To have a complete understanding of our Company, you should read this section in conjunction with the sections entitled "Our Business" and "Management's Discussion and Analysis of Financial Condition and Results of Operations" on pages 83 and 163 respectively, as well as the other financial and statistical information contained in this Prospectus. We have described the risks and uncertainties that our management believe are material but the risks set out in this Prospectus may not be exhaustive and additional risks and uncertainties not presently known to us, or which we currently deem to be immaterial, may arise or may become material in the future. In making an investment decision, you must rely on your own examination of our Company and the terms of the Issue including the merits and the risks involved. This Prospectus also contains forward-looking statements that involve risk and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below in the section entitled "Forward-Looking Statements" on page 16, and elsewhere in the Prospectus. Unless otherwise stated, the financial information used in this section is derived from our Restated Financial Statements.

- 1. Our business requires us to obtain and renew certain registrations, licenses and permits from government and regulatory authorities and any failure to obtain and renew them in a timely manner may adversely affect our business operations.***

Our business operations require us to obtain and renew from time to time, certain approvals, licenses, registrations and permits, some of which may have expired and we may have either made or are in the process of making an application to obtain such approval or its renewal. Further, we cannot assure that we will be able to obtain the approvals for which applications have been made including renewals in a timely manner or at all.

The approvals, licenses, registrations and permits obtained by us may contain conditions, some of which could be onerous. If our Company fails to comply with, or unable to comply with any of these conditions stipulated under the licenses, our certificate of registration / licenses for carrying on a particular activity may be suspended and / or cancelled and we will not be able to carry on such activity, which would adversely impact our business and results of operations. Additionally, we will need to apply for renewal of certain approvals, licenses, registrations and permits, which expire or seek fresh approvals, from time to time, as and when required in the ordinary course of our business.

We endeavour to obtain all approvals, licenses, registrations and permits required for running of our business. However, our Company is in the process of obtaining the licenses for (i) registration as a Principal Employer under the Contract Labour (Regulation & Abolition) Act, 1970, (ii) renewal of certificate for the use of a boiler bearing registry no. GTS – 8930 under the Indian Boilers Act, 1923.

Further, our Company is also in the process of updating its Import Export Code certificate and GST certificate with respect to the details of our other offices and the same will be updated in the Prospectus.

In addition to the above, our Company is not able to trace the original copy of the consent to establish issued by the Gujarat Pollution Control Board. However, our Company has a copy of the amended Consent to Establish dated August 4, 2018 under which our Company is required to comply with certain conditions. Our Company has not complied with certain conditions of the Consent to Establish and our Company may be subjected regulatory action by the concerned authorities.

For more information on the licenses obtained by our Company and the licenses applied for by our Company, please refer chapter titled "Government and Other Statutory Approvals" beginning on page 176 of this Prospectus.

- 2. Our Company has applied for registration of certain trademarks and designs in its name. Until such registrations are granted, we may not be able to prevent unauthorised use of such trademarks by third parties, which may lead to the dilution of our goodwill.***

We have filed certain applications seeking registration for trademarks and designs with the Controller General of Patents, Design and Trademarks, Government of India which is currently pending for approval. There can be no assurance that our applications will be accepted and will be registered. During the pendency of our application for registration of these trademarks and designs, we may face difficulties in protecting our private labels in the event of a possible infringement of the same. In the event we are not able to obtain registrations, we may not be able to avail the legal protection or prevent unauthorised use of such trademarks by third parties, which may adversely affect our goodwill and business. *For further details on the trademarks, patents and designs, registered or pending registration, please refer to the titled "Our Business" beginning on page 83 of this Prospectus.*

- 3. Intellectual property rights are important to our business. Since our business is based on trust and identity and using the same for maintaining, acquiring and servicing our clients, it is very important for us to ensure confidentiality of our intellectual property rights. We may be unable to protect them from being infringed by others, including our current and / or future competitors / employees.***

We sell our products under brand names i.e. "JINAAM'."., "FLORAL CREATIONS", "ROMA", "ASMIRA", "HEROINE", "BAHNI", "ZAREEN", "TIARAA", "FORMM" which we believe are well recognized, have been developed to cater to customers across the market for women's apparel and have contributed to the success of our business. Presently we are selling our product only under "JINAAM'."., "FLORAL CREATIONS", "ROMA", "ASMIRA", "HEROINE" and "BAHNI". Our Company does not hold registrations of all the trademarks in its name, which it presently uses for its business. Our Company uses most of the trademarks registered in the name of the individual promoters of the Company, through Trademark License Agreements. We cannot assure that we will be able to use these trademarks owned by individual Promoters at commercially acceptable terms at all times.

Moreover, few of the trademarks used by us are either not registered or the applications made for the registration of such trademarks under different class are pending or are abandoned or under objection. Therefore, we cannot assure that our trademarks are adequately protected. If we are unable to obtain required registration, we may face challenges to secure the trademarks which we use which could be vulnerable to infringement and passing-off by third parties. Further, we may not be able to enforce any rights against them which may adversely affect our reputation, existing brand market and business and could require us to incur additional costs. For details, please refer to the chapter titled "***Our Business***" beginning on page 83 of this Prospectus.

In addition to the above, our trade name 'Jinaam' is presently being used by an unrelated third party for its various retail stores. In this regard, our Company, in the past, had served legal notice to the above said third-party. However, till date, no legal proceeding has been initiated either by us or the said third-party. In the event of a dispute between our Company and the third party before an appropriate court of law and in the event of any adverse results in such dispute, our brand name, business value and our operations may have negative impact. Further, we may also have to incur additional cost and time in defending /protecting our rights over such trademark.

4. *If we are unable to anticipate and respond to changes in fashion trends and changing customer preferences in a timely and effective manner, the demand for our products may decline, which may have an adverse effect on our business, results of operations and prospects.*

We are a manufacturer of Indian ethnic and fusion wear for women and our business is characterized by rapidly changing customer preferences. Our results of operations are dependent on our ability to anticipate, gauge and respond to such changes in customer preferences and design new products or modify our existing products in line with changes in fashion trends as well as customer demands and preferences. If we are unable to anticipate, gauge and respond to changing customer preferences or fashion trends, or if we are unable to adapt to such changes by modifying our existing products or launch new products on a timely basis, we may lose, or fail to attract customers, our inventory may become obsolete and we may be subject to pricing pressure to sell our inventory at a discount. A decline in demand for our products or a misjudgement of customer preference on our part could lead to lower sales, excess inventories and higher markdowns, each of which may have an adverse effect on our results of operations and financial condition.

Further, our process for designing our products is a key aspect of our operations for which we rely on customer's feedback and the study of fashion trends to introduce new and original concepts. We incur expenses in the design and development of our product and we cannot assure you that our current portfolio of designs and any products we launch, will be well received by our customers, or that we will be able to recover costs we incurred in designing and developing such products. If the products that we launch are not as successful as we anticipate, our business, results of operations and prospects may be adversely affected.

5. *Our Company has borrowed certain unsecured loans that may be payable on demand.*

Our Company has borrowed certain unsecured loans that may be payable on demand affecting the cash flow of the Company adversely. As per February 28, 2019, our Company has availed total sum of ₹1436.33 lakhs unsecured loan (including unsecured loan of ₹984.94 from Directors & related parties) which may be recalled at any time. Sudden recall may disrupt our operations and also may force us to opt for funding at higher interest rates, resulting in higher financial burden. Further, we will not be able to raise funds at short notice and thus result in shortage of working capital fund. For further details, please refer the chapter "Financial Indebtedness" on page no.159 of this Prospectus. Any demand for the repayment of such unsecured loan, may adversely affect our cash flow and financial condition.

