous forecast, the upgrade largely reflects a mechanical pickup after current drags on growth dissipate in the second half of 2022. The forecast is conditional on adverse health outcomes declining to low levels in most countries by end-2022, assuming vaccination rates improve worldwide and therapies become more effective.

Elevated inflation is expected to persist for longer than envisioned in the October WEO, with ongoing supply chain disruptions and high energy prices continuing in 2022. Assuming inflation expectations stay well anchored, inflation should gradually decrease as supply-demand imbalances wane in 2022 and monetary policy in major economies responds.

Risks to the global baseline are tilted to the downside. The emergence of new COVID-19 variants could prolong the pandemic and induce renewed economic disruptions. Moreover, supply chain disruptions, energy price volatility, and localized wage pressures mean uncertainty around inflation and policy paths is high. As advanced economies lift policy rates, risks to financial stability and emerging market and developing economies' capital flows, currencies, and fiscal positions especially with debt levels having increased significantly in the past two years—may emerge. Other global risks may crystallize as geopolitical tensions remain high, and the ongoing climate emergency means that the probability of major natural disasters remains elevated.

With the pandemic continuing to maintain its grip, the emphasis on an effective global health strategy is more salient than ever. Worldwide access to vaccines, tests, and treatments is essential to reduce the risk of further dangerous COVID-19 variants. This requires increased production of supplies, as well as better in-country delivery systems and fairer international distribution. Monetary policy in many countries will need to continue on a tightening path to curb inflation pressures, while fiscal policy—operating with more limited space than earlier in the pandemic—will need to prioritize health and social spending while focusing support on the worst affected.

In this context, international cooperation will be essential to preserve access to liquidity and expedite orderly debt restructurings where needed. Investing in climate policies remains imperative to reduce the risk of catastrophic climate change.

Since the start of October, COVID-19 deaths have averaged about 7,000 a day worldwide, down from about 10,000 in late August. The diffusion of vaccines—although still uneven—has played a major role, with over 55 percent of people having received at least one dose. Yet the emergence of the Omicron variant in late November threatens to set back this tentative path to recovery. As of mid-January, Omicron appeared to be more transmissible than Delta, but its symptoms are perhaps less severe. The net effect on hospitalizations and deaths is still unknown. The baseline forecast is conditioned on adverse health outcomes—severe illness, hospitalizations, and deaths—coming down to low levels in most countries by the end of 2022. Some emerging market and developing economies are anticipated to fall short of the vaccination target in 2022 and achieve sufficiently broad coverage only in 2023.

Supply disruptions continued into the fourth quarter, hindering global manufacturing—especially in Europe and the United States. A resurgence in COVID cases (particularly in Europe) also held back a broader recovery. In China, disruptions from COVID outbreaks, interruptions to industrial production from power outages, declining real estate investment, and a faster-than-expected withdrawal of public investment all contributed to a second-half slowdown. Although there were signs of a global turnaround in November—with a pickup in international trade and upside surprises for services activity and industrial production data—this only partially offset earlier declines.

The emergence of a new variant is not the only risk that has crystallized in recent months. Inflation continued to rise throughout the second half of 2021, driven by several factors of varying importance across regions (Figure 1). Fossil fuel prices have almost doubled in the past year, driving up energy costs and causing higher inflation, most prominently in Europe. Rising food prices have contributed to higher inflation, for example in sub-Saharan Africa. Meanwhile, ongoing supply chain disruptions, clogged ports, land-side constraints, and high demand for goods have also led to broadening price pressures, especially in the United States. Higher imported goods prices have contributed to inflation for example in Latin America and the Caribbean region.

In the United States, with price and wage pressures broadening, the Federal Reserve decided to accelerate its taper of asset purchases and signalled that it will raise rates further in 2022 than previously expected. The European Central Bank (ECB) has announced it will end net asset purchases under the Pandemic Emergency Purchase Programme in March 2022, while it will temporarily increase net purchases by a modest amount under its longer-standing Asset Purchase Programme. The ECB has also committed to maintaining its key interest rates at current levels until adequate progress is made toward stabilizing inflation at its medium-term target.

Global growth is estimated at 5.9 percent in 2021 and is expected to moderate to 4.4 percent in 2022, half a percentage point lower than in the October 2021 World Economic Outlook (Table 1). The baseline incorporates anticipated effects of mobility restrictions, border closures, and health impacts from the spread of the Omicron variant. These vary by country depending on susceptibility of the population, the severity of mobility restrictions, the expected impact of infections on labor supply, and the importance of contact-intensive sectors. These impediments are expected to weigh on growth in the first quarter of 2022. The negative impact is expected to fade starting in the second quarter, assuming that the global surge in Omicron infections abates and the virus does not

mutate into new variants that require further mobility restrictions.

Note: Forecasts are based on information up to 18 January 2022.

The upward revision to global growth in 2023 is mostly mechanical. Eventually, the shocks dragging 2022 growth will dissipate and—as a result—global output in 2023 will grow a little faster. Among prominent revisions not due to the pandemic, India's prospects for 2023 are marked up on expected improvements to credit growth—and, subsequently, investment and consumption—building on better-than-anticipated performance of the financial sector. Japan's 2023 growth outlook is also revised up by 0.4 percentage point, reflecting anticipated improvements in external demand and continued fiscal support. The upward revision to 2023 global growth is, however, not enough to make up ground lost due to the downgrade to 2022. Cumulative global growth over 2022 and 2023 is projected to be 0.3 percentage point lower than previously forecast.

Note: Real effective exchange rates are assumed to remain constant at the levels prevailing during December 10, 2021–January 7, 2022. Economies are listed on the basis of economic size.

Inflation is expected to remain elevated in the near term, averaging 3.9 percent in advanced economies and 5.9 percent in emerging market and developing economies in 2022, before subsiding in 2023. Assuming medium-term inflation expectations remain well anchored and the pandemic eases its grip, higher inflation should fade as supply chain disruptions ease, monetary policy tightens, and demand rebalances away from goods-intensive consumption towards services. The rapid increase in fuel prices is also expected to moderate during 2022–23, which will help contain headline inflation. Futures markets indicate oil prices will rise about 12 percent and natural gas prices about 58 percent in 2022 (both considerably lower than the increases seen in 2021) before retreating in

2023 as supply-demand imbalances recede further. Similarly, food prices are expected to increase at a more moderate pace of about 4½ percent in 2022 and decline in 2023. In many countries, nominal wage growth remains contained despite employment and participation returning almost to pre-pandemic levels. But in the United States the story is different: a sharp decline in unemployment has been accompanied by buoyant nominal wage growth. This suggests a degree of tightening in US labor markets not evident elsewhere. If US labor force participation remains below pre-pandemic levels and discouraged workers remain on the sidelines, tighter labor markets may feed through to higher prices. As a result, the Federal Reserve communicated in December 2021 that it will taper asset purchases at a faster pace and signaled that the federal funds rate will likely be raised to 0.75–1.00 percent by the end of 2022, some 50 basis points higher than in the previous guidance.

