For more information, regarding our contingent liabilities, please refer chapter titled “Financial Information of the Company” beginning on page 131 of this Draft Prospectus.

3. Increase in the prices of our raw material may have an adverse effect on our business.

We are primarily engaged in the business of Manufacturing of Biscuits, Edible Oils, Vanaspati and Bengali Specialty Products. In addition to this, our company is also trading Crude Linseed Oil, Soyabean Meal etc.

Our key raw materials include refined flour, sugar, palm oil, edible oil, spices, and other additives etc. An increase in the price of the raw materials may increase our manufacturing expenses resulting in the overall cost of our products. The increase in the cost of our manufactured products may not be acceptable to the existing customers and this may lead to losing our customer base in the hands of the big players who achieve the economies of scale even with the increase in the cost of raw materials. This may lead to an adverse financial impact on the revenue from operations of the Company.

If we cannot fully offset increases in raw material and component prices with increases in the prices for our products, we will experience lower margins, which will have a material adverse effect on our results of operations and financial condition. In the absence of any long-term contracts we are also exposed to the risk of unavailability of certain raw materials and components in desired quantities and qualities, in a timely manner or at all.

4. *Our inability to expand or effectively manage our growing distribution network may have an adverse effect on our business, results of operations and financial condition.*

We have an extensive sales and distribution network, that covered, spread across West Bengal, Bihar, Assam, Odisha, Jharkhand, Punjab, Haryana, Delhi, Rajasthan, Uttar Pradesh, Madhya Pradesh, Chhattisgarh, Gujarat, Maharashtra, Karnataka, Tamil Nadu, Telangana and Andhra Pradesh in India. We continuously seek to increase the penetration of our products by appointing new distributors and retailers targeted at different customer groups. We cannot assure you that we will be able to successfully identify or appoint new distributors and retailers or effectively manage our existing network.

We also sell our products through online platforms such as Flipkart, Big Basket, Reliance Retail, JioMart, etc.

Also, we have not entered into any long-term agreements with these distributors or E-Commerce retail service providers. If the terms offered to such distributors and retailers by our competitors are more favourable than those offered by us, distributors and retailers may decline to distribute our products and terminate their arrangements with us. We may be unable to appoint replacement distributors in a timely fashion, or at all, which may reduce our sales volumes and adversely affect our business, results of operations and financial condition.

5. *We rely significantly on some suppliers for the supply of our raw materials. If these suppliers are unable or unwilling to supply raw materials on time or otherwise fail to meet our requirements, our business will be harmed. An inability to procure the desired quality, quantity of our raw materials and components in a timely manner and at reasonable costs, or at all, may have a material adverse effect on our business, results of operations and financial condition*

We do not have any long-term contracts with our suppliers with any commitment to supply products to us. If our suppliers are unable to supply our products in sufficient quantities and on a consistent basis, we may not be able to sell our products to our customers in a timely manner. If we were to experience a supply disruption, it could take an extended period of time to find and qualify an alternate vendor. In the event that our major suppliers were to become unable or unwilling to continue to provide the raw materials in our required volumes, we would need to identify and obtain acceptable replacement sources on a timely basis. There is no guarantee that we would be able to obtain such alternative sources of supply on a timely basis, if at all. Our Company may experience significant business disruption if we are unable to secure necessary raw materials from our suppliers or suffer reduction in efficiency, the revenue from operations of the Company will get severely affected.

6. *We are also dependent on exports for sale of our products. Consequently, we are exposed to foreign currency fluctuations risks which may have an adverse effect on our business, result of operations and financial condition.*

While a substantial portion of our revenues is from Domestic sales, and we expect in future will be, denominated in Rupees, we are also exposed to foreign exchange rate risk on export of our manufactured products. Over dependence on exports may adversely affect our profitability in case the trade relations of India with any of these countries get strained in the future or these countries face any sort of problems due to internal issues of their countries. Also, the exchange rate between the Indian Rupee and currencies of the export countries may fluctuate and adversely affect our results of operations. The exchange rate between the Indian Rupee and foreign currencies has fluctuated significantly in recent years and may continue to fluctuate in the future. Any significant appreciation of the Indian Rupee against foreign currencies in which we do business can fundamentally affect our competitiveness in the long term.

7. *We do not own the premises in which our Registered Office, Corporate office and manufacturing facility are located and the same are on lease and Rent arrangement. Any termination of such lease/rent and/or non-renewal thereof and attachment by Property Owner could adversely affect our operations.*

Our manufacturing facilities are located at:

a. Manufacturing Unit: Survey Plot No. A-2 & A-9, J.L. No. 30, P.S. Raniganj at Industrial Complex, Mangalpur, Raniganj.

b. Registered Office: Flat No. 2D, 2nd Floor at Premises No. 3, Pretoria Street, Kolkata – 700 071.

c. Packaging unit of Bengali Specialty products: Flat No. 2A, 2nd Floor and Flat No. 1D, 1st Floor at Premises No. 3, Pretoria Street, Kolkata – 700 071

The manufacturing facility is not owned by Company. It has been taken on lease for 60 years from Asansol Durgapur Development Authority vide lease deed dated February 28, 1995. The Registered Office of the Company and the Packaging unit of Bengali Specialty products has been taken on Rent basis (renewable in every 5 years) for a maximum

period of 15 years from a group company named Ambo Exports Industries Limited vide Rent Agreement dated April, 1, 2014 and April 1, 2015. Unless it is renewed, upon termination of the lease/rent, we are required to return the premises of our manufacturing facility and other premises to the Lessor/Owner. There can be no assurance that the term of the agreements will be renewed on commercially acceptable terms and in the event the Lessor/Owner terminates or does not renew the agreements, we are required to vacate premises of our facilities. Such a situation could result in time overruns and may adversely affect our operations temporarily.

8. *Our Company has not entered into any fixed contracts with its customers (both Indian and Foreign) and we typically operate on the basis of orders received on hand. Inability to maintain regular order flow would adversely impact our revenues and profitability*

We have not entered into any fixed contracts with our Indian and Foreign customers and we cater to them on an order-by-order basis. As a result, our customers can terminate their relationships with us without any notice and, without consequence, which could materially and adversely impact our business. Consequently, our revenue may be subject to variability because of fluctuations in demand for our products. Our Company's customers have no obligation to place order with us and may either cancel, reduce or delay orders. The orders placed by our Company's customers are dependent on factors such as the customer satisfaction with the Products that our Company provides, quality consistency, fluctuation in demand for our Company's products and customer's inventory management.

Although we place a strong emphasis on quality, pricing and timely delivery of our products such as feedback on the trends in their market, personal interaction by the top management with the customers, etc., in the absence of contracts, any sudden change in the buying pattern of buyers could adversely affect the business and the profitability of our Company.

9. *Our success depends on stable and reliable logistics and transportation infrastructure. Disruption of logistics and transportation services could impair our ability to deliver our products to our customers and/ or increase our transportation costs, which may adversely affect our operations:*

We utilize third party transportation services (including for imports & exports) by road and railways for procurement of raw materials and supply of our products and from/ to our suppliers and customers. Transportation by road as well as by railways involves risks, including, collision, grounding, storm, fire, explosion, lightning, political instability, availability of transportation for our imports and operating restrictions/ lockdown consequent to outbreak of infectious diseases, such as the COVID-19 pandemic. Any delay or disruption caused to the transportation of materials could adversely impact our ability to procure the materials as well as to meet the delivery schedule of the customers in an economical manner. To ensure timely delivery of our products, we may also be required to maintain relatively high level of inventory of our products and this may also resultantly increase our cost.

In addition, any compensation received from insurers or third-party transportation providers may be insufficient to cover the cost of any delays and will not repair damage to our relationships with our affected customers. We may also be affected by an increase in fuel costs, as it will have a corresponding impact on transportation charges levied by our third-party transportation providers. This could require us to expend considerable resources in addressing our distribution requirements, including by way of absorbing these excess transportation charges to maintain our selling price, which could adversely affect our results of operations, or passing these charges on to our customers, which could adversely affect demand for our products.

