SECTION III – RISK FACTORS

An investment in our Equity Shares involves a high degree of risk. You should carefully consider the risks described below as well as other information as may be disclosed in this Draft Prospectus before making an investment in our Equity Shares. The risks described in this section are those that we consider to be the most significant to our business, results of operations and financial condition as of the date of this Draft Prospectus. In addition, the risks set out in this section may not be exhaustive and additional risks and uncertainties not presently known to us, or which we currently deem to be immaterial, may arise or may become material in the future. If any or a combination of the following risks or other risks that are not currently known or are now deemed immaterial actually occur, our business, prospects, results of operations and financial condition could suffer, the trading price of the Equity Shares could decline, and you may lose all or part of your investment. Unless specified in the relevant risk factor below, we are not in a position to quantify the financial implication of any of the risks mentioned below. Any potential investor in the Equity Shares should pay particular attention to the fact that we are subject to a regulatory environment in India which may differ significantly from that in other jurisdictions. In making an investment decision, prospective investors must rely on their own examinations of us and the terms of the issue, including the merits and the risks involved. Prospective investors should consult their tax, financial and legal advisors about the particular consequences of investing in the issue. For further details, see “Business Overview” on page 61. This Draft Prospectus contains forward-looking statements that involve risks and uncertainties. Our actual results may differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Draft Prospectus. See “Forward-Looking Statements” on page 16 of this Draft Prospectus. Unless otherwise stated or the context otherwise requires, the financial information used in this section is derived from our Restated Financial Statements included in this Draft Prospectus.

INTERNAL RISKS

1. ***Some or all of our ongoing and planned projects may not be completed by their expected completion dates or at all. Such delays may adversely affect our business, results of operations and financial condition.***

As contractors, our ongoing and planned projects may be subject to significant changes and modifications from currently estimated management plans and timelines of the developers, as a result of factors outside our control, including, among others:

- defects or challenges to the land titles, including failure or delay in obtaining consent of current occupants.
- expiration of agreements to develop land or leases, and our inability to renew them in time or at all.
- availability of financing.
- failure or delay in securing necessary statutory or regulatory approvals and permits for us to develop some of our projects.
- natural disasters and weather conditions.
- reliance on third-party sub-contractors and the ability of third parties to complete their services on schedule and on budget; and

Such changes and modifications to our timelines may have a significant impact on our ongoing and planned projects, and consequently, we may not complete these projects as contemplated, or at all, which may have an adverse effect on our business, results of operations and financial condition. Some of our completed projects have faced delays in the past. In the event of occurrence of such events, could result in disruption in our business activities, which could adversely affect our results of operations.

2. ***We require certain approvals and licenses in the ordinary course of business and are required to comply with certain rules and regulations to operate our business, and the failure to obtain, retain and renew such approvals and licenses or comply with such rules and regulations, and the failure to obtain or retain them in a timely manner or at all may adversely affect our operations.***

We require several statutory and regulatory permits, licenses and approvals to operate our business, some of which our Company has either received, applied for or is in the process of application. Many of these approvals are granted

for fixed periods of time and need renewal from time to time. Non-renewal of the said permits and licenses would adversely affect our Company's operations, thereby having a material adverse effect on our business, results of operations and financial condition. There can be no assurance that the relevant authorities will issue any of such permits or approvals in the time-frame anticipated by us or at all. Further, some of our permits, licenses and approvals are subject to several conditions and we cannot provide any assurance that we will be able to continuously meet such conditions or be able to prove compliance with such conditions to the statutory authorities, which may lead to the cancellation, revocation or suspension of relevant permits, licenses or approvals. Any failure by us to apply in time, to renew, maintain or obtain the required permits, licenses or approvals, or the cancellation, suspension or revocation of any of the permits, licenses or approvals may result in the interruption of our operations and may have a material adverse effect on the business. In addition, we are subject to laws and regulations relating to, among others, environmental approvals in respect of the project, minimum wages, working hours, health and safety of our labourers and requirements of registration of contract labour. Although we believe that our contractual arrangements are substantially in compliance with such laws and regulations, statutory authorities may allege non-compliance and we cannot assure you that we will not be subject to any such regulatory action in the future, including penalties, seizure of land and other civil or criminal proceedings. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change, we may incur increased costs, be subject to penalties or suffer a disruption in our business activities, any of which could adversely affect our results of operations. Our Company is yet to apply for registration under the Contract Labour (Regulation and Abolition) Act, 1970 and a regulatory action can be taken against the Company by the CLRA authority including imposition of fine, which could adversely affect the business and financial operations of our company.

For further details, please see chapters titled "Government and Other Statutory Approvals" at pages 103 respectively of this Draft Prospectus.

3. *Our real estate construction activities are geographically concentrated in Maharashtra state mainly. Consequently, we are exposed to risks from economic, regulatory and other changes in these areas, which in turn may have an adverse effect on our business, results of operations, cash flows and financial condition.*

Our real estate construction activities are primarily focused in Maharashtra state mainly. For details of our projects, see "Business Overview" on page 61. The real estate market in Maharashtra may be affected by various factors outside our control, including prevailing local and economic conditions, changes in the supply and demand for properties comparable to those we develop, changes in the applicable governmental regulations, economic conditions, demographic trends, employment and income levels and interest rates, among other factors. These factors may contribute to fluctuations in real estate prices, rate of sales and the availability of land in the Maharashtra and could also adversely affect the demand for and valuation of our ongoing and planned projects. Any such risk may be further exacerbated by the illiquid nature of real estate investments. Consequently, our business, results of operations, cash flows and financial condition have been and will continue to be heavily dependent on the performance of, and the prevailing conditions affecting, the real estate market in the Maharashtra.

4. *We cannot assure you that the construction of our projects will be free from any and all defects.*

We cannot assure you that we will always finish the construction of our projects in accordance with the requisite specifications or that the construction of our projects will be free from any and all defects. If the work is unsatisfactory, the work has to be redone as per the instructions of Site in Charge without any extra cost. In the event of discovery of defects/faults in our work, or due to damages to our construction due to factors beyond our control, or any of the other reasons, we may incur significant contractual liabilities and losses under our projects contracts and such losses may materially and adversely affect our financial performance and results of operations.

5. *Changes in market conditions between the time that we acquire land, enter into development agreements, construct and ultimately sale, may affect our ability to achieve the estimated profits out of our projects or at all, which could adversely affect our revenues and earnings.*

Our business is heavily dependent on the performance of the real estate market in western region in the state of Maharashtra. In the event of a regional slowdown in construction activity in Maharashtra or factors such as a slowdown in the industries including IT/ ITeS and automotive sectors, or any developments that make projects in Maharashtra less economically beneficial, we may experience more pronounced effects on our financial condition and results of operations than if we had further diversified our portfolio across different sections in different geographical locations. Our business, financial condition and results of operations have been and will continue to be largely dependent on the performance of, and the prevailing conditions affecting, and the real estate market in Maharashtra. The real estate markets in Maharashtra may perform differently from, and be subject to, market and regulatory developments that are different from the real estate markets in other States of India. We cannot assure you that the demand for our properties in western India will grow, or will not decrease, in the future.

The real estate market is affected by changes in government policies, economic conditions, demographic trends, employment and income levels and interest rates among other factors, which may negatively affect the demand for and the valuation of our Ongoing Projects, Projects under Development as well as our Forthcoming Projects.

These and other factors may negatively contribute to changes in real estate prices, the demand for and valuation of our current and future properties under development, may restrict the availability of land in western India and may adversely affect our business, financial condition and results of operations. If property prices fall in western India particularly in the State of Maharashtra, our business, financial condition and results of operations may be adversely affected.

6. *Increased raw material, labour and other costs, may adversely affect our results of operation and feasibility of our development plan.*

We procure building materials for our projects, such as steel, cement, flooring products, hardware, bitumen, sand and aggregates, doors and windows, bathroom fixtures and other interior fittings, from third-party suppliers. The prices and supply of basic building materials and other raw materials depend on factors outside our control, including cost of their raw materials, general economic conditions, competition, production costs and levels, transportation costs, indirect taxes and import duties. Our ability to develop and construct projects profitably is dependent on our ability to obtain adequate and timely supply of building materials within our estimated budget. As we source our building materials from third parties, our supply chain may be interrupted by circumstances beyond our control. Poor quality roads and other transportation-related infrastructure problems, inclement weather and road accidents may also disrupt the transportation of supplies. Prices of certain building materials and, in particular, cement and steel prices, are susceptible to rapid increases. Further, we operate in a labour-intensive industry and if we or our contractors are unable to negotiate with the labour or their sub-contractors, it could result in work stoppages or increased operating costs as a result of higher than anticipated wages or benefits. In addition, it may be difficult to procure the required labour for ongoing or planned projects.

During periods of shortages in the supply of building materials or labour, we may not be able to complete projects according to our previously determined time frames, at our previously estimated project costs, or at all, which may adversely affect our results of operations and reputation. In addition, during periods where the prices of building materials or labour significantly increase, we may not be able to pass these price increases on to our customers, which could reduce or eliminate the profits we intend to gain from our projects. These factors could adversely affect our business, results of operations and cash flows.

7. *Our business is subject to various operating risks at our construction sites, the occurrence of which can affect our results of operations and consequently, financial condition of our Company.*

Our business operations are subject to operating risks, such as breakdown or failure of equipment's used at the project sites, weather conditions, interruption in power supply, shortage of consumables, performance below expected levels of output or efficiency, natural disasters, obsolescence, labour disputes, accidents, our inability to respond to technological advancements and emerging realty industry standards and practices along with the need to comply with the directives of relevant government authorities. The occurrence of these risks, if any, could significantly affect our operating results, and the slowdown / shutdown of business operations may have a material adverse effect on our business operations and financial conditions.