Less accommodative monetary policy in the United States is expected to prompt tighter global financial conditions, putting pressure on emerging market and developing economy currencies. Higher interest rates will also make borrowing more expensive worldwide, straining public finances. For countries with high foreign currency debt, the combination of tighter financial conditions, exchange rate depreciations, and higher imported inflation will lead to challenging monetary and fiscal policy trade-offs. Although fiscal consolidation is anticipated in many emerging market and developing economies in 2022, high post-pandemic debt burdens will be an ongoing challenge for years to come.

Global trade is expected to moderate in 2022 and 2023, in line with the overall pace of the expansion. Assuming that the pandemic eases over 2022, supply chain problems are expected to abate later in the year. The accompanying moderation in global goods demand will also help reduce imbalances. Cross-border services trade—particularly tourism—is expected to remain subdued.

Even before Omicron, inflation pressure had become more broad-based in many economies. Central banks in some emerging market and developing economies—and a few advanced economies—have already been raising interest rates. For some the decision to tighten policy reflects a difficult choice, trading off the benefits of getting ahead of price pressures against the costs of potentially slowing an already subdued employment recovery. Policy responses will vary according to country-specific inflation and employment developments and the strength of central bank policy frameworks. Extraordinary support is likely to continue in the euro area and Japan to allow the recovery to take firmer hold. By contrast, it will very likely be withdrawn in the United States in 2022—where the recovery is more advanced—with the prospect of a broader return of interest rates to higher levels thereafter. The timing and extent of responses in emerging markets is uncertain and will be complicated by ongoing developments with the pandemic, both domestically and through imported inflation stemming from international supply disruptions. This underscores the need to carefully monitor key indicators of future inflationary pressures, including inflation expectations, wage growth and unit labor costs (particularly as demand rebalances back toward services), and firms' profit margins, which can foreshadow whether higher cost pressures are likely to be passed on to prices.

Effective monetary policy communication is a key tool to avoid provoking overreactions from financial markets. In countries where inflation expectations have increased, and there is a tangible risk of more persistent price pressures, central banks should continue to telegraph an orderly, data-dependent withdrawal. This is particularly important given the exceptional uncertainty around the impact of the Omicron variant. Central banks should clearly signal that the pace at which monetary support will be withdrawn may need to be recalibrated if the pandemic worsens again.

Moreover, a tighter stance of monetary policy, especially if not clearly communicated, could have financial stability implications as financial vulnerabilities remain elevated in a number of sectors. A sudden repricing of risk in markets, should investors reassess further the economic and policy outlook, could interact with such vulnerabilities and lead to tighter financial conditions. Policymakers should take early action and tighten selected macroprudential tools to target pockets of elevated vulnerabilities (see the October 2021 Global Financial Stability Report).

Preparing for tighter external financial conditions: Less accommodative monetary policy in advanced economies will pose challenges for central banks and governments in emerging market and developing economies. Higher returns elsewhere will incentivize capital to flow overseas, putting downward pressure on emerging market and developing economy currencies and raising inflation. Without commensurate tightening, this will increase the burden on foreign-currency borrowers, both public and private. But tighter policy also brings costs at home, as domestic borrowers will find credit harder to come by. Overall, tighter policies will likely be appropriate in many

emerging market and developing economies to stave off the threat of persistently higher inflation. Moreover, emerging markets are generally more resilient, with higher reserves and better current account balances than in the previous tightening cycle—including during the 2013 taper tantrum. But financial vulnerabilities remain, and many countries have higher public and private debt. Debt service burdens could therefore rise significantly with higher interest rates.

Countries with stronger fiscal positions and clearer policy frameworks will be better placed to manage tighter global financial conditions. More generally, emerging market borrowers should extend debt maturities where feasible, while containing a further buildup of currency mismatches. Exchange rate flexibility can also help absorb shocks. But in economies with market distortions or balance sheet vulnerabilities limiting market access, the impact of capital flow reversals can imperil financial stability. In those economies, foreign exchange intervention may be needed to smooth disorderly market conditions and temporary capital flow management measures may be warranted—but should not substitute for needed macroeconomic policy adjustment. More generally, policymakers should strengthen resolution regimes where needed to facilitate orderly deleveraging and restructuring.

International cooperation will also be essential to minimize stress during the forthcoming tightening cycle. Ready access to reserve currency liquidity is an important buffer against the international amplification of these risks. IMF lending arrangements (precautionary or disbursing) can be an important backstop to smooth the impact of the shocks. For countries with large financing needs and unsustainable debt, liquidity relief may not be sufficient. In such cases, quick operationalization of the G20 Common Framework for debt treatment will provide an effective mechanism for timely and orderly debt restructuring. The progress in the initial country cases has been too slow. Urgent improvements are needed to move the process forward and extend its country coverage.

Public finances will come under strain in the coming months and years, as global public debt has reached record levels to cover pandemic-related spending at a time when tax receipts plummeted. Higher interest rates will also make borrowing more expensive, especially for countries borrowing in foreign currencies and at short maturities. As a result, fiscal deficits in most countries will need to shrink in the coming years, although the extent of consolidation should be contingent on the pace of the recovery. If the pandemic worsens, consolidation can be slowed where fiscal space permits. Where mobility restrictions are reintroduced, governments should reprise programs such as lifelines for the worst-affected households and firms as needed and increase support for the most vulnerable segments of the population. However, policy space is much reduced, so better targeting of such support will be essential to preserve fiscal sustainability. Initiatives should be nested in credible and sustainable medium-term fiscal plans. Decisive support from the international community to low-income countries with elevated debt levels will be necessary so that they can provide such fiscal support. On the other hand, in countries with upside growth surprises where the recovery continues to take hold (e.g., Chile, Colombia, Peru), there is scope to retire extraordinary crisis expenditures and enhance revenue mobilization.

Ultimately, higher growth and stronger tax revenues will be required for many countries to avoid the risk of debt distress. Such challenges make structural reforms (see below) and improvements to fiscal frameworks all the more essential.

The budget had four priorities PM GatiShakti, Inclusive Development, Productivity Enhancement and Investment and Financing of Investments. In the Union Budget 2022-23, effective capital expenditure is expected to increase by 27% at Rs. 10.68 lakh crore (US\$ 142.93 billion) to boost the economy. This will be 4.1% of the total Gross Domestic Production (GDP).

 - India is expected to attract investment of around US\$ 100 billion in developing the oil and gas infrastructure during 2019-23.
 - The Government of India is going to increase public health spending to 2.5% of the GDP by 2025.

Mr. Piyush Goyal, Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution, on January 21, 2022 said that Indian industry to raise 75 unicorns in the 75 weeks leading up to the country's 75th anniversary next year. Mr. Piyush Goyal said that India will achieve exports worth US\$ 650 billion in the financial

year 2021-22. India's electronic exports are expected to reach US\$ 300 billion by 2025-26 this will be nearly 40 times the FY2011-22 exports (till December 2021) of US\$ 67 billion. As per the data published in a Department of Economic Affairs report, in the first quarter of FY22, India's output recorded a 20.1% YoY growth, recovering >90% of the pre-pandemic output in the first quarter of FY20. India's real gross value added (GVA) also recorded an 18.8% YoY increase in the first quarter of FY22, posting a recovery of >92% of its corresponding pre-pandemic level (in the first quarter of FY20). Also, in FY21, India recorded a current account surplus at 0.9% of the GDP. The growth in the economic recovery is due to the government's continued efforts to accelerate vaccination coverage among citizens. This also provided an optimistic outlook to further revive industrial activities.