10. *Any reduction in the demand for our products could lead to under utilisation of our manufacturing capacity.*

We face the risk that our customers might not place any order or might even cancel existing orders. Cancellations, of orders by our customers could adversely affect our results of operations by reducing our sales volume leading to a reduced utilization of our existing manufacturing capacity. Further, we make significant decisions, including determining the levels of business that we will seek and accept, production schedules, personnel requirements and other resource requirements, based on our estimates of customer orders. The changes in demand of our products could reduce our ability to estimate accurately future customer requirements, make it difficult to schedule production and lead to over production and utilization of our manufacturing capacity for a particular product. The requirements of our customers are not restricted to one type of product and therefore variations in demand for certain types of products also requires us to make customizations. This may lead to over production of certain products and under production of some other products resulting in a complete mismatch of capacity and capacity utilization. Any such mismatch leading to over or under utilization of our manufacturing facilities could adversely affect our business, results of operations, financial condition and cash flows.

- 11. A certain amount of our revenue is generated from certain key customers, and the loss of one or more such customers, the deterioration of their financial condition or prospects, or a reduction in their demand for our products could adversely affect our business, results of operations, financial condition and cash flows.**

A portion of the Company's revenues has been dependent upon a few customers. For instance, the top ten customers accounted for 62.97%, 55.43% and 64.40% of its revenue from operations for Fiscal 2020, Fiscal 2021 and Fiscal 2022 respectively. There can be no assurance that our significant customers in the past will continue to place similar orders with us in the future. A significant decrease in business from any such key customer, whether due to circumstances specific to such customer or adverse market conditions affecting the industry or the economic environment generally, such as the COVID-19 pandemic, may materially and adversely affect our business, results of operations and financial condition.

Our reliance on a select group of customers may also constrain our ability to negotiate our arrangements, which may have an impact on our profit margins and financial performance. The deterioration of the financial condition or business prospects of these customers could reduce their requirement of our products and result in a significant decrease in the revenues we derive from these customers. We cannot assure you that we will be able to maintain historic levels of business from our significant customers, or that we will be able to significantly reduce customer concentration in the future. In addition, our revenues may be adversely affected if there is an adverse change in any of our customers supply chain strategies or a reduction in their outsourcing of products we offer, or if our customers decide to choose our competitors over us or if there is a significant reduction in the volume of our business with such customers. The loss of one or more of our significant customers or a reduction in the amount of business we obtain from them could have an adverse effect on our business, results of operations, financial condition and cash flows.

Further, to sustain or increase our revenue, we must add new customers and encourage existing customers to allocate a greater portion of their marketing spend to us. As our industry matures and competitors introduce lower cost or differentiated products or services, our ability to sell our goods could be impaired.

- 12. The company's business is dependent on certain suppliers and the loss of one or more of them would have a material adverse effect on the business.**

A substantial portion of the company's purchases has been dependent upon a few suppliers. For instance, its top ten suppliers accounted for 86.78%, 82.23% and 77.23% of its total purchase for Fiscal 2020, Fiscal 2021 and Fiscal 2022 respectively. The Company have not entered into long term agreements with the suppliers and the success of the business is accordingly dependent on maintaining good relationships with the various suppliers for regular supply of raw material required. The inability of a supplier to meet these requirements, the loss of a significant supplier, or any labour issues or work stoppages at a significant supplier could disrupt the supply of raw materials and parts to production facilities, preventing the Company from delivering to its customers, or cause returns of products, which may have an adverse effect on business, results of operations and financial condition of the company.

- 13. The availability of look-alikes, counterfeit products, primarily in our domestic and foreign markets, manufactured by other companies and passed off as our products, could adversely affect our goodwill and results of operations.**

We are exposed to the risk that certain entities in India and Foreign Countries where our products are marketed, could pass off their products as ours to create look alike and counterfeit products. For example, certain entities could create spurious and pirated products. The measures we take to protect our brands and other intellectual property include relying on Indian and International laws and initiating legal proceedings, may not be adequate to prevent unauthorised use of them by third parties. Furthermore, the application of laws governing intellectual property rights in India is uncertain and evolving and could involve substantial risks to us. Detecting and protecting against the unauthorised use of our products, technology and proprietary rights is expensive, difficult and, in some cases, impossible. The proliferation of unauthorised copies of our products, and the time lost in defending claims and complaints about spurious products could decrease the revenue we receive from our products and have a material adverse effect on our reputation, business, financial condition and results of operations.

- 14. The improper handling, processing or storage of our products or raw materials, or spoilage of and damage to such products or raw materials, or any real or perceived contamination in our products or raw materials, could subject us to regulatory action, damage our reputation and have an adverse effect on our business, results of operations and financial condition.**

Our products and raw materials are subject to risks such as contamination, adulteration, product labelling error and product tampering during their manufacture, transport or storage. Although our products are teste extensively at our facilities, we cannot assure you that the quality tests conducted by us will be accurate at all times. Any shortcoming in the production or storage of our products due to negligence, human error or otherwise, may damage our products and result in non-compliance with applicable regulatory standards. Any actual or alleged contamination of our products or raw materials

could damage our reputation, adversely affect our sales and result in legal proceedings being initiated against us, irrespective of whether such allegations have any factual basis. However, our Company has not faced any instance of spoilage of and damage to such products or raw materials, or any real or perceived contamination in our products or raw materials which had material impact on the financial and result of operations of our Company. Any allegation relating to, or the discovery of, unauthorised contaminants in our products or raw materials processed by us, which causes or is alleged to cause injury or illness, allegations that our products were mislabelled, were not produced in accordance with our customer's specifications and/or have not performed adequately, even where food safety or other product safety is not a concern could damage our reputation, adversely affect our sales and may cause product liability or other legal proceedings being initiated against us by our customers, irrespective of whether such allegations have any factual basis. We may also be subject to regulatory action and mandatory product recalls. We cannot assure you that we will not be subject to such product liability claims in the future, whether or not legitimate, or product recalls, whether voluntary or mandatory. Defending such claims or regulatory action could be time-consuming and may also result in unexpected expenditures, and our reputation, business, financial condition, cash flows and results of operations may be adversely affected.

15. *Our inability to manage our inventory and foresee accurate demand for our products for a future period may adversely affect our reputation, business, results of operation and our financial performance.*

The estimations on demands of our products are typically based on our projections, inventory levels at our distribution networks, our understanding of the anticipation of consumption and spending by our consumers. If we overestimate demand for our products, we may face difficulty on storage of such products due to lower shelf life and complications with respect to storage of perishable products. Further, if we are unable to provide our products to our consumers due to any disruptions of our manufacturing facilities or shortage of raw materials, we may incur the risk of customers choosing other products over our products. While we closely monitor our inventory requirements for our product, we may be exposed to various risks including the aforementioned risks. All of these factors could adversely affect our reputation, business, results of operation and our financial performance.

16. *Our operations are subject to high working capital requirements. If we are unable to generate sufficient cash flows to allow us to make required payments, there may be an adverse effect on our results of operations.*

Our business requires significant amount of working capital and major portion of our working capital is utilized towards debtors, inventories, and cash and cash equivalents. We have been sanctioned financing facilities from the Axis Bank (including Term Loan, Cash Credit and Current maturities of Long-Term Borrowings etc.). Our inability to maintain sufficient cash flow, credit facility and other sources of funding, in a timely manner, or at all, to meet the requirement of working capital or pay out debts, could adversely affect our financial condition and result of our operations. Further, we have high outstanding amount due from our debtors which may result in a high risk in case of non-payment by these debtors. In case of any such defaults from our debtors, it may affect our business operations and financials.

Further, any failure to meet these conditions or obtain these consents could have significant consequences on our business and operations. These covenants vary depending on the requirements of the Banks/financial institutions extending such loan and the conditions negotiated under each financing agreement. Some of the corporate actions that require prior consents from certain lenders include, amongst others, (a) to undertake any new projects scheme unless expenditure on such expansion is covered by the Company's net cash accruals, (b) permit or effect any direct or indirect change in the legal or beneficial ownership or control, (c) Change in our Company's Memorandum or Articles of Association and composition and constitution and (d) effect any material change in the management of the business of our Company.

While we have received all relevant consents required for the purposes of this Offer and have complied with these covenants, a failure to comply with such covenants in the future may restrict or delay certain actions or initiatives that we may propose to take from time to time. While we have not defaulted on any covenants in financing agreements in the past, we cannot assure you that this will continue to be the case in the future. A failure to observe the covenants under our financing arrangements or to obtain necessary consents/ waivers, constitute defaults under the relevant financing agreements and will entitle the respective lenders to declare a default against us and enforce remedies under the terms of the financing agreements, that include, among others, acceleration of amounts due under such facilities, enforcement of any security interest created under the financing agreements and taking possession of the assets given as security in respect of the financing agreements. In addition, during any period in which we are in default, we may be unable to raise, or face difficulties raising, further financing. For further information on our borrowings, see "Financial Indebtedness" on page 158.