6. *Our Company, Promoters and Directors are involved in certain legal proceedings. An adverse outcome in such proceedings may have a material adverse effect on our business, results of operations and financial condition.*

We are currently involved in a few legal proceedings. These proceedings are pending in various courts and authorities at different levels of adjudication. The amounts claimed in these proceedings have been disclosed to the extent ascertainable, excluding contingent liabilities but including amounts claimed jointly and severally from us and other parties.

A summary of the proceedings involving our Company, Promoters and Directors is provided below:

S. No.	Name of Entity	Criminal Proceedings	Tax proceedings	Statutory/Regulatory proceedings	Material civil litigation	Aggregate amount involved* (₹ in lakhs)
1.	Company					
	By the Company	-	-	-	3	5,766.59

2.	Promoters

	Against the Directors	-	-	-	-	-
	Total	2	1	-	4	5, 886.59

*the amount of interest, if any, is not ascertainable.

There can be no assurance that these legal proceedings will be decided in our favour and consequently it may divert the attention of our management and Promoters which may lead us to incur significant expenses in such proceedings. Further, we may have to make provisions in our financial statements, which could increase our expenses and liabilities and any adverse judgment in some of these proceedings could have an adverse impact on our business, financial condition and results of operations. For details in relation to certain material litigations, refer to the chapter titled “***Outstanding Litigation and Material Developments***” beginning on page 171 of this Prospectus.

7. ***Our Company is not in possession of some of the certified true copy of the litigations described in the chapter titled "Outstanding Litigation and Material Developments".***

Our Company is not in possession of certified true copy of the litigations described in the chapter titled "Outstanding Litigation and Material Developments" beginning on page 171 of this Prospectus. Accordingly, reliance has been placed on the unaffirmed litigation documents to describe the facts of litigation in the aforesaid chapter. Therefore, we cannot assure you that all information pertaining to the above is accurate.

8. ***Our Company is not in possession of certain litigation information/documents pertaining to certain litigation which are ongoing and detailed in the chapter titled "Outstanding Litigation and Material Developments".***

Our Company is not in possession of information/documents pertaining to litigation listed below which was commenced against the Company. Our Company has not been able to procure any documents pertaining to the below litigation despite efforts made by it. Hence, the facts regarding these matters as included in the chapter titled "Outstanding Litigation and Material Developments" beginning on page 171 of this Prospectus are based upon other documents and representations provided by the Company.

- Copy of Criminal Misc. Application, bearing Criminal Misc. Application No. 13866/ 2013 filed by Subashchandra Mansing Duva against our director.

9. ***We are subject to stringent labour laws or other industry standards and any strike, work stoppage or increased wage demand by our employees or any other kind of disputes with our employees could adversely affect our business, financial condition and results of operations***

Our manufacturing activities are labour-intensive. As on February 28, 2019, we have about 200 employees. We are subject to a number of stringent labour laws that protect the interests of workers, including legislation that stipulates rigorous procedures for dispute resolution and retrenchment of workers that imposes financial obligations on employers. Strikes, lock-outs and other labour action may have an adverse impact on our operations, and we cannot guarantee that we will not experience any strike, work stoppage or other industrial action in the future though we have not experienced any such incidents in the past. However, our third-party suppliers may experience strikes or other labour disruptions and shortages that could affect our operations, possibly for a significant period of time, result in increased wages, shortage in manpower and other costs and otherwise have a material adverse effect on our business, results of operations or financial condition. Additionally, our inability to recruit employees, in particular skilled employees and retain our current workforce could have a material adverse effect on our business, financial condition and profitability.

10. ***In the event we are unable to procure adequate amounts of raw materials, at competitive prices our business, results of operations and financial condition may be adversely affected.***

We are dependent on suppliers for our raw materials requirements and we do not have any long-term supply agreements or commitments in relation to the same or for any other raw materials used in our manufacturing process and typically transact on an invoice basis for each order. There can be no assurance that there will not be a significant disruption in the supply of raw materials or finished products from current sources or, in the event of a disruption, that we would be able to locate alternative suppliers of materials or third-party manufacturers of comparable quality on terms acceptable to us, or at all. Identifying a suitable supplier involves a process that requires us to become satisfied with their quality control,

responsiveness and service, financial stability and labour and other ethical practices. Consequently, we are also exposed to price fluctuations in yarn, grey cloth and other raw materials, and these fluctuations may adversely impact our ability to obtain orders and/or to execute them in a timely manner, which would have a material adverse effect on our business, results of operations and financial condition.

In case of non-availability of raw materials on favourable terms, we may have to procure the same at the terms and conditions prevalent at that point. This will result in reducing our margin by a considerable amount in the event we are not able to pass on the additional cost to the customers. Any delay, interruption or increased cost in the supply of yarn / fabric arising from a lack of long-term contracts could have an adverse effect on our ability to meet customer demand for our products and result in lower operating margin from operations both in the short and long term.

11. ***Our Company has reported certain negative cash flows from its investing and financing activities, details of which are given below. Sustained negative cash flow could impact our growth and business in the future.***

Our Company had reported certain negative cash flows from its investing and financing activities in the previous years as per the restated financial statements and the same are summarized as under:

Particulars	For period ended November 30, 2018	For the year ended March 31		
		2018	2017	2016
Net Cash Flow from/ (used in) Operating Activities	-232.80	1,086.07	866.86	747.40
Net Cash Flow from/ (used in) Investing Activities	-332.54	-1,307.50	-374.58	-484.48
Net Cash Flow from/ (used in) Financing Activities	542.38	251.92	-558.72	-159.57

For details, please refer “*Management’s Discussion and Analysis of Financial Conditions and Results of Operations of our Company*” on page no. 163 of this Prospectus.

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If our Company is not able to generate sufficient cash flows, it may adversely affect our business and financial operations.

12. ***Any disruption in operations of our manufacturing facility may have an adverse effect on our business, results of operations and financial condition.***

Our manufacturing facilities are subject to various operating risks including some which are beyond their control, such as the breakdown and failure of equipment, industrial accidents, employee unrest, severe weather conditions and natural disasters. Further, any non-compliance by us with the applicable laws, including environmental laws, may result in a shutdown of our facility and may adversely affect our operations. In case, we face any disruption in the operation of our manufacturing facility, we may be required to arrange for alternate manufacturing which will ultimately have an adverse effect on our business, results of operations and financial condition.

13. ***Substantial portion of our revenues has been dependent upon our few clients. The loss of any one or more of our major clients would have a material effect on our business operations and profitability.***

Our customers include various distributors that market our products and direct sellers. For the financial year ended March 31, 2018 and for eight months period ended November 30, 2018, our top ten clients accounted for approximately 40.09% and 57.83% of our total revenue respectively. The loss of any significant client would have a material effect on our financial results. We cannot assure you that we can maintain the historical levels of business from these clients/distributors or that we will be able to replace these clients/distributors in case we lose any of them. Furthermore, major events affecting our clients, such as bankruptcy, change of management, mergers and acquisitions could impact our business. If any of our

major clients becomes bankrupt or insolvent, we may lose some or all of our business from that client and our receivable from that client would increase and may have to be written off, impacting our income and financial condition.