As per RBI's revised estimates of July 2021, the real GDP growth of the country is estimated at 21.4% for the first quarter of FY22. The increase in the tax collection, along with government's budget support to states, strengthened the overall growth of the Indian economy.

India is focusing on renewable sources to generate energy. It is planning to achieve 40% of its energy from non-fossil sources by 2030, which is currently 30% and have plans to increase its renewable energy capacity from 175 gigawatt (GW) by 2022. In line with this, in May 2021, India, along with the UK, jointly launched a 'Roadmap 2030' to collaborate and combat climate change by 2030.

India is expected to be the third largest consumer economy as its consumption may triple to US\$ 4 trillion by 2025, owing to shift in consumer behavior and expenditure pattern, according to a Boston Consulting Group (BCG) report. It is estimated to surpass USA to become the second largest economy in terms of purchasing power parity (PPP) by 2040 as per a report by PricewaterhouseCoopers.

INDIAN FOOD PROCESSING SECTOR

India's food processing sector is one of the largest in the world and its output is expected to reach \$535 bn by 2025-26. The Indian food processing industry accounts for 32 per cent of the country's total food market, one of the largest industries in India and is ranked fifth in terms of production, consumption, export and expected growth. It contributes around 8.80 and 8.39 per cent of Gross Value Added (GVA) in Manufacturing and Agriculture respectively, 13 per cent of India's exports and six per cent of total industrial investment. The Indian gourmet food market is currently valued at US\$ 1.3 billion and is growing at a Compound Annual Growth Rate (CAGR) of 20 per cent.

India is the world's second-largest producer of fruits and vegetables. India enjoys a similar stature in the production of marine products, and meat and poultry. India is the single largest producer of milk in the world, with the production estimated at 137.7 MT.

The Government of India aims to boost growth in the food processing sector by leveraging reforms such as 100 per cent Foreign Direct Investment (FDI) in marketing of food products and various incentives at central and state government level along with a strong focus on supply chain infrastructure.

As per DIPP, the food processing sector in India has received around US\$ 7.54 billion worth of Foreign Direct Investment (FDI) during the period April 2000-March 2017.

The Food Processing sector in India has a quintessential role in linking Indian farmers to consumers in the domestic and international markets. The Ministry of Food Processing Industries (MoFPI) is making all efforts to encourage investments across the value chain. The food processing industry has a share of 12.38 per cent (at 3-digit of NIC classification) in the employment generated in all Registered Factory sector engaging approximately 1.93 Mn people. Unregistered food processing sector supports employment to 5.1 Mn workers as per the NSSO 73rd Round report. Major sectors constituting the food processing industry in India are grains, sugar, edible oils, beverages, and dairy products.

Textiles Industry

India's textiles sector is one of the oldest industries in the Indian economy, dating back to several centuries.

The industry is extremely varied, with hand-spun and hand-woven textiles sectors at one end of the spectrum, while the capital-intensive sophisticated mills sector on the other end. The decentralised power looms/ hosiery and knitting sector forms the largest component in the textiles sector. The close linkage of textiles industry to agriculture (for raw materials such as cotton) and the ancient culture and traditions of the country in terms of textiles makes it unique in comparison to other industries in the country. India's textiles industry has a capacity to produce wide variety of products suitable for different market segments, both within India and across the world.

India's Textiles industry has around 4.5 crore employed workers including 35.22 lakh handloom workers across the country. The industry contributed 7% to the industry output (by value) in 2018-19. The Indian textiles and apparel industry contributed 2% to the GDP, 12% to export earnings and held 5% of the global trade in textiles and apparel in 2018-19. Exports of textiles (RMG of all textiles, cotton yarns/fabs./made-ups/handloom products, man-made yarns/fabs./made-ups, handicrafts excl. handmade carpets, carpets and jute mfg. including floor coverings) stood at US\$ 22.89 billion between April 2021 and October 2021.

The Indian textiles market is expected to be worth >US\$ 209 billion by 2029.

Cotton production is expected to reach 37.10 million bales and consumption is expected to reach 114 million bales in FY21—13% growth over the previous year.

The production of raw cotton in India is estimated to have reached 35.4 million bales in FY20[^]. During FY19, production of fibre in India stood at 1.44 million tonnes (MT) and reached 2.40 MT in FY21 (till January 2021), while that for yarn, the production stood at 4,762 million kgs during same period.

India's home textile exports grew at a healthy rate of 9% in FY21 despite the pandemic.

The textiles sector has witnessed a spurt in investment during the last five years. The industry (including dyed and printed) attracted Foreign Direct Investment (FDI) worth US\$ 3.75 billion from April 2000 to March 2021. In May 2021, Indo Count Industries Ltd. (ICIL), announced an investment of Rs. 200 crore (US\$ 26.9 million) to expand its production capacity.

The production-linked incentive (PLI) scheme for man-made fibre and technical textiles will help boost manufacturing, increase exports and attract investments into the sector.

Companies in home textile are using technology to optimise the value chain. For example, in October 2021, Welspun India introduced Wel-Trak 2.0—an upgraded, patented end-to-end traceability technology—to track textile raw materials throughout the supply chain.

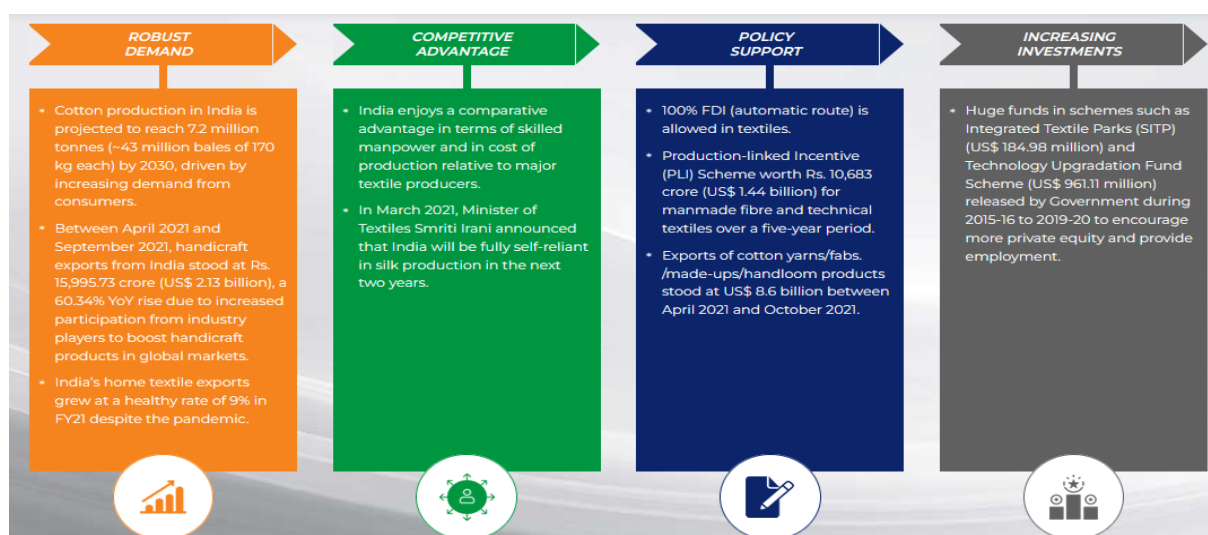

Home textile companies In India are also leveraging strategic partnerships to strengthen their business operations and foothold in the country.