8. *Our Company's activities are labour intensive and depend on availability of skilled and unskilled labourers in large numbers. In case of unavailability of such labourers and / or inability to retain such personnel or occurrence of any work stoppages, our business operations could be affected.*

We operate in a labour-intensive industry and our contractors hire casual labour to work on our projects. In the event of a labour dispute, if our contractors are unable to successfully negotiate with the workmen or sub-contractors, it would result in work stoppages or increased operating costs. It may also be difficult to procure the required skilled workers for existing or future projects. In addition, we may also be liable for or exposed to sanctions, penalties or losses arising from accidents or damages caused by our workers or contractors. Though we have not experienced any major disruptions in our business operations due to disputes or other problems with our work force in the past; however, there can be no assurance that we will not experience such disruptions in the future. Such disruptions may adversely affect our business and results of operations and may also divert the management's attention and result in increased costs.

India has stringent labour legislation that protects the interests of workers, including legislation that sets forth detailed procedures for the establishment of unions, dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. We are also subject to laws and regulations governing relationships with employees, in such areas as minimum wage and maximum working hours, overtime, working conditions, hiring and terminating of employees and work permits. Although our employees are not currently unionized, there can be no assurance that they will not unionize in the future. If our employees unionize, it may become difficult for us to maintain flexible labour policies, and we may face the threat of labour unrest, work stoppages and diversion of our management's attention due to union intervention, which may have a material adverse impact on our business, results of operations and financial condition.

9. *We face competition in our business from organized and unorganized players, which may adversely affect our business operation and financial condition.*

The market for our industry is competitive on account of both the organized and unorganized players. Players in this industry generally compete with each other on key attributes such as quality of construction, pricing and timely delivery. Some of our competitors may have longer industry experience and greater financial, technical and other resources, which may enable them to react faster in changing market scenario and remain competitive. Moreover, the unorganized sector offers their products at highly competitive prices which may not be matched by us and consequently affect our volume of sales and growth prospects. Growing competition may result in a decline in our market share and may affect our margins which may adversely affect our business operations and our financial condition.

10. *We may require capital financing, which may not be available to us on commercially viable terms, or at all.*

Our business is cyclical and highly capital intensive, requiring substantial capital to complete our projects. We expect that we will require additional funding to meet our working capital needs, which could result in incurrence of indebtedness and leverage and therefore, borrowing costs and require us to comply with certain restrictive covenants. Our ability to obtain financing on favourable commercial terms, if at all, will depend on a number of factors, including:

- our future financial condition, results of operations and cash flows.
- the amount and terms of any existing indebtedness.
- general market conditions and market conditions for financing activities by real estate companies; and
- economic, political and other conditions in India and, in particular, state of Maharashtra.

Challenging conditions such as the global financial conditions, including continued disruptions in the capital and credit markets as a result of uncertainty, changing or increased regulation of financial institutions, reduced alternatives or failures of significant financial institutions, may significantly diminish the availability of credit to us and our customers. This may require us to delay or abandon some or all of our planned projects, reduce planned expenditures and advances to obtain land or development rights, and reduce the scale of our operations, and may adversely affect the sales of, and market rates for, our projects, and, consequently, our profitability. In addition, Indian regulations on foreign investment in housing, built-up infrastructure and construction and development projects impose significant restrictions, which may impact the availability of financing for our operations. Further, under current Indian regulations except for certain limited purposes, external commercial borrowings cannot be raised for investment in real estate, which may further restrict our ability to obtain necessary financing. In the event we are not able to raise additional financing on favourable terms, or at all, our planned capital expenditure, business, results of operations and prospects could be adversely affected.

11. *Changes in interest rates in India could adversely affect our business.*

Our results of operations, and the financial standing of our customers, are substantially affected by prevailing interest rates and the availability of credit in the Indian economy. Interest rates in India have fluctuated over the last few years. Our ability to borrow funds for the development of our real estate projects is affected in part by the prevailing interest rates available to us from leading Indian banks. Changes in prevailing interest rates affect our interest expense in respect of our borrowings, and our interest income in respect of our interest on short-term deposits with banks and loans to associates. Significantly, the interest rate at which we may borrow funds, and the availability of capital to us for development purposes, affects our results of operations by limiting or facilitating the number of projects we may undertake and determining the return which we must obtain from each project to meet our obligations under our borrowings.

Changes in interest rates also affect the ability and willingness of our prospective real estate customers, particularly the customers for our residential properties, to obtain financing for their purchases of our completed developments. The interest rate at which our real estate customers may borrow funds for the purchase of our properties affects the affordability and purchasing power of, and hence the demand for, our real estate developments.

There can be no assurance that variations in interest rates and interest rate policy by the RBI will not adversely affect our financial condition and results of operations

12. *Our business is substantially affected by prevailing economic conditions in India.*

We perform all of our real estate construction activities in India, all of our projects are located in India, and the predominant portion of our customers are Indian nationals. As a result, we are highly dependent on prevailing economic conditions in India and our results of operation are significantly affected by factors influencing the Indian economy. Factors that may adversely affect the Indian economy, and hence our results of operations, include:

- any increase in Indian interest rates or inflation;
- any scarcity of credit or other financing in India, resulting in an adverse impact on economic conditions in India and scarcity of financing of our real estate developments and the purchase thereof by our customers;
- prevailing income conditions among Indian consumers and Indian corporations;
- changes in India's present tax, trade, fiscal or monetary policies;
- natural disasters, political instability, communal disturbances, riots, civil unrest, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighbouring countries;
- prevailing national, regional or global economic conditions, including in India's principal export markets; and
- other significant regulatory or economic developments in or affecting India or its real estate development sector.

In addition to the factors set forth above, our business may be affected by adverse changes specific to the residential, and office space real estate markets. Demand in the residential real estate market may be adversely affected by changes such as a decrease in disposable income or a rise in residential mortgage rates or a decline in the population. Demand for our office space developments may be adversely affected by deteriorating economic conditions that could prompt current and potential tenants to place any expansion plans on hold or to search for locations with lower rental rates.

13. *Any negative cash flows in the future would adversely affect our cash flow requirements, which may adversely affect our ability to operate our business and implement our growth plans, thereby affecting our financial condition.*

We have in the past experienced, and may in the future, experience negative operating cash flows. The following table sets forth certain information relating to our cash flows on a consolidated basis for the periods indicated:

Particulars	Rs in Lacs	
	For the Financial Year ended	
	2022	2021
Net cash flow from/(used in) operating activities	(12.90)	2.81

Negative cash flows over extended periods, or significant negative cash flows in the short term, could materially impact our ability to operate our business and implement our growth plans. As a result, our cash flows, business, future financial performance, and results of operations could be materially and adversely affected.

For further information, see “Financial Statements” on pages 67.

14. *A slowdown in economic growth in India could cause our business to suffer.*

Our performance and the quality and growth of our assets are necessarily dependent on the health of the overall Indian economy. A slowdown in the Indian economy could adversely affect our business. India’s economy could be adversely affected by a general rise in interest rates, weather conditions adversely affecting agriculture, commodity and energy prices or various other factors. In addition, the Indian economy is in a state of transition. The share of the services sector of the economy is rising while that of the industrial, manufacturing and agricultural sectors is declining. It is difficult to gauge the impact of these fundamental economic changes on our business. Any slowdown in the Indian economy or future volatility in global commodity prices could adversely affect our business.

15. *We, on an ongoing basis, explore new construction techniques aimed at reducing costs, and/ or improving margins and/ or quality/ timelines of construction that are untested.*

We on an ongoing basis explore new construction techniques that are aimed at lowering our costs, and/ or improving our margins and/ or quality/ timelines of construction. A failure to implement such new construction techniques in time or at all may result in a material adverse effect of our business, financial condition and results of operations.

16. *Our business may be affected by severe weather conditions and other natural disasters*

Our business activities may be materially and adversely affected by severe weather conditions, which may force us to evacuate personnel or curtail services, replace damaged equipment and facilities or suspend our operations or postpone delivery of materials to our worksites. Heavy or sustained rainfalls or other extreme weather conditions such as cyclones could result in delays or disruptions to our operations during the critical periods of our projects and cause severe damages to our premises and equipment. High temperatures during summer months and the monsoon season could limit our ability to carry on construction activities or to fully utilize our resources. Our business activities may also be adversely affected by other natural disasters, including earthquakes, floods, and landslides, which may cause significant interruptions of our operations and damages to our properties and working environment which may not be adequately covered by the insurance policies availed by our Company. During periods of curtailed activity due to severe weather conditions or natural disasters, we may continue to incur operating expenses but our revenues from operations may be delayed or reduced.

- 17. *Our business is capital intensive and is significantly dependent on the availability of real estate financing in India by the constructors. Difficult conditions in the global capital markets and the global economy generally may adversely affect our business and results of operations and may cause us to experience limited availability of funds. We cannot assure you that we will be able to raise sufficient financing on acceptable terms, or at all.***

Our business is capital intensive, requiring substantial capital to develop our projects. The actual amount and timing of our future capital requirements may also differ from estimates as a result of, among other things, unforeseen delays or cost overruns in developing our projects, changes in business plans due to prevailing economic conditions, unanticipated expenses, regulatory changes, and engineering design changes. To the extent our planned expenditure requirements exceed our available resources, we will be required to seek additional debt or equity financing. Additional debt financing, if available, could increase our interest cost and require us to comply with additional restrictive covenants in our financing agreements. In addition, the Indian regulations on construction and development projects impose significant restrictions on us, including the types of financing activities we may engage in. Our ability to obtain additional financing on favourable commercial terms, if at all, will depend on a number of factors, including:

- our results of operations and cash flows;
- the amount and terms of our existing indebtedness;
- general market conditions in the markets where we operate; and
- General condition of the debt and equity markets.

