INTERNAL RISK FACTORS

BUSINESS RELATED RISKS

We operate from our registered office situated at A-01 Shalibhadra Classic, 100 feet Link Road, Near Union Bank of India, Nalasopara (E), Thane -401 209, Maharashtra, India which is not owned by our Company. Veer Finance Limited has allowed us, to use the place situated at A-01 Shalibhadra Classic, 100 feet Link Road, Near Union Bank of India, Nalasopara (E), Thane -401 209, Maharashtra, India as registered office. Any discontinuance of facility to use the office will lead us to locate any other premises. Our inability to identify the new premises may adversely affect the operations, finances and profitability of our Company. For further details please refer to section titled Our Business on page 86 of this Draft letter of offer.

2. *We have given possession to some of our customers for fitments in few of our units without obtaining the Occupation Certificate from Municipal Corporation or other appropriate authority. The appropriate authority may take penal action and this could adversely affect our business and result of operation.*

If the possession of the property is handed over by the Developer to the buyer without obtaining the Occupation Certificate from Municipal Corporation or other appropriate authority, then appropriate authority may take penal action and the developer would be solely liable for the same.

In recent past, we have handed over possession to some of our customers for fitments in the following projects prior to obtaining the Occupation Certificate:

Name of the Projects	Address
Shahada - Sai Villa	Sai Villa, S.No.196 /1, Village -Shahada, Nandurbar, Maharashtra- 425409

While no legal proceedings or regulatory action has been initiated against our Company in relation to the aforementioned non-compliances as of the date of this Draft Letter of Offer, we cannot assure you that no legal proceedings or regulatory actions will be initiated against us in the future in relation to these non-compliances, which may have an adverse impact on our business, financial condition and reputation.

3. *There was lapse on part of one SCSB'S in previous Rights Issue leading to non-bidding of various shareholders impacting their financial loses.*

Bank of Baroda was one of the SCSB'S who lapsed the Bidding Procedure in time of closing the Issue and not received the extension of bidding for the Issue post the closure of the Public Issue resulting in non-acceptance of Equity Shares of many Rights Issue bidders which may have an adverse effect on their opportunity resulting in their adverse financial condition.

4. *Some or all of our ongoing and planned projects may not be completed by their expected completion dates or at all. Such delays may adversely affect our business, results of operations and financial condition.*

Our ongoing and planned projects may be subject to significant changes and modifications from our currently estimated management plans and timelines as a result of factors outside our control, including, among others:

- defects or challenges to our land titles, including failure or delay in obtaining consent of current occupants;
- expiration of agreements to develop land or leases, and our inability to renew them in time or at all;
- availability of financing;
- failure or delay in securing necessary statutory or regulatory approvals and permits for us to develop some of our projects;
- natural disasters and weather conditions;
- reliance on third-party contractors and the ability of third parties to complete their services on schedule and on budget; and
- the risk of decreased market demand subsequent to the launch of a project.

Such changes and modifications to our timelines may have a significant impact on our ongoing and planned projects, and consequently, we may not develop these projects as contemplated, or at all, which may have an adverse effect on our business, results of operations and financial condition. Some of our completed projects have faced delays in the past.

In addition, some of the sale agreements which we enter into with our residential customers contain penalty clauses wherein we are liable to pay interests payments to our customers due to completion delays. Further, a buyer of our residential unit may also terminate his arrangements with us if we fail to deliver the unit as per the timelines mentioned under the sale agreement, and we may be liable to refund the amount along with interest. We might also be exposed to penalties under the Real Estate (Regulation and Development) Act, 2016 (the "RERA"). The aggregate penalties we may be liable to pay in the event

of delays may affect the overall profitability of the project and therefore adversely affect our business, results of operations and financial condition.

Presently due to COVID 19 and lockdown, the real estate sector has been impacted as well with the tightened restrictions and the construction work of all the real estate projects has been severely affected in the manner that the partial workforce has been unable to attend work or construction sites as the labour work force may have migrated back to their respective home states. Further, there is disturbed supply chain in obtaining construction materials as the same has been disrupted. In view of the disruptions caused by the coronavirus pandemic, the government has issued an advisory to all states and union territories to extend the timelines of various time- bound permissions, No Objection Certificates (NoCs) and approvals related to real estate construction projects by nine months automatically. This ministry had also issued an advisory on May 13, 2020 for extension of registration of real estate projects for which completion date or revised completion date or extended completion date as per registration expires on or after March 25, 2020 and to extend the said date automatically by six months by invoking Force Majeure clause under the provisions of RERA.

Our following projects have also been extended for the aforesaid reason and we fail to complete within the extended time, we are liable to pay interests payments to our customers due to completion delays.

- 8. *Our real estate development activities are geographically concentrated in the Palghar District. Consequently, we are exposed to risks from economic, regulatory and other changes in these areas, which in turn may have an adverse effect on our business, results of operations, cash flows and financial condition.***

Our real estate development activities are primarily focused in and around Vasai- Virar and Palghar which may perform differently from, and may be subject to market conditions and regulatory developments that are different from, real estate markets in other parts of India or the world. For details of our projects, see "Our Business on page 86. The real estate market in the Vasai- Virar and Palghar may be affected by various factors outside our control, including prevailing local and economic conditions, changes in the supply and demand for properties comparable to those we develop, changes in the applicable governmental regulations, economic conditions, demographic trends, employment and income levels and interest rates, among other factors. These factors may contribute to fluctuations in real estate prices, rate of sales and the availability of land in the Vasai- Virar and Palghar and could also adversely affect the demand for and valuation of our ongoing and planned projects. Any such risk may be further exacerbated by the illiquid nature of real estate investments. Consequently, our business, results of operations, cash flows and financial condition have been and will continue to be heavily

dependent on the performance of, and the prevailing conditions affecting, the real estate market in the Vasai- Virar and Palghar.

9. *We cannot assure you that the construction of our projects will be free from any and all defects.*

We cannot assure you that we will always finish the construction or development of our projects in accordance with the requisite specifications or that the construction of our projects will be free from any and all defects. If the work is unsatisfactory, the work has to be redone as per the instructions of Site in Charge without any extra cost. In the event of discovery of defects/faults in our work, or due to damages to our construction due to factors beyond our control, or any of the other reasons, we may incur significant contractual liabilities and losses under our projects contracts and such losses may materially and adversely affect our financial performance and results of operations.

Further, it may result in cancellation by customers of any commitment to purchase in our real estate projects and/ or refund of any advance deposited with us by any customer as a guarantee for purchase in our real estate projects, dissatisfaction among our customers, resulting in negative publicity, consumer litigation and lack of confidence among future buyers for our projects and all these factors could adversely affect our business, financial condition and results of operations. However, to safeguard the loss to an extent, majority of the contracts which we enter with our sub-contracted includes a clause relating to forfeiture of their security deposit in case of unsatisfactory work carried out by them.

10. *We sometimes enter into MoUs, acquisition agreements and similar agreements with third parties to acquire land and projects, which entails certain risks.*

We sometimes enter into MoUs, acquisition agreements and other similar agreements with third parties to acquire title with respect to certain land and/or buildings or parts thereof. Since a formal transfer of title with respect to such land or buildings or parts thereof is completed only after all requisite governmental consents and approvals have been obtained and all conditions precedent to such agreements have been complied with, we are subject to the risk that the landowners may transfer the land to other purchasers or that we may fail to acquire registration of title with respect to such land. We also make partial payments to third parties to acquire certain land or buildings, which we may be unable to recover under certain circumstances. Further, our inability to comply with our obligations under such MoUs or agreements may result in third parties' termination of these MoUs or agreements and forfeiting any partial payments we have made and possibly also claiming damages from us. Our inability to acquire such land or buildings, or failure to recover the partial payment we made with respect to such land, could adversely affect our business, prospects, financial condition and results of operations.

We have and may continue to acquire buildings by entering into purchase agreements with the owners of individual flats or units of such buildings. In such cases, we may be unable to acquire each and every flat or unit, causing a delay in the redevelopment plan and result in an inefficient use of our resources, which could adversely affect our business Draft Letter of Offer, financial condition and result of operations.

11. *Increased raw material, labour and other costs, may adversely affect our results of operation and feasibility of our development plan.*

We procure building materials for our projects, such as steel, cement, flooring products, hardware, bitumen, sand and aggregates, doors and windows, bathroom fixtures and other interior fittings, from third-party suppliers. The prices and supply of basic building materials and other raw materials depend on factors outside our control, including cost of their raw materials, general economic conditions, competition, production costs and levels, transportation costs, indirect taxes and import duties. Our

ability to develop and construct projects profitably is dependent on our ability to obtain adequate and timely supply of building materials within our estimated budget. As we source our building materials from third parties, our supply chain may be interrupted by circumstances beyond our control. Poor quality roads and other transportation-related infrastructure problems, inclement weather and road accidents may also disrupt the transportation of supplies. Prices of certain building materials and, in particular, cement and steel prices, are susceptible to rapid increases. Further, we operate in a labour-intensive industry and if we or our contractors are unable to negotiate with the labour or their sub-contractors, it could result in work stoppages or increased operating costs as a result of higher than anticipated wages or benefits. In addition, it may be difficult to procure the required labour for ongoing or planned projects.

During periods of shortages in the supply of building materials or labour, we may not be able to complete projects according to our previously determined time frames, at our previously estimated project costs, or at all, which may adversely affect our results of operations and reputation. In addition, during periods where the prices of building materials or labour significantly increase, we may not be able to pass these price increases on to our customers, which could reduce or eliminate the profits we intend to gain from our projects. These factors could adversely affect our business, results of operations and cash flows.

12. Our business is subject to various operating risks at our construction sites, the occurrence of which can affect our results of operations and consequently, financial condition of our Company.

