Further, these plans are not static, but are subject to continuous internal review and may be altered if the altered plans are perceived to suit the Company’s needs better. Further, many of the plans may be based on one or more underlying assumptions (all of which may not be contained in this Document) which may not come to fruition. All forward-looking statements are subject to risks, uncertainties and assumptions that may cause actual results to differ materially from those contemplated by the relevant forward-looking statement. Important factors that may cause actual results to differ materially from the Company’s expectations include, among others:

- General economic and business conditions in India and abroad;
- Our ability to successfully implement our strategy, our growth and expansion plans and technological changes;
- Our ability to compete effectively and access funds at competitive cost;
- Changes in the value of Rupee and other currency changes;
- Unanticipated turbulence in interest rates, equity prices or other rates or prices; the performance of the financial and capital markets in India and globally;
- Availability of funds and willingness of our lenders to lend;
- Changes in political conditions in India;
- The rate of growth of our loan assets and level of NPAs in our portfolio;
- Potential mergers, acquisitions or restructuring and increased competition;
- The outcome of any legal or regulatory proceedings in which we are or may become a party to;
- Our ability to recruit and retain our management team and skilled personnel;
- Changes in Indian and foreign laws and regulations, including tax, accounting, banking, securities, investments and loans, foreign exchange, insurance and other regulations; changes in competition and the pricing environment in India; and regional or general changes in asset valuations; and
- Changes in laws and regulations that apply to NBFCs in India, including laws that impact our lending rates and our ability to enforce our collateral.

These are only illustrative and not exhaustive.

By their nature, certain market risk disclosures are only estimates and could be materially different from what actually occurs in the future. As a result, actual future gains or losses could materially differ from those that have been estimated. For further discussion of factors that could cause our actual results to differ, see the section titled “Risk Factors”.

(B) Use of Market Data

Unless stated otherwise, macroeconomic and industry data used throughout this Document has been obtained from publications prepared by providers of industry information, government sources and multilateral institutions. Such publications generally state that the information contained therein has been obtained from sources believed to be reliable but that their accuracy and completeness are not guaranteed and their reliability cannot be assured. Although the Issuer believes that industry data used in this Disclosure Document is reliable, it has not been independently verified.

(C) Risk Factors

The following are the risks envisaged by the management and Investors should consider the following risk factors carefully for evaluating the Company and its business before making any investment decision. Unless the context requires otherwise, the risk factors described below apply to Aditya Birla Housing Finance Limited only. The risks have been quantified wherever possible. If any one of the following stated risks actually occurs, the Company's business, financial conditions and results of operations could suffer and therefore, the value of the Company's debt securities could decline.

Note: Unless specified or quantified in the relevant risk factors, the Company is not in a position to quantify the financial or other implications of any risk mentioned herein below:

(A) INTERNAL RISK FACTORS

1. As an HFC, one of the most important risks affecting the profitability of the Company is the risk of non-payment by the borrowers and other counterparties.

Our Company's gross loan asset size as on **March 31, 2021 is Rs. 11,869 crore**. The size of our Company's loan assets are expected to continue to increase in the future as our Company expands its business in India and offers new products. Since most of our Company's borrowers are individuals and small and medium size companies, our Company's credit risk could be higher due to their potential inability to adapt to changes in the economic and industrial scenario and global technological changes as also changes in the Indian regulatory and political environment. This may lead to an increase in the number and value of our Company's NPAs.

Our Company is exposed to the risk that third parties which owe us money, securities or other assets may not perform their obligations. These parties may default on their obligations to us due to various reasons including bankruptcy, lack of liquidity, operational failure, and other reasons. Further, any delay in enforcing the collateral due to delays in enforcement proceedings before Indian courts or otherwise could expose our Company to potential losses.

In deciding whether to extend credit to or enter into transactions with customers and counter parties, our Company relies largely on information furnished by or on behalf of its customers, including financial information, based on which the Company performs its credit assessment. The Company may also depend on certain representations and undertakings as to the accuracy, correctness and completeness of information, and the verification of the same by agencies to which such functions are outsourced. Any such information, if materially misleading, may increase the risk of default. Our financial condition and results of operations could be negatively affected by relying on information that may not be true or may be materially misleading.