17. *Our presence in foreign market subject us to various business, economic, political, regulatory and legal risk.*

Our revenue from operations comprises both of export sales and domestic sales. We export our products mainly in Bangladesh and Bhutan. Our Foreign customers, which we believe have a large Indian diaspora and / or a population with similar tastes and preferences as the audience in India. For further details, see chapter titled "Our Business" on page 83.

Our Foreign operations are subject to inherent risks, including, but not limited to:

- difficulties in establishing brand recognition;
- uncertainties in cooperation with new local business partners, including distributors, logistics and transportation partners;
- exposure to tariffs, duties or other government costs and actions arising from trade restrictions;
- increased costs related to marketing our products;
- longer accounts receivable collection periods and greater difficulty in accounts receivable collection due to lower bargaining power in a less familiar market;
- potential foreign exchange and repatriation controls on foreign earnings, exchange rate fluctuations and currency conversion restrictions;
- the burden of complying with a variety of foreign laws, including delays or difficulties in obtaining government approvals and permits, import and export licenses, and regulations and unexpected changes in the legal and regulatory environment, including changes to import and export regulations;
- increases in distribution and transportation costs;
- uncertainty regarding liability for products;
- difficulties and costs of staffing and managing multiple multinational operations;
- reduced protection for intellectual property rights in some jurisdictions, at a reasonable cost or at all;
- potentially adverse tax consequences, including tax consequences which may arise in connection with intercompany pricing for transactions between separate legal entities within a group operating in different tax jurisdictions;
- challenges caused by distance, language and cultural differences, and by commencing business relationship with foreign partners, foreign agencies and governments; and
- political and economic instability including potential for political unrest, war or acts of terrorism in countries in which we operate.

We may be unsuccessful in developing and implementing policies and strategies that will be effective in managing these risks in each country where we plan to do business. Our failure to manage these risks successfully could adversely affect our business, operating results and financial condition. Further, we may face competition in other countries from companies that have more experience with operations in such countries or with international operations generally. We may not be able to compete with such companies if we are unable to offer competitive products at better price points which appeal to consumers in such markets. If we are unable to successfully build our brand reputation and revenues in our target overseas markets, it may limit our ability to grow our business.

18. *Our inability to collect receivables and default in payment from our customers could result in the reduction of our profits and affect our cash flows.*

Our operations involve extending credit for extended periods of time to our dealers and distributors in respect of our products, and consequently, we face the risk of non-receipt of these outstanding amounts in a timely manner or at all, particularly in the absence of long-term arrangements with dealers and distributors. Our credit terms vary from 0 days to 30 days for our dealers and distributors. Our inability to collect receivables from our dealers and distributors in a timely manner or at all in future, could adversely affect our working capital cycle and cash flows. If we are unable to collect receivables or if the provisions for doubtful receivables are inadequate, it could have a material adverse effect on our business, financial condition and results of operations.

Macroeconomic conditions could also result in financial difficulties, including insolvency or bankruptcy, for our customers and dealers, and as a result could cause dealers to delay payments to us, request modifications to their payment arrangements, that could increase our receivables or affect our working capital requirements, or default on their payment obligations to us. An increase in bad debts or in defaults by our dealers may compel us to utilize greater amounts of our operating working capital and result in increased interest costs, thereby adversely affecting our results of operations and cash flows.

19. *We are subject to certain government regulation and if we fail to obtain, maintain or renew our statutory and regulatory licenses, permits and approvals required to operate our business, our business and results of operations may be adversely affected.*

Our operations are subject to certain government regulation and we are required to obtain and maintain a number of statutory and regulatory permits and approvals under central, state and local government rules in India such as FSSAI License, Factory License, Fire license, license under Export-Import Code, Consent to operate from pollution control board etc., generally for carrying out our business. For details of approvals relating to our business and operations, see “Government and Other Approvals” on page 170. Some of these approvals are granted for a limited duration and require

renewal. Further, while we have applied for some of these approvals, we cannot assure you that such approvals will be issued or granted to us in a timely manner, or at all. We cannot assure you that we will be able to obtain such consent in a timely manner. If we do not receive such approvals or are not able to renew the approvals in a timely manner, our business and operations may be adversely affected. The approvals required by our Company are subject to numerous conditions and we cannot assure you that these would not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. If there is any failure by us to comply with the applicable regulations or if the regulations governing our business are amended, we may incur increased costs, be subject to penalties, have our approvals and permits revoked or suffer a disruption in our operations, any of which could adversely affect our business.

- 20. *We operate in an industry with several competitors, including large and established ones, and we may fail to compete successfully against existing or new competitors, which may reduce the demand for our products and services which may lead to reduced prices, operating margins, profits and further result in loss of market share across product categories.***

We operate in an industry with several competitors, and face competition from domestic and international competitors in the markets in which we operate. Our competitors include foreign brands, emerging Indian brands, as well as several small. We believe that we are able to remain competitive across the product categories that we offer.

It is possible that some of our existing and potential competitors may have greater brand recognition in India or globally, longer operating histories, greater financial, research, distribution and technological resources, product development, sales and marketing, more experienced management, access to a cheaper cost of capital and other resources than we do. Some of our competitors may have lower costs, or be able to offer lower prices and a larger variety of products in order to gain market share. If market prices are substantially reduced by our competitors in the respective markets, our business in those markets could be adversely affected. Our competitors may also make acquisitions or establish cooperative or other strategic relationships, among themselves or with third parties, including dealers and distributors of our products, thereby increasing their ability to address the needs of our targeted customers and offering lower cost products and services than we do which may have a negative effect on our sales. Further, new competitors may emerge at any time. Further, some of our competitors may have the ability to devote greater resources to the marketing, advertising and product endorsement. As a result, these competitors may be better equipped to influence consumer preferences or otherwise increase their market share. Increased competition could result in, among other things, a slowdown in the growth of our corporate customers, a loss of our market share, price reductions, reduced demand for our products, reductions in revenues and reduced margins and profitability.

- 21. *Our Company requires significant amount of working capital for continues growth. Our inability to meet our working capital requirements may have an adverse effect on our results of operations.***

Our business requires a substantial amount of working capital, primarily to increase the manufacturing capacity. Moreover, we may need working capital for the manufacturing and expansion of our business. Further, we are also required to meet the increasing demand and for achieving the same, adequate stocks have to be maintained which requires sufficient working capital. In the event, we are unable to source the required amount of working capital for addressing increased demand of our products, we might not be able to efficiently satisfy the demand of our customers. Even if we are able to source the required amount of funds, we cannot assure you that such funds would be sufficient to meet our cost estimates and that any increase in the expenses will not affect the price of our products. Further, if we decide to raise additional funds through the incurrence of debt, our interest and debt repayment obligations will increase, and could have a significant effect on our profitability and cash flows and we may be subject to additional covenants, which could limit our ability to access cash flows from operations. Any issuance of equity, on the other hand, could result in a dilution of your shareholding. Accordingly, continued increases in our working capital requirements may have an adverse effect on our financial condition and results of operations.

Our inability to obtain or maintain sufficient cash flow, credit facilities and other sources of funding, in a timely manner, or at all, to meet our working capital requirements or to pay our debts, could adversely affect our financial condition and results of operations.

- 22. *Our business is dependent on developing and maintaining continuing relationships with our distributors or customers. The loss of any significant distributor or customer could have a material adverse effect on our business, financial condition and results of operations.***

Our business is dependent on developing and maintaining a continuing relationship with our distributors and customers. In the event of a significant decline in the demand for our products by our key distributor or customer, our business, results of operations and financial condition may be materially and adversely affected. There can be no assurance that we will be

able to maintain the historic levels of business from these distributors and customers or that we will be able to replace these clients in case we lose any of them.

- 23. Our Company has experienced negative cash flow from operating activities in prior periods and may continue to do so in the future, which could have a material adverse effect on our business, prospects, financial condition, cash flows and results of operations.**

Our Company has experienced negative net cash flows from operating activities in the past, the details of which are provided below:

Particulars	<i>(Amount in Lacs)</i>		
	Fiscal 2022	Fiscal 2021	Fiscal 2020
Net cash generated from operating activities	79.08	(50.68)	135.40
Net cash used in investing activities	(2.70)	(5.81)	(18.47)
Net cash used in financing activities	(72.69)	42.09	(131.47)
Net (decrease)/ increase in cash and cash equivalents	3.69	(14.40)	(14.54)

For details on the negative cash flows for the last three Fiscals, please refer to the chapter titled “*Management Discussion and Analysis of Financial Condition and Result of Operations*” on page 160. We may incur negative cash flows in the future which may have a material adverse effect on our business, prospects, results of operations and financial condition.