14. ***We do not have any agreement with the third-party service providers to whom we outsource some processes like dyeing and other allied work; consequently, we are exposed to price and supply fluctuations for the same.***

Our Company's management is of the view that certain process like dyeing and other chemical related work on grey fabric and finished fabric may be outsourced at a cheaper rate. Thus we outsource such operational activities to third parties associated with us on invoice basis and we have no agreements with them. Further, we cannot assure you that our third-party service providers will continue to be associated with us on reasonable terms, or at all. Since such third-party service providers are not contractually bound to deal with us exclusively, we may face the risk of our competitors offering better terms to such third-party service providers, which may cause them to cater to our competitors alongside, or even instead of us. Also, in the absence of any contract, they may discontinue their job-work on a short notice and our production process may be stalled or hindered due to this. Consequently, we may be exposed to price and supply fluctuations in these areas which may have a material effect on our business, results of operations and financials.

15. ***We have in the past entered into related party transactions and may do so in the future. We cannot assure you that we could not have achieved more favourable terms if such transactions had not been entered into with related parties.***

We have entered into various transactions with related parties including our Group Companies and Promoter Group. While we believe that all such transactions have been conducted on an arm's length basis and contain commercially reasonable terms, we cannot assure you that we could not have achieved more favourable terms had such transactions been entered into with unrelated parties. It is likely that we may enter into related party transactions in the future. Such related party transactions may potentially involve conflicts of interest. We cannot assure you that such transactions, individually or in the aggregate will not have an adverse effect on our business, results of operations, cash flows and financial condition resulting from potential conflict of interest or otherwise.

16. ***Our operations are subject to high working capital requirements. Our inability to maintain sufficient cash flow, credit facilities and other sources of funding, in a timely manner, or at all, to meet requirement of working capital or pay out debts, could adversely affect our operations.***

Our business requires significant amount of working capital. Major Portion of our working capital is utilized towards debtors and inventory. We have a sanctioned limit for working capital of ₹ 3250 lakhs from the existing bankers / financial institutions. Our growing scale and expansion, if any, may result in increase in the quantum of current assets. Our inability to maintain sufficient cash flow, credit facility and other sourcing of funding, in a timely manner, or at all, to meet the requirement of working capital or pay out debts, could adversely affect our financial condition and result of our operations.

Further, we have high Debtors which may result in a high risk in case of non-payment by these Debtors. In the event we are not able to recover our dues from our Debtors, we may not be able to maintain our sales level and thus adversely affecting our financial health. If this situation persists, we may not be able to pay our lenders / creditors which may result in adversely affecting our operations and future prospects.

17. ***Non-compliance with and changes in, safety, health, labour and environmental laws and other applicable regulations, may adversely affect our business, results of operations and financial condition. If we fail to obtain, maintain or renew our statutory and regulatory licenses, permits and approvals required to operate our business, our business and results of operations may be adversely affected.***

Our operations including manufacturing activities undertaken by us are subject to extensive laws and government regulations, including in relation to safety, health and environmental protection. There is a risk that we may inadvertently fail to comply with such regulations, which could lead to enforced shutdowns and other sanctions imposed by the relevant authorities. We are also subject to the laws and regulations governing relationships with employees in such areas as minimum wages and maximum working hours,

overtime, working conditions, hiring and termination of employees, contract labour and work permits and maintenance of regulatory and statutory records and making periodic payments.

In addition, we are governed by various laws and regulations for our business and operations. We are required, and will continue to be required, to obtain and hold relevant licenses, approvals and permits at state and central government levels for doing our business. The approvals, licenses, registrations and permits obtained by us may contain conditions, some of which could be onerous. Additionally, we have applied and require to apply for renewal of certain approvals, licenses, registrations and permits, which expire or need to update pursuant to conversion of company from private to public Company and change in address in registered office of the Company. Furthermore, we cannot assure you that the approvals, licenses, registrations and permits issued to us will not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. Any suspension or revocation of any of the approvals, licenses, registrations and permits that has been or may be issued to us may affect our business and results of operations.

These laws and regulations governing us are increasingly becoming stringent and may in the future create substantial compliance or liabilities and costs. While we endeavour to comply with applicable regulatory requirements, it is possible that such compliance measures may restrict our business and operations, result in increased cost and onerous compliance measures, and an inability to comply with such regulatory requirements may attract penalty. For further details regarding the material approvals, licenses, registrations and permits, which have not been obtained by our Company or are, pending renewal, refer to the chapter titled “*Government and Other Statutory Approvals*” on page 176 of this Prospectus.

18. ***Any failure in our quality control processes may have an adverse effect on our business, results of operations and financial condition. We may face product liability claims and legal proceedings if the quality of our products does not meet our customers’ expectations.***

Our products may contain quality issues or undetected errors or defects, especially when first introduced or when new products are developed, resulting from the design or manufacture of the product or raw materials used in the product. We have implemented quality control processes and regularly conduct inspections of raw materials sourced from suppliers and finished products manufactured on the basis of our internal quality standards. Any shortcoming in the raw materials procured by us or in the production of our products due to failure of our quality assurance procedures, negligence, and human error or otherwise, may damage our products and result in deficient products. In the event the quality of our products is not in accordance with our standards or our products are defective, our customers may return our products, we may be required to recall or exchange such products at additional cost to us and our reputation may be impacted, which in turn may adversely affect our business, results of operations and financial condition.

We also face the risk of legal proceedings and product liability claims being brought against us by various entities including distributors, large format stores, and customers for defective products sold. We cannot assure you that we will not experience any material product liability losses in the future or that we will not incur significant costs to defend any such claims. A product liability claim may adversely affect our reputation and brand image, as well as entail significant costs.

19. ***Inventories and trade receivables form a major part of our current assets and net worth. Failure to manage our inventory and trade receivables could have an adverse effect on our net sales, profitability, cash flow and liquidity.***

Our Company’s business is working capital intensive and hence, inventories and trade receivables form a major part of our current assets and net worth. The results of operations of our business are dependent on our ability to effectively manage our inventory (raw material and finished goods) and trade receivables. To effectively manage our inventory, we must be able to accurately estimate customer demand and supply requirements and purchase new inventory accordingly. However, if our management misjudges expected customer demand, it could cause either a shortage of products or an accumulation of excess inventory. Further, if we fail to sell the inventory we manufacture or purchase, we may be required to write-down our inventory or pay our suppliers without new purchases, or create additional vendor financing, all of which could have an adverse impact on our income and cash flows.

To effectively manage our trade receivables, we must be able to accurately evaluate the credit worthiness of our customers and dealers and ensure that suitable terms and conditions are given to them in order to ensure our continued relationship with them. However, if our management fails to accurately evaluate the credit worthiness of our customers, it may lead to bad debts, delays in recoveries and / or write-offs which could lead to a liquidity crunch, thereby adversely affecting our business and results of operations. A liquidity crunch may also result in increased working capital borrowings and, consequently, higher finance cost which will adversely impact our profitability.

20. ***All our place of operations including our manufacturing facility is utilized by us on a leasehold basis. If we are unable to comply with the terms of these leases, renew our agreements or enter into new agreements on favourable terms, or at all, our business, results of operations and financial condition may be adversely affected.***

We do not own the premises from where we operate. We enter into both long term and short-term leases, which are renewable based on the terms of the agreement. Typically for the short term lease the lease is required to be renewed periodically. Our Company has obtained the property from where the registered office our manufacturing unit is operated on leasehold basis for the period of 7 years. Further, if we are required to relocate our manufacturing unit or other premises from where we operate as a result of any termination or non-renewal of our leases, we may incur additional cost as a result of such relocation. If we are unable to renew the agreements pursuant to which we occupy the premises on terms and conditions acceptable to us, or at all, we may have to relocate to other places. Any failure or difficulty faced by us in renewing leases, or disputes or other problems that we or our business partners may face in the future with lessees may affect our business and prospects. For further details of our Properties, please refer to section titled "Our Business" beginning on Page 83 of this Prospectus.