In October 2021, Welspun India collaborated with DuPont Biomaterials to introduce a home textile range and strengthen the company's sustainable textiles business.

Indian government has come up with several export promotion policies for the textiles sector. It has also allowed 100% FDI in the sector under the automatic route. The Rs. 10,683 crore (US\$ 1.44 billion) PLI scheme is expected to be a major booster for the textile manufacturers. The scheme proposes to incentivise MMF (man-made fibre) Apparel, MMF Fabrics and 10 segments of Technical Textiles products.

Some Initiatives taken by Government of India

- The Indian government has notified uniform goods and services tax rate at 12% on man-made fabrics (MMF), MMF yarns, MMF fabrics and apparel, which will come into effect from January 1, 2022.
- Union textile minister Mr. Piyush Goyal announced a mega handloom cluster in Manipur and a handloom and handicraft village at Moirang in Bishnupur. The mega cluster will be set up at an estimated cost of Rs.30 crore (US\$ 4.03 million) under the National Handloom Development Programme (NHDP).

India is working on major initiatives, to boost its technical textile industry. Owing to the pandemic, the demand for technical textiles in the form of PPE suits and equipment is on rise. Government is supporting the sector through funding and machinery sponsoring.

Top players in the sector are attaining sustainability in their products by manufacturing textiles that use natural

recyclable materials.

The future for the Indian textiles industry looks promising, buoyed by strong domestic consumption as well as export demand. With consumerism and disposable income on the rise, the retail sector has experienced a rapid growth in the past decade with the entry of several international players like Marks & Spencer, Guess and Next into the Indian market.

High economic growth has resulted in higher disposable income. This has led to rise in demand for products creating a huge domestic market.

Real Estate and Allied Industries

Real estate sector is one of the most globally recognized sectors. It comprises of four sub sectors - housing, retail, hospitality, and commercial. The growth of this sector is well complemented by the growth in the corporate environment and the demand for office space as well as urban and semi-urban accommodations. The construction industry ranks third among the 14 major sectors in terms of direct, indirect and induced effects in all sectors of the economy.

In India, the real estate sector is the second-highest employment generator, after the agriculture sector. It is also expected that this sector will incur more non-resident Indian (NRI) investment, both in the short term and the long term. Bengaluru is expected to be the most favoured property investment destination for NRIs, followed by Ahmedabad, Pune, Chennai, Goa, Delhi and Dehradun.

By 2040, real estate market will grow to Rs. 65,000 crore (US\$ 9.30 billion) from Rs. 12,000 crore (US\$ 1.72 billion) in 2019. Real estate sector in India is expected to reach US\$ 1 trillion in market size by 2030, up from US\$ 200 billion in 2021 and contribute 13% to the country's GDP by 2025. Retail, hospitality, and commercial real estate are also growing significantly, providing the much-needed infrastructure for India's growing needs.

The office market in top eight cities recorded transactions of 22.2 msf from July 2020 to December 2020, whereas new completions were recorded at 17.2 msf in the same period. In terms of share of sectoral occupiers, Information Technology (IT/ITeS) sector dominated with a 41% share in second half of 2020, followed by BSFI and Manufacturing sectors with 16% each, while Other Services and Co-working sectors recorded 17% and 10%, respectively.

As per ICRA estimates, Indian firms are expected to raise >Rs. 3.5 trillion (US\$ 48 billion) through infrastructure and real estate investment trusts in 2022, as compared with raised funds worth US\$ 29 billion to date. According to Savills India, real estate demand for data centres is expected to increase by 15-18 million sq. ft. by 2025.

In 2020, the manufacturing sector accounted for 24% of office space leasing at 5.7 million square feet. SMEs and electronic component manufacturers leased the most between Pune, Chennai and Delhi NCR, followed by auto sector leasing in Chennai, Ahmedabad and Pune. The 3PL, e-commerce and retail segments accounted for 34%, 26% and 9% of office space leases, respectively. Of the total PE investments in real estate in Q4 FY21, the office segment attracted 71% share, followed by retail at 15% and residential and warehousing with 7% each.

In the first quarter of 2022, the gross leasing volume of India's top seven office markets was at 11.55 million sq. ft. Between July 2021-September 2021, a total of 55,907 new housing units were sold in the eight micro markets in India (59% YoY growth).

According to JLL India, in the third quarter of 2021, India's net office absorption reached 5.85 million sq. ft., up 8% YoY in key cities. Three cities—Delhi-NCR, Mumbai and Pune—accounted for ~62% of the total volumes recorded in the quarter. Between July 2021 and September 2021, a total of 55,907 new housing units were sold in the eight micro markets in India (59% YoY growth).

In the third quarter of 2021 (between July 2021 and September 2021), new housing supply stood at ~65,211 units, increased by 228% YoY across the top eight cities compared with ~19,865 units launched in the third quarter of 2020.

In 2021-22, the commercial space is expected to record increasing investments. For instance, in October 2021, Chintels Group announced to invest Rs. 400 crore (US\$ 53.47 million) to build a new commercial project in Gurugram, covering a 9.28 lakh square feet area.

According to the Economic Times Housing Finance Summit, about 3 houses are built per 1,000 people per year compared with the required construction rate of five houses per 1,000 population. The current shortage of housing in urban areas is estimated to be ~10 million units. An additional 25 million units of affordable housing are required by 2030 to meet the growth in the country's urban population.

Further, India is the second largest producer of cement in the world. It accounts for more than 7% of the global installed capacity. India has a lot of potential for development in the infrastructure and construction sector and the cement sector is expected to largely benefit from it. Some of the recent initiatives, such as development of 98 smart cities, is expected to provide a major boost to the sector.

Aided by suitable Government foreign policies, several foreign players such as Lafarge-Holcim, Heidelberg Cement, and Vicat have invested in the country in the recent past. A significant factor which aids the growth of this sector is the ready availability of raw materials for making cement, such as limestone and coal.

India's overall cement production accounted for 294.4 million tonnes (MT) in FY21 and 329 million tonnes (MT) in FY20.

Cement production reached 329 million tonnes (MT) in FY20 and is projected to reach 381 MT by FY22. However, the consumption stood at 327 MT in FY20 and will reach 379 MT by FY22. The cement production capacity is estimated to touch 550 MT by 2020. As India has a high quantity and quality of limestone deposits through-out the country, the cement industry promises huge potential for growth.

As per ICRA, in FY22, the cement production in India is expected to increase by ~12% YoY, driven by rural housing demand and government's strong focus on infrastructure development.