- 24. The success of our business strategy depends on our ability to enhance our own brands and product portfolio. If we fail to maintain and enhance our brand and reputation, consumers’ recognition of our brands, and trust in us, our business may be materially and adversely affected.**

Our brand and reputation are among our most important assets and we believe our brands serve in attracting consumers to our products in preference over those of our competitors. Enhancing our own brands, including various schemes, direct marketing is one of our most important business strategies. Consumers in existing or new markets may be unfamiliar with our brand and products and we may need to build or increase brand awareness in the relevant markets by increasing investments in advertising and promotional activities than we originally planned. We face, and will continue to face, competition with established brands in the new markets we intend to enter. We have incurred, and may continue to incur in the future, significant expenditures for advertising and marketing campaigns in an effort to build brand awareness and achieve preference over competing products. We may not be successful in our efforts to expand our brand presence and we cannot guarantee that our advertising and marketing campaigns will result in customer or consumer acceptance of our brands. Our success in marketing our products also depend on our ability to adapt to a rapidly changing market environment. If we do not successfully maintain, extend and expand our reputation and brand image, then our brands, product sales, financial condition, future cash flows and results of operations could be materially and adversely affected.

- 25. A shortage or non-availability of electricity or water may adversely affect our manufacturing operations and have an adverse effect on our business, results of operations and financial condition.**

Our manufacturing operations require a significant amount and continuous supply of electricity and water and any shortage or non-availability may adversely affect our operations. The production process of certain products, as well as the storage of our products at particular temperatures requires significant power. We currently source our water requirements from municipal corporation and water tankers and depend on state electricity supply for our energy requirements. Any failure on our part to obtain alternate sources of electricity or water, in a timely fashion, and at an acceptable cost, may have an adverse effect on our business, results of operations and financial condition.

- 26. Our Company’s insurance coverage to protect us against all material hazards which may result in disruptions of operations/monetary loss on account of stoppage of work may not be sufficient.**

Our Company has insured itself against some business or operational risks. But we cannot assure you that these would be sufficient to protect us against all material hazards which may result in disruptions of operations/monetary loss on account of stoppage of work. Any excess loss would have to be borne by us and our results of operations, cash flows and financial performance could be adversely affected.

- 27. Our actual results could differ from the estimates and projections used to prepare our financial statements.**

The estimates and projections are based on and reflect our current expectations, assumptions and/ or projections as well as our perception of historical trends and current conditions, as well as other factors that we believe are appropriate and reasonable under the circumstances. There can be no assurance that our expectations, estimates, assumptions and/or projections, including with respect to the future earnings and performance will prove to be correct or that any of our expectations, estimates or projections will be achieved.

- 28. *Our Company's manufacturing activities are labour intensive and depend on availability of skilled and unskilled labourers in large numbers. In case of unavailability of such labourers and / or inability to retain such personnel, our business operations could be affected.***

The manufacturing process requires daily wage labour. Thus, being labour intensive, we are dependent on labour force for carrying out manufacturing activities. Our Company has employed 83 employees as on August 31, 2022, which consists of employees all of whom are on payroll. The above includes employees in the Top and middle management and also employees who are part of manufacturing unit and office staff. It doesn't include contracted skilled and unskilled labour at our factory. Our operations and performance are labour intensive and depends on our ability to identify, attract and retain both skilled and unskilled labour. Shortage of skilled/ unskilled personnel or work stoppages caused by disagreements with labour could have an adverse effect on our business and results of operations. We have not experienced any major disruptions in our business operations due to disputes or other problems with our work force in the past; however, there can be no assurance that we will not experience such disruptions in the future. Such disruptions may adversely affect our business and results of operations and may also divert the management's attention and result in increased costs.

- 29. *We have entered into certain related party transactions and may continue to do so.***

We have entered into related party transactions with our Promoters, its group members/ entities, Directors and other associates. While we believe that all such transactions have been conducted on arm's length basis, however it is difficult to ascertain whether more favourable terms would have been achieved had such transactions been entered with unrelated parties. Furthermore, it is likely that we will continue to enter into related party transactions in the near future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operation. For further details regarding the related party transactions, see the disclosure on related party transactions contained in the financial statements included in this Draft Prospectus and, also see the section "Related Party Transactions" on page no. 157 of this Draft Prospectus.

- 30. *If we are unable to raise additional capital, our business prospects could be adversely affected.***

We intend to fund our development plans through our cash on hand, cash flow from operations and from the Net Proceeds. We will continue to incur significant expenditure in maintaining and growing our existing infrastructure. We cannot assure you that we will have sufficient capital resources for our current operations or any future expansion plans that we may have. While we expect our cash on hand and cash flow from operations to be adequate to fund our existing commitments, our ability to incur any future borrowings is dependent upon the success of our operations. Additionally, the inability to obtain sufficient financing could adversely affect our ability to complete expansion plans. Our ability to arrange financing and the costs of capital of such financing are dependent on numerous factors, including general economic and capital market conditions, credit availability from banks, investor confidence, the continued success of our operations and other laws that are conducive to our raising capital in this manner. If we decide to meet our capital requirements through debt financing, we may be subject to certain restrictive covenants. If we are unable to raise adequate capital in a timely manner and on acceptable terms, or at all, our business, results of operations, cash flows and financial condition could be adversely affected.

- 31. *Any delay or default in Customer payment could result in the reduction of our profits.***

Our operations involve extending credit for extended periods of time to our certain customers and consequently, we face the risk of the uncertainty regarding the receipt of these outstanding amounts. As a result of such industry conditions, we have and may continue to have high levels of outstanding receivables. If our customers delay or default in making these payments, our profits margins could be adversely affected.

- 32. *The Promoters and Directors hold Equity Shares in our Company and are therefore interested in our Company's performance in addition to their remuneration and reimbursement of expenses.***

Certain of our Directors (including our Promoters) are interested in our Company, in addition to regular remuneration or benefits and reimbursement of expenses, to the extent of their shareholding in our Company. We cannot assure you that our Promoters will exercise their rights as shareholders to the benefit and best interest of our Company. Our Promoters will continue to exercise significant control over us, including being able to control the composition of our Board of Directors and determine decisions requiring simple or special majority voting of shareholders, and our other shareholders may be unable to affect the outcome of such voting. Our Promoters may take or block actions with respect to our business which may conflict with the best interests of our Company or that of minority shareholders. For details on the interest of our Promoters and Directors of our Company, other than reimbursement of expenses incurred or normal remuneration or

benefits, see “Our Management – Interest of Directors” and “Our Promoters, Promoter Group and Group Companies – Interest in our Company” on pages 109 and 120, respectively.

33. We are dependent on a number of key personnel, including our senior management, and the loss of or our inability to attract or retain such persons could adversely affect our business, results of operations and financial condition.

Our performance depends largely on the efforts and abilities of our senior management and other key personnel. We believe that the inputs and experience of our senior management and key managerial personnel are valuable for the development of business and operations and the strategic directions taken by our Company. We cannot assure you that we will be able to retain these employees or find adequate replacements in a timely manner, or at all. We may require a long period of time to hire and train replacement personnel when qualified personnel terminate their employment with our Company. We may also be required to increase our levels of employee compensation more rapidly than in the past to remain competitive in attracting employees that our business requires. The loss of the services of such persons may have an adverse effect on our business and our results of operations. The continued operations and growth of our business is dependent upon our ability to attract and retain personnel who have the necessary and required experience and expertise. Competition for qualified personnel with relevant industry expertise in India is intense. A loss of the services of our key personnel may adversely affect our business, results of operations and financial condition.

34. The Logo used by our Company is currently not registered under Trade Marks Act, 1999. Failure to protect our intellectual property rights may adversely affect our competitive business position, financial condition and profitability.

Presently, our Company is using logo “”, “”, “”, “”, “” which are registered and  has been ‘Objected’ under the Trade Marks Act, 1999. Therefore, as on date we enjoy the statutory provisions that are accorded to a registered trademark. However, we may not be able to detect any unauthorized use or infringement or take appropriate and timely steps to enforce or protect our intellectual property, nor can we provide any assurance that any unauthorized use or infringement will not cause damage to our business prospects. Thus, we cannot guarantee that the application for registration of the ‘Objected’ Trademark will be allowed. In case we are unable to obtain the registration for the said trademark in our name, our business revenues and profitability may be impacted.