21. ***We are dependent on third party transportation providers for the delivery of raw materials and products. Accordingly, continuing increases in transportation costs or unavailability of transportation services for our products, as well the extent and reliability of Indian infrastructure may have an adverse effect on our business, financial condition, results of operations and prospects.***

We use third party transportation providers for the supply of most of our raw materials and for delivery of our products to our customers. Transportation strikes could have an adverse effect on our receipt of raw materials and our ability to deliver our products to our customers. Non-availability of trucks and railway could also adversely affect our receipt of raw materials and the delivery of our products. In addition, transportation costs in India have been steadily increasing over the past several years. While usually the end consumer bears the cost, we may not always be able to pass on these costs to our customers. Continuing increases in transportation costs or unavailability of transportation services for our products may have an adverse effect on our business, financial condition, results of operations and prospects.

22. ***The success of our business operations depends largely upon our Promoter Directors and Key Managerial Personnel, the loss of any of them may negatively impact our business operations and financial conditions.***

Our success is highly dependent on the expertise and services of our Promoter Directors, Rahul Hemraj Oswal and Vishal Hemraj Oswal, and other key managerial personnel. Our ability to successfully function and meet future business challenges partly depends on our ability to attract and retain these key managerial personnel. We believe that our relation with our Promoters, who have rich experience in setting up business, developing markets, managing customers and handling overall businesses, has enabled us to experience growth and profitability. We benefit from our relationship with our Promoters and our success depends upon the continuing services of our Promoters who have been responsible for the growth of our business and are closely involved in the overall strategy, direction and management of our business. Further, our Promoters have also promoted other companies / firms / ventures and may continue to do so. If they divert their attention to the other companies, we may not be able to function as efficiently and profitably as before. We may have to incur additional costs to replace the services of our promoters or we may not be able to do so at all, which could adversely affect our business operations and affect our ability to continue to manage and expand our business.

Further, we also depend significantly on our Key Managerial Persons for executing their day to day activities. If our Promoters / Directors or any member of the senior management team is unable or unwilling to continue in his present position, we may not be able to replace him easily or at all, and our business, financial condition, results of operations and prospects may be materially and adversely affected.

23. ***In the event our marketing initiatives do not yield intended results our business and results of operations may be adversely affected.***

We believe that the recognition and reputation of our brands has contributed to the growth of our business. We intend to continue to enhance the brand recall of our products through the use of targeted marketing and public relations initiatives. In order to maintain and enhance such recognition and reputation, we may be required to invest significant resources towards marketing and brand building exercises, specifically with respect to new products we launch or for geographic markets where we intend to expand our operations. We incur advertising and marketing expenses to increase brand recall and capture additional demand, and in the event they do not yield their intended results, or we are required to incur additional expenditures than anticipated, our business and results of operations may be adversely affected.

24. ***Our Company if not able to manage our growth or to successfully implement our business plan could have an effect on our business, results of operations and financial condition.***

The success of our business will depend greatly on our ability to effectively implement our business and growth strategy. If our Company is not able to execute our strategy on time and within our estimated budget, or that our expansion and development plans fail to generate the required results, it may adversely impact our profitability. Further, our growth strategies could place significant demand on our management team and other resources and would require us to continuously develop and improve our operational, financial and other controls, none of which can be assured. Any failure on our part to scale up our infrastructure and management could cause disruptions to our business and could be detrimental to our long term business outlook. Further, we operate in a highly dynamic industry, and on account of changes in market conditions, industry dynamics, technological improvements or changes in trends and fashions and any other relevant factors, our growth strategy and plans may undergo changes or modifications, and such changes or modifications may be substantial, and may even include limiting or foregoing growth opportunities if the situation so demands. Our inability to implement our business strategies and sustain our growth may impair our financial growth and thus result in an adverse impact on our Company's share price.

25. ***The Company under Export Promotion Capital Goods (EPCG) scheme has imported machinery for manufacturing at zero duty and is subject to an export obligation saved on the machines imported under EPCG scheme, to be fulfilled in 6 years from the respective date of import.***

The Company has availed the benefit of duty-free import of machinery for manufacturing under EPCG Scheme of Government of India. As per the list compiled by the Company, there is an export obligation for the Company during next few years. The Company has not yet completed its export obligation of US\$ 1271403.43 (₹879.43 lakhs in rupee terms considering RBI currency reference rate of 1\$=₹69.17 as on March 29, 2019) pending till date. In case the Company, fails to fulfil the said obligation, the exemption on duty availed may be reversed and evolve upon the Company as a liability to pay, thus affecting the financials in the year/s it devolves.

26. ***Conflicts of interest may arise out of common business objects shared by our Company and our Promoter Company.***

Some of our Promoter Group companies are engaged to carry out common business objects with our Company. There can be no assurance that our Promoter Company will not compete with our existing business or any future business that we may undertake or that their interests will not conflict with ours. Any such conflicts could have a material adverse effect on our reputation, business, results of operations and financial condition.

27. ***We have significant power requirements for continuous running of our factories. Any disruption to our operations on account of interruption in power supply or any irregular or significant hike in power tariffs may have an effect on our business, results of operations and financial condition.***

Our factories and offices have significant electricity requirements and any interruption in power supply to our factories and offices may disrupt our operations. Our business and financial results may be affected by any disruption of operations. We depend on third parties for majority of our power requirements. Since we have significant power consumption, any unexpected or significant increase in its tariff can increase the operating cost of factories and offices and production cost which we may not be able to pass on to our customers.

28. ***Our Company's manufacturing activities are labour intensive and depend on availability of skilled and unskilled labourers in large numbers. In case of unavailability of such labourers and / or inability to retain such personnel, our business operations could be affected.***

Our Company has employed 200 employees all of whom are on our payrolls. The above includes employees in the top and middle management (including Executive Directors), and also employees who are part of manufacturing unit and office staff. Our operations and performance are labour intensive and depends on our ability to identify, attract and retain both skilled and unskilled labour. In case such labour is unavailable or we are unable to identify and retain such labourers, our business could be adversely affected. Further, there are instances where we need to hire additional labour/job-workers on assignment basis or daily wages, either for specialized jobs or during periods of high manufacturing. We have not entered into any agreement for hiring additional labourers and thus availability of appropriately skilled labour cannot be guaranteed. Any failure to hire the appropriate labour may impact the operations and impair our client relations.

29. ***We have high financial indebtedness which could adversely affect our financial condition and results of operations and further we may not be able to meet our obligations under the debt financing agreements.***

Our total outstanding debt as on February 28, 2019 is ₹ 5562.76 lakhs consisting of ₹4126.43 lakhs of secured loans and ₹ 1436.33 lakhs of unsecured loans (including unsecured loan of ₹984.94 lakhs from Directors & other related parties). If we fail to meet our debt servicing obligations under our financing documents, the relevant lenders could declare us to be in default, accelerate the maturity of our obligations or takeover our project or even sell our Company's movable and immovable assets. We cannot assure investors that in the event of any such acceleration we will have enough resources to repay these borrowings. Failure to meet obligations under debt financing agreements may have an adverse effect on our cash flows, business and results of operations. Our ability to meet our debt service obligations and to repay our outstanding borrowings will depend primarily upon the cash flows generated by our business. We cannot assure you that we will generate enough cash to enable us to service existing or proposed borrowings. Incurring significant indebtedness may limit our flexibility in planning for or reacting to changes in our business & industry and limit our ability to borrow additional funds. For further details please refer the chapter "Financial Indebtedness" on page no. 159 of this Prospectus.