Our business operations are subject to operating risks, such as breakdown or failure of equipments used at the project sites, weather conditions, interruption in power supply, shortage of consumables, performance below expected levels of output or efficiency, natural disasters, obsolescence, labour disputes, accidents, our inability to respond to technological advancements and emerging realty industry standards and practices along with the need to comply with the directives of relevant government authorities. The occurrence of these risks, if any, could significantly affect our operating results, and the slowdown / shutdown of business operations may have a material adverse effect on our business operations and financial conditions.

13. We may not be able to successfully identify and acquire suitable land for development, which may adversely affect our business and growth prospects.

Our ability to identify suitable parcels of land for development is a vital element of growing our business and involves certain risks, including identifying land with clean title and at locations that are preferred by our target customers. We have an internal assessment process for land selection and acquisition, which includes a due diligence exercise to assess the title of the land and its suitability for development and marketability. Our internal assessment process is based on information that is available or accessible to us. We cannot assure you that such information is accurate, complete or current, and any decision based on inaccurate, incomplete or outdated information may result in certain risks and liabilities associated with the acquisition of such land, which could adversely affect our business and growth prospects.

We acquire parcels of land at various locations, which can be subsequently consolidated to form a contiguous land area, upon which we can undertake development. While in the past we have acquired contiguous parcels of land for our development activities, we may not be able to acquire such parcels of land in the future or may not be able to acquire such parcels of land on terms that are acceptable to us, which may affect our ability to consolidate these parcels of land into a contiguous land area. Failure to acquire such parcels of land may cause a delay or force us to abandon or modify our development of land that we have acquired at a certain location, which may result in a failure to realize profit on our initial

investment and also affect our assessment of the Developable Area of our land reserves. Additionally, we may be asked to pay premium amounts for acquiring certain large parcels of land.

In addition, due to the increased demand for land in connection with the development of residential, commercial and retail properties, we may experience increased competition in our attempt to acquire land in the geographical areas in which we operate and the areas in which we anticipate operating in the future. For example, the supply of land in Mumbai and particularly in south and central Mumbai is limited and acquisition of new land in these and other parts of Mumbai poses substantial challenges and is highly competitive. Increased competition may result in a shortage of suitable land that can be used for development and can increase the price of land. We may not be able to or may decide not to acquire parcels of land due to various factors, such as the price of land.

Moreover, the availability of land, as well as its use and development, is subject to regulations by various local authorities. For example, if a specific parcel of land has been deemed as agricultural land, depending on its location, no commercial or residential development may be permitted beyond certain specified timelines or without the prior approval of the local authorities, as applicable.

We may also be required by applicable laws or court orders to incur expenditures and undertake activities in addition to real estate development on certain portions of our land reserves. Accordingly, our inability to acquire parcels of land or development rights or any restrictions on use of our land may adversely affect our business and growth prospects.

14. Changes in Indian taxation laws, including the introduction of GST could adversely affect our ability to benefit from tax incentives which may have a material adverse effect on our business. Our infrastructure and construction business is subject to the IT Act.

There can be no assurance that such tax incentives will continue in the future or that such tax credits shall be held to be available to us. Further, as GST has been introduced relatively recently and because many of our existing contracts do not provide specifically for the consequences of GST, we may be involved in disputes arising due to differences in the interpretation of the new law. Accordingly, we may be involved in litigation in relation to GST and/or disputes with our clients as regards the manner in which GST applies to our contracts with them.

15. Our development agreements do not convey any interest in the immovable property to us and only the development right is transferred to us. Further, investments through development agreements involve risks, including the possibility that owner of the property may fail to meet their obligations under the development agreement, causing the whole project to suffer.

We have sought to develop our projects and certain parts of our projects primarily through development agreements with landowners of the proposed projects. Most of our development agreements confer rights on us to develop, market and eventually sell the Saleable Area (or a certain proportion of such Saleable Area as mutually agreed under area-sharing arrangements) to third party buyers. While we have the right to create mortgages to raise funds for the projects, such agreements do not convey any ownership interest in the immovable property to us. Under these agreements, we are typically entitled to a share in the developed property and a proportionate undivided share of the land area, or a share of the revenues or profits generated from the sale of the developed property, or a combination of the above entitlements, after adjustments. Disputes that may arise between us and our development partners may cause delay in completion, suspension or complete abandonment of a project, which may adversely affect our business, financial condition and results of operations.

16. We rely on independent contractors to execute our projects and any failure on their part to perform their obligations could adversely affect our reputation, business, results of operations and cash flows.

We utilize labour contractors to execute our projects. The timing and quality of construction of the projects we develop depends on the availability and skill of these contractors, as well as contingencies affecting them, including labour and raw material shortages and industrial action such as strikes and lockouts. If a contractor fails to perform its obligations satisfactorily or within the prescribed time periods with regard to a project, or terminates its arrangement with us, we may be unable to develop the project within the intended timeframe and at the intended cost. If this occurs, we may be required to incur additional cost or time to develop the property to appropriate quality standards in a manner consistent with our development objective, which could result in reduced profits or, in some cases, significant penalties and losses which we may not be able to recover from the relevant independent contractor. We cannot assure you that the services rendered by any of our independent contractors will always be satisfactory or match our requirements for quality. Further, we may be subject to claims in relation to defaults and late payments to our contractors, which may adversely affect our reputation, business, results of operations and cash flows.

17. The success of our residential real estate development business is dependent on our ability to anticipate and respond to consumer requirements.

We depend on our ability to understand the preferences of our customers and to accordingly develop projects that suit their tastes and preferences. The growing disposable income of India's middle and upper income classes has led to a change in popular lifestyle resulting in substantial changes in the nature of their demands. The range of amenities now demanded by consumers include those that have historically been uncommon in India's residential real estate market such as gardens, community space, security systems, playgrounds, fitness centres, tennis courts, etc. As customers continue to seek better housing and better amenities as part of their residential needs, we are required to continue to focus on the development of quality residential accommodation with various amenities. We also intend to continue to provide quality facilities even in our middle-income housing projects. Our inability to provide customers with certain amenities or our failure to continually anticipate and respond to customer needs may affect our business and prospects.

18. Our Company's activities are labour intensive and depend on availability of skilled and unskilled labourers in large numbers. In case of unavailability of such labourers and / or inability to retain such personnel or occurrence of any work stoppages, our business operations could be affected.

We operate in a labour intensive industry and our contractors hire casual labour to work on our projects. In the event of a labour dispute, if our contractors are unable to successfully negotiate with the workmen or sub- contractors, it would result in work stoppages or increased operating costs. It may also be difficult to procure the required skilled workers for existing or future projects. In addition we may also be liable for or exposed to sanctions, penalties or losses arising from accidents or damages caused by our workers or contractors. Though we have not experienced any major disruptions in our business operations due to disputes or other problems with our work force in the past; however there can be no assurance that we will not experience such disruptions in the future. Such disruptions may adversely affect our business and results of operations and may also divert the management's attention and result in increased costs.

India has stringent labour legislation that protects the interests of workers, including legislation that sets forth detailed procedures for the establishment of unions, dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. We are also subject to laws and regulations governing relationships with employees, in such areas as minimum wage and maximum working hours, overtime, working conditions, hiring and terminating of employees and work permits. Although our employees are not currently unionized, there can be no assurance that they

will not unionize in the future. If our employees unionize, it may become difficult for us to maintain flexible labour policies, and we may face the threat of labour unrest, work stoppages and diversion of our management's attention due to union intervention, which may have a material adverse impact on our business, results of operations and financial condition.

19. We face competition in our business from organized and unorganized players, which may adversely affect our business operation and financial condition.

The market for our industry is competitive on account of both the organized and unorganized players. Players in this industry generally compete with each other on key attributes such as quality of construction, pricing and timely delivery. Some of our competitors may have longer industry experience and greater financial, technical and other resources, which may enable them to react faster in changing market scenario and remain competitive. Moreover, the unorganized sector offers their products at highly competitive prices which may not be matched by us and consequently affect our volume of sales and growth prospects. Growing competition may result in a decline in our market share and may affect our margins which may adversely affect our business operations and our financial condition.

20. We may require real estate financing, which may not be available to us on commercially viable terms, or at all.

Our business is cyclical and highly capital intensive, requiring substantial capital to develop and market our projects. We expect that we will require additional funding to meet our capital expenditure needs, which could result in incurrence of indebtedness and leverage and therefore, borrowing costs and require us to comply with certain restrictive covenants. Our ability to obtain financing on favourable commercial terms, if at all, will depend on a number of factors, including:

- our future financial condition, results of operations and cash flows;
- the amount and terms of any existing indebtedness;
- general market conditions and market conditions for financing activities by real estate companies; and
- economic, political and other conditions in India and, in particular, Mumbai and District of Palghar.

Challenging conditions such as the global financial conditions, including continued disruptions in the capital and credit markets as a result of uncertainty, changing or increased regulation of financial institutions, reduced alternatives or failures of significant financial institutions, may significantly diminish the availability of credit to us and our customers. This may require us to delay or abandon some or all of our planned projects, reduce planned expenditures and advances to obtain land or development rights, and reduce the scale of our operations, and may adversely affect the sales of, and market rates for, our projects, and, consequently, our profitability. In addition, Indian regulations on foreign investment in housing, built-up infrastructure and construction and development projects impose significant restrictions, which may impact the availability of financing for our operations. Further, under current Indian regulations except for certain limited purposes, external commercial borrowings cannot be raised for investment in real estate, which may further restrict our ability to obtain necessary financing. In the event we are not able to raise additional financing on favourable terms, or at all, our planned capital expenditure, business, results of operations and prospects could be adversely affected.

21. We face significant risks before we realize any income from our real estate developments because of the length of time required for completion of each project.

Real estate developments typically require substantial capital outlay during the acquisition of land or development rights and/or construction phases and it may take a year or more before income or positive cash flows may be generated through sales of a real estate development. Depending on the size of the development, the time span for completing a real estate development runs into several years.