In addition, changes in the global and Indian credit and financial markets may affect the availability of credit to our customers and decrease in demand for our development.

Our inability to obtain funding on reasonable terms, or at all, would have an adverse effect on our business and results of operations.

- 18. *We enter into certain related party transactions in the ordinary course of our business and we cannot assure you that such transactions will not have an adverse effect on our results of operation and financial condition.***

We have entered into transactions with related parties in the past and are likely to do so in the future. For example, we have entered into various transactions, including loan availed by the company, managerial remuneration etc. For details, see Financial Statements “Related Party Transactions” on page 67. We cannot assure you that we could not achieve more favourable terms if such transactions were not entered into with related parties. We cannot assure you that such transactions, individually or in the aggregate, will not have an adverse effect on our results of operations and financial condition.

- 19. *We are subject to extensive statutory or governmental regulations, which may restrict our flexibility in operating our business and any non-compliance may have an adverse effect on our business, financial condition and results of operations.***

Development of real estate projects is subject to extensive local, state and central laws and regulations that govern the development of and construction on land, including laws and regulations related to zoning, permitted land uses, proportion and use of open spaces, building designs, fire safety standards, height of the buildings, access to water and other utilities and water and waste disposal. In addition, we and our sub-contractors are subject to laws and regulations relating to, among others, environmental approvals in respect of the project, minimum wages, working hours, health and safety of our labourers and requirements of registration of contract labour. Although we believe that our contractual arrangements are substantially in compliance with such laws and regulations, statutory authorities may allege noncompliance and we cannot assure you that we will not be subject to any such regulatory action in the future, including penalties, seizure of land and other civil or criminal proceedings. In addition, such laws and regulations may change in future requiring the expenditure of resources and changes in development plan amongst other things, which would adversely affect our business, financial conditions and results of operations.

The laws and regulations, under which we and our subcontractors operate, may result in delays or stoppage in construction and development, causing us to incur substantial compliance costs and other increased costs, and prohibit or severely restrict our real estate and construction businesses. If we are unable to continue to acquire, construct and develop land and deliver products as a result of these restrictions or if our compliance costs increase substantially, our business, financial condition and results of operations may be adversely affected.

20. *If the constructors, do not comply with certain environmental regulations or if environmental problems are discovered in respect of certain of our projects, it may adversely affect our business, financial condition and results of operations.*

The construction of projects is subject to extensive environmental laws and regulations, which govern the discharge, emission, storage, handling and disposal of a variety of substances that may be used in. Such laws and regulations include the Environmental Protection Act 1986, the Air (Prevention and Control of Pollution) Act 1981, the Water (Prevention and Control of Pollution) Act 1974 and other regulations promulgated by the Ministry of Environment and the Pollution Control Boards of the relevant states. Further, in accordance with such laws, the constructors are required to conduct an environmental assessment on most of our projects before we receive a regulatory approval. In case such environmental assessments reveal material environmental risks, the constructors may not receive the required regulatory approvals, which would ultimately affect our business, financial condition and results of operations.

21. *Accidents at the residential projects arising due to construction faults may lead to public liability consequences.*

We take due care and all possible steps to ensure adoption and compliance with high standards of safety, construction quality and fire control in our residential projects, but we cannot assure you that these mechanisms will be adequate to contain safety risks that may arise in the future. Further the company does not take commercial General Liability Insurance. If any unwarranted incident / Accident happen, there may be liability on the company and it may affect the business & cash flow of the company.

22. *We may be affected by inadequate health and safety precautions in India.*

In developing countries, such as India, health and safety standards on construction sites may not be applied as stringently as in industrialized countries. Construction companies in India remains, however, subject to various health and safety laws and regulations as well as laws and regulations governing our relationship with our employees in areas such as minimum wages, maximum working hours, overtime, working conditions, hiring and terminating employees, contract labor and work permits. Accidents and, in particular, fatalities may have an adverse impact on our reputation and may result in fines and/or investigations by public authorities as well as litigation from injured workers or their dependents.

23. *Our performance is subject to seasonality and revenue may fluctuate significantly from period to period.*

Our revenue from these construction activities may fluctuate significantly due to a variety of factors. Moreover, due to occasional lags in development timetables caused by unforeseen circumstances, we cannot predict with certainty when our real estate projects will be completed. Our results of operations may also fluctuate from period to period due to a combination of other factors beyond our control, including volatility in expenses such as costs to acquire land or development rights and construction costs. We may experience cash flow mismatches and difficulties in covering our operating costs, which may adversely affect our business, financial condition, results of operations and our ability to fund future projects.

As a result of one or more of these factors, we may record significantly higher turnover or profits during one accounting period and significantly lower turnover or profits during prior or subsequent accounting periods. Furthermore, the periods discussed in our financial statements may not be comparable to each other or to other future periods, and our results of operations and cash flows may vary significantly from period to period, year to year, and over time.

24. ***We are dependent on a number of key personnel, and the loss of or our inability to attract or retain such persons could adversely affect our business, results of operations and financial condition.***

We are highly dependent on our Key Managerial Personnel for setting our strategic business direction and managing our business. Our Managing Director and certain other Key Managerial Personnel have extensive experience in the real estate development sector. For further information, see “Our Management – Key Management Personnel” on page 64. Our ability to meet continued success and future business challenges depends on our ability to attract, recruit and retain experienced, talented and skilled professionals. Due to the current limited pool of skilled personnel in our industry, competition for senior management is intense. The loss of the services of our Key Managerial Personnel or our inability to recruit or train a sufficient number of experienced personnel or our inability to manage the attrition levels in different employee categories may have an adverse effect on our financial results and business prospects.

External Risk Factors

25. ***Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.***

The Government has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of the Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The Government has in recent years sought to implement economic reforms and the current government has implemented policies and undertaken initiatives that continue the economic liberalization policies pursued by previous governments. There can be no assurance that liberalization policies will continue in the future. The rate of economic liberalization could change and specific laws and policies affecting the road infrastructure sector, foreign investment and other matters affecting investment in our securities could change as well. A newly elected government may announce new policies or withdraw existing benefits, which may be applicable to our industry. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally and our business, prospects, financial condition and results of operations, in particular.

26. ***Our business faces adverse weather conditions and natural disasters that could cause significant interruptions of operations which leads to delay in completion of projects undertaken by us within the stipulated time leading to cost escalation or termination of the project, which in turn could adversely affect our results of operations. Further, the operation of infrastructure assets involves many risks and we may not have sufficient insurance coverage in respect of our economic losses which could adversely affect our financial results.***

Extended periods of adverse weather conditions or periods of heavy or sustained rainfall or any such extreme weather condition could result in delays or disruptions to our operations during critical periods and consequently result in reduced sales and profits. The procurement and construction works carried out in respect of our projects also involve a number of hazards including earthquakes, flooding, and landslides. Natural disasters may cause significant interruption to our operations, disruption to our properties and damage to the environment that could have an adverse impact on us.

Additionally, operating infrastructure assets involves many risks and hazards which may adversely affect our profitability, including:

- adverse changes in market demand or prices for the products or services that the project, when
- the willingness and ability of consumers to pay for infrastructure services.
- shortages of or adverse price movements for construction materials.
- design and engineering defects.
- breakdown, failure or substandard performance of equipment.
- temporary non-availability of machines and equipment
- improper installation or operation of equipment.
- labour disturbances.
- environmental hazards.

- industrial accidents; and
- terrorist activities.

Not all of the above risks may be insurable or possible to insure on commercially reasonable terms. We maintain insurance coverage, including business interruption insurance with respect to each of our operating road projects, which we believe is customary for the infrastructure industries in India and jurisdictions in which we operate. Our insurance, however, may not provide adequate coverage in certain circumstances and is subject to certain deductibles, exclusions and limits on coverage. For example, the insurance policies for our road projects do not cover losses caused by our failure to maintain such roads to agreed standards. We cannot assure you that the operation of our infrastructure assets will not be affected by any of the incidents and hazards listed above, or that the terms of our insurance policies will be adequate to cover any damage caused by any such incidents and hazards. Should an uninsured loss or a loss in excess of insured limits occur, we would lose the anticipated revenue from the construction contract and, in the case of our projects, the loss of our investment in the relevant project company.

27. *We face labour risks, including potential increases in labour costs.*

We operate in a labour - intensive industry and we or our contractors hire casual labour to work on our projects. In the event of a labour dispute, if our contractors are unable to successfully negotiate with the workmen or sub-contractors, it could result in work stoppages or increased operating costs as a result of higher than anticipated wages or benefits. It may also be difficult to procure the required skilled workers for existing or future projects. Either of these factors could adversely affect our business, financial condition, results of operations and cash flows. In addition, we may be liable for or exposed to sanctions, penalties or losses arising from accidents or damages caused by our workers or contractors.

28. *Our operations and the work force on our development sites are exposed to various hazards.*

We conduct various site studies prior to the acquisition of any parcel of land and its construction and development. However, there are certain unanticipated or unforeseen risks that may arise due to adverse weather and geological conditions, such as storms, outbreaks of disease, hurricanes, lightning, floods, landslides, rockslides and earthquakes and other reasons. Additionally, our operations are subject to hazards inherent in providing these services, such as the risk of equipment failure, impact from falling objects, collision, work-related accidents, fire, or explosion, including hazards that may cause injury and loss of life, severe damage to and destruction of property and equipment, and environmental damage. If any one of these hazards or other hazards were to affect our business, our results of operations may be adversely affected. Moreover, any injury to or loss of life of the workers employed on our construction sites may expose us to liability and / or compensation claims.