The Company has institutionalized a systematic credit evaluation process monitoring the performance of its asset portfolio on a regular and continual basis to detect any material development, and also constantly evaluates the changes and developments in sectors to which it has substantial exposure. The Company also undertakes a periodic review of its entire asset portfolio with a view to determine the portfolio valuation, identify potential areas of action and devise appropriate strategies thereon. The Company follows a provisioning and write-off policy which is in line with what is prescribed by the NHB.

Although our Company regularly reviews credit exposures to clients and counterparties, and to industries and geographical regions that our Company believes may present credit concerns, defaults may arise from events or circumstances that are difficult to detect or foresee.

2. Interest Rate Risk

The Company's business is largely dependent on interest income from its operations.

The Company is exposed to interest rate risk principally as a result of lending to customers at interest rates and in amounts and for periods, which may differ from its funding sources (institutional / bank borrowings and debt offerings). The Company seeks to match its interest rate positions to minimize interest rate risk.

Despite these efforts, there can be no assurance that significant interest rate movements will not have an effect on its results of operations. Interest rates are highly sensitive to many factors beyond its control, including the monetary policies of the RBI, deregulation of the financial sector in India, domestic and international economic and political conditions, inflation and other factors. Due to these factors interest rates in India have historically experienced a relatively high degree of volatility. Nevertheless the endeavor of the Company will be to keep the interest rate risk at minimum levels by proactively synchronizing resource securing and lending activities on an ongoing basis.

3. Access to Capital Markets and Commercial Borrowings

The Company's growth will depend on its continued ability to access funds at competitive rates. With the growth of its business, the Company is increasingly reliant on funding from the debt capital markets and commercial borrowings.

The market for such funds is competitive and its ability to obtain funds at competitive rates will depend on various factors, including its ability to maintain its credit ratings. While its borrowing costs have been competitive in the past due to its credit rating and the quality of its asset portfolio, if the Company is unable to access funds at an effective cost that is comparable to or lower than its competitors, the Company may not be able to offer competitive interest rates for its loans.

This may adversely impact its business and its future financial performance. The value of its collateral may decrease or the Company may experience delays in enforcing its collateral when its customers default on their obligations, which may result in failure to recover the expected value of collateral and adversely affect its financial performance.

The developments in the international markets affect the Indian economy including the financial liquidity position. Our Company is exposed to the risk of liquidity in the financial markets. Changes in economic and financial conditions could make it difficult for the Company to access funds at competitive rates. Being an HFC, we also face certain restrictions to raise money from international markets which are relatively cheaper sources of money and this further constrains our ability to raise cheaper funds.

4. Failure to recover the expected value of collateral when borrowers default on their obligations to Company may adversely affect its financial performance.

ABHFL cannot guarantee that it will be able to realize the full value of its collateral, due to, among other things, defects in the perfection of collateral, delays on its part in taking immediate action in bankruptcy foreclosure proceedings, stock market downturns, claims of other lenders, legal or judicial restraint and fraudulent transfers by borrowers. In the event a specialized regulatory agency gains jurisdiction over the borrower, creditor actions can be further delayed. In addition, to put in place an institutional mechanism for the timely and transparent restructuring of corporate debt, the RBI has devised a corporate debt restructuring system. Any failure to recover the expected value of collateral security could expose ABHFL to a potential loss. Apart from the RBI guidelines, ABHFL may be a part of a syndicate of lenders, the majority of whom elect to pursue a different course of action than the Company would have chosen. Any such unexpected loss could adversely affect business, prospects, results of operations and financial condition.

5. Asset-Liability mismatches in the short term, which could affect company's liquidity position.

The difference between the value of assets and liabilities maturing in any time period category provides the measure to which we are exposed to the liquidity risk. As is typical for several HFC, a portion of our funding requirements is met through short-term funding sources, i.e. working capital demand loans, cash credit, short term loans and commercial papers. However, some portion of our assets has medium or long-term maturities. As the Company grows its business, the proportion of medium and long-term assets in the portfolio is expected to grow. In the event that the existing and committed credit facilities are withdrawn or are not available to the Company, funding mismatches may be created and it could have an adverse effect on our business and our future financial performance.