Consequently, changes in the business environment during the length of time a project requires for completion may affect the revenue and cost of the development during the period from project commencement to completion, directly impacting on the profitability of the project. Factors that may affect the profitability of a project include the risk that the receipt of government approvals may take more time than expected, the failure to complete construction according to original specifications, schedule or budget, and lack of sales or leasing of properties. The sales and the value of a real estate development project may be adversely affected by a number of factors, including but not limited to the national, state and local business climate and regulatory environment, local real estate market conditions, perceptions of property buyers and tenants in terms of the convenience and attractiveness of the project and competition from other available or prospective properties developments.

If any of the risks described above materialises, our returns on investment may be delayed and/or lower than originally expected by us and our financial performance may be adversely affected.

22. Delays associated with the collection of receivables from our clients or defaults in customer payments may adversely affect our business, results of our operations, cash flows, and financial condition.

Because of the nature of our contracts, we sometimes commit resources to projects prior to receiving advances, progress or other payments from the customer in amounts sufficient to cover expenditures as they are incurred. There may be delays associated with the collection of receivables from our clients. As at March 31, 2022, our top ten receivables on a consolidated basis is Rs. 430.55 Lacs i.e 23.11% of our total trade receivables. Our operations involve significant working capital requirements and delayed collection of receivables could adversely affect our liquidity, business, cash flows and results of operations. In addition, we may be subject to additional regulatory or other scrutiny associated with commercial transactions with government owned, controlled or funded entities. We are also currently engaged in certain recovery measures involving disputes with our customers.

23. Inability to comply with the provisions of RERA may subject us to penal consequences there under.

The Government notified the RERA in the official gazette on March 25, 2016 which has been introduced to regulate the real estate industry and to ensure, among others, imposition of certain responsibilities on real estate developers and accountability toward customers and protection of their interest. The RERA has imposed certain obligations on real estate developers, including us, such as mandatory registration of real estate projects, not issuing any advertisements or accepting advances unless real estate projects are registered under RERA, maintenance of a separate account for amounts realized from each real estate project and restrictions on withdrawal of amounts from such accounts and taking customer approval for major changes in sanction plan.

RERA has inter-alia prescribed

- a. Registration of construction projects,
- b. Conditions to monitor the funds allocated towards each project and placed restrictions on the usage of the same
- c. Submission of specific details of the projects for public access
- d. Disclosure of timeline for construction, completion and delivery of project and
- e. Regulation of the advertising of the projects.

In addition, we will have to comply with state-specific rules and regulations which will be enacted by the relevant state government where our ongoing projects are or our future projects may be located, due to the introduction of RERA. While most of the state governments have notified rules in relation to RERA, other states are in the process of doing so. To ensure compliance with the requirements of the RERA, we may need to allocate additional resources, which may increase our regulatory compliance costs

and divert management attention. Further, we may face challenges in interpreting and complying with the provisions of the RERA due to limited jurisprudence on them. In the event our interpretation of provisions of the RERA differs from, or contradicts with, any judicial pronouncements or clarifications issued by the Government in the future, we may face regulatory actions or we may be required to undertake remedial steps. Any non-compliance of the provisions of RERA or such state-specific legislations may result in punishments (including fines or imprisonment) and revocation of registration of our ongoing projects, which may have an adverse effect on our business, operations and financial condition.

24. Any negative cash flows in the future would adversely affect our cash flow requirements, which may adversely affect our ability to operate our business and implement our growth plans, thereby affecting our financial condition.

We have in the past experienced, and may in the future, experience negative operating cash flows. The following table sets forth certain information relating to our cash flows on a consolidated basis for the periods indicated:

(Rs in Lacs)				
Particulars	For half year ended on 30.09.2022	Fiscal		
		2022	2021	2020
Net cash flow from/ (used in) operating activities	-	(318.19)	(584.71)	(397.69)
Net cash flow from/ (used in) investing activities	(38.18)	-	-	(4.20)
Net cash flow from/ (used in) financing activities	(4.89)	-	-	-

Negative cash flows over extended periods, or significant negative cash flows in the short term, could materially impact our ability to operate our business and implement our growth plans. As a result, our cash flows, business, future financial performance and results of operations could be materially and adversely affected.

25. Our strategy to focus on the affordable housing segment may not be successful, which may have an adverse effect on our business, financial condition and results of operations.

We intend to focus on development of affordable housing as well as specialized senior living projects, which we believe offers significant growth opportunities. We have limited experience in the developing and marketing of some of these projects, and may have to operate at lower profit margins. We cannot assure you that we will be successful in this venture or will be able to generate positive returns on our investments in such projects, which may have an adverse effect on our business, financial condition and results of operations.

26. We, on an ongoing basis, explore new construction techniques aimed at reducing costs, and/ or improving margins and/ or quality/ timelines of construction that are untested.

We on an ongoing basis explore new construction techniques that are aimed at lowering our costs, and/ or improving our margins and/ or quality/ timelines of construction. A failure to implement such new construction techniques in time or at all may result in a material adverse effect of our business, financial condition and results of operations.

27. In the event that we are unable to acquire lands for which we have entered into agreements to sell, we may lose advances paid towards acquisition of such lands.

As part of our land acquisition process, we enter into agreements to sell with third parties prior to the transfer or conveyance of title to parcels of land. We enter into these agreements to sell to ensure that the sellers of the land satisfy certain conditions within the stipulated time frame specified under these agreements. Under these agreements, the owners of the land may be required to provide to us all of the original deeds and documents in relation to the land.

Upon entering into these agreements to sell, we are required to pay these landowners certain advances towards the purchase of the lands. These agreements also provide that the lands must be conveyed in our favour within a prescribed period of time. In the event that we are not able to acquire the lands covered by these agreements to sell, we may not be able to recover all or part of the advance monies related to these lands.

Furthermore, in the event that these agreements to sell are either invalid or have expired, we may lose the right to acquire these lands and also may not be able to recover the advances made in relation to the land. Also, any indecisiveness or delay on our part to perform our obligations under these agreements may jeopardize our ability to acquire these lands before these agreements expire. Additionally, any failure to renew any of these agreements on similar terms or recover the advanced monies from the relevant counterparties following the expiration of the initial term of such agreement could adversely affect our business, financial condition and results of operations.

28. The demand for our residential projects depends on the availability of financing and tax benefits to potential customers.

A large majority of customers acquiring property avail themselves of financing. The interest rate at which our customers may borrow funds for the purchase of our properties affects the affordability of our real estate projects. Any increase in the interest rates payable on home loans would make home loans less attractive to our customers, which may adversely affect our business, future growth and results of operations. Further, any changes in the tax treatment with respect to the repayment of principal on housing loans and interest paid on housing loans may further affect the demand for residential real estate. There are various tax benefits under the Income Tax Act which are available to the purchasers of residential premises who utilize loans from banks or financial institutions. Any unfavorable changes in respect of tax benefits or interest rates could adversely affect the ability or willingness of our potential customers to purchase residential apartments. Consequently, the marketability and value of any properties in which we have invested will depend on many factors beyond our control and there is no assurance that there will be either a ready market for any of our properties or that such properties or any of our investments will be sold at a profit or in a timely manner, if at all. If we are unable to sell or lease our interest in a project, in time or at all, we may incur additional costs and our ability to invest in other developments may be adversely impacted.

29. Failure to commence construction work within time may adversely affect the financial position of the developer.

We need to commence the construction work within the stipulated time from the date of obtaining commence certificate. If we fail to commence work within time, we may have to pay additional cost, which may affect our business and financial position.

30. *Our Company may be subject to industrial unrest, slowdowns and increased labour costs.*

India has stringent labour legislation that protects the interests of workers, including legislation that sets forth detailed procedures for dispute resolution and employee removal and legislation that imposes certain financial obligations on employers during employment and upon retrenchment. Under Indian law, workers also have a right to establish trade unions. Although the Company has not experienced any labour unrest, we cannot assure you that there will be no labour unrest in the future.

While our Company believes that it maintains good relationships with the employees and contractors, there can be no assurance that we will not experience disruptions to our operations in the future due to disputes or issues with our contractors or employees. In the event there are any unrest with labour unions and conflicts with the same, or if our Company experiences unrest or slowdowns, it may become difficult for our Company to maintain flexible labour policies, all of which may materially and adversely impact our business, prospects, results of operations and financial condition.

31. *The Objects of this Issue are based on the internal estimates of our management, and have not been appraised by any bank or financial institution. The deployment of funds in is entirely at our discretion and the same will not be monitored by any external agency.*

Our funding requirements and the deployment of the proceeds of the Issue are based on our management estimates and have not been appraised by any bank or financial institution. The deployment of funds for the Objects of the Issue is entirely at our own discretion and the same will not be monitored by any external agency. We may have to revise our management estimates from time to time and consequently our funding requirements may also change. The estimates contained in this Draft Letter of Offer may exceed the value that would have been determined by third party appraisals, which may require us to reschedule the deployment of funds proposed by us and may have a bearing on our expected revenues and earnings.

The SEBI ICDR Regulations stipulates the appointment of monitoring agency only where the issue size is in excess of Rs.10,000 Lakh. Since the Issue is for less than 10,000 Lakh, we will not be appointing a monitoring agency and the deployment of Issue Proceeds as stated in the chapter titled “Objects of the Issue” beginning on page 69 of this Draft Letter of Offer will not be monitored by an independent agency.

32. *Our future fund requirements, in the form of further issue of capital or securities may be prejudicial to the interest of the Shareholders depending upon the terms on which they are eventually raised.*

We may require additional capital from time to time depending on our business needs. Any further issue of Equity Shares or convertible securities would dilute the shareholding of the existing Shareholders and such issuance may be done on terms and conditions, which may not be favourable to the then existing Shareholders. If such funds are raised in the form of loans or debt or preference shares, then it may substantially increase our fixed interest/dividend burden and decrease our cash flows, thus adversely affecting our business, results of operations and financial condition.