30. ***Our Group Company have incurred losses in past and any operating losses in the future could affect the results of operations and financial conditions of our group companies.***

The details of profit and loss of our Group Company in past three years are as follows:-

Name of the Group Company	Profit/ (Loss) for the year ended		
	March 31, 2018	March 31, 2017	March 31, 2016
Manndola E-Trade Private Limited	6.46	4.68	(10.16)
Roman Apparels Private Limited	(26.98)	(12.64)	26.23

(₹ in Lakhs)

Any operating losses could affect the overall operations and financial conditions of the Group. For more information, regarding the Company, please refer chapter titled "Our Group Companies" beginning on page 179 of this Prospectus.

31. ***The insurance coverage taken by our Company may not be adequate to protect against certain business risks and this may have an adverse effect on the business operations.***

Operations in our business carry inherent risks of personal injury, damage to or destruction of property,

plant and equipment and damage to the environment, and are subject to risks such as fire, theft, flood, earthquakes and terrorism. We maintain insurance coverage, in amounts which we believe are commercially appropriate, including insurance against damage, loss of profit and business interruption.

However, such insurance may not be adequate to cover all losses or liabilities that may arise from our operations, including when the loss suffered is not easily quantifiable and in the event of severe damage to our reputation. Even if we have made a claim under an existing insurance policy, we may not be able to successfully assert our claim for any liability or loss under such insurance policy. Additionally, there may be various other risks and losses for which we are not insured, either because such risks are uninsurable or not insurable on commercially acceptable terms. In addition, in the future, we may not be able to maintain insurance of all types which we deem necessary or adequate or at rates which we consider reasonable. The occurrence of an event for which we are not adequately or sufficiently insured or the successful assertion of one or more large claims against us that exceed available insurance coverage, or changes in our insurance policies (including premium increases or the imposition of large deductible or coinsurance requirements), could have an adverse effect on our business, reputation, results of operations, financial condition and cash flows.

32. *We face foreign exchange risks that could affect our results of operations*

We face foreign exchange rate risk to the extent that certain of our revenues are denominated in a currency other than the Indian Rupee. Due to our foreign currency exposures, exchange rate fluctuations between the Indian Rupee and foreign currencies, especially the U.S. dollar, can have a material impact on our results of operations, cash flows and financial condition. The exchange rate between the Indian Rupee and U.S. dollar has been volatile in recent periods and may continue to fluctuate in the future.

33. *Any failure to comply with financial and other restrictive covenants imposed on us under our financing agreements may affect our operational flexibility, business, results of operations and prospects.*

As on February 28, 2019, we have sanctioned secured borrowings from banks and financial institutions amounting to ₹ 4,676.71 Lakhs of which ₹ 4126.43 Lakhs remains outstanding. Our financing agreements contains certain restrictive covenants and require us to obtain the consent of, or to intimate, our lenders for certain actions including change in shareholding or directorship of our Company, drawdown of further loans, or taking up a new scheme of expansion or line of business, issuance of guarantees, and for certain corporate actions. Our failure to comply with financial or restrictive covenants or periodic reporting requirements or to obtain our lenders' consent to take certain actions in a timely manner or at all may result in declaration of an event of default by any current or future lenders, which may accelerate repayment or increase applicable interest rates or trigger cross-default or cross-acceleration under other financing agreements. The termination of, or declaration or enforcement of default under, any current or future financing agreement (if not waived or cured) may affect our ability to raise additional funds or renew maturing borrowings to finance our existing operations and pursue our growth initiatives and, therefore, influence our business, results of operations and prospects.

34. *Increases in interest rates may materially impact our results of operations.*

Substantially all of our secured debt carries interest at floating interest rates or at rates that are subject to adjustments at specified intervals. We are exposed to interest rate risk in respect of contracts for which we have not entered into any swap or interest rate hedging transactions, although we may decide to engage in such transactions in the future. We may further be unable to pass any increase in interest expense to our existing customers. Any such increase in interest expense may have a material effect on our business, financial condition, results of operations and cash flows. Furthermore, if we decide to enter into agreements to hedge our interest rate risk, there can be no assurance that we will be able to do so on commercially reasonable terms, that our counterparties will perform their obligations, or that these agreements, if entered into, will protect us fully against our interest rate risk.

35. *Accidents could result in the slowdown or stoppage of our operations and could also cause damage to life and property.*

We endeavour to meet necessary safety standards in relation to our operations at our facility. However,

certain accidents or mishaps may be unavoidable or may occur on account of negligence or human error in complying with the prescribed safety standards or for other reasons. Such accidents or mishaps may result in, amongst others, an action of tort being initiated against us. Therefore, although we take steps to ensure safety, accidents, including human fatalities, may occur and there can be no assurance that our safety measures and the precautions undertaken will be completely effective or sufficient. Further, if we fail to maintain adequate insurance cover in relation to the foregoing, a claim filed by us with our insurer is rejected, a loss occurs, which does not fall under the insurance cover maintained by us, or our claim is subject to any deductible or delay in settlement, amongst other things, our exposure will increase. Any accident at our area of operations could also harm our reputation. Such accidents may have an impact on our business.

36. ***In addition to normal remuneration, other benefits and reimbursement of expenses some of our Directors are interested in our Company to the extent of their shareholding and dividend entitlement in our Company.***

Some of our Directors are interested in our Company to the extent of their shareholding and dividend entitlement in our Company, in addition to normal remuneration or benefits and reimbursement of expenses. We cannot assure you that our Directors would always exercise their rights as Shareholders to the benefit and best interest of our Company. As a result, our Directors will continue to exercise significant control over our Company, including being able to control the composition of our board of directors and determine decisions requiring simple or special majority voting, and our other Shareholders may be unable to affect the outcome of such voting. Our Directors may take or block actions with respect to our business, which may conflict with our best interests or the interests of other minority Shareholders, such as actions with respect to future capital raising or acquisitions. We cannot assure you that our Directors will always act to resolve any conflicts of interest in our favour, thereby affecting our business and results of operations and prospects.

37. ***Our business operations may be materially affected by strikes, work stoppages or increased wage demands by our employees or those of our suppliers.***

We have not experienced any major disruptions to our business operations due to disputes or other problems with our work force in the past, there can be no assurance that we will not experience such disruptions in the future. Such disruptions may affect our business and results of operations and may also divert the management's attention and result in increased costs.

India has stringent labour legislation that protects the interests of workers, including legislation that sets forth detailed procedures for the establishment of unions, dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. Although our employees are not currently unionized, there can be no assurance that they will not unionize in the future. If our employees unionize, it may become difficult for us to maintain flexible labour policies, and we may face the threat of labour unrest, work stoppages and diversion of our management's attention due to union intervention, which may have a material impact on our business, results of operations and financial condition. We are also subject to laws and regulations governing relationships with employees, in such areas as minimum wage and maximum working hours, overtime, working conditions, hiring and terminating of employees and work permits. Shortage of skilled personnel or work stoppages caused by disagreements with employees could have an effect on our business and results of operations.