35. Certain relevant copies of education qualification and experience certificates of our promoters/Directors are not traceable.

Relevant copies of education qualification and experience certificates of some of our promoters/Directors are not traceable. We can’t assure you that back-ups for the relevant copies of educational qualifications will be available in a timely manner or at all. We have relied on personal undertakings provided from them.

36. Our Company has availed in the past certain unsecured loans that were recallable by the lenders at any time.

Our Company had availed in the past certain unsecured loans and may continue to do so in future that are recallable on demand by the lenders. In such cases, the lender is empowered to require repayment of the facility at any point in time during the tenor. In case the loan is recalled on demand by the lender and our Company is unable to repay the outstanding amounts under the facility at that point, it would constitute an event of default under the respective loan agreements. For further details, please refer chapter titled “Financial Indebtedness” beginning on page 158 of this Draft Prospectus.

37. Our funding requirements and the proposed deployment of the Net Proceeds are based on management estimates and have not been independently appraised.

Our funding requirements and the proposed deployment of the Net Proceeds are based on management estimates and is subject to change in light of changes in external circumstances, costs, other financial condition or business strategies, and have not been appraised by an independent entity. In the absence of such independent appraisal, or the requirement for us to appoint a monitoring agency in terms of the SEBI Regulations, the deployment of the net proceeds is at our discretion. We cannot assure you that we will be able to monitor and report the deployment of the Net Proceeds in a manner similar to that of a monitoring agency. Further, we may have to revise our expenditure and funding requirements as a result of variations in costs, estimates, quotations or other external factors, which may not be within the control of our management. This may entail rescheduling, revising or cancelling planned expenditure and funding requirements at the discretion of our Board. Additionally, various risks and uncertainties, including those set out in this “Risk Factors” section, may limit or delay our Company’s efforts to use the Net Proceeds and to achieve profitable growth in our business.

38. *The COVID-19 pandemic and resulting deterioration of general economic conditions has impacted our business and results of operations in the past and the extent to which it will impact our future business and results of operations will depend on future developments, which are difficult to predict.*

Since first being reported in December 2019, the outbreak of COVID-19 has spread globally. The World Health Organization declared the novel coronavirus disease (“COVID-19”) outbreak a Public Health Emergency of International Concern on January 30, 2020, and a pandemic on March 11, 2020. The rapid and diffused spread of COVID-19 and global health concerns relating to this pandemic have had a severe negative impact on, among other things, financial markets, liquidity, economic conditions and trade and could continue to do so or could worsen for an unknown period of time, that could in turn have a material adverse impact on our business, cash flows, results of operations and financial condition, including liquidity and growth. The extent to which the COVID-19 outbreak impacts our business, cash flows, results of operations and financial condition will depend on future developments, including on the duration and severity of the pandemic, the nature and scope of government actions to contain it, and the potential impact on global and national economic conditions, including inflation, interest rates, availability of capital markets, consumer spending rates, energy availability and costs (including fuel surcharges), which are highly uncertain and cannot be predicted. The scope, duration and frequency of such measures and the adverse effects of COVID-19 remain uncertain and are likely to be severe.

In addition, while the Government of India in coordination with the state governments have started the bulk immunization process or vaccination drive since January 16, 2021, achieving a complete vaccination scale may take significant amount of time. There is also no assurance that the vaccines that are developed will be fully effective and/ or may not have side effects. On March 14, 2020, India declared COVID-19 as a ‘notified disaster’ and imposed a nationwide lockdown announced on March 24, 2020. Subsequently, progressive relaxations have been granted for movement of goods and people and cautious reopening of businesses and offices. Thus, our business was under lock down during the nationwide lock down due to the spread of COVID 19 Pandemic from March 25, 2020 to May 02, 2020. It was also shut down during the month of June 2020 due to widespread COVID – 19 pandemic. Subsequently, our business was operating subject to certain social distancing and additional safety measures, such as, regular temperature checks, regular sanitization, and compulsory use of masks and hand sanitization. While we have not been able to determine any material impact on our operations and results on account of COVID-19, in the previous Fiscal, our Company has witnessed a lower quantum of sales compared to similar periods in previous years. In addition, throughout March and April 2021, due to an increase in the number of daily COVID-19 cases, several state governments in India re-imposed lockdowns, curfews and other restrictions to curb the spread of the virus. As a result of the detection of new strains and subsequent waves of COVID-19 infections in several states in India as well as throughout various parts of the world, we may be subject to further reinstatements of lockdown protocols or other restrictions, which may adversely affect our business operations. We continue to closely monitor the impact that COVID-19 may have on our business and results of operations.

39. *Our Promoters and Promoter Group will continue to retain control over our Company after completion of the Issue, which will allow them to influence the outcome of matters submitted for approval of our shareholders.*

Post completion of the Issue, our Promoters and Promoter Group will continue to hold approximately 99.99 % of our post-Issue Equity Share capital. As a result, they will have the ability to significantly influence matters requiring share-holders approval, including the ability to appoint Directors to our Board and the right to approve significant actions at Board and at shareholders’ meetings, including the issue of Equity Shares and dividend payments, business plans, mergers and acquisitions, any consolidation or joint venture arrangements, any amendment to our Memorandum of Association and Articles of Association, and any assignment or transfer of our interest in any of our licenses. We cannot assure you that our Promoters will not have conflicts of interest with other shareholders or with our Company. Any such conflict may adversely affect our ability to execute our business strategy or to operate our business.

40. *Any future issuance of Equity Shares may dilute your shareholdings, and sale of the Equity Shares by our major shareholders may adversely affect the trading price of our Equity Shares.*

Any future equity issuances by our Company may lead to the dilution of investors’ shareholdings in our Company. In addition, any sale of substantial Equity Shares in the public market after the completion of this Issue, including by our major shareholders, or the perception that such sales could occur, could adversely affect the market price of the Equity Shares and could significantly impair our future ability to raise capital through offerings of the Equity Shares. We cannot predict what effect, if any, market sales of the Equity Shares held by the major shareholders of our Company or the availability of these Equity Shares for future sale will have on the market price of our Equity Shares.

41. *The Issue Price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the Issue Price and you may not be able to sell your Equity Shares at or above the Issue Price.*

The Issue price is based on numerous factors. For further information, see the chapter titled “*Basis for Issue Price*” beginning on page no. 61 of this Draft Prospectus and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price are:

- Quarterly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts;
- Speculation in the press or investment community;
- Domestic and international economic, legal and regulatory factors unrelated to our performance.

42. *Managing employee benefit pressures in India may prevent us from sustaining our competitive advantage which could adversely affect our business prospects and future financial performance.*

Employee benefits represent a major expense for us and our ability to maintain or reduce such costs is critical for our business operations. We may be required to increase employee compensation levels to remain competitive and manage attrition, and consequently we may need to increase the prices of our products and services. An increase in wages/ salaries paid to our employees may result in a material adverse effect on our profits in the event that we are unable to pass on such increased expenditure to our customers without losing their business to our competitors. Likewise, if we are unable to sustain or increase the number of employees as necessary to meet growing demand, our business, financial condition and results of operations could be adversely affected.

EXTERNAL RISK FACTOR:

1. *Changes in government regulations or their implementation could disrupt our operations and adversely affect our business and results of operations.*

Our business and industry are regulated by different laws, rules and regulations framed by the Central and State Government. These regulations can be amended/ changed on a short notice at the discretion of the Government. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change adversely, we may incur increased costs or be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations.

2. *You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under current Indian tax laws, capital gains arising from the sale of equity shares within 12 months in an Indian company are classified as short term capital gains and generally taxable. Any gain realized on the sale of listed equity shares on a stock exchange that are held for more than 12 months is considered as long-term capital gains and is taxable at 10%, in excess of Rs. 1,00,000. Any long-term gain realized on the sale of equity shares, which are sold other than on a recognized stock exchange and on which no STT has been paid, is also subject to tax in India. Capital gains arising from the sale of equity shares are exempt from taxation in India where an exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India’s ability to impose tax on capital gains. As a result, residents of other countries may be liable to pay tax in India as well as in their own jurisdiction on a gain on the sale of equity shares.