33. *Our Company’s ability to pay dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures.*

Our Company has not been a dividend paying Company. Further, the amount of future dividend payments, if any, will depend upon our Company’s future earnings, financial condition, cash flows, working capital requirements, the terms and conditions of our Company’s indebtedness and capital expenditures. There can be no assurance that our Company will be able to pay dividends in the future.

34. *We have not commissioned an industry report for the disclosures made in the chapter titled “Industry Overview” and made disclosures on the basis of the data available on the internet and such data has not been independently verified by us.*

We have neither commissioned an industry report, nor sought consent from the quoted website source for the disclosures which need to be made in the chapter titled "*Industry Overview*" of this Draft Letter of Offer. We have made disclosures in the said chapter on the basis of the relevant industry related data available online for which relevant consents have not been obtained. We have not independently verified such data. We cannot assure you that any assumptions made are correct or will not change and, accordingly, our position in the market may differ from that presented in this Draft Letter of Offer. Further, the industry data mentioned in this Draft Letter of Offer or sources from which the data has been collected are not recommendations to invest in our Company. Accordingly, investors should read the industry related disclosure in this Draft Letter of Offer in this context.

35. Our performance is subject to seasonality and revenue may fluctuate significantly from period to period.

Our revenue is significantly dependent on the sale of our residential and commercial properties under development. Our revenue from these development activities may fluctuate significantly due to a variety of factors. Moreover, due to occasional lags in development timetables caused by unforeseen circumstances, we cannot predict with certainty when our real estate developments will be completed. Our results of operations may also fluctuate from period to period due to a combination of other factors beyond our control, including volatility in expenses such as costs to acquire land or development rights and construction costs. We may experience cash flow mismatches and difficulties in covering our operating costs, which may adversely affect our business, financial condition, results of operations and our ability to fund future projects.

As a result of one or more of these factors, we may record significantly higher turnover or profits during one accounting period and significantly lower turnover or profits during prior or subsequent accounting periods. Furthermore, the periods discussed in our financial statements may not be comparable to each other or to other future periods, and our results of operations and cash flows may vary significantly from period to period, year to year, and over time.

36. We do not have documentary evidence for the educational qualification and certain other details of certain of our Directors included in the "Management" section.

Certain supporting documentation for details required to be stated under brief profiles of our Directors included in the section "Our Management" on page 89, with respect to their educational qualifications and prior work experience are not available. The information included in these sections is based on the details provided by the respective Promoters and Directors. We cannot assure you that all such information included in relation to them is true and correct.

37. Our Promoters and Directors and related entities have interests in a number of ventures, which are in businesses similar to ours and this may result in potential conflicts of interest with us.

A conflict of interest may occur between our business and the business of such ventures in which our Promoters, our Directors and related entities are involved with, which could have an adverse effect on our operations. Conflicts of interest may also arise out of common business objectives shared by us, our Promoters, Directors and related entities. Our Promoters, our Directors and related entities may compete with us and have no obligation to direct any opportunities to us. We cannot assure you that these or other conflicts of interest will be resolved in an impartial manner.

38. We are dependent on a number of key personnel, and the loss of or our inability to attract or retain such persons could adversely affect our business, results of operations and financial condition.

We are highly dependent on our Key Managerial Personnel for setting our strategic business direction and managing our business. Our Managing Director and certain other Key Managerial Personnel have extensive

experience in the real estate development sector. For further information, see “Our Management” on page 89. Our ability to meet continued success and future business challenges depends on our ability to attract, recruit and retain experienced, talented and skilled professionals. Due to the current limited pool of skilled personnel in our industry, competition for senior management is intense. The loss of the services of our Key Managerial Personnel or our inability to recruit or train a sufficient number of experienced personnel or our inability to manage the attrition levels in different employee categories may have an adverse effect on our financial results and business prospects.

ISSUE SPECIFIC RISKS

39. The Equity Shares of our Company are infrequently traded and the proposed right issue may not result in an active or liquid market for the Equity Shares.

Prior to the Right Issue, there has been infrequent public market for the Equity Shares and an active public market for the Equity Shares may not develop or be sustained after the Right Issue. Listing and quotation does not guarantee that a trading market for the Equity Shares will develop or, if a market does develop, the liquidity of that market for the Equity Shares. Although we currently intend that the Equity Shares will remain listed on the Stock Exchange, there is no guarantee of the continued listing of the Equity Shares. Failure to maintain our listing on the Stock Exchange or other securities markets could adversely affect the market value of the Equity Shares.

40. Our Company will not distribute the Draft Letter of Offer and Application Form to certain overseas Shareholders who have not provided an address in India for service of documents.

Our Company will dispatch this Draft Letter of Offer, the Abridged Letter of Offer, Rights Entitlement Letter and Application Form (the “Offering Materials”) to such Shareholders who have provided an address in India for the service of documents. The Offering Materials will not be distributed to addresses outside India on account of restrictions that apply to the circulation of such materials in various overseas jurisdictions. However, the Companies Act requires companies to serve documents at any address, which may be provided by the members as well as through e- mail.

Presently, there is a lack of clarity under the Companies Act, 2013, and the rules thereunder, with respect to the distribution of Offering Materials to retail individual shareholders in overseas jurisdictions where such distribution may be prohibited under applicable laws of such jurisdictions.

41. SEBI has recently, by way of circulars dated January 22, 2020, May 6, 2020, January 19, 2021 and April 22, 2021, streamlined the process of rights issues. You should follow the instructions carefully, as stated in such SEBI circulars and in this Draft Letter of Offer.

The concept of crediting Rights Entitlements into the demat accounts of the Eligible Equity Shareholders has recently been introduced by the SEBI. Accordingly, the process for such Rights Entitlements has been recently devised by capital market intermediaries. Eligible Equity Shareholders are encouraged to exercise caution, carefully follow the requirements as stated in the SEBI circulars dated January 22, 2020, May 6, 2020 and January 19, 2021 and April 22, 2021, and ensure completion of all necessary steps in relation to providing/updating their demat account details in a timely manner. For details, see “Terms of the Issue” on page 168 of this Draft Letter of Offer.

In accordance with Regulation 77A of the SEBI ICDR Regulations read with the SEBI Rights Issue Circular, the credit of Rights Entitlements and Allotment of Rights Equity Shares shall be made in dematerialized form only. Prior to the Issue Opening Date, our Company shall credit the Rights Entitlements to (i) the demat accounts of the Eligible Equity Shareholders holding the Equity Shares in dematerialised form; and (ii) a demat suspense escrow account opened by our Company, for the Eligible Equity Shareholders which would comprise Rights Entitlements relating to (a) Equity Shares held in a demat suspense account pursuant to Regulation 39 of the SEBI Listing Regulations; or (b) Equity Shares held in the account of IEPF authority; or (c) the demat accounts of the Eligible Equity Shareholder which are frozen or details of

which are unavailable with our Company or with the Registrar on the Record Date; or (d) credit of the Rights Entitlements returned/reversed/failed; or (e) the ownership of the Equity Shares currently under dispute, including any court proceedings.

42. The entitlement of Equity Shares to be allotted to investors applying for Allotment in physical form, will be kept in abeyance.

In accordance with the SEBI ICDR Regulations, the option to receive the Rights Equity Shares in physical form will not be available after a period of six months from the date of coming into force of the SEBI ICDR Regulations, i.e., May 10, 2019. Since, the Rights Equity Shares offered pursuant to this Issue will be Allotted only after May 10, 2019, the entitlement of Rights Equity Shares to be Allotted to the Applicants who have applied for Allotment of the Rights Equity Shares in physical form will be kept in abeyance in electronic mode by our Company until the Applicants provide details of their demat account particulars to the Registrar. Pursuant to a press release dated December 3, 2018 issued by the SEBI, with effect from April 1, 2019, a transfer of listed Equity Shares cannot be processed unless the Equity Shares are held in dematerialized form (except in case of transmission or transposition of Equity Shares).

43. Any future issuance of Equity Shares, or convertible securities or other equity-linked securities by our Company may dilute your shareholding and any sale of Equity Shares by our Promoter or members of our Promoter Group may adversely affect the trading price of the Equity Shares.

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by our Company may dilute your shareholding in our Company; adversely affect the trading price of the Equity Shares and our ability to raise capital through an issue of our securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. We cannot assure you that we will not issue additional Equity Shares. The disposal of Equity Shares by any of our Promoter and Promoter Group, or the perception that such sales may occur may significantly affect the trading price of the Equity Shares. We cannot assure you that our Promoter and Promoter Group will not dispose of, pledge or encumber their Equity Shares in the future.

44. You may not receive the Equity Shares that you subscribe in the Issue until fifteen days after the date on which this Issue closes, which will subject you to market risk.

The Equity Shares that you subscribe in the Issue may not be credited to your demat account with the depository participants until approximately 15 days from the Issue Closing Date. You can start trading such Equity Shares only after receipt of the listing and trading approval in respect thereof. There can be no assurance that the Equity Shares allocated to you will be credited to your demat account, or that trading in the Equity Shares will commence within the specified time period, subjecting you to market risk for such period.

45. There is no guarantee that our Equity Shares will be listed in a timely manner or at all which may adversely affect the trading price of our Equity Shares.

In accordance with Indian law and practice, final approval for listing and trading of the Equity Shares will not be granted by the Stock Exchanges until after those Equity Shares have been issued and allotted. Approval will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on Stock Exchanges. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares. Further, historical trading prices, therefore, may not be indicative of the prices at which the Equity Shares will trade in the future which may adversely impact the ability of our shareholders to sell the Equity Shares or the price at which shareholders may be able to sell their Equity Shares at that point of time.

46. The Issue Price of our Right Equity Shares may not be indicative of the market price of our Equity Shares after the Issue.