6. Our inability to control the number and value of NPAs in our portfolio could adversely affect our business and results of operations.

The Company's inability to control or reduce the number and value of its NPAs may lead to deterioration of the quality of its loan portfolio and may severely impact its business.

While the Company's total provisioning against the NPAs at present may be adequate to cover all the identified losses in our loan portfolio, there may not be any assurance that in future the provisioning, though compliant with regulatory requirements, will be sufficient to cover all anticipated losses.

Further, the Company may not be able to meet its recovery targets set for the particular financial year due to the intense competition witnessed at both global and domestic levels. In such circumstances, there could be an increase in the number and value of NPAs which can impact the Company.

7. System failures, infrastructure bottlenecks and security breaches in computer systems may adversely affect our business.

Our businesses are highly dependent on our ability to process, on a daily basis, a large number of increasingly complex transactions. Our financial, accounting or other data processing systems may fail to operate adequately or become disabled as a result of events that are wholly or partially beyond our control, including a disruption of electrical or communications services. If any of these systems do not operate properly or are disabled or if there are other shortcomings or failures in our internal processes or systems, it could affect our operations or result in financial loss, disruption of our businesses, regulatory intervention or damage to our reputation. In addition, our ability to conduct business may be adversely impacted by a disruption in the infrastructure that supports our businesses and the localities in which we are located.

Our operations also rely on the secure processing, storage and transmission of confidential and other information in our computer systems and networks. Our computer systems, software and networks may be vulnerable to unauthorized access, computer viruses or other malicious code and other events that could compromise data integrity and security.

8. Our indebtedness and restrictive covenants imposed by our financing agreements could restrict our ability to conduct our business and operations.

Our financing agreements require us to maintain certain security margins. Should we breach any financial or other covenants contained in any of our financing agreements, we may be required to immediately repay our borrowings either in whole or in part, together with any related costs.

Under the terms of some of the credit lines, the Company is required to obtain the prior written consent of the concerned lender prior to the Company entering into any scheme of expansion, merger, amalgamation, compromise or reconstruction or selling, leasing, transferring all or a substantial portion of its fixed and other assets; making any change in ownership or control or constitution of our Company, or in the shareholding or management or majority of directors, or in the nature of business of our Company; or making amendments in the Company's Memorandum and Articles of Association. This may restrict/ delay some of the actions / initiatives that our Company may like to take from time to time.

9. We may not get the benefits of being Aditya Birla Group Company in case of any change of control.

In case of any change of control due to any event such as transfer of shares by our Promoter, preferential allotment to any investor, our ability to leverage the "Aditya Birla" brand may get affected and the benefits of being an Aditya Birla Group company including leveraging of business from other Aditya Birla Group companies may not be available to us and consequently, could adversely impact our business operations and profitability.

10. We are exposed to various operational risks including the risk of fraud and other misconduct by employees or outsiders.

Like other financial intermediaries, we are also exposed to various operational risks which include the risk of fraud or misconduct by our employees or even an outsider, unauthorized transactions by employees or third parties, misreporting and non-compliance of various statutory and legal requirements and operational errors. It may not be always possible to deter employees from the misconduct or the precautions we take to detect and prevent these activities may not be effective in all cases. Any such instances of employee misconduct or fraud, the improper use or disclosure of confidential information, could result in regulatory and legal proceedings and may harm our reputation and also our operations.

11. We may not be able to attract or retain talented professionals required for our business.

The complexity of our business operations requires highly skilled and experienced manpower. Such highly skilled personnel give us a competitive edge. Further the successful implementation of our growth plans would largely depend on the availability of such skilled manpower and our ability to attract such qualified manpower. We may lose many business opportunities and our business would suffer if such required manpower is not available on time. Though we have appropriate human resource policies in place, we may face the risk of losing our key management personnel due to reasons beyond our control and we may not be able to replace them in a satisfactory and timely manner which may adversely affect our business and our future financial performance.

12. The Company faces increasing competition from established banks and HFCs. The successful implementation of our growth plans depends on our ability to face the competition.