29. *The real estate industry has witnessed significant downturns in the past, and any significant downturn in the future could adversely affect our business, financial condition and results of operations.*

Economic developments within and outside India adversely affected the property market in India and our overall business in the recent past. The global credit markets have experienced, and may continue to experience, significant volatility and may continue to have an adverse effect on the availability of credit and the confidence of the financial markets, globally as well as in India. As a result of the global downturn, the real estate industry also experienced a downturn. It resulted in an industry-wide softening of demand for property due to a lack of consumer confidence, decreased affordability, decreased availability of mortgage financing, and resulted in large supplies of apartments.

Even though the global credit and the Indian real estate markets have shown signs of recovery, market volatility and economic turmoil may continue to exacerbate industry conditions or have other unforeseen consequences, leading to uncertainty about future conditions in the real estate industry. These effects include, but are not limited to, a decrease in the sale of, or market rates for, our projects, delays in the release of certain of our projects in order to take advantage of future periods of more robust real estate demand and the inability of our contractors to obtain working capital. We cannot assure you that the government's responses to the disruptions in the financial markets will restore consumer

confidence, stabilise the real estate market or increase liquidity and availability of credit. Any significant downturn in future would have an adverse effect on our business, financial condition and results of operations.

30. *Restrictions on foreign direct investment ("FDI") in the real estate sector may hamper our ability to raise additional capital.*

The Government of India permits FDI of up to 100.00% in construction-development projects (which would include, amongst others, development of townships, construction of residential/commercial premises, hotels, resorts, recreational facilities), without prior approval, subject to certain conditions being fulfilled. These conditions relate, among other things, to the minimum area to be developed under a project, minimum capitalization, restrictions on repatriation and the time within which a project is required to be developed. Our inability to raise additional capital, through FDI, as a result of these and other restrictions could adversely affect our business and prospects. Further, under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are permitted subject to compliance with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares is not in compliance with such pricing guidelines or reporting requirements or certain other conditions, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from such sale of shares in India into foreign currency and repatriate that foreign currency from India will require the approval from the RBI, unless such sale is made on a stock exchange in India through a stock broker at the market price, and a no objection or tax clearance certificate from the income tax authority. We cannot assure you that any required approval from the RBI or any other Government agency can be obtained on any particular terms or at all.

31. *We may be affected by competition law in India and any adverse application or interpretation of the Competition Act could in turn adversely affect our business.*

The Competition Act was enacted for the purpose of preventing practices that have or are likely to have an adverse effect on competition in India and has mandated the CCI to regulate such practices. Under the Competition Act, any arrangement, understanding or action, whether formal or informal, which causes or is likely to cause an appreciable adverse effect on competition is void and attracts substantial penalties.

Further, any agreement among competitors which, directly or indirectly, involves determination of purchase or sale prices, limits or controls production, or shares the market by way of geographical area or number of subscribers in the relevant market is presumed to have an appreciable adverse effect in the relevant market in India and shall be void. The Competition Act also prohibits abuse of a dominant position by any enterprise. On March 4, 2011, the Central Government notified and brought into force the combination regulation (merger control) provisions under the Competition Act with effect from June 1, 2011. These provisions require acquisitions of shares, voting rights, assets or control or mergers or amalgamations that cross the prescribed asset and turnover based thresholds to be mandatorily notified to, and pre-approved by, the CCI. Additionally, on May 11, 2011, the CCI issued the Competition Commission of India (Procedure for Transaction of Business Relating to Combinations) Regulations, 2011, as amended, which sets out the mechanism for implementation of the merger control regime in India. The Competition Act aims to, among other things, prohibit all agreements and transactions which may have an appreciable adverse effect in India. Consequently, all agreements entered into by us could be within the purview of the Competition Act. Further, the CCI has extra-territorial powers and can investigate any agreements, abusive conduct or combination occurring outside of India if such agreement, conduct or combination has an appreciable adverse effect in India. However, the impact of the provisions of the Competition Act on the agreements entered into by us cannot be predicted with certainty at this stage. We do not have any outstanding notices in relation to non-compliance with the Competition Act or the agreements entered into by us.

However, if we are affected, directly or indirectly, by the application or interpretation of any provision of the Competition Act, or any enforcement proceedings initiated by the CCI, or any adverse publicity that may be generated due to scrutiny or prosecution by the CCI or if any prohibition or substantial penalties are levied under the Competition Act, it would adversely affect our business.

32. *Companies operating in India are subject to a variety of central and State Government taxes and surcharges. Any increases in tax rates could adversely affect our business and results of operations.*

Tax and other levies imposed by the Central and State Governments in India that affect our tax liability include central and state taxes and other levies, income tax, value added tax, turnover tax, service tax, stamp duty and other special taxes and surcharges which are introduced on a temporary or permanent basis from time to time. Moreover, the central and state tax scheme in India is extensive and subject to change from time to time. The Central or State Government may in the future increase the corporate income tax it imposes. Any such future increases or amendments may affect the overall tax efficiency of companies operating in India and may result in significant additional taxes becoming payable. Additional tax exposure could adversely affect our business and results of operations.

Risks Related to the Issue

33. *Our Company will not distribute the Offer Documents to certain overseas shareholders who have not provided an address in India for service of documents.*

Our Company will dispatch the Offer Documents to such shareholders who have provided an address in India for the service of documents or who are in jurisdictions where the offer and sale of the Rights Equity Shares permitted under laws of such jurisdictions and in each case who make a request in this regard. The Offer Documents will not be distributed to addresses outside India on account of restrictions that apply to the circulation of such materials in various overseas jurisdictions. However, the Companies Act requires companies to serve documents at any address, which may be provided by the members as well as through e-mail. Presently, there is a lack of clarity under the Companies Act, 2013, and the rules thereunder, with respect to the distribution of Issue Materials in overseas jurisdictions where such distribution may be prohibited under applicable laws of such jurisdictions. While we have requested all the shareholders to provide an address in India for the purposes of distribution of Issue Materials, we cannot assure you that the regulator or authorities would not adopt a different view with respect to compliance with the Companies Act and may subject us to fines or penalties.

34. *There is no public market for the Rights Equity Shares or Equity Shares outside India.*

After this Issue, there will continue to be no public market for our Equity Shares in the United States or any country other than India. In addition, the holders of the partly paid-up Rights Equity Shares will not be able to trade in these Equity Shares till they are credited to the holders' account as fully paid-up, and thereafter there will also be no public market for the Rights Equity Shares outside of India. We cannot assure you that the face value of the Rights Equity Shares will correspond to the price at which the Rights Equity Shares will trade subsequent to this Issue. This may also affect the liquidity of our Rights Equity Shares and Equity Shares and restrict your ability to sell them.

35. *Failure to exercise or sell the Rights Entitlements will cause the Rights Entitlements to lapse without compensation and result in a dilution of shareholding.*

The Rights Entitlements that are not exercised prior to the end of the Issue Closing Date will expire and become null and void, and Eligible Equity Shareholders will not receive any consideration for them. The proportionate ownership and voting interest in our Company of Eligible Equity Shareholders who fail (or are not able) to exercise their Rights Entitlements will be diluted. Even if you elect to sell your unexercised Rights Entitlements, the consideration you receive for them may not be sufficient to fully compensate you for the dilution of your percentage ownership of the equity share capital of our Company that may be caused as a result of the Issue. Renouces may not be able to apply in case of failure in completion of renunciation through off-market transfer in such a manner that the Rights Entitlements are credited to the demat account of the Renouces prior to the Issue Closing Date. Further in case the Rights Entitlements do not get credited in time, in case of On Market Renunciation, such Renounce will not be able to apply in this Issue with respect to such Rights Entitlements.

36. *Non-receipt of complete Call Money(ies) may have an impact of a consequential shortfall in Net Proceeds.*

The Calls shall be deemed to have been made at the time when the resolution authorizing such calls is passed at the meeting of our Board of Directors. The Calls may be revoked or postponed at the discretion of our Board of Directors, from time to time. Pursuant to the provisions of the Articles of Association, the Investors would be given at least 30 (Thirty) days' notice for the payment of the Calls. Our Board of Directors may, from time to time at its discretion, extend the time fixed for the payments of the Calls. Our Company, at its sole discretion, may send reminders for the calls as it deems fit, and if it does not receive the Call Money(ies) as per the timelines stipulated, it would forfeit the Application Money. Non-receipt of complete Call Money(ies) and a consequential forfeiture of the Application Money may lead to a shortfall in the Net Proceeds, which may have to be met out of internal accruals and may impact the business and capital expenditure plans. For further details, please refer to the section titled '*Objects of the Issue*' on page 18 of this Draft Letter of Offer.

37. *Any future issuance of the Equity Shares, or convertible securities by our Company may dilute your future shareholding and sales of the Equity Shares by our Promoters or other major shareholders of our Company may adversely affect the trading price of the Equity Shares.*

Any future issuance of the Equity Shares, or convertible securities by our Company, including through exercise of employee stock options or restricted stock units may lead to dilution of your shareholding in our Company, adversely affect the trading price of the Equity Shares and our ability to raise capital through an issue of our securities. Further, any future sales of the Equity Shares by the Promoters and members of our Promoter Group, or other major shareholders of our Company may adversely affect the trading price of the Equity Shares.