The market price of the Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. There can be no assurance that the Investors will be able to sell their Equity Shares at or above the Issue Price. The factors that could affect our share price are:

- (a) quarterly variations in the rate of growth of our financial indicators such as earnings per share;
- (b) changes in revenue or earnings estimates or publication of research reports by analysts;
- (c) speculation in the press or investment community;
- (d) general market conditions; and
- (e) domestic and international economic, legal and regulatory factors unrelated to our performance.

EXTERNAL RISK FACTORS

47. Any downgrading of India's debt rating by a domestic or international rating agency could adversely affect our business.

There could be a downgrade of India's sovereign debt rating due to various factors, including changes in tax or fiscal policy, or a decline in India's foreign exchange reserves, which are outside our control. Any adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India, which may cause fluctuations in the prices of our Equity Shares. This could have an adverse effect on our business and financial performance, and ability to obtain financing for expenditures.

48. Investing in securities that carry emerging market risks can be affected generally by volatility in the emerging markets.

The markets for securities bearing emerging market risks, such as risks relating to India, are, to varying degrees, influenced by economic and securities market conditions in other emerging market countries. Although economic conditions differ in each country, investors' reactions to developments in one country may affect securities of issuers in other countries, including India. A loss of investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and the Indian economy in general. Any worldwide financial instability could also have a negative impact on the Indian economy, including the movement of exchange rates and interest rates in India, which could adversely affect the Indian financial sector in particular. Any such disruption could have an adverse effect on our Company's business, future financial performance, financial condition and results of operations, and affect the price of the Equity Shares. Accordingly, the price and liquidity of the Equity Shares may be subject to significant fluctuations, which may not necessarily be directly or indirectly related to our financial performance.

49. Political instability or changes in the Government or Government policies could impact the liberalization of the Indian economy and adversely affect economic conditions in India generally.

The performance and growth of our Company is dependent on the health of the Indian economy and more generally the global economy. The economy could be adversely affected by various factors such as political or regulatory action, including adverse changes in liberalization policies, social disturbances, terrorist attacks and other acts of violence or war, natural calamities, interest rates, commodity and energy prices and various other factors. The rate of economic liberalization could change, and specific laws and policies affecting foreign investment, currency exchange rates and other matters affecting investment in India could change as well. As a result, our business and the market price and liquidity of the Equity Shares may be affected by such economic and / or political changes. While the current Government is expected to continue the liberalization of India's economic and financial sectors and deregulation policies, there can be no absolute assurance that such policies will be continued. A significant change in India's economic liberalization and deregulation policies could disrupt business and

economic conditions in India generally and specifically have an adverse effect on the operations of our Company.

50. Regional hostilities, terrorist attacks, communal disturbances, civil unrest and other acts of violence or war involving India and other countries may result in a loss of investor confidence and adversely affect our business, prospects, results of operations and financial condition.

Terrorist attacks, civil unrest and other acts of violence or war may negatively affect the Indian markets on which our Equity Shares will trade as well as the worldwide financial markets. The Asian region has from time to time experienced instances of civil unrest and hostilities among neighbouring countries which may persist and occur in the future. Military activity or terrorist attacks in India may result in investor concern about stability in the region, which may adversely affect the price of our Equity Shares.

Events of this nature in the future, as well as social and civil unrest within other countries in the World, could influence the Indian economy and could have an adverse effect on the market for securities of Indian companies, including our Equity Shares.

51. Natural disasters and other disruptions could adversely affect the Indian economy and could cause our business and operations to suffer and the trading price of our Equity Shares to decrease.

Our operations, may be damaged or disrupted as a result of natural disasters such as earthquakes, floods, heavy rainfall, epidemics, tsunamis and cyclones and other events such as protests, riots and labour unrest. Such events may lead to the disruption of information systems and telecommunication services for sustained periods. They also may make it difficult or impossible for employees to reach our business locations which may affect our business. Damage or destruction that interrupts our production could adversely affect our reputation, our relationships with our customers, our senior management team's ability to administer and supervise our business or it may cause us to incur substantial additional expenditure to repair or replace damaged equipment or rebuild parts of our infrastructure.

We may also be liable to our customers for disruption in supply resulting from such damage or destruction. Our insurance coverage for such liability may not be sufficient. Any of the above factors may adversely affect our business, our financial results and the price of our Equity Shares.

52. Any future issuance of the Equity Shares may dilute your future shareholding and sales of the Equity Shares by the Promoters or other major shareholders of our Company may adversely affect the trading price of the Equity Shares.

Any future equity issuances by our Company may lead to dilution of your future shareholding in our Company. Any future equity issuances by our Company or sales of the Equity Shares by the Promoters or other major shareholders of our Company may adversely affect the trading price of the Equity Share. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Share. Except as otherwise stated in the Draft Letter of Offer, there is no restriction on our Company's ability to issue the Securities or the relevant shareholders' ability to dispose of their Equity Share, and there can be no assurance that our Company will not issue Equity Share or that any such shareholder (including Promoters and Promoter Group) will not dispose of, encumber, or pledge its Securities.

53. The outbreak of Novel Coronavirus, or outbreak of any other severe communicable disease could have a potential impact on our business, financial condition and results of operations.

The outbreak, or threatened outbreak, of any severe epidemic caused due to viruses (particularly the Novel Coronavirus) could materially adversely affect overall business sentiment and environment, particularly if such outbreak is inadequately controlled. The spread of any severe communicable disease may also adversely affect the operations of our customers and suppliers, which could adversely affect our business, financial condition and results of operations. The outbreak of Novel Coronavirus has resulted in authorities implementing several measures such as travel bans and restrictions, quarantines, shelter in place orders, and shutdowns. These measures have impacted and may further impact our

workforce and operations, the operations of our customers, and those of our respective vendors and suppliers. There is currently substantial medical uncertainty regarding Novel Coronavirus. A rapid increase in severe cases and deaths where measures taken by governments fail or are lifted prematurely, may cause significant economic disruption in India and in the rest of the world. The scope, duration and frequency of such measures and the adverse effects of Novel Coronavirus remain uncertain and could be severe. Our ability to meet our ongoing disclosure obligations might be adversely affected, despite our best efforts. If any of our employees were suspected of contracting Novel Coronavirus or any other epidemic disease, this could require us to quarantine some or all of these employees or disinfect the facilities used for our operations. In addition, our revenue and profitability could be impacted to the extent that a natural disaster, health epidemic or other outbreak harms the Indian and global economy in general.

The outbreak has significantly increased economic uncertainty. It is likely that the current outbreak or continued spread of Novel Coronavirus will cause an economic slowdown and it is possible that it could cause a global recession. The spread of Novel Coronavirus has caused us to modify our business practices (including employee travel, employee work locations, and cancellation of physical participation in meetings, events and conferences), and we may take further actions as may be required by government authorities or that we determine are in the best interests of our employees, customers, partners, and suppliers. There is no certainty that such measures will be sufficient to mitigate the risks posed by the outbreak, and our ability to perform critical functions could be harmed.

The extent to which the Novel Coronavirus further impacts our results will depend on future developments, which are highly uncertain and cannot be predicted, including new information which may emerge concerning the severity of the coronavirus and the actions taken globally to contain the coronavirus or treat its impact, among others. Existing insurance coverage may not provide protection for all costs that may arise from all such possible events.

We are still assessing our business operations and system supports and the impact Novel Coronavirus may have on our results and financial condition, but there can be no assurance that this analysis will enable us to avoid part or all of any impact from the spread of Novel Coronavirus or its consequences, including downturns in business sentiment generally or in our sector in particular. The degree to which Novel Coronavirus impacts our results will depend on future developments, which are highly uncertain and cannot be predicted, including, but not limited to, the duration and spread of the outbreak, its severity, the actions taken to contain the outbreak or treat its impact, and how quickly and to what extent normal economic and operating conditions can resume. The above risks can threaten the safe operation of our facilities and cause disruption of operational activities, environmental harm, loss of life, injuries and impact the wellbeing of our people.

Further in case the lockdown is extended, it could result in muted economic growth or give rise to a recessionary economic scenario, in India and globally, which could adversely affect the business, prospects, results of operations and financial condition of our Company.

54. Inflation in India could have an adverse effect on our profitability and if significant, on our financial condition.

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of salaries, and other expenses relevant to our business. High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to pass on to our customers, whether entirely or in part, and the same may adversely affect our business and financial condition. In particular, we might not be able to reduce our costs or increase our rates to pass the increase in costs on to our customers. In such case, our business, results of operations, cash flows and financial condition may be adversely affected.

Further, the GoI has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

GLOBAL PROSPECTS AND POLICIES

After an estimated contraction of -3.3 percent in 2020, the global economy is projected to grow at 6 percent in 2021, moderating to 4.4 percent in 2022. The contraction for 2020 is 1.1 percentage points smaller than projected in the October 2020 WEO, reflecting the higher-than-expected growth outturns in the second half of 2020 for most regions after lockdowns were eased. The projections for 2021 and 2022 are 0.8 percentage point and 0.2 percentage point stronger than in the previous forecast, reflecting additional fiscal support in a few large economies and the anticipated vaccine-powered recovery in the second half of the year. This pace reflects continued adaptation of all sectors of the economy to the challenging health situation. The strength of the projected recovery varies across countries, depending on the severity of the health crisis, the extent of domestic disruptions to activity (related to countries' reliance on contact-intensive sectors), the exposure to cross-border spillovers, and—importantly—the effectiveness of policy support to limit persistent damage.

Beyond 2022 global growth is projected to moderate to 3.3 percent into the medium term. Persistent damage to supply potential across both advanced and emerging market economies and slower labor force growth because of population aging (largely in advanced economies, but also in a few emerging market economies), and necessary rebalancing to a sustainable growth path in China, are all expected to weigh on the growth outlook for the global economy in the medium term. GDP levels are projected to remain well below the pre-pandemic trend path through 2024 for most countries (Figure 1.16).