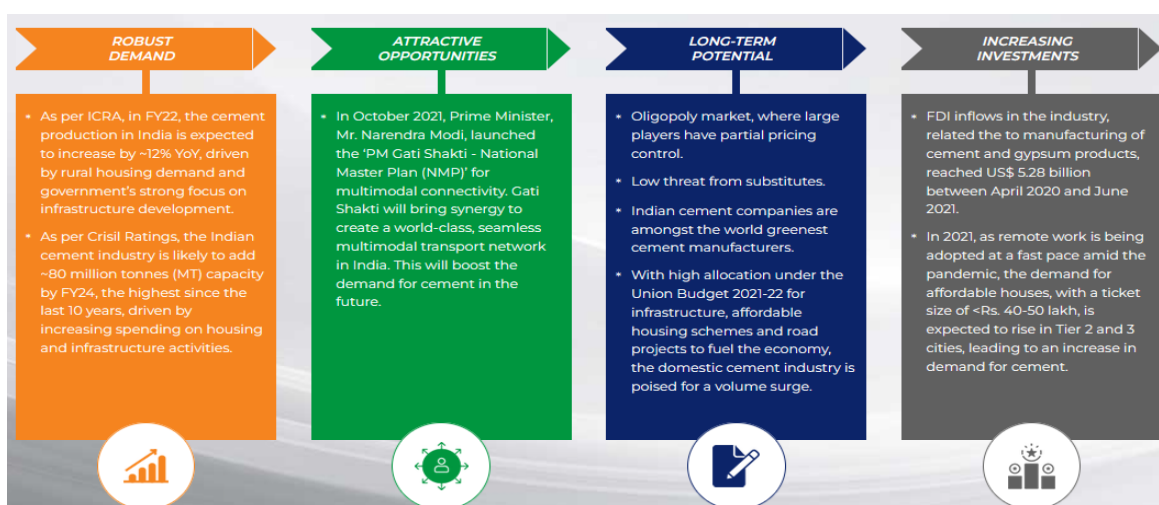

As per Crisil Ratings, the Indian cement industry is likely to add ~80 million tonnes (MT) capacity by FY24, the highest since the last 10 years, driven by increasing spending on housing and infrastructure activities. Higher allocation for infrastructure—34.9% in roads, 8.7% in metros and 33.6% in railways in budget estimates of FY22, over FY21, is likely to boost demand for cement.

According to CLSA (institutional brokerage and investment group), the Indian cement sector is witnessing improved demand. Key players reported by the company are ACC, Dalmia and Ultratech Cement. In the second quarter of FY21, Indian cement companies reported a sharp rebound in earnings and demand for the industry increased, driven by rural recovery. With the rural markets normalising, the demand outlook remained strong. For FY21, CLSA expects a 14% YoY increase in EBITDA in the cement market for its coverage stocks.

Major developments in the sector

The eastern states of India are likely to be the newer and untapped markets for cement companies and could contribute to their bottom line in future. In the next 10 years, India could become the main exporter of clinker and gray cement to the Middle East, Africa, and other developing nations of the world. Cement plants near the ports, for instance the plants in Gujarat and Visakhapatnam, will have an added advantage for export and will logistically be well armed to face stiff competition from cement plants in the interior of the country. India's cement production capacity is expected to reach 550 MT by 2025.

Due to the increasing demand in various sectors such as housing, commercial construction and industrial construction, cement industry is expected to reach 550-600 million tonnes per annum (MTPA) by the year 2025. A number of foreign players are also expected to enter the cement sector owing to the profit margins and steady demand.

The Company's board of directors is responsible for the preparation of the other information. The other information comprises the information included in the Board's Report including Annexures to Board's Report, Business Responsibility Report but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the standalone financial statements or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Management's Responsibility for the Standalone Financial Statements

The Company's Board of Directors is responsible for the matters stated in Section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation of these standalone Ind AS financial statements that give a true and fair view of the state of affairs (financial position), profit or loss (financial performance including other comprehensive income), cash flows and changes in equity of the Company in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards (Ind AS) prescribed under section 133 of the Act.

This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the standalone Ind AS financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The board of directors are also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibility

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- a) Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- b) Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act, 2013, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- c) Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- d) Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- e) Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the standalone financial statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the standalone financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i)

planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the standalone financial statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards. From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

1. As required by the Companies (Auditor's Report) Order, 2020 ("the Order"), issued by the Central Government of India in terms of sub-section (11) of section 143 of the Companies Act, 2013, we give in the Annexure "A", a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.
2. As required by Section 143(3) of the Act, we report that:
 - a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.

 - d) In our opinion, the aforesaid standalone Ind AS financial statements comply with the Indian Accounting Standards prescribed under section 133 of the Act.

NOTES TO FINANCIAL STATEMENTS FOR THE YEAR ENDED 31ST MARCH, 2022

Company Overview

Integra Essentia Limited ("the Company") is a public limited company, incorporated and domiciled in India which mainly deals in trading of essential items like Cashew, Rice etc. . The registered office of the Company is located at 902 9th Floor, Aggarwal Cyber Plaza-I, Neta ji Subhash Place, New Delhi, North West, Delhi-110034. The Company is listed on the Bombay Stock Exchange (BSE) and the National Stock Exchange (NSE). The standalone financial statements for the year ended 31st March, 2022 were approved by the Board of Directors and authorised for issue on 28th April 2022.

Note 1: Significant Accounting Policies

(a) Basis of Preparation of Financial Statements

(i) Statement of Compliance with Indian Accounting Standards (Ind AS)

These financial statements comply, in all material respects, with Ind AS notified under section 133 of the Companies Act, 2013 ("the Act"). Companies (Indian Accounting Standards) Rules, 2015 (as amended) and other relevant provisions of the Act.

(ii) Historical Cost Convention

The financial statements have been prepared on a historical cost basis, except for the following assets and liabilities:

- a) Certain financial assets and liabilities that are measured at fair value
- b) Derivative financial instruments

(iii) Functional and Presentation Currency

These financial statements are presented in Indian Rupees, which is also the functional currency of the Company.

(iv) Current and Non-current Classification

All assets and liabilities have been classified as current and non-current as per the Company's normal operating cycle (Twelve months) and other criteria set out in Schedule III to the Act.

(b) Property, Plant and Equipment (PPE) and Depreciation

All items of PPE are stated at cost less depreciation and impairment, if any. Historical cost includes expenditure that is directly attributable to the acquisition of the items. Cost includes its purchase price including non-refundable taxes and duties, directly attributable costs of bringing the asset to its present location and condition and initial estimate of costs of dismantling and removing the item and restoring the site on which it is located.

Subsequent costs are included in the carrying amount of PPE or recognised as a separate PPE, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably.

The carrying amount of any component accounted for as a separate asset is derecognised when replaced. All other repairs and maintenance are charged to the Statement of Profit and Loss during the reporting period in which they are incurred.

Machinery spares and servicing equipment are recognised as PPE when they meet the definition of PPE. Otherwise, such items are classified as inventory.

Capital work-in-progress includes cost of PPE under installation / under development as at the Balance Sheet date.

The Company depreciates its PPE over the useful life in the manner prescribed under Part C of Schedule II to the Act. Depreciation commences when the assets are ready for their intended use and is computed on pro-rata basis from the date of installation/ acquisition till the date of sale/ disposal. Management believes that useful life of assets are same as those prescribed in Schedule II to the Act, except for machinery spares wherein based on technical evaluation, useful life has been estimated to be different from that prescribed in Schedule II of the Act.

Useful life considered for calculation of depreciation for machinery spares varies from 2 to 10 years.

Lease hold PPE are amortised over the period of lease or useful life, whichever is lower. Leasehold land (under Finance Lease) is amortised over the period of lease.