38. *Investment in Rights Equity Shares is exposed to certain risks. From the Call Record Date for each Call prior to the final Call, the trading of the Rights Equity Shares would be suspended for an applicable period under the applicable law. Furthermore, the Rights Equity Shares will not be traded with effect from the Call Record Date for the final call fixed for the determination of the Investors liable to pay Call Monies, as determined by our Board of Directors or Rights Issue Committee at its sole discretion, from time to time. The holders of the Rights Equity Shares will not be able to trade in these securities till they are credited to the holders' account as fully paid-up. Furthermore, until the subsistence of Rights Equity Shares, we may not be able to undertake certain forms of equity capital raising.*

The Issue Price is ₹[●].00/- (Rupees [●] Only) per Rights Equity Share. Investors will have to pay ₹[●].00/- (Rupees [●] Only) per Rights Equity Shares which constitutes [●].00% ([●] Percent) of the Issue Price on Application and the balance ₹[●].00/- (Rupees [●] Only) per Rights Equity Shares which constitutes [●].00% ([●] Percent) of the Issue Price on one or more subsequent Call(s), as determined by our Company's Board of Directors at its sole discretion, from time to time. The Rights Equity Shares offered under this Issue will be listed under a separate ISIN. An active market for trading may not develop for the Rights Equity Shares. This may affect the liquidity of the Rights Equity Shares and restrict your ability to sell them.

If our Company does not receive the Call Money from the Rights Equity Shareholders (including the Promoters and members of Promoter Group of our Company) as per the timelines stipulated in the Call notice, unless extended by our Board, the defaulting Rights Equity Shareholders (including the Promoters and members of Promoter Group of our Company) will be liable to pay interest as may be fixed by our Board unless waived or our Company may forfeit the Application Money and any Call Money received for previous Calls made, in accordance with the Companies Act, 2013 and our Company's Articles of Association. For further details, please refer to the section titled '*Terms of the Issue*' on page 110 of this Draft Letter of Offer. Rights Equity Shareholders are only entitled to dividend in proportion to the amount paid-up and the voting rights (exercisable on a poll) by investors shall also be proportional to such investor's share of the paid-up Equity Share capital of our Company. If certain investors do not pay the full amount, we may not be able to raise the amount proposed under this Issue.

The ISIN representing partly paid-up Rights Equity Shares will be terminated after the Call Record Date for the final Call. On payment of the final Call-in respect of the partly paid-up Rights Equity Shares, such partly paid-up Rights Equity Shares would be converted into fully paid-up Equity Shares and shall be listed and identified under the existing ISIN 'INE185U01035' for our fully paid-up Equity Shares. Our Company would fix a Call Record Date for the purpose

of determining the list of allottees to whom the notice for the final Call would be sent. From the Call Record Date for each Call prior to the final Call, the trading of the Rights Equity Shares would be suspended for an applicable period under the applicable law. Further, with effect from the Call Record Date, trading in the partly paid-up Equity Shares for which final Call have been made, would be suspended prior to the Call Record Date, for such period as may be applicable under the rules and regulations. Furthermore, the holders of the partly paid-up Rights Equity Shares will not be able to trade in these shares until they are credited to the holders' account as fully paid-up Rights Equity Shares. Similarly, for an applicable period, from the Call Record Date for each Call, the trading of the Rights Equity Shares would be suspended under the applicable law.

Further, there is little history of trading of partly paid-up shares in India and therefore there could be less liquidity in this segment, which may cause the price of the Rights Equity Shares to fall and may limit ability of Investors to sell the Rights Equity Shares. There may also be a risk of the Rights Equity Shares not forming part of the index.

Further, until the subsistence of Rights Equity Shares, we cannot undertake further rights issues, further public offers, or bonus issues. In terms of Regulations 62 and 104 of the SEBI (ICDR) Regulations, an issuer making a rights issue or further public offer is required to ensure that all its existing partly paid-up equity shares have either been fully paid-up or have been forfeited. Additionally, a bonus issue will not be permitted under law till the subsistence of partly paid-up equity shares in terms of Regulation 293 of the SEBI (ICDR) Regulations.

39. *You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares of an Indian company are generally taxable in India. Any gain realized on the sale of listed equity shares on a stock exchange held for more than 12 months will not be subject to long-term capital gains tax in India if Securities Transaction Tax (STT) is paid on the sale transaction and additionally, as stipulated by the Finance Act, 2017, STT had been paid at the time of acquisition of such equity shares, except in the case of such acquisitions where STT could not have been paid, as notified by the GoI under notification no. 43/2017/F. No. 370142/09/2017-TPL on June 5, 2017. However, Finance Act, 2018, taxes such long term capital gains exceeding ₹1 lakh arising from sale of equity shares on or after April 1, 2018. Accordingly, you may be subject to payment of long-term capital gains tax in India, in addition to payment of STT, on the sale of any Equity Shares held for more than 12 months. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short-term capital gains tax in India. Capital gains arising from the sale of the Equity Shares may be partially or completely exempt from taxation in India in cases where such exemption is provided under a treaty between India and the country of which the seller is a resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on gains made upon the sale of the Equity Shares.

40. *You may not receive the Equity Shares that you subscribe in the Issue until fifteen days after the date on which this Issue closes, which will subject you to market risk.*

The Equity Shares that you subscribe in the Issue may not be credited to your demat account with the depository participants until approximately 15 days from the Issue Closing Date. You can start trading such Equity Shares only after receipt of the listing and trading approval in respect thereof. We cannot assure you that the Equity Shares allocated to you will be credited to your demat account, or that trading in the Equity Shares will commence within the specified time period, subjecting you to market risk for such period.

41. *Investors will not have the option of getting the Allotment of Rights Equity Shares in physical form and the Rights Entitlement of Eligible Equity Shareholders holding Equity Shares in physical form ("Physical Shareholders") may lapse in case they fail to furnish the details of their demat account to the Registrar.*

In accordance with Regulation 77A of the SEBI ICDR Regulations read with the SEBI Rights Issue Circular, the credit of Rights Entitlements and Allotment of Rights Equity Shares shall be made in dematerialised form only. Accordingly, the Rights Entitlements of the Physical Shareholders shall be credited in a suspense escrow demat

account opened by our Company during the Issue Period. The Physical Shareholders are requested to furnish the details of their demat account to the Registrar not later than two Working Days prior to the Issue Closing Date to enable the credit of their Rights Entitlements in their demat accounts at least one day before the Issue Closing Date. The Rights Entitlements of the Physical Shareholders who do not furnish the details of their demat account to the Registrar not later than two Working Days prior to the Issue Closing Date, shall lapse. Further, pursuant to a press release dated December 3, 2018 issued by the SEBI, with effect from April 1, 2019, a transfer of listed Equity Shares cannot be processed unless the Equity Shares are held in dematerialized form (except in case of transmission or transposition of the Equity Shares and except the pending transfers).

For details, refer chapter titled “Terms of the Issue – Procedure for Application by Eligible Equity Shareholders holding Equity Shares in physical form” on page 110 of this Draft of Letter of Offer.

42. *Applicants to this Issue are not allowed to withdraw their Applications after the Issue Closing Date.*

In terms of the SEBI (ICDR) Regulations, the Applicants in this Issue are not allowed to withdraw their Applications after the Issue Closing Date. The Allotment in this Issue and the credit of such Equity Shares to the Applicant’s demat account with its depository participant shall be completed within such period as prescribed under the applicable laws. There is no assurance, however, that material adverse changes in the international or national monetary, financial, political or economic conditions or other events in the nature of force majeure, material adverse changes in our business, results of operation or financial condition, or other events affecting the Applicant’s decision to invest in the Issue Shares, would not arise between the Issue Closing Date and the date of Allotment in this Issue. Occurrence of any such events after the Issue Closing Date could also impact the market price of our Equity Shares. The Applicants shall not have the right to withdraw their Applications in the event of any such occurrence. We cannot assure you that the market price of the Equity Shares will not decline below the Issue Price. To the extent the market price for the Equity Shares declines below the Issue Price after the Issue Closing Date, the shareholder will be required to purchase Issue Shares at a price that will be higher than the actual market price of the Equity Shares at that time. Should that occur, the shareholder will suffer an immediate unrealized loss as a result. We may complete the Allotment even if such events may limit the Applicants’ ability to sell our Equity Shares after this Issue or cause the trading price of our Equity Shares to decline.

43. *Your ability to acquire and sell the Issue Shares offered in the Issue is restricted by the distribution, solicitation and transfer restrictions set forth in this Draft Letter of Offer.*

No actions have been taken to permit an offering of the Issue Shares in the Issue in any jurisdiction except India. As such, our Issue Shares have not and will not be registered under the U.S. Securities Act, any state securities laws or the law of any jurisdiction other than India. Further, your ability to acquire Issue Shares is restricted by the distribution and solicitation restrictions set forth in this Draft Letter of Offer. For further information, please refer to the chapters entitled ‘Notice to Overseas Investors’, ‘Other Regulatory and Statutory Disclosures’ and ‘Restrictions on Foreign Ownership of Indian Securities’ on pages 13, 104, and 143 respectively. You are required to inform yourself about and observe these restrictions. Our representatives, our agents and us will not be obligated to recognize any acquisition, transfer or resale of the Issue Shares made other than in compliance with applicable law.

44. *Holders of Equity Shares could be restricted in their ability to exercise pre-emptive rights under Indian law and could thereby suffer future dilution of their ownership position.*

Under the Companies Act, any company incorporated in India must offer its holders of equity shares pre-emptive rights to subscribe and pay for a proportionate number of shares to maintain their existing ownership percentages prior to the issuance of any new equity shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by holders of three-fourths of the shares voted on such resolution, unless our Company has obtained Government approval to issue without such rights. However, if the law of the jurisdiction that you are in does not permit the exercise of such pre-emptive rights without us filing an offering document or registration statement with the applicable authority in such jurisdiction, you will be unable to exercise such pre-emptive rights unless we make such a filing. We may elect not to file a registration statement in relation to pre-emptive rights otherwise available by

Indian law to you. To the extent that you are unable to exercise pre-emptive rights granted in respect of the Equity Shares, your proportional interests in us would be reduced.