Figure 1.16. Medium-Term GDP Losses Relative to Pre-COVID-19, by Region
(Revisions to projected 2024 GDP levels between the January 2020 and April 2021 WEO forecasts, percent)

Source: IMF staff estimates.

Note: AE = advanced economies; EM Asia ex. CHN = emerging and developing Asia excluding China; EM Eur. = emerging and developing Europe; EMDEs = emerging market and developing economies; LAC = Latin America and the Caribbean; ME&CA = Middle East and Central Asia; SSA = sub-Saharan Africa.

In *advanced economies*, occasional regional restrictions will likely be necessary at times to stem the progression of new strains of the virus. As the vulnerable population gets vaccinated, contact-intensive activities are expected to resume and drive a significant pickup in growth thanks to pent-up demand funded by accumulated savings in 2020. Recovery paths also vary within the group. The United States is projected to return to end-of-2019 activity levels in the first half of 2021 and Japan in the second half. In the euro area and the United Kingdom, activity is expected to remain below end-of-2019 levels into 2022. The gaps can be traced back to differences in behavioral and public health responses to infections, flexibility and adaptability of economic activity to low mobility, preexisting trends, and structural rigidities predating the crisis.

With respect to the October 2020 WEO, projections for 2021 have been revised down in Europe and up in Japan and the United States. The downward revision in Europe is more than offset by stronger-than-expected growth in the United States and Japan, reflecting additional fiscal support legislated in both countries at the end of 2020. In addition, the Biden administration's \$1.9 trillion rescue package is expected to further boost GDP over 2021-22, with significant spillovers to main US trading partners.

European countries (for example, Cyprus, Italy, Malta, Portugal, Spain), were able to salvage part of the summer tourist season by reopening in mid-2020. But this was followed by a surge in infections that forced new lockdowns in the last months of 2020, carrying over to 2021. GDP growth for 2022 has been revised up by 0.7 percentage point to 3.8 percent in the euro area and by 1.9 percentage points in the United Kingdom to 5.1 percent.

In *emerging market and developing economies*, vaccine procurement data suggest that effective protection will remain unavailable for most of the population in 2021. Lockdowns and containment measures may be needed more frequently in 2021 and 2022 than in advanced economies, increasing the likelihood of medium-term scarring effects on the potential output of these countries. Considerable differentiation is expected between China—where effective containment measures, a forceful public investment response, and central bank liquidity support have facilitated a strong recovery—and others. Tourism-based economies within this group (such as Fiji, Seychelles, Thailand) face particularly difficult prospects considering the expected slow normalization of cross-border travel. Recovery profiles vary, based on regional differences in the severity of the pandemic, economic structure (employment and GDP shares of contact-intensive sectors), exposure to specific shocks (for instance, due to reliance on commodity exports), and the effectiveness of the policy response to combat the fallout.

Price inflation (excluding food and energy) has dropped in sectors usually sensitive to fluctuations in aggregate demand (cyclical) and those that are not.

Note: The figure plots the time fixed effects of regressions in which three-month trailing averages of contributions to headline inflation are regressed on country and time fixed effects, with the weights being the GDP in purchasing-power-parity terms. The contribution of a component is defined as its year-over-year price change multiplied by its weight in the headline consumer price index basket.

Real Estate Global Market Report 2021: COVID-19 Impact And Recovery To 2030

The real estate market consists of sales of real estate services by entities (organizations, sole traders and partnerships) that rent, lease and allow the use of buildings and/or land. The industry also includes managing real estate for others, selling, renting and buying real estate for others and appraising real estate. The real estate market is segmented into real estate rental and real estate agency and brokerage.

The global real estate market is expected to grow from \$2687.5 billion in 2020 to \$2774.5 billion in 2021 at a compound annual growth rate (CAGR) of 3.%. The growth is mainly due to the companies rearranging their operations and recovering from the COVID-19 impact, which had earlier led to restrictive containment measures involving social distancing, remote working, and the closure of commercial activities that resulted in operational challenges. The market is expected to reach \$3717.3 billion in 2025 at a CAGR of 8%.

Asia Pacific was the largest region in the global real estate market, accounting for 40% of the market in 2020. Western Europe was the second largest region, accounting for 24% of the global market. Africa was the smallest region in the global real estate market.

Faster Economic Growth - The real estate market's growth will be aided by stable economic growth forecasted in many developed and developing countries. The International Monetary Fund (IMF) predicts that the global real GDP growth will be 3.% over 2019 and 2020, and 3.% from 2021 to 2023. Recovering commodity prices, after a significant decline in the historic period is further expected to aid the market growth. Developed economies are also expected to register stable growth during the forecast period. Additionally, emerging markets are expected to continue to grow slightly faster than the developed markets in the forecast period. For instance, India's GDP is expected to grow at 7.%, whereas China is forecasted to register GDP growth of 6.% in 2019.

Coronavirus Pandemic - The outbreak of the Coronavirus disease (COVID-19) acted as a massive restraint on the real estate market in 2020 as the need for services offered by these establishments declined due to lockdowns imposed by governments globally. COVID 19 is an infectious disease with flu-like symptoms including fever, cough, and difficulty in breathing. The virus was first identified in 2019 in Wuhan, Hubei province of the People's Republic of China and spread globally including Western Europe, North America and Asia. Steps by national governments to contain the transmission have resulted in a decline in economic activity with countries entering a state of lockdown and the outbreak is expected to continue to have a negative impact on businesses throughout 2020 and into 2021. However, it is expected that the real estate market will recover from the shock across the forecast period as it is a 'black swan' event and not related to ongoing or fundamental weaknesses in the market or the global economy.

Gen Z (born between mid-1990s and early 2000s) is the next generation renters after the millennials and they are predicted to spend more than any other generations on rental services in their lifetime. Gen Z is highly dependent on technology and relies more on the internet and social media to make purchasing and lifestyle decisions. Since Gen Z has experienced technology their entire lives, leasing and marketing campaigns for real estate rental services should incorporate the use of technology to reach this generation where they are most active such as on apps, on social media or any other internet source. Gen Z make up almost one-quarter of the U.S. population therefore, the real estate rental services market is expected to witness growth from this generation in the five years following 2019.

Major companies in the market include CBRE Group; Jones Lang LaSalle Inc; New World Development Company Limited; Colliers International; Newmark Grubb Knight Frank.

The countries covered in the global real estate market are Australia, Brazil, China, France, Germany, India, Indonesia, Japan, Russia, South Korea, UK, USA.

Housing launches were 86,139 units across the top eight Indian cities in the second half of 2020. Home sales volume across eight major cities in India jumped by 2x to 61,593 units from October 2020 to December 2020, compared with 33,403 units in the previous quarter, signifying healthy recovery post the strict lockdown imposed in the second quarter due to the spread of COVID-19 in the country.

According to the Economic Times Housing Finance Summit, about 3 houses are built per 1,000 people per year compared with the required construction rate of five houses per 1,000 population. The current shortage of housing in urban areas is estimated to be ~10 million units. Government Initiatives

Government of India along with the governments of respective States has taken several initiatives to encourage development in the sector. The Smart City Project, with a plan to build 100 smart cities, is a prime opportunity for real estate companies. Below are some of the other major Government initiatives:

- Under Union Budget 2021-22, tax deduction up to Rs. 1.5 lakh (US\$ 2069.89) on interest on housing loan, and tax holiday for affordable housing projects have been extended until the end of fiscal 2021-22.
- In October 2021, the RBI announced to keep benchmark interest rate unchanged at 4%, giving a major boost to the real estate sector in the country. The low home loan interest rates regime is expected to drive the housing demand and increase sales by 35-40% in the festive season in 2021.
- The Government has allowed 100% FDI for townships and settlements development projects.
- Provision for reduction in minimum capitalisation for FDI investment from US\$ 10 million to US\$ 5 million to boost urbanisation.
- In January 2018, the Government allowed 100% FDI in single-brand retail trading and construction development without Government approvals.
- Indian real estate is expected to attract a substantial amount of FDI over the next two years, with US\$ 8 billion capital infusion by FY22.
- In order to revive around 1,600 stalled housing projects across top cities in the country, the Union Cabinet has approved the setting up of Rs. 25,000 crore (US\$ 3.58 billion) alternative investment fund (AIF).
- Government has created an Affordable Housing Fund (AHF) in the National Housing Bank (NHB) with an initial corpus of Rs. 10,000 crore (US\$ 1.43 billion) using priority sector lending short fall of banks/financial institutions for micro financing of the HFCs.
- As of January 31, 2021, India formally approved 425 SEZs, of which 265 were already operational. Most special economic zones (SEZs) are in the IT/ BPM sector.

Road Ahead

The Securities and Exchange Board of India (SEBI) has given its approval for the Real Estate Investment Trust (REIT) platform, which will allow all kind of investors to invest in the Indian real estate market. It would create an opportunity worth Rs. 1.25 trillion (US\$ 19.65 billion) in the Indian market in the coming years. Responding to an increasingly well-informed consumer base and bearing in mind the aspect of globalisation, Indian real estate developers have shifted gears and accepted fresh challenges. The most marked change has been the shift from family owned businesses to that of professionally managed ones. Real estate developers, in meeting the growing need for managing multiple projects across cities, are

also investing in centralised processes to source material and organise manpower and hiring qualified professionals in areas like project management, architecture and engineering.

The residential sector is expected to grow significantly, with the central government aiming to build 20 million affordable houses in urban areas across the country by 2022, under the ambitious Pradhan Mantri Awas Yojana (PMAY) scheme of the Union Ministry of Housing and Urban Affairs. Expected growth in the number of housing units in urban areas will increase the demand for commercial and retail office space.

The current shortage of housing in urban areas is estimated to be ~10 million units. An additional 25 million units of affordable housing are required by 2030 to meet the growth in the country's urban population.