Gains and losses on disposals are determined by comparing net disposal proceeds with carrying amount.

These are included in the Statement of Profit and Loss.

(c) Intangible Assets and Amortisation

Intangible assets that are acquired by the Company, which have finite useful lives are measured at cost less amortisation and impairment, if any. Historical cost includes expenditure that is directly attributable to the acquisition of the items. Cost includes its purchase price including non-refundable taxes and duties, directly attributable costs of bringing the asset to its present location and condition.

Intangible assets are amortised on straight line basis over the estimated useful life.

Gains and losses on disposals are determined by comparing net disposal proceeds with carrying amount.

These are included in the Statement of Profit and Loss.

(d) Leases

At inception of a contract, company shall assess whether the contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

Where the Company is Lessee

At the Inception, lessee shall recognise and measure Right-of-use asset and lease liability at cost. Right to use assets shall comprise initial measurement of lease liability, any lease payments made at or before the commencement date, less any lease incentives received, any initial direct costs incurred by the lessee; and an estimate of costs to be incurred by the lessee in dismantling and removing the underlying asset, restoring the site on which it is located or restoring the underlying asset to the condition required by the terms and conditions of the lease, unless those costs are incurred to produce inventories.

Lease liability is the present value of the lease payments that are not paid. These lease payments shall be discounted using the interest rate implicit in the lease (if readily determined) otherwise should be discounted at lessee's incremental borrowing rate.

If the lease contract transfers ownership of the underlying asset, at the end of the lease term or if, the cost of the right-of-use asset reflects that the lessee will exercise a purchase option, then depreciate the right-of-use asset over the useful life of the underlying asset. Otherwise, depreciate the right-of-use asset till the end of the useful life of the right-of-use asset or the end of the lease term, whichever is earlier.

The lease term as the non-cancellable period of a lease, together with both: (a) periods covered by an option to extend the lease if the lessee is reasonably certain to exercise that option; and (b) periods covered by an option to terminate the lease if the lessee is reasonably certain not to exercise that option.

Subsequently, lessee shall measure the right-of-use asset applying a cost model.

Where the Company is Lessor

Leases are classified as finance leases when substantially all of the risks and rewards of ownership transfer from the Company to the lessee. Amounts due from lessees under finance leases are recorded as receivables at the Company's net investment in the leases. Finance lease income is allocated to accounting periods so as to reflect a constant periodic rate of return on the net investment outstanding in respect of the lease.

Leases in which the Company does not transfer substantially all the risks and rewards of ownership of an asset are classified as operating leases. Rental income from operating lease is recognised on a straight line basis over the term of the relevant lease

(e) Borrowing Cost

Borrowing costs are interest and other costs that the Company incurs in connection with the borrowing of funds and is measured with reference to the effective interest rate applicable to the respective borrowing.

General and specific borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset are capitalised during the period of time that is required to complete and prepare the asset for its intended use. Qualifying assets are assets that necessarily take a substantial period of time to get ready for their intended use. Other borrowing costs are expensed in the period in which they are incurred.

(f) Financial Instruments

(i) Financial Assets

Initial Recognition and Measurement

All financial assets are recognised initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset.

Subsequent Measurement

The Company classifies financial assets as subsequently measured at amortised cost, fair value through other comprehensive income (FVTOCI) or fair value through profit or loss (FVTPL) on the basis of its business model for managing the financial assets and the contractual cash flow characteristics of the financial asset, as per Ind AS 109.

a. Subsequent Measurement - Equity Instruments

All equity investments other than investments in subsidiaries, joint ventures and associates are measured at fair value. Equity investments which are held for trading are classified as FVTPL. For all other equity investments, the Company decides to classify the same either at FVTOCI or FVTPL. The Company makes such election on an instrument by instrument basis. The classification is made on initial recognition and is irrevocable. Investment in equity instruments of subsidiaries, joint ventures and associates are measured at cost.

b. Subsequent Measurement - Debt Instruments

A financial asset being debt instrument that meets the following 2 conditions is measured at amortised cost (net off any write down for impairment) unless the asset is designated at fair value through profit or loss under the fair value option.

Business Model Test: the objective of the Company's model is to hold the financial asset to collect the contractual cash flows (rather than to sell the instrument prior to its contractual maturity to realise its fair value changes).

Cash Flow Characteristics Test: The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payment of principal and interest on the principal amount outstanding.

A financial asset that meets the following 2 conditions is measured at fair value through other comprehensive income unless the asset is designated at fair value through profit or loss under the fair value option.

Business Model Test: the financial asset is held within a business model whose objective is achieved both by collecting contractual cash flows and selling the financial assets.

Cash Flow Characteristics Test: The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payment of principal and interest on the principal amount outstanding.

Even if an instrument meets the two requirements to be measured at amortised cost or fair value through other comprehensive income, a financial asset is measured at fair value through profit or loss if doing so eliminates or significantly reduces a measurement or recognition inconsistency (sometimes referred to as an 'accounting mismatch') that would otherwise arise from measuring assets or liabilities or recognising the gains or losses on them on different basis.

All other debt instruments are measured at fair value through profit or loss.

Derecognition of Financial Assets

The Company de-recognises a financial asset only when the contractual rights to the cash flows from the asset expire, or it transfers the financial asset and substantially all risks and rewards of ownership of the asset, to another entity.

Impairment of Financial Assets

Loss allowance for expected credit losses is recognised for financial assets measured at amortised cost and FVTOCI.

For financial assets other than trade receivables, whose credit risk has not significantly increased since initial recognition, loss allowance equal to twelve months expected credit losses is recognised. Loss allowance equal to the lifetime expected credit losses is recognised if the credit risk on the financial instruments has significantly increased since initial recognition.

The Company follows 'simplified approach' for recognition of impairment loss allowance on trade receivables, considering historical trend, industry practices and the business environment in which the Company operates or any other appropriate basis.

The impairment losses and reversals are recognised in Statement of Profit and Loss.

(ii) Equity and Financial Liabilities

Debt and equity instruments issued by an entity are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

a. Equity Instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Company are recognised at the proceeds received, net of direct issue costs.

b. Financial Liabilities

Initial Recognition and Measurement

Financial liabilities are initially recognised at fair value plus any transaction costs that are attributable to the acquisition of the financial liabilities, except for the financial liabilities at FVTPL which are initially measured at fair value.

Subsequent Measurement

The financial liabilities are classified for subsequent measurement either at amortised cost or at fair value through Profit and Loss (FVTPL).

Amortised cost for financial liabilities represents amount at which financial liability is measured at initial recognition minus the principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount.

Derecognition of Financial Liabilities

A financial liability is removed from the Balance Sheet when the obligation is discharged, or is cancelled, or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the Statement of Profit and Loss.

Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount is reported in the Balance Sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, or to realize the assets and settle the liabilities simultaneously.

(g) Fair Value Measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 — Quoted prices in active markets for identical assets or liabilities
- Level 2 — Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices)
- Level 3 — Inputs for the asset or liability that are not based on observable market data.