3. *Public companies in India, including our Company, shall be required to prepare financial statements under Indian Accounting Standards.*

Our Company currently prepares its annual financial statements under Indian GAAP. The MCA, Government of India, has, through a notification dated February 16, 2015, set out the Indian Accounting Standards (Ind AS) and the timelines for their implementation. In accordance with such notification, our Company may be required to prepare its financial statements in accordance with Ind AS in future. Ind AS is different in many aspects from Indian GAAP under which our financial statements are currently prepared. Accordingly, the degree to which the restated financial statements included in the Draft Prospectus will provide meaningful information is entirely dependent on the reader’s level of familiarity with Indian accounting practices. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in the Draft Prospectus should accordingly be limited.

4. *Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse effect on our business, financial condition and results of operations.*

Taxes and other levies imposed by the Central or State Governments in India that affect our industry include:

- Custom duties on imports of raw materials and components;
- Goods and Service

These taxes and levies affect the cost and prices of our products and therefore demand for our product. An increase in any of these taxes or levies, or the imposition of new taxes or levies in the future, may have a material adverse effect on our business, profitability and financial condition.

5. *Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.*

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

6. *We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and industry in which we operate contained in the Draft Prospectus.*

While facts and other statistics in the Draft Prospectus relating to India, the Indian economy and the industry in which we operate has been based on various web site data and IBEF that we believe are reliable, we cannot guarantee the quality or reliability of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the chapter titled “*Industry Overview*” beginning on page 66 of this Draft Prospectus. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

7. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

8. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfer of shares between non- residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

9. *The extent and reliability of Indian infrastructure could adversely affect our Company's results of operations and financial condition.*

India's physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition.

10. *Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

11. *Natural calamities could have a negative impact on the Indian economy and cause our Company's business to suffer.*

India has experienced natural calamities such as earthquakes, tsunami, floods etc. in recent years. The extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

12. *Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.*

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks in India, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

INDIAN ECONOMY

INTRODUCTION

The Indian economy has fully recovered to the pre-pandemic real GDP level of 2019-20, according to the provisional estimates of GDP released on May 31, 2022. Real GDP growth in FY 2021-22 stands at 8.7%, which is 1.5% higher than the real GDP in FY 2019-20. These figures are associated with stronger growth momentum, indicating increased economic demand. The investment rate in the fourth quarter increased to its highest level in the previous nine quarters. Moreover, capacity utilisation in the manufacturing sector rose in the fourth quarter, as against the third quarter, implying a build-up in demand, which is consistent with the growth objectives of the Indian economy.

Future capital spending of the government in the Indian economy is expected to be supported by factors such as tax buoyancy, streamlined tax system, thorough assessment and rationalisation of the tariff structure and digitisation of tax filing. In the medium term, an increase in capital spending on infrastructure and asset-building projects is set to increase growth multipliers. Furthermore, revival in monsoon and Kharif sowing helped the agriculture sector gain momentum. As of July 11, 2022, the South-West monsoon has covered the entire country, resulting in 7% higher rainfall than the normal level.

India has emerged as the fastest-growing major economy in the world, and is expected to be one of the top three economic powers globally over the next 10-15 years, backed by its robust democracy and strong partnerships.

- According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 and 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between this period. India's current account deficit (CAD), primarily driven by an increase in the trade deficit, stood at 1.2% of GDP in 2021-22.
- Exports fared remarkably well during the pandemic and aided recovery when all other growth engines lost steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India’s trade

partners witness an economic slowdown. According to Mr. Piyush Goyal, Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles, Indian exports are expected to reach US\$ 1 trillion by 2030.

ROAD AHEAD

Despite continuing geopolitical concerns, rising interest rates in the US and India and high prices of crude oil and few other commodities, economic activity in India is holding up better than anticipated. Electricity consumption, manufacturing PMI, exports, power supply and other high-frequency indicators indicate that the pace of economic activity has fully recovered from the COVID-19 pandemic shock. Economic growth is anticipated to be fueled by the effective implementation of PLI schemes, development of renewable energy sources while diversifying import dependence on crude oil and bolstering of the banking sector. Recent government initiatives to boost revenue will aid in containing the rise in the current account deficit and ensure that any potential fiscal slippage is adequately contained. Overall, the first ten days of July and June were better than the first two months of FY 2022–23, which is a cause for comfort and even cautious optimism in these testing times. According to a Boston Consulting Group (BCG) analysis, India is expected to be the third-largest consumer economy as its consumption may quadruple to US\$ 4 trillion by 2025 due to changes in consumer behaviour and spending patterns. By 2040, India is anticipated to overtake the US to become the second-largest economy in terms of purchasing power parity (PPP), according to a report by PricewaterhouseCoopers.

INDIAN FOOD PROCESSING INDUSTRY OVERVIEW

The contribution of the food processing sector has increased continuously with Gross Value Added (GVA) in food processing sector from Rs.1.34 lakh crore in 2014-15 to Rs. 2.37 lakh crore in 2020-21 at a Compound Annual Growth Rate (CAGR) of 9.97%.

The Ministry of Food Processing Industries(MoFPI) implements various schemes with an objective of overall growth and development of the food processing sector, creation of off-farm employment and entrepreneurial opportunities whose details are as under:

(i) MoFPI implements the Pradhan Mantri Kisan SAMPADA Yojana (PMKSY) which, inter-alia, aims at creation of modern post-harvest infrastructure, value addition, providing better returns to farmers, creation of off-farm employment opportunities etc.

(ii) In addition, the Ministry is also implementing the PM- Formalization of Micro Food Processing Enterprises (PMFME) Scheme for providing financial, technical and business support for setting up/upgradation of two lakh existing micro food processing enterprises across the country on One District One Product (ODOP) approach.

(iii) A new Production Linked Incentive scheme (PLIS) for Food Processing Sector is being implemented to support creation of global food manufacturing champions. The scheme incentivizes investment and will promote exports and employment in the sector.

To attract Foreign Direct Investment (FDI) in the food processing sector, the Government has put in place an investor-friendly policy wherein 100% FDI is allowed for food products' manufacturing under the automatic route, and 100% FDI under Government approval route is allowed for retail trading, including through e-commerce, in respect of food products manufactured and/or produced in India. Also, to facilitate all investment interests, MoFPI has set up a dedicated NiveshBandhu Portal as well as an Investment Facilitation Cell with Invest India. The total FDI inflow in the food processing sector during last 5 years ending 2021-22 is USD 3.54 billion.

As per the latest Annual Survey of Industries (ASI) 2018-19, released by Ministry of Statistics and Programme Implementation, 40579 food processing units are in the registered sector. The ASI do not give segregated data/details of Multi-National Companies (MNCs). However, State-wise number of units as per ASI 2018-19 are as under;

The growth rate is significant as it is over and above the growth of 17.66 per cent at USD 41.87 billion achieved in 2020-21 and has been achieved in spite of unprecedented logistical challenges in the form of high freight rates and container shortages, etc.

In 2021-22, agricultural and processed food products were exported to the tune of USD 25.6 billion, which was around 51 per cent of India's total agricultural goods exports of more than USD 50 billion.

The rise in the export of agricultural and processed food products is the outcome of various initiatives taken for the export promotion of agricultural and processed food products such as organising B2B exhibitions in different countries, exploring new potential markets through product-specific and general marketing campaigns by the active involvement of Indian Embassies.

Several initiatives have also been taken to promote products having registered geographical indications (GI) in India by organizing virtual Buyer Seller Meets on agricultural and food products with the United Arab Emirates and on GI products, including handicrafts with the USA.

Indian food processing industry: Current scenario

The Indian food industry is poised for huge growth, increasing its contribution to the world food trade every year. In India, the food sector has emerged as a high-growth and high-profit sector due to its immense potential for value addition, particularly within the food processing industry.

There has been a great revolution in the food ordering business in India with online food delivery players like Zomato, Swiggy, etc. Investors are more attracted to the Food processing industry, foreseeing its high potential and wider customer base. Food is a basic necessity; therefore the demands are always going to be high. There are many big companies already actively involved in the Food Processing Industry and the government is playing a vital role in promoting it. Many factors are shaping and affecting the growth of such industries.

Market size

On a worldwide scale, India is the largest country in terms of food production, processing, supply, and consumption. India's food market is ranked 6th in the world, with 70% of sales and 5th in production, consumption, and export. India exports 13% of its overall manufacturing output and 6% of its industrial investment. Manufacturing and agriculture contribute 8.80 percent and 8.39 percent, respectively, to India's Gross Value Addition. The Indian food industry is growing at a CAGR of 11% and the output is projected to reach the US \$535 billion by 2025. The food processing sector will be led by the demand in retail and the rise of health-conscious consumers.