38. ***Our growth and profitability depend on the level of consumer confidence and spending in India and the other jurisdictions in which we operate.***

Our results of operations are sensitive to changes in overall economic and political conditions that impact consumer spending. The textiles industry, in particular, is very sensitive to broad economic changes, and retail purchases tend to decline during recessionary periods. Substantially, all of our net revenues are derived from sales in India & exports sales to our overseas customers. Many factors outside of our control, including interest rates, volatility of the world's stock markets, inflation, tax rates and other government policies, and unemployment rates can affect consumer confidence and spending. The domestic and international political environments, including military conflicts and political turmoil or social instability, may also affect consumer confidence and reduce spending, which could in turn materially and affect our

growth and profitability.

39. ***Obsolescence, destruction, theft, breakdowns of our major plants or machineries or failures to repair or maintain the same may affect our business, cash flows, financial condition and results of operations.***

Obsolescence, destruction, theft or breakdowns of our major plants or machineries may significantly increase our machineries purchase cost and the depreciation of our plants and machineries, as well as change the way our management estimates the useful life of our plants and machineries. In such cases, we may not be able to acquire new plants or machineries or repair the damaged plants or machineries in time or at all, particularly where our plants or machineries are not readily available from the market or require services from original machinery manufacturers. Some of our major machineries or parts may be costly to replace or repair. We may experience significant price increases due to supply shortages, inflation, transportation difficulties or unavailability. Such obsolescence, destruction, theft, breakdowns, repair or maintenance failures or price increases may not be adequately covered by the insurance policies availed by our Company and may have an effect our business, cash flows, financial condition and results of operations. For further details of our Plant and Machineries, please refer to chapter titled “Our Business” beginning on page 83 of this Prospectus.

40. ***Marketing initiatives undertaken by us may turn out to be ineffective.***

Marketing initiatives is important for sale of our Products. This requires us to enhance our marketing strategies and experiment with new marketing methods to keep pace with industry developments and customer preferences. An inability to refine our marketing strategies or introduce targeted marketing campaigns in a cost-effective manner could reduce our market share, cause our net revenues to decline and negatively impact our profitability.

41. ***We may be unable to enforce our rights under some of our agreements with counterparties on account of insufficient stamping and non-registration or other reasons.***

A few of agreements including tripartite agreement dated July 13, 2018 between our Company, NSDL and Registrar to the Issue relating to dematerialisation of shares, lease agreement relating to marketing office and retail store executed by us are inadequately stamped. Inadequately stamped documents may be impounded by the appropriate authority. Such inadequately stamped or not registered documents may not be admissible in evidence in a court of law until the applicable stamp duty, with penalty, has been paid and registered, which could, therefore, impact our ability to enforce our rights under the agreements in a timely manner or at all. We cannot assure you that we would be able to enforce our rights under such agreements and any inability to do so, could impair our operations and affect our financial condition, cash flows and results of operation.

42. ***Our funding requirements and deployment of the issue proceeds are based on management estimates and actual cost may vary compared with the estimated amount.***

Our funding requirement and deployment of the proceeds of the issue are based on management estimates and our current business plan. The fund requirements and intended use of proceeds have not been appraised by banks or financial institutions and are based on our estimates. In view of the highly competitive nature of the industry in which we operate, we may have to revise our management estimates from time to time and, consequently, our funding requirements may also change as a result of various factors which may not be within the control of our management. This may entail rescheduling, revising or cancelling the planned expenditure and fund requirement and increasing or decreasing the working capital limits maintained from time to time at the discretion of our board. In addition, schedule of implementation as described herein are based on management’s current expectations and our subject to change due to various factors some of which may not be in our control. The deployment of the funds towards the objects of the issue is entirely at the discretion of the Board of Directors and is not subject to monitoring by external independent agency. However, the deployment of funds is subject to monitoring by our Audit Committee.

43. ***We have not received the No objection Certificate (NoCs) and consent letter for the proposed Issue from few of our lenders as may be required under the terms of our loan agreements.***

We have obtained certain borrowing from our lenders under the respective loan agreements which require us to obtain no objection certificates regarding various corporate actions including fund raising and change in capital structure. We have received NoCs and consents from all the lenders except few unsecured lenders for the proposed Issue as on the date of filing this Prospectus. Although, we have applied to these lenders we have not received NoCs from these lenders as on date of this Prospectus. In the event these lenders reject our application, it may affect our liquidity/ resources position to the extent of current outstanding with these lenders.

External Risks

44. *Economic or other factors that are beyond our control may have an adverse impact on our business, financial condition, results of operations and prospects.*

We are incorporated in India, and all of our assets and employees are located in India. As a result, we are dependent on prevailing economic conditions in India and our results of operations are significantly affected by factors influencing the Indian economy. A slowdown in the Indian economy could adversely affect our business, including our ability to grow our assets, the quality of our assets, and our ability to implement our strategy. Factors that may adversely affect the Indian economy, and hence our results of operations, may include:

- any increase in interest rates may adversely impact our access to capital and increase our borrowing costs;
- any downgrade of India's sovereign rating by international credit rating agencies;
- political instability, resulting from a change in government or in economic and fiscal policies;
- any natural calamities such as earthquakes, tsunamis, floods and droughts;
- any civil unrest, acts of violence, terrorist attacks, regional conflicts or situations; and
- other significant regulatory or economic developments in or affecting India

Any slowdown in the Indian economy or in the growth of the sectors we participate in or future volatility in global commodity prices could adversely affect our borrowers and contractual counterparties. This in turn could adversely affect our business and financial performance and the price of our Equity Shares.

45. *Significant differences exist between Indian GAAP and other accounting principles, such as US GAAP and IFRS, which may be material to investors' assessments of our financial condition. Our failure to successfully adopt IND(AS) may have an adverse effect on the price of our Equity Shares.*

Our financial statements, including the Restated Financial Statements provided in this Prospectus, are prepared in accordance with Indian GAAP. We have not attempted to quantify the impact of IFRS or U.S. GAAP on the financial data included in this Prospectus, nor do we provide a reconciliation of our financial statements to those of U.S. GAAP or IFRS. U.S. GAAP and IFRS differ in significant respects from Indian GAAP. For details, please refer "*Presentation of Financial, Industry and Market Data*" on page 14 of this Prospectus.

There are significant differences between Indian GAAP, Ind AS, US GAAP and IFRS. Accordingly, the degree to which the financial statements included in this Prospectus will provide meaningful information is entirely dependent on the reader's level of familiarity with Indian GAAP and Ind AS. Persons not familiar with Indian GAAP and Ind AS should limit their reliance on the financial disclosures presented in this Prospectus.

If our financial statements were to be prepared in accordance with such other accounting principles, our results of operations, cash flows and financial position may be substantially different. Prospective investors should review the accounting policies applied in the preparation of our financial statements and consult their own professional advisers for an understanding of the differences between these accounting principles and those with which they may be more familiar. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Prospectus should accordingly be limited. In making an investment decision, investors must rely upon their own examination of us, the terms of this Offer and the financial information contained in this Prospectus.

46. ***QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Applications (in terms of quantity of Equity Shares or the Application Amount) at any stage after submitting an Application.***

Pursuant to the SEBI (ICDR) Regulations, QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Applications (in terms of quantity of Equity Shares or the Application Amount) at any stage after submitting an Application and are required to pay the Application Amount upon submission of the Application. Events affecting the Applicants' decision to invest in the Equity Shares, including material adverse changes in international or national monetary policy, financial, political or economic conditions, our business and results of operations or financial condition may arise between the date of submission of the Application and Allotment. However, our Company may complete the Allotment of the Equity Shares even if such events occur, and QIBs and Non-Institutional Investors would not be able to withdraw or lower their Applications at any stage after submitting an Application.