45. *Conditions in the Indian securities market may affect the price or liquidity of our Equity Shares.*

The Indian securities markets are smaller and more volatile than securities markets in more developed economies. The Indian stock exchanges have, in the past, experienced substantial fluctuations in the prices of listed securities. Prices of listed securities are subject to volatility linked among other factors to the uncertainty in the global markets and the rising inflationary and interest rate pressures domestically. The governing bodies of the Indian stock exchanges have, from time to time, imposed restrictions on trading in certain securities, limitations on price movements and margin requirements. Future fluctuations or trading restrictions could have a material adverse effect on the price of our Equity Shares.

46. *The Issue Price of our Rights Equity Shares may not be indicative of the market price of our Equity Shares after the Issue.*

The Issue Price of Rights Equity Share may not be indicative of the market price for our Equity Shares after the Issue. The market price of the Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. There can be no assurance that the Investors will be able to sell their Equity Shares at or above the Issue Price. The factors that could affect our share price are:

- quarterly variations in the rate of growth of our financial indicators such as earnings per share;
- changes in revenue or earnings estimates or publication of research reports by analysts;
- speculation in the press or investment community;
- general market conditions; and,
- domestic and international economic, legal and regulatory factors unrelated to our performance.

47. *There is no guarantee that the Rights Equity Shares issued pursuant to the Issue will be listed on the Stock Exchanges in a timely manner or at all and any trading closures at the Stock Exchanges may adversely affect the trading price of our Equity Shares.*

In accordance with Indian law and practice, permission for listing of the Rights Equity Shares will not be granted until after those Rights Equity Shares have been issued and allotted. In addition, we are required to deliver the Draft Letter of Offer to SEBI and the Stock Exchanges under the applicable provisions of the Companies Act and the SEBI (ICDR) Regulations. The trading approvals shall be granted subject to the submission of all other relevant documents authorizing the issuing of Rights Equity Shares. There could be a failure or delay in listing the Rights Equity Shares on the Stock Exchanges. Any failure or delay in obtaining the approval would restrict investors' ability to dispose of their Equity Shares. Further, a closure of, or trading stoppage on the Stock Exchanges could adversely affect the trading price of the Equity Shares.

GLOBAL ECONOMIC OVERVIEW

Introduction

Global growth is expected to decelerate sharply to 1.7 percent in 2023—the third weakest pace of growth in nearly three decades, overshadowed only by the global recessions caused by the pandemic and the global financial crisis. This is 1.3 percentage points below previous forecasts, reflecting synchronous policy tightening aimed at containing very high inflation, worsening financial conditions, and continued disruptions from Russia’s invasion of Ukraine. The United States, the euro area, and China are all undergoing a period of pronounced weakness, and the resulting spillovers are exacerbating other headwinds faced by emerging market and developing economies (EMDEs). The combination of slow growth, tightening financial conditions, and heavy indebtedness is likely to weaken investment and trigger corporate defaults. Further negative shocks—such as higher inflation, even tighter policy, financial stress, deeper weakness in major economies, or rising geopolitical tensions—could push the global economy into recession. In the near term, urgent global efforts are needed to mitigate the risks of global recession and debt distress in EMDEs. Given limited policy space, it is critical that national policy makers ensure that any fiscal support is focused on vulnerable groups, that inflation expectations remain well anchored, and that financial systems continue to be resilient. Policies are also needed to support a major increase in EMDE investment, which can help reverse the slowdown in long-term growth exacerbated by the overlapping shocks of the pandemic, the invasion of Ukraine, and the rapid tightening of global monetary policy. This will require new financing from the international community and from the repurposing of existing spending, such as inefficient agricultural and fuel subsidies.

EMDE growth: The forecast for growth in 2023 and 2024 combined has been downgraded for every EMDE region. Monetary policy tightening, and restrictive global financial conditions are slowing growth, especially in LAC, SAR and SSA. Persistently elevated energy prices are expected to dampen outlooks for energy importers in all regions, while falling metals prices will weigh on terms of trade in LAC and SSA. The projected slowdown in advanced economy import demand is expected to especially impact EAP and ECA. Added to the pandemic recession and incomplete recovery, the outlook implies feeble per capita income growth in LAC, MNA and SSA in the half decade to 2024. Risks to the baseline forecasts are skewed to the downside in all regions. They include the possibility of financial stress and greater spillovers from major advanced economy weakness (especially in EAP, ECA, LAC and SSA), commodity price shocks (especially in ECA, EAP and SAR), conflict (particularly in ECA, MNA, and SSA), and natural disasters (with elevated risk in subregions in EAP, LAC and SAR).

INDIAN ECONOMY OVERVIEW

Introduction

Strong economic growth in the first quarter of FY 2022-23 helped India overcome the UK to become the fifth-largest economy after it recovered from repeated waves of COVID-19 pandemic shock. Real GDP in the first quarter of 2022–23 is currently about 4% higher than its corresponding 2019-20, indicating a strong start for India's recovery from the pandemic. Given the release of pent-up demand and the widespread vaccination coverage, the contact-intensive services sector will probably be the main driver of development in 2022–2023. Rising employment and substantially increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers, and with the revival in monsoon and the Kharif sowing, agriculture is also picking up momentum. The contact-based services sector has largely demonstrated promise to boost growth by unleashing the pent-up demand over the period of April-September 2022. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships. India has the second-largest road network in the world, spanning a total of 5.89 million kilometres (kms). This road network transports 64.5% of all goods in the country and 90% of India's total passenger traffic uses road network to commute. Road transportation has gradually increased over the years with improvement in connectivity between cities, towns and villages in the country.

In India, sale of automobiles and movement of freight by roads is growing at a rapid rate.

Highway construction in India increased at 17.00% CAGR between FY16-FY21. Despite pandemic and lockdown, India has constructed 13,298 km of highways in FY21. Under the Union Budget 2022-23, the Government of India has allocated Rs. 199,107.71 crore (US\$ 26.04 billion) to the Ministry of Road Transport and Highways. In FY22 (until December), the Ministry of Road Transport and Highways constructed national highways extending 5,835 kms. In June 2021, the Ministry of Road Transport and Highways constructed 2,284 kms of national highways compared with 1,681 kms in June 2020.

In October 2020, the foundation stone was established for nine National Highway projects—with a total length of ~262 kms—worth >Rs. 2752 crore (US\$ 371.13 million) in Tripura.

The Government of India has allocated Rs. 111 lakh crore (US\$ 1.4 trillion) under the National Infrastructure Pipeline for FY 2019-25. The roads sector is likely to account for 18% capital expenditure over FY 2019-25.

In October 2020, the National Investment and Infrastructure Fund (NIIF) is making progress towards integrating its road and highway portfolio. The NIIF has acquired Essel Devanahalli Tollway and Essel Dichpally Tollway through the NIIF master fund. These road infra-projects will be supported by Athaang Infrastructure, NIIF's proprietary road network, assisted by a team of established professionals with diverse domain expertise in the transport field.

Market size

India's nominal gross domestic product (GDP) at current prices is estimated to be at Rs. 232.15 trillion (US\$ 3.12 trillion) in FY22. With more than 100 unicorns valued at US\$ 332.7 billion, India has the third-largest unicorn base in the world. The government is also focusing on renewable sources to generate energy and is planning to achieve 40% of its energy from non-fossil sources by 2030.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 and 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between

2023 and 2030. India's current account deficit (CAD), primarily driven by an increase in the trade deficit, stood at 2.1% of GDP in the first quarter of FY 2022-23.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Mr. Piyush Goyal, Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles, Indian exports are expected to reach US\$ 1 trillion by 2030.

Road Ahead

In the second quarter of FY 2022-23, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2022. India's comparatively strong position in the external sector reflects the country's generally positive outlook for economic growth and rising employment rates. India ranked fifth in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in FY 2022–23 (until August 2022), stood 46.8% higher than the same period last year. The ratio of revenue expenditure to capital outlay decreased from 6.4 in the previous year to 4.5 in the current year, signaling a clear change in favour of higher-quality spending. Stronger revenue generation as a result of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels.

Despite the continued global slowdown, India's exports climbed at the second highest rate this quarter. With a reduction in port congestion, supply networks are being restored. The CPI-C and WPI inflation reduction from April 2022 already reflects the impact. In August 2022, CPI-C inflation was 7.0%, down from 7.8% in April 2022. Similarly, WPI inflation has decreased from 15.4% in April 2022 to 12.4% in August 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

INDEPENDENT AUDITOR'S REPORT

To the Members of

Opinion

1. We have audited the accompanying Standalone IND AS Financial Statements of KCD Industries India Limited ("the Company"), which comprise the Balance Sheet as at March 31, 2022, the Statement of Profit and Loss, the Statement of Changes in Equity and Cash Flow Statement for the year then ended, and a summary of significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid Standalone IND AS Financial Statements give the information required by the Companies Act, 2013 ("the Act") in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards prescribed under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended, ("Ind AS") and other accounting principles generally accepted in India, of the state of affairs of the Company as at 31st March 2022, its profit, changes in equity and its cash flows for the year ended on that date.