Current Status

Through the Ministry of Food Processing Industries (MoFPI), the Government of India is taking all necessary steps to boost investments in the food processing industry in India. After the pandemic, people have become more conscious about their health, and hence, their preferences towards the kind of food and the intake has changed. This has increased the demand for gluten-free, low-calorie, natural preservatives, colours, and flavours. There is a surge in demand for Ready to Eat and Cook products. Organic products have become common among people and with the effect of social media on our lives, people are opting for innovative food products. The government has become more active in making the labelling and information on the packaging to be more intuitive to the consumer. The govt has also forced the FMCG companies to think differently for packaging solutions as it has banned plastic, leading to eco-friendly packaging for food products.

Government initiatives.

With India moving from a position of scarcity to surplus in terms of food production, the opportunities for increasing food processing are numerous. India's food processing sector, in recent years, has been known for its high-growth and high-profits, thus, increasing its contribution to the world food trade every year. The Government of India aims to boost growth in the food processing sector by leveraging reforms such as 100% Foreign direct investment (FDI) in the marketing of food products and various incentives at the central and state government level along with a strong focus on supply chain infrastructure. Recently the government of India has established 18 mega food parks and 134 cold chain projects to develop the food processing supply chain. Recently Finance Minister, Mrs. Nirmala Sitharaman implemented a scheme of Rs.10,000 Cr. to help two lakh micro food enterprises (MFE) with a view of 'vocal for local with global outreach'. The government has launched the One District One Product program, to upgrade SMEs on selected products through credit linked subsidy of 35% of the eligible project cost limited to a maximum value of Rs.10 lakhs.

For providing support to existing individual micro-units for capital investment, preference would be given to those producing ODOP products. The MoFPI has also given impetus to the Agro Processing Cluster by giving grants to the tune of Rs.10Cr-Rs.35Cr.

Why Should you invest in food processing business

Food Processing is a sunrise sector and even with the advent of large MNC players, there is always demand for locally processed food. Abundance of raw materials and better govt policies are also contributing factors for Food Processing units. Regional taste preferences can be catered to only by a local brand and this in turn has given rise to a large number of local players who have huge market share in smaller areas esp Tier 2 and 3 cities. Presence of good D2C marketing channels has helped to promote the regional brands to become national players as well.

The changing food habits, consumption patterns, low production costs, and food preferences have significantly contributed to the boom in the food processing industry.

The food processing sector is one of the largest sectors in India in terms of production, growth, consumption, and export. India's food processing sector covers fruit and vegetables; spices; meat and poultry; milk and milk products, alcoholic beverages, fisheries, plantation, grain processing and other consumer product groups like confectionery, chocolates and cocoa products soya-based products, mineral water, high protein foods, etc. Since liberalization in August 1991 proposals for projects have been proposed in various segments of the food and agro-processing industry. Besides this, Govt. has also approved proposals for joint ventures; foreign collaboration, industrial licenses and 100% export-oriented units envisaging an investment. The foreign direct investment in food processing sector in 2020-21 is estimated to be 2934.12 crores.

India's exports of Processed Food was Rs. 41,460.06 Crores/ 5,559.84 USD Millions in 2021-22, which including the share of products like Mango Pulp (Rs. 924.54 Crores/ 124.11 USD Millions), Processed Vegetables (Rs. 3986.45 Crores/ 534.98 USD Millions), Cucumber and Gherkins(Prepd. & Presvd) (Rs. 1487.30 Crores/ 199.46 USD Millions), Processed Fruits, Juices & Nuts (Rs. 3626.08 Crores/ 486.58 USD Millions) Pulses (Rs. 2834.29 Crores/ 379.75 USD Millions), Groundnuts (Rs. 4697.10 Crores/ 629.26 USD Millions), Guar gum (Rs. 3334.77 Crores/ 446.77 USD Millions), Jaggery & Confectionary (Rs. 2797.85 Crores/ 375.18 USD Millions), Cocoa Products (Rs. 1145.48 Crores/ 153.71 USD Millions), Cereal Preparations (Rs. 4862.19 Crores/ 652.26 USD Millions), Alcoholic Beverages (Rs. 2070.92 Crores/ 277.85 USD Millions), Miscellaneous Preparations (Rs. 7406.98 Crores/ 993.85 USD Millions), and Milled Products (Rs. 2286.11 Crores/ 306.08 USD Millions).

The Indian food processing industry is primarily export oriented. India's geographical situation gives it the unique advantage of connectivity to Europe, the Middle East, Japan, Singapore, Thailand, Malaysia and Korea. One such example indicating India's location advantage is the value of trade in agriculture and processed food between India and the Gulf region.

Retail (food & grocery retail market), one of the largest sectors in the global economy (USD 11.32 Trillion in 2021), is going through a transition phase in India. It is expected to grow at a Compound Annual Growth Rate (CAGR) of 3.0% from 2022 to 2030. One of the prime factors for non-competitiveness of the food processing industry is because of the cost and quality of marketing channels. Globally more than 72% of food sales occur through superstores. India presents a huge opportunity and is all set for a big retail revolution. India is the least saturated of global markets with small organized retail and also the least competitive of all global markets.

Food Safety and Standards Act, 2006 (“FSSA”):

The Food Safety and Standards Act, 2006 (the “FSSA”) was enacted on August 23, 2006 with a view to consolidate the laws relating to food and to establish the Food Safety and Standards Authority of India (the “Food Authority”) for setting out scientific standards for articles of food and to regulate their manufacture, storage, distribution, sale and import to ensure availability of safe and wholesome food for human consumption. The Food Authority is required to provide scientific advice and technical support to the Government of India and the state governments in framing the policy and rules relating to food safety and nutrition. The standards prescribed by the FSSAI include specifications for ingredients, contaminants, pesticide residue, biological hazards and labels. Under section 31 of the FSSA, no person may carry on any food business except under a license granted by the FSSAI. The FSSA sets forth the requirements for licensing and registering food businesses in addition to laying down the general principles for safety, responsibilities and liabilities of food business operators. The enforcement of the FSSA is generally facilitated by ‘state commissioners of food safety’ and other officials at a local level. The provisions of the FSSA require every distributor to be able to identify any food article by its manufacturer, and every seller by its distributor that should be registered under the FSSA and every entity in the sector is bound to initiate recall procedures if it finds that the food marketed has violated specified standards. Food business operators are required to ensure that persons in his employment do not suffer from infectious or contagious diseases. The FSSA also imposes liabilities upon manufacturers, packers, wholesalers, distributors and sellers requiring them to ensure that inter alia unsafe and misbranded products are sold or supplied in the market.

The Food Authority has also framed the following food safety and standards regulations:

- Food Safety and Standards (Licensing and Registration of Food Business) Regulations, 2011;
- Food Safety and Standards (Packaging and Labelling) Regulations, 2011;
- Food Safety and Standards (Food Product Standards and Food Additives) Regulations, 2011;

- Food Safety and Standards (Contaminants, Toxins and Residues) Regulations, 2011; and
- Food Safety and Standards (Laboratory and Sampling Analysis) Regulations, 2011.

Further, FSSAI has issued guidance note on 'Food Hygiene and Safety Guidelines for Food Businesses during Coronavirus Disease (COVID-19) Pandemic' ("Guidance Note") with an intent to provide guidance to food businesses, including their personnel involved in handling of food and other employees to prevent spread of COVID- 19 in the work environment and any incidental contamination of food/food packages. It also provides guidance in relation to operative mechanism such as establishment of an in-house emergency response team in large food businesses to deal with suspected infections effectively. It mandates that employers should have a COVID-19 screening protocol in place to screen all personnel entering the premise. All the employees or visitors should be screened at entry point for the symptoms of COVID-19 such as, among others, temperature (using non-contact type thermometer), cough, cold etc. The entrance shall mandatorily have measures installed for hand hygiene. Employees and food handlers should be encouraged to self-declare any symptoms of any respiratory illness before visiting the premises. To spread awareness and contain the spread of the disease, employers should employ and ensure compliance with numerous measures such as, among others, display of posters/standees/audio visuals on preventive measures for COVID-19, frequent usage of alcohol-based sanitizers, avoidance of close contact with symptomatic personnel, usage of face masks, and frequent cleaning and disinfection. Food sectors involved in food services, takeaways and deliveries shall ensure, among others, that the food service area shall be thoroughly cleaned and disinfected after every meal, hand wash facilities should be made available to the workers, employees wear a clean uniform, mask/ face cover, gloves and head covers at all time, adoption of contactless delivery. The Guidance Note prescribes guidelines for the management of the food establishment to handle a Covid-19 suspect/positive case in accordance with the guidelines issued by Ministry of Health and Family Welfare and clean and disinfect the premises accessed by the suspected Covid-19 case.