47. ***Our future fund requirements, in the form of further issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the Shareholders depending upon the terms on which they are eventually raised.***

We may require additional capital from time to time depending on our business needs. Any further issue of Equity Shares or convertible securities would dilute the shareholding of the existing Shareholders and such issuance may be done on terms and conditions, which may not be favourable to the then existing Shareholders. If such funds are raised in the form of loans or debt or preference shares, then it may substantially increase our fixed interest/dividend burden and decrease our cash flows, thus adversely affecting our business, results of operations and financial condition.

Risk Factors Related to our Equity Shares

48. ***There is no existing market for our Equity Shares, and we do not know if such market will develop to provide you with adequate liquidity. Further, an active trading market for the Equity Shares may not develop and the price of the Equity Shares may be volatile.***

An active public trading market for the Equity Shares may not develop or, if it develops, may not be maintained after the Issue. Our Company, in consultation with the Lead Manager, will determine the Issue Price. The Issue Price may be higher than the trading price of our Equity Shares following this Issue. As a result, investors may not be able to sell their Equity Shares at or above the Issue Price or at the time that they would like to sell. The trading price of the Equity Shares after the Issue may be subject to significant fluctuations in response to factors such as, variations in our results of operations, market conditions specific to the sectors in which we operate, economic conditions of India and volatility in the stock price and trading pattern of our shares listed on the Stock Exchange and securities markets elsewhere in the world.

49. ***The price of the Equity Shares may be highly volatile after the Issue.***

The price of the Equity Shares on the Indian stock exchanges may fluctuate after this Issue as a result of several factors, including: volatility in the Indian and global securities market; our operations and performance; performance of our competitors and the perception in the market about investments in the agro inputs industry; adverse media reports on us or the Indian agro input industry; changes in the estimates of our performance or recommendations by financial analysts; significant developments in India's economic liberalization and deregulation policies; and significant developments in India's fiscal and environmental regulations. There can be no assurance that the prices at which the Equity Shares are initially traded will correspond to the prices at which the Equity Shares will trade in the market subsequently.

50. ***There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.***

Subsequent to listing, our Company will be subject to a daily circuit breaker imposed on listed companies by all stock exchanges in India which does not allow transactions beyond certain volatility in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on our Company's

circuit breaker is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchanges are not required to inform our Company of the percentage limit of the circuit breaker from time to time and may change it without its knowledge. This circuit breaker would effectively limit the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, there can be no assurance regarding the ability of shareholders to sell the Equity Shares or the price at which shareholders may be able to sell their Equity Shares.

51. *Under Indian law, foreign investors are subject to investment restrictions that limit our ability to attract foreign investors, which may adversely impact the trading price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the valuation and reporting requirements specified by the RBI. If a transfer of shares is not in compliance with such valuation and reporting requirements or falls under any of the specified exceptions, then prior approval of the RBI will be required. In addition, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no-objection or tax clearance certificate from the Indian income tax authority. We cannot assure that any required approval from the RBI or any other Government agency can be obtained on any particular terms or at all.

52. *Rights of shareholders under Indian law may differ or may be more limited than under the laws of other jurisdictions.*

The Companies Act and rules made thereunder, the rules and regulations issued by SEBI and other regulatory authorities, the Memorandum of Association, and the Articles of Association govern the corporate affairs of the Company. Indian legal principles relating to these matters and the validity of corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as a shareholder in India than as a shareholder of a corporation in another jurisdiction.

53. *Investors may be subject to Indian taxes arising out of capital gains on sale of Equity Shares.*

Under current Indian tax laws and regulations, capital gains arising from the sale of shares in an Indian company are generally taxable in India. Any gain realised on the sale of listed equity shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India if Securities Transaction Tax ("STT") has been paid on the transaction. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Any gain realised on the sale of equity shares held for more than 12 months to an Indian resident, which are sold other than on a recognised stock exchange and on which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realised on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India. Capital gains arising from the sale of the Equity Shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares.

INTRODUCTION OF TEXTILE & APPAREL INDUSTRY

The Indian textile industry exhibits rich cultural heritage of India with wide variety of fabrics, techniques and hues that reflect the diverse set of people and traditions across the country. One of the oldest industries in India, it covers an extensive spectrum of segments, from hand woven/ hand-spun, unorganized segment on one end to capital and technology intensive organized segment on the other. India is the largest producer of Jute in the world and is the second largest producer of silk and cotton globally.

This sector offers tremendous employment opportunities for people, especially in the rural regions. The textile sector in India accounts for 10% of the country's manufacturing production, 5% of India's GDP, and 13% of India's exports earnings. Under Union Budget 2018-19, Government of India allocated around Rs 7,148 crore (US\$ 1.1 billion) for the textile industry.

Efforts are being made to restore glory of cottage based traditional sectors like handlooms, handicrafts, jute and wool through an integrated approach covering entire value chain.

To provide encouragement to textile manufactures and farmers of raw materials, the government has been providing incentives like minimum support price to cotton farmers, upgrading the technology for handloom weavers and providing centres for trade facilitation. The emphasis on the handloom brand, such as through the National Handloom Day and launch of the 'India Handloom Brand,' has been pivotal in reviving the sector, making it technology driven, and positioning it in mainstream fashion. This is encouraging the youth to wear more handloom products, hence increasing the market reach for these products.

The power-loom industry is also growing, with incentives like financial assistance for upgrading the technology. Funds up to 50% of the cost of the up gradation are being provided by the Government.

Global Women's Wear Market

The global women's wear market has shown rapid growth as fashion trends, which are the most important aspects of women's wear, are changing rapidly. Europe is the largest market of women's wear followed by North America and Asia Pacific respectively. Asia Pacific is expected to be the fastest growing market for women's wear as it comprises some of the emerging economies with a very high proportion of middle-class with significant disposable income.

An overview of the women's wear market in India

Indian Apparel Market

The Indian apparel market can be broadly classified into three broad categories; men's wear, women's wear and kid's wear.

Women's Wear in India

Women's wear segment of the market is mostly dominated by unorganised players. But, recently many organised players have started showing interest in this segment. These organised players have realised the market potential and have aggressively grown over a short span of time with the help of e-commerce and other disruptive distribution channels. Increase in number of working women has resulted in increase in disposable income which in turn has fuelled this market segment. Globalisation coupled with fast fashion has resulted in awareness on fashion trends and styling. We believe Women's wear market will also see a paradigm shift from non-branded to branded and ethnic wear to western wear as well in near future.

Key Categories in Women's Wear in India

Women's wear in India can be broadly classified into four categories:

- Ethnic Wear
- Western Wear
- Indo Western Wear
- Innerwear

Ethnic Wear

The women's ethnic wear can be further sub divided into three major categories: sarees, salwar kameez and blouse-petticoats. The saree is perhaps the quintessential Indian dress for women's. It is the most widely accepted women's wear in India. Though a market shift is expected from saree to salwar kameez or western wear in urban and semi-urban markets, saree will still remain as the predominant category among elderly and middle-aged women across urban and rural India.

Surat, Varanasi, Ahmedabad and Mumbai are some of the major manufacturing hubs of saree.

Salwar kameez is another dominating category in ethnic wear. The comfort level provided by salwar kameez has made it popular among the working women. But, it has started facing stiff competition from western wear. The increasing number of working women in the country and their shift from ethnic to western formal or western casual has led to an increase in the competition for ethnic wear in urban areas. In rural India, salwar kameez is still the most preferred choice of young women.