Basis for opinion

2. We conducted our audit in accordance with the Standards on Auditing (SAs) specified under Section 143(10) of the Act. Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the Standalone IND AS Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the Standalone IND AS Financial Statements under the provisions of the Companies Act, 2013 and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Management's Responsibility for the Standalone IND AS Financial Statements

3. The company's Board of Directors is responsible for the matters stated in Section 134(5) of the Act with respect to the preparation of these Standalone IND AS Financial Statements that give a true and fair view of the financial position, financial performance, changes in equity and cash flows of the Company in accordance with the Ind AS and other accounting principles generally accepted in India.

This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the Standalone IND AS Financial Statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the Standalone IND AS Financial Statements, the Board of Directors is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those Board of Directors are also responsible for overseeing the company's financial reporting process.

Auditor's Responsibilities for the Audit of the Standalone IND AS Financial Statements

4. Our objectives are to obtain reasonable assurance about whether the Standalone IND AS Financial Statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these Standalone IND AS Financial Statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the Standalone IND AS Financial Statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act, 2013, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the Standalone IND AS Financial Statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the Standalone IND AS Financial Statements, including the disclosures, and whether the Standalone IND AS Financial Statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

The hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities [Level 1 measurements] and lowest priority to unobservable inputs [Level 3 measurements]. The categories used are as follows: Level 1: Quoted prices (unadjusted) for identical instruments in an active market; Level 2: Directly (i.e. as prices) or indirectly (i.e. derived from prices) observable market inputs, other than Level 1 inputs; and Level 3: Inputs which are not based on observable market data (unobservable inputs).				
B.1	Fair value of instruments measured at amortised cost				
	Fair value of instruments measured at amortised cost for which fair value is disclosed is as follows, these fair values are calculated using Level 3 inputs:				
	Particulars	As at 31st March 2022		As at 31st March 2021	
		Carrying value	Fair value	Carrying value	Fair value

	The management assessed those fair values the above items approximate their respective carrying amounts, largely due to the short-term maturities of these instruments. The following methods and assumptions were used to estimate the fair values for other assets and liabilities: Accordingly, these are classified as level 3 of fair value hierarchy. The own non-performance risk as at 31st March 2022 was assessed to be insignificant.

The Company's exposure to credit risk is influenced mainly by cash and cash equivalents, loan assets, and other financial assets measured at amortised cost. The Company continuously monitors defaults of customers and other counterparties and incorporates this information into its credit risk controls.				
	Credit risk management The Company assesses and manages credit risk based on internal credit rating system. Internal credit rating is performed for each class of financial instruments with different characteristics. 	Moderate credit risk	Nil		Lifetime expected credit loss or 12 month expected credit loss	
	High credit risk	Nil		Lifetime expected credit loss fully provided for	

	Based on business environment in which the Company operates, a default on a financial asset is considered when the counter party fails to make payments within the agreed time period as per contract. Loss rates reflecting defaults are based on actual credit loss experience and considering differences between current and historical economic conditions.		
	Assets are written off when there is no reasonable expectation of recovery, such as a borrower declaring bankruptcy or a litigation decided against the Company. The Company continues to engage with parties whose balances are written off and attempts to enforce repayment. Recoveries made are recognised in statement of profit and loss.

Previous Year's figures have been regrouped/reclassified, wherever necessary, to correspond with the current year's classification/disclosures.

2.3 Rounding of Amounts

All amounts disclosed in the standalone financial statements and notes is in INR, except where otherwise indicated.

2.4 Use of Judgments, Estimates & Assumptions

While preparing standalone financial statements in conformity with Ind AS, the management makes certain estimates and assumptions that require subjective and complex judgments. These judgments affect the application of accounting policies and the reported amount of assets, liabilities, income and expenses, disclosure of contingent liabilities at the statement of financial position date and the reported amount of income and expenses for the reporting period. Financial reporting results rely on our estimate of the effect of certain matters that are inherently uncertain. Future events rarely develop exactly as forecasted and the best estimates require adjustments, as actual results may differ from these estimates under different assumptions or conditions. The management continually evaluates these estimates and assumptions based on the most recently available information.

The said estimates are based on the facts and events, that existed as at the reporting date, or that occurred after that date but provide additional evidence about conditions existing as at the reporting date.

Revisions to accounting estimates are recognized in the period in which the estimates are revised and in any future periods affected. In particular, information about significant areas of estimation uncertainty and critical judgments in applying accounting policies that have the most significant effect on the amounts recognized in the standalone financial statements are as below:

Key assumptions

- i. Financial instruments (Refer note 27)
- ii. Useful lives of Property, Plant and Equipment and Intangible Assets (Refer note 04)
- iii. Assets and obligations relating to employee benefits (Refer note 22)
- iv. Evaluation of recoverability of deferred tax assets (Refer note 06)

3. Summary of Significant Accounting Policies

3.1 Current versus non-current classification:

- The Company presents assets and liabilities in the balance sheet based on current/ non- current classification.
- An asset is treated as current when it is:
 - a. Expected to be realised in normal operating cycle or within twelve months after the reporting period held primarily for the purpose of trading, or
 - b. Cash or cash equivalents unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period
 - c. All other assets are classified as non-current.
- A liability is current when:
 - a. It is expected to be settled in normal operating cycle or due to be settled within twelve after the reporting period or
 - b. There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.
- The Company classifies all other liabilities as non-current.
- Deferred tax assets and liabilities are classified as non-current assets and liabilities.

The operating cycle is the time between the acquisition of assets for processing and their realization in cash and cash equivalents. The Company has identified period of twelve months as its operating cycle.

3.2 Dues to Micro and Small Enterprises

It is informed that the Company has certain dues to suppliers registered under as 'micro' and 'small' under Micro, Small and Medium Enterprises Development Act, 2006 ('MSMED Act'). The disclosures pursuant to the said MSMED Act forms integral part of the financial statements.

3.3 Cash and Cash Equivalents

Cash and Cash equivalent in the presentation of balance sheet and the statement of cash flows, includes comprise cash at banks and on hand.

3.4 Inventories

Inventories of Stock-in Trade is stated at cost or net realizable value, whichever is lower.

3.5 Property, Plant and Equipment

Property, Plant and Equipment are stated at cost, net of recoverable taxes, trade discount and rebates less accumulated depreciation and impairment losses, if any. Such cost includes purchase price, borrowing cost and any cost directly attributable to bringing the assets to its working condition for its intended use.

Depreciation on property, plant and equipment is provided using Written down value method. Depreciation is provided based on useful life of the assets as prescribed in Schedule II to the Companies Act, 2013.

The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.

Gains or losses arising from derecognition of a property, plant and equipment are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the Statement of Profit and Loss when the asset is derecognised.

3.6 Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or an equity instrument of another entity.

i. Financial Assets

a) Initial recognition and measurement

All financial assets are initially recognised at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets, which are not accounted at fair value through profit or loss, are adjusted to the fair value on initial recognition. Purchase and sale of financial assets are recognised using trade date accounting.

b) Subsequent measurement

- Financial assets measured at amortised cost:

A financial asset is subsequently measured at amortised cost if it is held within a business model whose objective is to hold the asset in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

The effective interest rate amortisation is included in other income in the Statement of Profit and Loss.

- Financial assets measured at fair value through other comprehensive income (FVTOCI)

A financial asset is measured at fair value through other comprehensive income if it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and the contractual terms of the financial assets give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

- Financial assets measured at fair value through profit or loss (FVTPL).

A financial asset which is not classified in any of the above categories are measured at fair value through profit or loss.

c) Impairment of financial assets

In accordance with Ind AS 109, the Company uses 'Expected Credit Loss' (ECL) model, for evaluating impairment of financial assets other than those measured at fair value through profit and loss (FVTPL).

Expected credit losses are measured through a loss allowance at an amount equal to:

- a) The 12-months expected credit losses (expected credit losses that result from those default events on the financial instrument that are possible within 12 months after the reporting date); or
- b) Full lifetime expected credit losses (expected credit losses that result from all possible default events over the life of the financial instrument)

For trade receivables, the Company applies 'simplified approach' which requires expected lifetime losses to be recognised from initial recognition of the receivables. Further, the Company uses historical default rates to determine impairment loss on the portfolio of the trade receivables. At every reporting date, these historical default rates are reviewed and changes in the forward- looking estimates are analysed.

For other assets, the Company uses 12 months ECL to provide for impairment loss where there is no significant increase in credit risk. If there is significant increase in credit risk full lifetime ECL is used. ECL impairment allowance is recognised in the Statement of Profit and Loss.

ii. Financial Liabilities

A. Initial recognition and measurement

All financial liabilities are recognized initially at fair value and in case of borrowings, net of directly attributable cost. Fees of recurring nature are directly recognised in the Statement of Profit and Loss as finance cost.

B. Subsequent measurement

Financial liabilities are carried at amortised cost using the effective interest method. For trade and other payables maturing within one year from the Balance Sheet date, the carrying amounts approximate fair value due to the short maturity of these instruments.

iii. Derecognition of financial instruments

The Company derecognizes a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the financial asset and the transfer qualifies for derecognition under Ind AS 109. A financial liability (or a part of a financial liability) is derecognized from the Company's Balance Sheet when the obligation specified in the contract is discharged or cancelled or expires.

iv. Offsetting

Financial assets and financial liabilities are offset and the net amount is presented in the balance sheet when, and only when, the Company has a legally enforceable right to set off the amount and it intends, either to settle them on a net basis or to realise the asset and settle the liability simultaneously.

3.7 Earnings per share

Basic earnings per share is calculated by dividing the net profit after tax by the weighted average number of equity shares outstanding during the year adjusted for bonus element in equity share. Diluted earnings per share adjust the figures used in determination of basic earnings per share to take into account the conversion of all dilutive potential equity shares. Dilutive potential equity shares are deemed converted as at the beginning of the period unless issued at a later date.