Information Other than the Standalone Financial Statements and Auditor's Report Thereon

The Company's Board of Directors is responsible for the preparation of the other information. The other information comprises the information included in the Director's Report and Corporate Governance Report but does not include the standalone financial statements and our auditor's report thereon. The Director's Report and Corporate Governance Report is expected to be made available to us after the date of auditor's report.

Our opinion on the standalone financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the standalone financial statements, our responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the

- Identify and assess the risks of material misstatement of the standalone financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal financial controls relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act, 2013, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the standalone financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the standalone financial statements, including the disclosures, and whether the standalone financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the standalone financial statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the financial statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the standalone financial statements of the current period and

other information is materially inconsistent with the standalone financial statements or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated.

When we read the Director's Report and Corporate Governance Report if we conclude that there is a material misstatement therein, we are required to communicate the matter to those charge with governance.

Management's Responsibility for the Standalone Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Act with respect to the preparation of these standalone financial statements that give a true and fair view of the financial position, financial performance, total comprehensive income, changes in equity and cash flows of the Company in accordance with the Ind AS and other accounting principles generally accepted in India. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate implementation and maintenance of accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the standalone financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the standalone financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Standalone Financial Statements

Our objectives are to obtain reasonable assurance about whether the standalone financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material, if individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these standalone financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

ANNEXURE "B" TO THE INDEPENDENT AUDITOR'S REPORT

(Referred to in paragraph 2(f) under 'Report on Other Legal and Regulatory Requirements' section of our report to the Members of Veer Global Infraconstruction Ltd of even date)

Report on the Internal Financial Controls Over Financial Reporting under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of Veer Global Infraconstruction Ltd ("the Company") as of March 31, 2022 in conjunction with our audit of the standalone financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Board of Directors of the Company is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ("ICAI"). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to respective company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditor's Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") issued by the Institute of Chartered Accountants of India and the Standards on Auditing prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and

evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the internal financial controls system over financial reporting of the Company.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that

- (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;
- (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and
- (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, to the best of our information and according to the explanations given to us, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2022, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

SIGNIFICANT ACCOUNTING POLICIES

1. Statement of Compliance

The financial statements have been prepared in accordance with Indian Accounting Standards (Ind AS) as notified under Section 133 of The Companies Act, 2013 (the "Act") read with Rule 4 of the Companies (Indian Accounting Standards) Rules, 2015 as amended and the relevant provisions of the Act and accounting principles generally accepted in India.

2. Use of estimates

The preparation of the financial statements in conformity with Ind AS requires management to make estimates, judgments and assumptions. These estimates, judgments and assumptions affect the application of accounting policies and the reported amounts of assets and liabilities, the disclosures of contingent assets and liabilities at the date of the financial statements and reported amounts of revenues and expenses during the period. Application of accounting policies that require critical accounting estimates involving complex and subjective judgments and the use of assumptions in these financial statements have been disclosed in notes below. Accounting estimates could change from period to period. Actual results could differ from these estimates. Appropriate changes in estimates are made as management becomes aware of changes in circumstances surrounding the estimates. Changes in estimates are reflected in the financial statements in the period in which changes are made and if material, then effects are disclosed in the notes to the financial statements.

3. Current and Non-Current Classification

The Company presents assets and liabilities in the balance sheet based on current/non-current classification. An asset is classified as current if:

- (a) it is expected to be realized or sold or consumed in the Company's normal operating cycle;
- (b) it is held primarily for the purpose of trading;
- (c) it is expected to be realized within twelve months after the reporting period; or
- (d) it is cash or a cash equivalent unless it is restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current. Liability is classified as current if:

- (a) it is expected to be settled in normal operating cycle;
- (b) it is held primarily for the purpose of trading;
- (c) it is expected to be settled within twelve months after the reporting period;
- (d) it has no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

All other liabilities are classified as non-current.

The operating cycle is the time between acquisition of assets for processing and their realization in cash and cash equivalents. The Company's normal operating cycle is twelve months

4. Functional and Presentation Currency

Items included in the financial statements of the Company are measured using the currency of the primary economic environment in which the Company Operated (Function Currency) Indian rupee (Rs. or `) is the functional currency of the Company. The financial statements are presented in Indian rupees, which the Company's presentation currency. All amounts included in the financial statements are reported in Indian rupees (Rupees in Lakhs) except equity shares, which are expressed in numbers.

5. Revenue Recognition

The Company recognizes revenue from contracts with customers when it satisfies a performance obligation by transferring promised good or service to a customer. The revenue is recognized to the extent of transaction price allocated to the performance obligation satisfied. Performance obligation is satisfied over time when the transfer of control of asset (good or service) to a customer is done over time and in other cases, performance obligation is satisfied at a point in time. For performance obligation satisfied over time, the revenue recognition is done by measuring the progress towards complete satisfaction of performance obligation. The progress is measured in terms of a proportion of survey of performance to date.

Transaction price is the amount of consideration to which the Company expects to be entitled in exchange for transferring good or service to a customer excluding amounts collected on behalf of a third party.

Costs to obtain a contract which are incurred regardless of whether the contract was obtained are charged-off in Profit & Loss immediately in the period in which such costs are incurred.

Impairment loss (termed as provision for foreseeable losses in the financial statements) is recognized in profit or loss to the extent the carrying amount of the contract asset exceeds the remaining amount of consideration that the company expects to receive towards remaining performance obligations (after deducting the costs that relate directly to fulfill such remaining performance obligations). In addition, the Company recognizes impairment loss (termed as Allowance for expected credit loss on contract assets in the financial statements) on account of credit risk in respect of a contract asset using expected credit loss model on similar basis as applicable to trade receivables.

(a) Recognition of Revenue from Contractual Projects

The company recognizes construction contract revenue over time, as performance obligations are satisfied, due to the continuous transfer of control to the customer.

Construction contracts are generally accounted for as a single unit of account (a single performance obligation). The Company adopts the output method in recognizing the revenue over time by reference to the progress

Towards complete satisfaction of the relevant performance obligation. The progress towards complete satisfaction of a relevant performance obligation is measured by reference to the surveys of work performed primarily includes certificates issued by the internal or external surveyors on the performance completed to date. The percentage-of-completion method (output method) is the most faithful depiction of the company's performance because it directly measures the value of the services transferred to the customer. Where the entity is unable to reasonably measure the percentage of completion, the revenue is recognized only up to the amount of cost incurred provided the entity expects to at least recover its cost.

(b) Other Income

The Company recognizes income under the below mentioned heads, provided that it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably.

a. Interest Income from Financial Instruments

Interest income is accrued on a time proportionate basis taking into account the principal outstanding and the effective interest rate applicable.

Interest Income on disputed revenue is recognized on realization basis.

b. Dividend Income.

There remains no dividend income for the period under consideration.

c. Others

Other items of income are accounted as and when the right to receive such income arises and it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably.

6. Inventories

- a.** Inventory of Construction raw material & stores and spares and other consumables are stated at lower of cost and net realizable value.
- b.** Works in progress are estimated at cost.
- c.** Finished goods and scraps are valued at cost or net realizable value whichever is lower.

7. Property, Plant and Equipment

(i) Recognition and measurement

Property, plant and equipment are measured at cost less accumulated depreciation and impairment losses, if any. The cost comprises purchase price, borrowing cost if capitalization criteria are met and directly attributable cost of bringing the asset to its working condition for the intended use. Any trade discount and rebates are deducted in arriving at the purchase price.

(ii) Subsequent expenditure

Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company. All other repair and maintenance costs are recognized in statement of profit and loss as incurred.

(iii) Depreciation

Depreciation on property, plant and equipment is provided on the Straight Line Method (SLM) computed on the basis of useful lives prescribed in Schedule II to the Companies Act, 2013.

(iv) De-recognition

An item of property, plant and equipment initially recognized is de-recognized upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on de-recognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is recognized in statement of profit and loss when the asset is derecognized.

8. Financial Instruments

I. Financial Assets

i) Classification

The Company classifies financial assets as subsequently measured at

- amortized cost or
- Fair value through other comprehensive income or
- Fair value through profit or loss on the basis of its business model for managing the financial assets and the contractual cash flow characteristics of the financial asset.

ii) Initial Recognition and Measurement

Financial assets are recognized when the company becomes party to a contract embodying the related financial instruments. All financial assets are initially measured at transaction values and where such values are different from the fair value, at fair value. Transaction costs that are attributable to the acquisition financial assets (other than financial assets at fair value through profit or loss) are added to the fair value of such assets on initial recognition. Transaction costs directly

attributable to the acquisition of financial assets measured at fair value through profit or loss are recognized immediately in profit or loss.

iii) **Subsequent Measurement**

For the purpose of subsequent measurement, the financial assets are classified into four categories:

- Debt Instruments at amortized cost
- Debt instruments at fair value through other comprehensive income
- Debt instruments at fair value through profit or loss
- Equity Instruments

iv) **Debt Instruments at amortized cost**

A 'debt instrument' is measured at the amortized cost if both the following conditions are met:

- The asset is held within a business model whose objective is to hold assets in order to collect contractual cash flows; and
- The contractual terms of instrument give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

After initial measurement, such financial assets are subsequently measured at amortized cost using the effective interest rate (EIR) method. Amortized cost is calculated by taking into account any discount or premium and fees or costs that are an integral part of the EIR. The EIR amortization is included in the finance income in the Statement of Profit and Loss. The Losses arising from impairment are recognized in the Statement of Profit and Loss.

v) **Debt Instruments at fair value through other comprehensive income**

Debt instruments that meet the following conditions are subsequently measured at fair value through other comprehensive income (FVTOCI) (unless the same are designated as fair value through profit or loss)

- The asset is held within a business model whose objective is achieved both by collecting contractual cash flows and selling financial assets; and
- The contractual terms of instrument give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

For debt instruments that are measured at FVTOCI, income by way of interest, dividend and exchange difference (on debt instrument) is recognized in profit or loss and changes in fair value (other than on account of such income) are recognized in Other Comprehensive Income and accumulated in other equity. On disposal of debt instruments measured at FVTOCI, the cumulative gain or loss previously accumulated in other equity is reclassified to profit or loss.

vi) **Debt Instruments at fair value profit or loss**

Debt instruments included within the fair value through profit and loss (FVTPL) category are measured at fair value with all changes recognized in the Statement of Profit and Loss.

vii) **Equity Instruments**

All equity instruments including investment in subsidiaries are measured at fair value. Equity instruments which are held for trading are classified as at Fair Value through Profit and Loss (FVTPL). For all other equity instruments, the Company has decided to classify the same at FVTOCI. The classification is made on the initial recognition and is irrevocable.

viii) **De-recognition**

A financial asset (or, where applicable, a part of a financial asset) is primarily de-recognized when:

- The rights to receive cash flows from the asset have expired, or
- The Company has transferred substantially all the risks and rewards of the asset, or
- The Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred the control of the asset.