The accounting policies adopted in the preparation of financial statements are consistent with those of previous year.

Use of Estimates:

The preparation of the financial statements in conformity with GAAP requires management to make judgments, estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent liabilities as at the date of the financial statements and the reported amount of revenues and expense during the reporting period. Accounting estimates could change from one period to another. Actual results could differ from those estimates. Any revision to accounting estimates is recognized prospectively in current and future periods as and when the Management becomes aware of the changes in circumstances surrounding the estimates. Changes in estimates are reflected in the period in which the changes are made and, if material, their effects are disclosed in the notes to the financial statements.

Operating Cycle

Based on the nature of products/activities of the company and the normal time between acquisition of assets and their realization in cash or cash equivalents, the company has determined its operating cycle as 12 months for the purpose of classification of its assets and liabilities as current and non current.

Current and Non-Current Assets:

All assets and liabilities are classified into current and non-current.

Assets:

An asset is classified as current when it satisfies any of the following criteria:

- a) It is expected to be realized in, or is intended for sale or consumption in, the Company's normal operating cycle;
- b) It is held primarily for the purpose of being traded;
- c) It is expected to be realized within 12 months after the reporting date; or
- d) It is cash or cash equivalent unless it is restricted from being exchanged or used to settle a liability for at-least 12 months after the reporting date.

Current assets include the current portion of non-current financial assets. All other assets are classified as non-current.

Liabilities:

A liability is classified as current when it satisfies any of the following criteria:

- a) It is expected to be settled in the Company's normal operating cycle;
- b) It is held primarily for the purpose of being traded;
- c) It is due to be settled within 12 months after the reporting date; or
- d) The Company does not have an unconditional right to defer settlement of the liability for atleast 12 months after the reporting date.

Property, Plant and Equipment:

Property, plant and equipment are carried at cost of acquisition or construction net of recoverable taxes, trade discounts and rebates less accumulated depreciation and/or accumulated impairment loss, if any. The cost of an item of property, plant and equipment comprises its purchase price, including import duties and other non-refundable taxes or levies and any directly attributable cost of bringing the asset to its working condition for its intended use; any trade discounts and rebates are deducted in arriving at the purchase price. Subsequent expenditures related to an item of property, plant and equipment (except land) are added to its book value only if they increase the future benefits from the existing asset beyond its previously assessed standard of performance. The valuation and recognition is done by keeping in view the provisions of the Accounting Standard 10 on "Accounting for Property, Plant and Equipment". None of Fixed Assets have been revalued during the Year.

Depreciation on Tangible Fixed Assets has been provided on Written down Value Method over the useful lives of Assets as prescribed in Schedule II of the Companies Act, 2013. Depreciation for Assets purchased/sold during a period is proportionately charged.

Property, plant and equipment is eliminated from the financial statements on disposal or when no further benefit is expected from its use and disposal.

Losses arising from retirement or gains or losses arising from disposal of property, plant and equipment which are carried at cost are recognized in the Statement of Profit and Loss.

Property, Plant and Equipment - Intangible:

Intangible assets that are acquired by the Company are measured initially at cost. After initial recognition, an intangible asset is carried at its cost less any accumulated amortization and any accumulated impairment loss.

Intangible assets are amortized in the Statement of profit and loss over their estimated useful lives, from the date that they are available for use based on the expected pattern of consumption of economic benefits of the asset.

In accordance with the applicable Accounting Standard, the Company follows a rebuttable presumption that the useful life of an intangible asset will not exceed ten years from the date when the asset is available for use. However, if there is persuasive evidence that the useful life of an intangible asset is longer than ten years, it is amortized over the best estimate of its useful life. Such intangible assets that are not yet available for use are tested annually for impairment.

Intangible assets comprise ERP software only, which are being amortized over a period of 5 years.

Amortization method and useful lives are reviewed at each reporting date. If the useful life of an asset is estimated to be significantly different from previous estimates, the amortization period is changed accordingly. If there has been a significant change in the expected pattern of economic benefits from the asset, the amortization method is changed to reflect the changed pattern. An intangible asset is derecognized on disposal or when no future economic benefits are expected from its use and disposal.

Inventories:

Inventories comprise Trading and Manufactured Goods and are carried at the lower of cost and net realizable value. Cost of inventories comprises all costs of purchase and other costs incurred in bringing the inventories to their present location and condition. Valuation of inventories is done on a First in First Out (FIFO) basis.

Deferred Income Tax reflect the current period timing differences between taxable income and accounting income for the period and reversal of timing differences of earlier years/period. Deferred tax assets are recognized only to the extent that there is a reasonable certainty that sufficient future income will be available except that deferred tax assets, in case there are

unabsorbed depreciation or losses, are recognized if there is virtual certainty that sufficient future taxable income will be available to realize the same.

Provisions, Contingent Liabilities and Contingent Assets

A contingent liability exists when there is a possible but not probable obligation, or a present obligation that may, but probably will not, require an outflow of resources, or a present obligation whose amount cannot be estimated reliably. Contingent liabilities do not warrant provisions, but are disclosed unless the possibility of outflow of resources is remote. Contingent assets are neither recognized nor disclosed in the financial statements. However, contingent assets are assessed continually and if it is virtually certain that an inflow of economic benefits will arise, the asset and related income are recognized in the period in which the change occurs.

Cash & Cash Equivalents as indicated in the Cash Flow Statement comprise Cash on Hand, Cash at Bank and Fixed Deposits held with Bank.

Borrowing Costs:

Phased implementation of Unified Payments Interface (UPI)

SEBI has issued the various UPI Circulars in relation to streamlining the process of public issue of inter alia, equity shares. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by Retail Individual Investors through Designated Intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circulars have introduced the UPI Mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever was later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a Retail Individual Investor had the option to submit the ASBA Form with any of the Designated Intermediary and use his/her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.

Phase II: This phase has become applicable from July 1, 2019. SEBI vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019 had extended the timeline for implementation of UPI Phase II till March 31, 2020. Further, SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020 dated March 30, 2020 decided to continue Phase II of UPI with ASBA until further notice. Under this phase, submission of the ASBA Form by Retail Individual Investors through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will

be replaced by the UPI Mechanism. However, the time duration from public issue closure to listing would continue to be six Working Days during this phase.

Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing is proposed to be reduced to three Working Days. For further details, refer to the General Information Document available on the websites of the Stock Exchanges and the Managers.

(a) to be registered himself as holder of the share; or

(b) to make such transfer of the share as the deceased or insolvent member could have made.

(ii) The Board shall, in either case, have the same right to decline or suspend registration as it would have had, if the deceased or insolvent member had transferred the share before his death or insolvency.

27. (i) If the person so becoming entitled shall elect to be registered as holder of the share himself, he shall deliver or send to the company a notice in writing signed by him stating that he so elects.

(ii) If the person aforesaid shall elect to transfer the share, he shall testify his election by executing a transfer of the share.

(iii) All the limitations, restrictions and provisions of these regulations relating to the right to transfer and the registration of transfers of shares shall be applicable to any such notice or transfer as afore said as if the death or insolvency of the member had not occurred and the notice or transfer were a transfer signed by that member.

28. A person becoming entitled to a share by reason of the death or insolvency of the holder shall be entitled to the same dividends and other advantages to which he would be entitled if he were the registered holder of the share, except that he shall not, before being registered as a member in respect of the share, be entitled in respect of it to exercise any right conferred by membership in relation to meetings of the company:

Provided that the Board may, at any time, give notice requiring any such person to elect either to be registered himself or to transfer the share, and if the notice is not complied with within ninety days, the Board may thereafter withhold payment of all dividends, bonuses or other monies payable in respect of the share, until the requirements of the notice have been complied with.

35. The provisions of these regulations as to forfeiture shall apply in the case of non-payment of any sum which, by the terms of issue of a share, becomes payable at a fixed time, whether on account of the nominal value of the share or by way of premium, as if the same had been payable by virtue of a call duly made and notified.