3.8 Provisions and Contingencies

Provisions and liabilities are recognized in the period when it becomes probable that there will be a future outflow of funds resulting from past operations or events and the amount of cash outflow can be reliably estimated. The timing of recognition and quantification of the liability require the application of judgment to existing facts and circumstances, which can be subject to change. The carrying amounts of provisions and liabilities are reviewed regularly and adjusted to take account of changing facts and circumstances.

Contingent liabilities are disclosed unless the possibility of outflow of resources is remote. Contingent assets are neither recognized nor disclosed in the financial statements.

3.9 Leases

The Company, as a lessee, recognizes a right-of-use asset and a lease liability for its leasing arrangements, if the contract conveys the right to control the use of an identified asset. The contract conveys the right to control the use of an identified asset, if it involves the use of an identified asset and the Company has substantially all of the economic benefits from use of the asset and has right to direct the use of the identified asset. The cost of the right-of-use asset shall comprise of the amount of the initial measurement of the lease liability adjusted for any lease payments made at or before the commencement date plus any initial direct costs incurred. The right-of-use assets is subsequently measured at cost less any accumulated depreciation, accumulated impairment losses, if any and adjusted for any remeasurement of the lease liability. The right-of-use assets is depreciated using the straight-line method from the commencement date over the shorter of lease term or useful life of right-of-use asset. The Company measures the lease liability at the present value of the lease payments that are not paid at the commencement date of the lease. The lease payments are discounted using the interest rate implicit in the lease, if that rate can be readily determined. If that rate cannot be readily determined, the Company uses incremental borrowing rate. For short-term and low value leases, the Company recognises the lease payments as an operating expense on a straight-line basis over the lease term.

3.10 Borrowing Cost

Borrowing costs that are directly attributable to the acquisition or construction of qualifying assets are capitalized as part of the cost of such assets. A qualifying asset is one that necessarily takes substantial period of time to get ready for its intended use. All other borrowing costs are charged to the Statement of Profit and Loss for the period for which they are incurred.

3.11 Impairment of Non-Financial Assets

The Company assesses at each reporting date as to whether there is any indication that any Property, Plant and Equipment and Intangible assets or group of assets, called Cash Generating Unit ('CGU') may be impaired. If any such indication exists, the recoverable amount of assets or CGU is estimated to determine the extent of impairment, if any. When it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the CGU to which the asset belongs. An impairment loss is

recognized in the Statement of the Profit and Loss to the extent, asset's carrying amount exceeds its recoverable amount. The recoverable amount is higher of an asset's fair value less cost of disposal and value in use. Value in use is based on the estimated future cash flows, discounted to their present value using pre-tax discount rate that reflects current market assessments of the time value of money and risk specific to the assets. The impairment loss, other than goodwill, recognised in prior accounting period is reversed if there has been a change in the estimate of recoverable amount.

3.12 Employee Benefits

Employee benefits include provident fund and compensated absences.

- Defined contribution plans:

Contributions payable to recognized provident funds, which are defined contribution schemes, are charged to the standalone statement of profit and loss.

- Short-term employee benefits:

Short-term employee benefits expected to be paid in exchange for the services rendered by employees are recognised during the year when the employees render the service. Compensated absences, which are expected to be utilised within the next 12 months, are treated as short-term employee benefits. The Company measures the expected cost of such absences as the additional amount that it expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

3.13 Tax Expenses

The tax expense for the period comprises of current and deferred tax. Tax is recognised in the Statement of Profit and Loss, except to the extent that it relates to items recognised in the Other Comprehensive Income. In which case, the tax is also recognised in Other Comprehensive Income.

i. Current Tax

Current tax assets and liabilities are measured at the amount expected to be recovered from or paid to the Income tax authorities, based on tax rates and laws that are enacted or substantively enacted at the Balance Sheet date.

ii. Deferred Tax

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred income tax assets are reassessed at each reporting period and are recognised to the extent that it is probable that taxable profits will be available against which the deductible temporary differences and the carry forward of unused tax credits and unused tax losses can be utilised. The carrying amount of deferred income tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred income tax assets to be utilised. Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset is realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period. The carrying amount of deferred tax liabilities and assets are reviewed at the end of each reporting period.

3.14 Revenue recognition

Revenue from contracts with customers is recognised when control of the goods or services are transferred to the customer at an amount that reflects the consideration entitled in exchange for those goods or services.

Revenue from contracts with customers includes sale of goods and services. Revenue from rendering of services includes advertisement revenue and subscription revenue. Revenue from rendering of services is recognised

over time where the Company satisfies the performance obligation over time or point in time where the Company satisfies the performance obligation at a point in time.

Generally, control is transferred upon shipment of goods to the customer or when the goods is made available to the customer, provided transfer of title to the customer occurs and the Company has not retained any significant risks of ownership or future obligations with respect to the goods shipped.

Revenue is measured at the amount of consideration which the Company expects to be entitled to in exchange for transferring distinct goods or services to a customer as specified in the contract, net of returns and allowances, trade discounts and volume rebates and excluding amounts collected on behalf of third parties (for example taxes and duties collected on behalf of the government). Consideration is generally due upon satisfaction of performance obligations and the receivable is recognized when it becomes unconditional.

Interest income

Interest Income from Financial Assets is recognised using effective interest rate method.

Dividend income

Dividend Income is recognised when the Company's right to receive the amount has been established.

Fair value measurement The Company measures financial assets and financial liability at fair value at each balance sheet date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either: -

In the principal market for the asset or liability, or –

In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible by the Company. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use. The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data

are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole: -

Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities.

Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.

Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable. For assets and liabilities that are recognised in the financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

The Company's Valuation team determines the policies and procedures for both recurring fair value measurement, such as derivative instruments and unquoted financial assets measured at fair value, and for non-recurring measurement.

Material uncertainty about going concern: In preparing financial statements, management has made an assessment of Company's ability to continue as a going concern. Financial statements are prepared on a going concern basis. The Management is aware, in making its assessment, of material uncertainties related to events or conditions that may cast significant doubt upon the Company's ability to continue as a going concern.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

There are two routes through which foreign investors may invest in India. One is the 'automatic route', where no government approval is required under Indian foreign exchange laws to make an investment as long as it is within prescribed thresholds for the relevant sector. The other route is the "government route", where an approval is required under foreign exchange laws from the relevant industry regulator, prior to the investment.

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991, of the Government of India and FEMA. While the Industrial Policy, 1991, of the Government of India, prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise way such investment may be made. The Union Cabinet, as provided in the Cabinet Press Release dated May 24, 2017, has given its approval for phasing out the FIPB. Under the Industrial Policy, 1991, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. Accordingly, the process for foreign direct investment and approval from the Government of India will now be handled by the concerned ministries or departments, in consultation with the Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (formerly known as the Department of Industrial Policy and Promotion), Ministry of Finance, Department of Economic Affairs, FIPB section, through a memorandum dated June 5, 2017, has notified the specific ministries handling relevant sectors.

The Government has, from time to time, made policy pronouncements on FDI through press notes and press releases. The DPIIT issued the Consolidated FDI Policy Circular of 2020 ('**FDI Circular 2020**'), which, with effect from October 15, 2020, consolidated and superseded all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect as on October 15, 2020. The Government proposes to update the consolidated circular on FDI policy once every year and therefore, FDI Circular 2020 will be valid until the DPIIT issues an updated circular.

The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases which are notified by RBI as amendments to FEMA. In case of any conflict, the relevant notification under Foreign Exchange Management (Non-Debt Instruments) Rules, 2019 will prevail. The payment of inward remittance and reporting requirements are stipulated under the Foreign Exchange Management (Mode of Payment and Reporting of Non-Debt Instruments) Regulations, 2019 issued by RBI. The FDI Circular 2020, issued by the DPIIT, consolidates the policy framework in place as on October 15, 2020, and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect as on October 15, 2020.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of RBI, provided that:

1. The activities of the investee company fall under the automatic route as provided in the FDI Policy and FEMA and transfer does not attract the provisions of the SEBI (SAST) Regulations;
2. The non- resident shareholding is within the sectoral limits under the FDI Policy; and
3. The pricing is in accordance with the guidelines prescribed by SEBI and RBI.

No investment under the FDI route (i.e., any investment which would result in the investor holding 10% or more of the fully diluted paid-up equity share capital of the Company or any FDI investment for which an approval from the government was taken in the past) will be allowed in the Issue unless such application is accompanied with necessary approval or covered under a pre-existing approval from the government. It will be the sole responsibility of the investors to ensure that the necessary approval or the pre-existing approval from the government is valid to make any investment in the Issue.

Our Company will not be responsible for any allotments made by relying on such approvals. Please also note that pursuant to Circular no. 14 dated September 16, 2003, issued by RBI, Overseas Corporate Bodies have been derecognized as an eligible class of investors and RBI has subsequently issued the Foreign Exchange Management (Withdrawal of General Permission to Overseas Corporate Bodies (OCBs)) Regulations, 2003. Any Investor being an OCB is required not to be under the adverse notice of RBI and in order to apply for this issue as a incorporated non-resident must do so in accordance with the FDI Circular 2020 and Foreign Exchange Management (Non-Debt Instrument) Rules, 2019. Further, while investing in the Issue, the Investors are deemed to have obtained the necessary approvals, as required, under applicable laws and the obligation to obtain such approvals shall be upon the Investors. Our Company shall not be under an obligation to obtain any approval under any of the applicable

laws on behalf of the Investors and shall not be liable in case of failure on part of the Investors to obtain such approvals.

The above information is given for the benefit of the Applicants / Investors. Our Company is not liable for any amendments or modification or changes in applicable laws or regulations, which may occur after the date of the Draft Letter of Offer.