II. **Financial Liabilities**

i) **Classification**

The Company classifies all financial liabilities as subsequently measured at amortized cost.

ii) **Initial Recognition and measurement**

Financial liabilities are recognized when the company becomes party to a contract embodying the related financial instruments. All financial liabilities are initially measured at transaction values and where such values are different from the fair value, at fair value. Transaction costs that are attributable to the issue of financial liabilities are deducted from the fair value of such assets on initial recognition.

iii) **Loans and Borrowings**

After initial recognition, interest -bearing loans and borrowings are subsequently measured at amortized cost using Effective Interest Rate (EIR) method. Gains and losses are recognized in the Statement of Profit and Loss when the liabilities are derecognized. Amortized cost is calculated by taking into account any discount or premium on acquisition and transaction costs. The EIR amortization is included as finance costs in the Statement of Profit and Loss. This category generally applies to loans and borrowings.

iv) **De-recognition**

A financial liability is de-recognized when the related obligation expires or is discharged or cancelled. When an existing financial liability is

replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the de-recognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognized in Profit and Loss for the year.

9. Income Taxes

Income tax expense represents the sum of the tax currently payable and deferred tax. Current and deferred tax are recognized in profit or loss, except when they relate to items that are recognized in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognized in other comprehensive income or directly in equity respectively.

Current tax: Current tax is determined on taxable profits for the year chargeable to tax in accordance with the applicable tax rates and the provisions of the Income Tax Act, 1961 including other applicable tax laws that have been enacted or substantively enacted.

Deferred tax: Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognized for all taxable temporary differences. Deferred tax assets are generally recognized for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized. Such deferred tax assets and liabilities are not recognized if the temporary difference arises from the initial recognition (other than in a business combination) of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

Deferred tax asset is recognized for the carry forward of unused tax losses and unused tax credits to the extent that it is probable that future taxable profit will be available against which the unused tax losses and unused tax credits can be utilized.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset is realized, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

10. Cash and Cash Equivalents

Cash and cash equivalents in the Balance Sheet comprise cash at banks and on hand.

11. Earnings per share

Basic earnings per share is calculated by dividing the net profit or loss for the period attributable to equity shareholders (after deducting attributable taxes) by the weighted average number of equity shares outstanding during the period. The weighted average number of equity shares outstanding during the period is adjusted for events including a bonus issue.

For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity share holders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

12. Provisions, contingent liabilities and contingent assets

These estimates are reviewed at each reporting date and adjusted to reflect the current best estimates. Provisions are discounted to their present values, where the time value of money is material.

Contingent liability is disclosed for:

- Possible obligations which will be confirmed only by future events not wholly within the control of the Company or
- Present obligations arising from past events where it is not probable that an outflow of resources will be required to settle the obligation or a reliable estimate of the amount of the obligation cannot be made.

Contingent assets are neither recognized nor disclosed. However, when realization of income is virtually certain, related asset is recognized.

13. **Borrowing Costs**

Borrowing costs net of any investment income from the temporary investment of related borrowings that are attributable to the acquisition, construction or production of a qualifying asset are capitalized as part of cost of such asset till such time the asset is ready for its intended use or sale. A qualifying asset is an asset that necessarily requires a substantial period of time to get ready for its intended use or sale. All other borrowing costs are recognized in profit or loss in the period in which they are incurred.

Fractional Entitlements

As the current lot size comprises of [•] Shares, it is our endeavor to ensure that the RE lots as well as the allotment of rights shares shall be in tradable lots (no odd lots). Hence the Rights Entitlements will be credited to the shareholders in multiples of [•] Shares and the participation by shareholders in the Rights Issue will also be in multiples of [•] Shares. Entitlements that are not in the multiple of [•] Shares will be treated as fractional entitlements. Such fractional entitlements will not be credited to the Shareholders' accounts and the option of trading of fractional entitlements will also not be allowed by the Stock Exchanges. Accordingly, off-line transfers will not be permitted.

For ease of reference and understanding, considering that the ratio of one Lot for every eight Lots held by the Eligible Shareholders will be offered on a rights basis, the detailed description of the fractional entitlement and the basis of allotment are provided below:

The Shares are being offered on a rights basis to existing Eligible Shareholders in the ratio of one Lot for every eight Lots held as on the Record Date. Fractional entitlements of the Rights Entitlement will be credited to a suspense account. Accordingly, if the holding of any of the Eligible Shareholders is less than eight Lots or is not in the multiple of eight Lots, the fractional entitlements of such Eligible Shareholders shall be ignored.

However, the Eligible Shareholders whose fractional entitlements are being ignored, will be given preferential consideration for the Allotment of one additional lot if they apply for additional Lot in the Issue over and above their Rights Entitlements, if any, subject to availability of lots in this Issue post allocation towards Rights Entitlements applied for.

For example, if an Eligible Shareholder holds nine Lots, such Shareholder will be entitled to one Lot and will also be given a preferential consideration for the Allotment of one additional Lot, if such Eligible Shareholder has applied for additional Lots in the Issue, over and above his/her Rights Entitlements, subject to availability of lots in this Issue post allocation towards Rights Entitlements applied for.

Further, the Eligible Shareholders holding less than eight Lots (being, one, two, three, four, five, six or seven Lot(s)) shall have 'zero' entitlement for the lots. Such Eligible Shareholders are entitled to apply for additional lots in the Issue and will be given preference in the Allotment of one Lot, if such Eligible Shareholders apply for additional lots in the Issue, subject to availability of lots in this Issue post allocation. Allotment to those Eligible Shareholders holding fractional entitlement will be given preference basis their fractional holding, provided there is an undersubscribed portion.

For example, fractional entitlement shareholder holding seven Lots will get preference for allotment of one Lot over those holding six, five, four, three, two or one Lot(s).

For off-market transfers, investors are advised to transfer Shares in multiple of [•] Shares only.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991, of the Government of India and FEMA. While the Industrial Policy, 1991, of the Government of India, prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. The Union Cabinet, as provided in the Cabinet Press Release dated May 24, 2017, has given its approval for phasing out the FIPB. Under the Industrial Policy, 1991, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. Accordingly, the process for foreign direct investment ("FDI") and approval from the Government of India will now be handled by the concerned ministries or departments, in consultation with the Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (formerly known as the Department of Industrial Policy and Promotion) ("DPIIT"), Ministry of Finance, Department of Economic Affairs, FIPB section, through a memorandum dated June 5, 2017, has notified the specific ministries handling relevant sectors.

The Government has, from time to time, made policy pronouncements on FDI through press notes and press releases. The DPIIT issued the Consolidated FDI Policy Circular of 2020 ("FDI Circular 2020"), which, with effect from October 15, 2020, consolidated and superseded all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect as on October 15, 2020. The Government proposes to update the consolidated circular on FDI policy once every year and therefore, FDI Circular 2020 will be valid until the DPIIT issues an updated circular.

The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases which are notified by RBI as amendments to FEMA. In case of any conflict, the relevant notification under Foreign Exchange Management (Non-Debt Instruments) Rules, 2019 will prevail. The payment of inward remittance and reporting requirements are stipulated under the Foreign Exchange Management (Mode of Payment and Reporting of Non-Debt Instruments) Regulations, 2019 issued by RBI. The FDI Circular 2020, issued by the DPIIT, consolidates the policy framework in place as on October 15, 2020, and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect as on October 15, 2020.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of RBI, provided that (i) the activities of the investee company falls under the automatic route as provided in the FDI Policy and FEMA and transfer does not attract the provisions of the Takeover Regulations; (ii) the non-resident shareholding is within the sectorial limits under the FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI and RBI.

No investment under the FDI route (i.e. any investment which would result in the investor holding 10% or more of the fully diluted paid-up equity share capital of the Company or any FDI investment for which an approval from the government was taken in the past) will be allowed in the Issue unless such application is accompanied with necessary approval or covered under a pre-existing approval from the government. It will be the sole responsibility of the investors to ensure that the necessary approval or the pre-existing approval from the government is valid in order to make any investment in the Issue. Our Company will not be responsible for any allotments made by relying on such approvals.

Please also note that pursuant to Circular no. 14 dated September 16, 2003 issued by RBI, Overseas Corporate Bodies ("OCBs") have been derecognized as an eligible class of investors and RBI has subsequently issued the Foreign Exchange Management (Withdrawal of General Permission to Overseas Corporate Bodies (OCBs)) Regulations, 2003. Any Investor being an OCB is required not to be under the adverse notice of RBI and in order to apply for this issue as a incorporated non-resident must do so in accordance with the FDI Circular 2020 and Foreign Exchange Management (Non-Debt Instrument) Rules, 2019. Further, while investing in the Issue, the Investors are deemed to have obtained the necessary approvals, as required, under applicable laws and the obligation to obtain such approvals shall be upon the Investors. Our Company shall not be under an obligation to obtain any approval under any of the

applicable laws on behalf of the Investors and shall not be liable in case of failure on part of the Investors to obtain such approvals.