The Company's main competitors are established commercial banks and HFCs. Over the past few years, the financing area has seen the entry of banks, both nationalized as well as foreign. Banks have access to low cost funds which enables them to enjoy higher margins and / or offer finance at lower rates. HFCs do not have access to large quantities of low cost deposits, a factor which can render them less competitive. The Company also faces increased competition from new HFC's foraying into this space and some of which have been quite aggressive in their pricing to garner market share.

13. We may have a high concentration of loans to certain customers or group of customers. If a substantial portion of these loans becomes non-performing, our business and financial performance could be affected.

Our business of lending with or without securities exposes us to the risk of third parties that owe us money. Our loan portfolio and non-performing asset portfolio has, or may in the future, have a high concentration in certain customers or groups of customers. These parties may default on their obligations to us due to bankruptcy, lack of liquidity, operational failure, and breach of contract, government or other regulatory intervention and other reasons including inability to adapt to changes in the macro business environment. Historically, borrowers or borrower groups have been adversely affected by economic conditions in varying degrees. Credit losses due to financial difficulties of these borrowers / borrower groups in the future could adversely affect our business and our financial performance.

(B) Risks Relating to the Utilization of Issue Proceeds

Our management will have significant flexibility in applying proceeds of the Issue.

The funds raised through this Issue, after meeting the expenditures of and related to the Issue, will be used for our various activities, including but not restricted to, lending and investments, to repay our existing loans, our business operations including capital expenditure and working capital requirements.

The Main Objects clause of the Memorandum of Association of the Company permits the Company to undertake the activities for which the funds are being raised through the present Issue and also the activities which the Company has been carrying on till date.

The management of the Company, in accordance with the policies formulated by it from time to time, will have flexibility in deploying the proceeds received from the Issue. Pending utilization of the proceeds out of the Issue for the purposes described above, the Company intends to temporarily invest funds in high quality interest bearing liquid instruments including money market mutual funds, deposits with banks or temporarily deploy the funds in investment grade interest bearing securities as may be approved by the Board.

Further as per the provisions of the SEBI (Issue and Listing of Debt Securities) Regulations, 2008, we are not required to appoint a monitoring agency and therefore no monitoring agency has been appointed for this Issue.

(C) Risks Relating to the Debentures

1. Changes in general interest rates in the economy may affect the price of our Debentures.

All securities where a fixed rate of interest is offered, such as our Debentures, are subject to price risk. The price of such securities will vary inversely with changes in prevailing interest rates, i.e. when interest rates rise, prices of fixed income securities fall and when interest rates drop, the prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of prevailing interest rates.

Increased rates of interest, which frequently accompany inflation and /or a growing economy, are likely to have a negative effect on the price of our Debentures.

2. We are not required to maintain any Debenture Redemption Reserve (DRR) for the Debentures issued under this Disclosure Document.

No Debenture Redemption Reserve is being created for the issue of NCDs in pursuance of this Document since creation of Debenture Redemption Reserve is not required for the proposed issue of Debentures. In accordance with Rule the 18 (7) (b) (iii) (B) of Companies (Share Capital and Debentures) Rules 2014, Housing Finance Companies registered with National Housing Bank issuing debentures which are privately placed are not required to create DRR.

3. Any downgrading in credit rating of our Debentures may affect the value of Debentures and thus our ability to raise further debts.

The Company has obtained credit rating from the following agencies, of which the proposed issue forms a part:

ICRA Limited has assigned a rating (for the amount of Rs. 3,000 crore) of “[ICRA] AAA (Stable)”.

India Ratings Limited has assigned a rating (for the amount of Rs. 2,800 crore) of “[IND] AAA (Stable)”.

The Issuer cannot guarantee that the rating will not be downgraded. Such a downgrade in the above credit ratings may lower the value of the NCDs and may also affect the Issuer's ability to raise further debt.

(D) EXTERNAL RISK FACTORS

1. We are subject to regulatory and legal risk which may adversely affect our business.

The operations of an HFC are subject to regulations framed by the RBI and other authorities including regulations relating to foreign investment in India.

We are also subject to changes in Indian laws, regulations and accounting principles. There can be no assurance that the laws governing the Indian financial services sector will not change in the future or that such changes or the interpretation or enforcement of existing and future laws and rules by governmental and regulatory authorities will not affect our business and future financial performance.

2. Our growth depends on the sustained growth of the Indian economy. An economic slowdown in India and abroad could have direct impact on our operations and profitability.