(h) Inventories

Inventories are stated at the lower of cost and net realisable value. Costs comprise direct materials and, where applicable, direct labour costs and those overheads that have been incurred in bringing the inventories to their present location and condition. Net realisable value represents the estimated selling price for inventories less all estimated costs of completion and costs necessary to make the sale. The cost formula used for determination of cost is 'Weighted Average Cost'.

Machinery spares, stand-by equipment and servicing equipment are recognised as inventory when the useful life is less than one year and the same are charged to the Statement of Profit and Loss as and when issued for consumption.

(i) Income Tax

The income tax expense or credit for the period is the tax payable on the current period's taxable income based on the applicable income tax rate adjusted by changes in deferred tax assets and liabilities attributable to temporary differences and to unused tax losses.

The Company's liability for current tax is calculated using the Indian tax rates and laws that have been enacted by the reporting date. The Company periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretations and provisions where appropriate.

Deferred income tax is provided in full, using the liability method on temporary differences arising between the tax bases of assets and liabilities and their carrying amount in the financial statements. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantively enacted by the end of the reporting period and are expected to apply when the related deferred income tax assets is realised or the deferred income tax liability is settled.

Deferred tax assets are recognised for all deductible temporary differences and unused tax losses, only if, it is probable that future taxable amounts will be available to utilise those temporary differences and losses.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets and current tax liabilities and when the deferred tax balances relate to the same taxation authority. Current tax assets and tax liabilities are offset where the Company has a legally enforceable right to offset and intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously.

Current and deferred tax is recognised in the Statement of Profit and Loss, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case, the tax is also recognised in other comprehensive income or directly in equity, respectively.

Minimum Alternate Tax (MAT) credit is recognised as deferred tax asset only when and to the extent there is convincing evidence that the Company will pay normal income tax during the specified period. Such asset is reviewed at each Balance Sheet date and the carrying amount of the MAT credit asset is written down to the extent there is no longer a convincing evidence to the effect that the Company will pay normal income tax during the specified period.

(j) Provisions and Contingencies Provisions

A provision is recognised when the Company has a present obligation (legal or constructive) as a result of past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. These estimates are reviewed at each reporting date and adjusted to reflect the current best estimates.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

NOTES TO FINANCIAL STATEMENT FOR THE YEAR ENDED 31ST MARCH, 2022

Contingent Liabilities and Contingent Assets

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognised because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases, where there is a liability that cannot be recognised because it cannot be measured reliably. The Company does not recognize a contingent liability but discloses its existence in the financial statements unless the probability of outflow of resources is remote.

Contingent assets are not recognised in the financial statements. If the inflow of economic benefits is probable, then it is disclosed in the financial statements.

Provisions, contingent liabilities, contingent assets and commitments are reviewed at each Balance Sheet date.

(k) Employee Benefits

(i) Short-term Obligations

Liabilities for wages and salaries, including non-monetary benefits that are expected to be settled wholly within 12 months after the end of the period in which the employees render the related service are recognised in respect of employees' services up to the end of the reporting period and are measured at the amounts expected to be paid when the liabilities are settled.

(ii) Post-employment Obligations

The Company operates the following post-employment schemes:

(a) Defined benefit plan (Gratuity), and

(b) Defined contribution plans such as, provident fund.

Defined Benefit Plan

The liability or asset recognised in the Balance Sheet in respect of defined benefit gratuity plan is the present value of the defined benefit obligation at the end of the reporting period. The defined benefit obligation is calculated annually on the basis of actuarial valuation using the Projected Unit Credit method.

The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows by reference to market yields at the end of the reporting period on government bonds that have terms approximating to the terms of the related obligation.

The interest cost is calculated by applying the discount rate to the balance of the defined benefit obligation. This cost is included in employee benefits expense in the Statement of Profit and Loss.

Remeasurement gains and losses arising from experience adjustments and changes in actuarial assumptions are recognised in the period in which they occur, directly in other comprehensive income.

Defined Contribution Plans

Defined Contribution Plans such as provident fund are charged to the Statement of Profit and Loss as an expense, when an employee renders the related services.

(iii) Other Long-term Employee Benefits

The liabilities for compensated absences that are not expected to be settled wholly within 12 months are measured as the present value of expected future payments to be made in respect of services provided by employees up to the end of the reporting period using the Projected Unit Credit method. Remeasurements as a result of experience adjustments and changes in actuarial assumptions are recognised in the Statement of Profit and Loss.

The obligations are presented as current liabilities in the Balance Sheet if the entity does not have any unconditional right to defer settlement for at least 12 months after the end of the reporting period, regardless of when the actual settlement is expected to occur.

(l) Cash and Cash Equivalents

For the purpose of presentation in the Statement of Cash Flows as well as the Balance Sheet, cash and cash equivalents include cash on hand, demand deposits with banks, other short-term highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

(m) Earnings per Share (EPS)

Basic earnings per share are computed by dividing the profit / (loss) after tax by the weighted average number of equity shares outstanding during the year. The weighted average number of equity shares outstanding during the year is adjusted for the events for bonus issue, bonus element in a rights issue to existing shareholders, share split and reverse share split (consolidation of shares).

Diluted earnings per share is computed by dividing the profit / (loss) after tax as adjusted for dividend, interest and other charges to expense or income (net off any attributable taxes) relating to the dilutive potential equity shares, by the weighted average number of equity shares considered for deriving basic earnings per share and the weighted average number of equity shares which could have been issued on conversion of all dilutive potential equity shares.

(n) Dividend Distribution to Equity Shareholders

Dividend distributed to Equity shareholders is recognised as distribution to owners of capital in the Statement of Changes in Equity, in the period in which it is paid. Dividend proposed by the Board of Directors, subject to the approval of shareholders, is disclosed in the notes to financial statements.

(o) Foreign Currency Transactions

Transactions in foreign currencies are recognised at the prevailing exchange rates on the transaction dates. Realised gains and losses on settlement of foreign currency transactions are recognised in the Statement of Profit and Loss.

Monetary foreign currency assets and liabilities at the year-end are translated at the year-end exchange rates and the resultant exchange differences are recognised in the Statement of Profit and Loss.

(p) Revenue Recognition

Effective from 01 April 2018, the Company has adopted Indian Accounting Standard 115 (Ind AS 115)-

-'Revenue from contracts with customers'. Revenue from contracts with customers is recognized on transfer of control of promised goods or services to the customer at amount that reflects the consideration to which the company is expected to be entitled in exchange for those goods or services. Revenue towards satisfaction of performance obligation is measured at the amount of transaction price (net of variable consideration) allocated to that performance obligation. The transaction price of goods sold and services rendered is net of variable consideration on account of various discounts and schemes offered by the Company as part of the contract. This variable consideration is estimated based on expected value of outflow. Revenue (net of variable consideration) is recognized only to the extent that it is highly probable that the amount will not be subject to significant reversal when uncertainty relating to its recognition is resolved.

Revenue from sale of products is recognized when the control on the goods have been transferred to the customer. The performance obligation in case of sale of products is satisfied at a point in time when material is shipped / delivered to the customer as may be specified in the contract.

Interest Income

Interest income is accrued on a time proportion basis, by reference to the principal outstanding and the applicable effective interest rate.

Dividend Income

Dividend income from investments is recognised when the shareholder's rights to receive payment have been established.

Income from Services

Income from services is recognised (net of taxes as applicable) as they are rendered, based on agreement/ arrangement with the concerned customers.