Macroeconomic factors that affect the Indian economy and the global economic scenario have an impact on our business. The Indian economy has grown about 7.70% in FY18 and 6.1% in FY19 and 4% in FY20. Recent trends suggest that the economy may grow at a flat pace which may have a direct impact on our disbursements and a slowdown in the economy as a whole can increase the level of defaults thereby adversely impacting the Company's growth plans and the quality of its portfolio.

A sustained slowdown in the Indian economy could adversely affect its business, including its ability to grow its asset portfolio, the quality of its assets, and its ability to implement its strategy.

India's economy could be adversely affected by a general rise in interest rates, or various other factors affecting the growth of industrial, manufacturing and services sector or general down trend in the economy.

3. Civil unrest, terrorist attacks and war could affect our business.

Terrorist attacks and other acts of violence, war or conflicts, particularly those involving India, as well as the United States of America, the United Kingdom, Singapore and the European Union, may adversely affect Indian and global financial markets. Such acts may negatively impact business sentiment, which could adversely affect our business and profitability. India has from time to time experienced, and continues to experience, social and civil unrest, terrorist attacks and hostilities with neighboring countries. Also, some of India's neighboring countries have experienced, or are currently experiencing internal unrest. This, in turn, could have a material adverse effect on the market for securities including the Debentures. The consequences of any armed conflicts are unpredictable, and we may not be able to foresee events that could have an adverse effect on our business and the price and yield of our NCDs.

4. Our business may be adversely impacted by natural calamities or unfavorable climatic changes.

India, Nepal, Bangladesh, Pakistan, Indonesia and other Asian countries have experienced natural calamities such as earthquakes, floods, droughts and a tsunami in recent years. Some of these countries have also experienced pandemics, including the outbreak of avian flu / swine flu. The extent and severity of these natural disasters and pandemics determines their impact on these economies and in turn affects the financial services sector of which our Company is a part.

Prolonged spells of abnormal rainfall and other natural calamities could have an adverse impact on the economies in which we have operations, which could adversely affect our business and the price of our Debentures.

5. Any downgrading of India's sovereign rating by an international rating agency (ies) may affect our business and our liquidity to a great extent.

Any adverse revision to India's credit rating for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our financial performance and our ability to obtain financing to fund our growth on favorable terms, or at all.

Notes to the Risk Factors

Save, as stated elsewhere in this Disclosure Document, since the date of the audited financial accounts, no developments have taken place that are likely to materially and adversely affect the performance or prospects of the Company.

Industry Overview

Housing Finance Companies (HFCs) act as a critical link in the overall financial system catering to a large market of niche customers. They are one of the major purveyors of credit in India.

HFCs in India offer a wide variety of financial services and play an important role in providing credit. As a result of consolidation and restructuring in the financial sector and liberalization and globalization of markets only a few strong HFCs now remain in business. However, competition has become intense due to the entry of the Indian and foreign banks into the retail lending business in a big way, thereby exerting pressure on margins. As compared to banks, HFCs have the ability to take quicker decisions and customize their services in accordance with the needs of the customer. Thus, HFCs can sustain in this competitive environment only through optimization of funding costs, identification of potential areas, widening geographical reach, and use of technology, cost efficiencies, strict credit monitoring and raising the level of customer service

Competition

We face competition in all our lines of businesses. Our primary competitors are other HFCs, public sector banks, private sector banks, co-operative banks and foreign banks.

In Capital Markets, we face competition from other HFC's and private sector banks. Their access to lower cost funds enables them to fund certain segments of the market at lower rates. People being the prime asset of any service oriented businesses, our ability to strengthen our existing businesses and establish new businesses largely depends on our ability to attract qualified and highly skilled workforce and motivate and retain the existing ones. Competition is also witnessed in the recruitment and retention of skilled and professional human resources.

In Mortgage Finance, our main competition stems from HFCs who have the capacity to finance long-term and have access to NHB finance. Our competition also stems from NBFCs and banks.

People being the prime asset of any service oriented businesses, our ability to strengthen our existing businesses and establish new businesses largely depends on our ability to attract qualified and highly skilled workforce and motivate and retain the existing ones.