(a) Significant Accounting Estimates, Judgements and Assumptions:

The preparation of the Company's financial statements in conformity with Ind AS requires Management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances existing when the financial statements were prepared. The estimates and underlying assumptions are reviewed on an ongoing basis. Revision to accounting estimates is recognised in the year in which the estimates are revised and in any future year affected.

In the process of applying the Company's accounting policies, Management has made the following judgements which have significant effect on the amounts recognised in the financial statements:

- i. **Useful Lives of Property, Plant and Equipment:** Determination of the estimated useful life of tangible assets and the assessment as to which components of the cost may be capitalised. Useful life of tangible assets is based on the life specified in Schedule II of the Act and also as per Management estimate for certain category of assets. Assumption also needs to be made, when the Company assesses, whether an asset may be capitalised and which components of the cost of the assets may be capitalised.
- ii. **Fair Value Measurement of Financial Instruments:** When the fair values of financial assets and financial liabilities recorded in the Balance Sheet cannot be measured based on quoted prices in active markets, their fair value is measured using appropriate valuation techniques. The inputs for these valuations are taken from observable sources where possible, but where this is not feasible, a degree of judgement is required in establishing fair values. Judgements include considerations of various inputs including liquidity risk, credit risk, volatility etc. Changes in assumptions/ judgements about these factors could affect the reported fair value of financial instruments.
- iii. **Measurement of Defined Benefit Plan:** The cost of the defined benefit gratuity plan and other post-employment benefits and the present value of the gratuity obligation are determined using actuarial valuations. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases and mortality rates. Due to the complexities involved in the valuation and its long term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date.
- iv. **Impairment of Financial Assets:** Trade receivables are stated at their normal value as reduced by appropriate allowances for estimated irrecoverable amounts. Individual trade receivables are written off when Management deems them not collectable. Impairment is made on the expected credit loss model, which is the present value of the cash shortfall over the expected life of the financial assets. The impairment provisions for financial assets are based on assumption about the risk of default and expected loss rates. Judgement in making these assumptions and selecting the inputs to the impairment calculation are based on past history, existing market condition as well as forward looking estimates at the end of each reporting period.
- v. **Impairment of Non-financial Assets:** The Company assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or Cash Generating Unit (CGU)'s fair value less costs of disposal and its value in use. It is determined for an individual asset unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered as impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used.

- vi. **Contingencies:** Management judgement is required for estimating the possible outflow of resources, if any, in respect of contingencies/ claim/ litigation against the Company as it is not possible to predict the outcome of pending matters with accuracy.

Integra Garments & Textiles Limited and others vs. The Union of India and others - W.P No. 430 of 2020

Our Company has filed a writ petition against The Union of India and others ("**Respondents**") before the Hon'ble Madras High Court against a demand of ₹73,56,080 raised by the Director General of Foreign Trade and the Commissioner of Customs, EODC, Chennai - IV. The demand stems from a failure to fulfill export obligations by M/s. Fabritex Exports Private Limited (hereinafter referred to as "**Importer**"). The Importer had obtained an advanced authorization bearing no. 0710041662 dated November 30, 2005 from the Additional Director General of Foreign Trade ("**ADGFT**"), Bangalore, and had imported goods valued at ₹3,39,39,123 involving customs duty of ₹73,56,080. The said authorization was issued to the Importer with a condition that the Importer would fulfill the Export Obligation as

prescribed by the authorities. Additionally, the importer also executed a bond of Rs. 1,25,00, 000 with an undertaking stating that they would fulfill the export obligation, failing which they will pay back the customs duty availed as exemption under advance authorization scheme along with the applicable interest. The Importer failed to fulfill the export obligation and produce the Export Obligation Discharge Certificate from the concerned ADGFT within the prescribed time. This resulted in a violation of the export obligation and the conditions under the advance authorization and the bond executed by them. A show cause notice was also furnished to the Importer by the Respondent. The Importer amalgamated with our Company, therefore, the show cause notice and the charges mentioned therein were deemed to be against our Company. RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Consolidated FDI Policy and FEMA. The FDI Policy prescribes the limits and conditions subject to which foreign investment can be made in different sectors of the Indian economy and FEMA regulates the precise manner in which such investment may be made.

The government bodies responsible for granting foreign investment approvals are the concerned ministries/departments of the Government of India and the RBI. Pursuant to the press release dated May 24, 2017, the Union Cabinet phased out the FIPB and it was replaced by the Foreign Investment Facilitation Portal (**FIFP**) to speed up the FDI inflow and to increase the transparency in the FDI approvals in the country. The DIPP issued the Standard Operating Procedure (SOP) for Processing FDI Proposals on June 29, 2017 (the "**SOP**"). The SOP provides a list of the competent authorities to grant approvals for foreign investment for sectors/activities requiring Government approval. For sectors or activities that are currently under the automatic route but which required Government approval earlier as per the extant policy during the relevant period, the concerned Administrative Ministry/Department shall act as the competent authority (the "**Competent Authority**") for the grant of post facto approval for foreign investment. In circumstances where there is a doubt as to which department shall act as the Competent Authority, the DIPP will identify the Competent Authority.

The Government of India, from time to time, has made policy pronouncements on Foreign Direct Investment ("**FDI**") through press notes and press releases. The DIPP, has issued a consolidated FDI Policy DPIIT File Number 5(2)/2020-FDI Policy Dated the October 15, 2020 ("**FDI Policy 2020**"), which consolidates and supersedes all previous press notes, press releases and clarifications on FDI policy issued by the DIPP that were in force till that date. The Government of India proposes to update the consolidated circular on FDI policy once every year and therefore, the FDI Policy 2020 will be valid until the DIPP issues an updated circular.

Under the FDI Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to 100% without any prior approvals, however the foreign investor must follow certain prescribed procedures for making such investment. Accordingly, the process for foreign direct investment ("**FDI**") and approval from the Government of India will now be handled by the **FIFP**.

The transfer of shares between an Indian resident and a non-resident does not need prior approval of the RBI, provided that (i) the activities of the investee company falls under the automatic route as provided in the FDI Policy and FEMA, and the transfer does not attract the provisions of the SEBI Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI and RBI.

As per the extant policy of the Government of India, erstwhile OCBs cannot participate in this Issue. OCBs or Overseas Corporate Bodies have been derecognised as a class of investor entity in India with effect from September 16, 2003.

Overseas Corporate Body means a company, partnership firm, society and other corporate body owned directly or indirectly to the extent of at least sixty per cent by Non- Resident Indians and includes overseas trust in which not less than sixty percent beneficial interest is held by Non-resident Indians directly or indirectly but irrevocably, which was in existence as on September 16, 2003 and was eligible to undertake transactions pursuant to the general permission granted under FEMA. Any investment made in India by such entities will be treated as investments by incorporated non-resident entities, i.e. a foreign company.

The Issue, if renounced by our shareholders, may include offers within India, to Indian institutional, non-institutional and retail investors in offshore transactions as defined in, and made in reliance upon exemptions from the registration requirements under the United States Securities Act of 1933, as amended (the "**U.S. Securities Act**"), including the exemption under Regulation S ("**Regulation S**") of the U.S. Securities Act.