Indo-Western Wear

The increased competition from western wear has resulted in a new category, Indo-western. It is a blend of both ethnic and western. This category has gained popularity in the urban areas of the country. Brands have realised that a mix of both western and ethnic is accepted by today's women and hence most modern players have come with unique designs which are a perfect mix of ethnic and western. The growing publicity of Indian fashion in the western nations, the integration of women's clothing designs has become inevitable. Comfort comes first while selecting attires. Sarees being formal wear are time consuming to drape. Indo-western attires are so comfortable that women love to wear them. Basically, these attires come as full stitched or semi-stitched.

A quintessential clothing item of Indo-western ensemble is the trouser suit, which is a short kurta with straight pants with or without a dupatta. Newer designs often feature sleeveless tops, short dupattas and pants with slits. Additional examples of the fusion that Indo-western clothing represents include wearing jeans with a kurta, adding a dupatta to a western-style outfit and wearing a lehenga (long skirt) with a tank top or halter top.

Innerwear

The women's innerwear category is another promising category in the women's wear market. Brassieres, panties and camisoles, etc., are the key sub categories of women's inner wear category.

Women's Western Wear

Women's western wear can be further classified into casual western wear and formal western wear.

Denims are the most popular casual wear product among women. Initially, the denim brands used to focus primarily on the men consumers, but with the change in the demand and preferences of women, they started catering to women consumers as well. Of late, stretch denims have seen a huge demand among women.

Women's t-shirts and tops categories are also growing fast owing to increasing participation of women in workforce and a generic inclination for western wear categories. Another promising segment in western wear is formal wear. The increasing number of working women has led to the demand of formal attire. The companies have started realising the need of the hour and have shifted their focus on tapping this segment. Today's working woman is very much concerned with her image. She is ready to experiment and does not want to lag behind in this fashion era. Ranging from business formals to smart casuals to Friday dressing, women are concerned how they look at their workplace. This has provided sufficient market space to companies to explore several options in this segment. Western formal attire is one of the fastest growing segments.

The emergence of e-commerce has given a boost to the fashion retail market. This market platform has provided an easy and less time-consuming option in the hustle bustle of today's world. The increasing number of working women, with less time to shop has found an easy mode of purchasing.

Outlook

The women's wear market in India is emerging as a high growth potential market. International players are showing interest and it is becoming more organised. It is also estimated that it will grow at a higher rate than men's wear in the country.

The increasing penetration of Internet, the increasing purchasing power of the women, high brand consciousness and fashion sense has made e-commerce an important medium of shopping. Women have become ready to experiment with fashion. They are exploring options based not only on the value but also on the brand. E-tailing is also gaining popularity among women, which is seeing great future prospects. Many online platforms are also coming with ideas of providing customisation to Indian women, when it comes to western formal wear.

Therefore, it will not be incorrect to say that Indian women's wear market will see some major changes in the near future.

Our Manufacturing Process

There are different stages that are involved in our manufacturing process, each stage is crucial and of utmost importance for the product to have its required quality and standard. We ensure quality control check at each of the manufacturing stages. Our manufacturing process consists of the following stages:

Concept & product development

We endeavour to carry out detailed analysis of consumer preferences by understanding the range of sale of products, regional preferences, fashion trends etc. At this stage, print inspiration may also be utilised by our in-house design development team. We then select trends that seem relevant for our brands and once we have developed a story or concept, we commence development of textile designs.

Development & selection of designs, patterns and colour variants

Our CAD designers develop designs and colour combinations in electronic form. Thereafter, we commence development of textile design, by developing the 'paper-doll' presentations, where the entire collection is made on paper and presented to members of our sales, sourcing, planning and marketing teams for obtaining feedback. Upon receipt of the feedback, our design team comprising of skilled designers and craftsmen, finalizes the design.

Sample production

After finalizing the design, we commence manufacturing of the sample product which is reviewed by our sampling team. Sampling is back and forth process, there may come possibility of alterations. Thereafter, catalogue management team finalizes the designs and its colour variants to create a catalogue and handed over it to production team for its further planning.

Shooting of catalogue garments

Once the sample product is approved for commercial production, we schedule a photo-shoot with such sample product to prepare the product catalogue. The catalogue is a major promotional tool for sale of our products.

Production planning

The production planning is an important role in the manufacturing process. At this stage, the volume of product and time required for production is accessed and decided according to the estimated price range.

Grey purchase and processing

On the basis of the product planning, we procure the basic raw material i.e. grey fabric in bulk as per our weaving quality specifications from our raw material suppliers. Grey fabric is then processed for printing and dyeing. After purchase, the grey fabric is treated with a white chemical coat which strengthens the fabric for dyeing and printing in order to enable it to sustain the inks, chemicals and prints to be used further.

Fabric dyeing

The dyeing process then starts with the application of dyestuff solution in hydraulic jiggers by an exhaustion method and is further processed using automatic and semi-automatic machines.

Digital printing

Once the dyeing of fabric is completed then the fabric is sent for printing. We use digital printing machines wherein the printing designs are developed electronically by our design development team. Once the fabric is printed, it is steamed and then washed using water softening, washing agents and chemical coating.

Fabric post process

Thereafter, the fabric is passed through stenter machine wherein the desired feel is derived.

Value addition Work

Once the fabric is ready to be worked upon, the value addition to the fabric is carried out by the skilled job-workers manually and by using various machines such as stone raising machines, laser machine etc. Value-addition covers various process including embroidery, stone fixing, laser cutting, addition of patches, manual thread and design work.

Fabric cutting

After value-addition, the fabric (in the form of roll batch) undergoes the process of cutting and becomes ready for individual piece assembly as per the product specification.

Garmenting

Garmenting is the process where the individual piece assembly is stitched along with additional accessories to finalise the apparel.

Packaging and storage

The finished apparel is packed as per the quality standards of the Company and is stored in our manufacturing facility to be dispatched to our customers.

The Minimum Wages Act, 1948

The Minimum Wages Act, 1948 ("**MW Act**") came in to force with the objective to provide for the fixation of a minimum wage payable by the employer to the employee. Under the MW Act, the appropriate government is authorised to fix the minimum wages to be paid to the persons employed in scheduled or non scheduled employment. Every employer is required to pay not less than the minimum wages to all employees engaged to do any work whether skilled, unskilled, and manual or clerical (including out-workers) in any employment listed in the schedule to the MW Act, in respect of which minimum rates of wages have been fixed or revised under the MW Act.

The Payment of Gratuity Act, 1972

III. Tax Laws

Income Tax Act, 1961

The Income Tax Act, 1961 ("**IT Act**") deals with the taxation of individuals, corporate, partnership firms and others. As per the provisions of the IT Act the rates at which they are required to pay tax is calculated on the income declared by them or assessed by the authorities, after availing the deductions and concessions accorded under the IT Act. The maintenance of books of Accounts and relevant supporting documents and registers are mandatory under the IT Act. Filing of returns of Income is compulsory for all assesses.

The Central Goods and Services Tax Act, 2017 (the "GST Act")

The Government of India proposed a comprehensive national goods and services tax ("**GST**") regime that would combine taxes and levies by the Central and State Governments into a unified rate structure. In this regard, the Constitution (101 Amendment) Act 2016, which received presidential assent on September 8, 2016, enabled the Government of India and State Government to introduce GST. Accordingly, GST was enacted to make a provision for levy and collection of tax on supply of goods or services or both and was made effective from July 1, 2017.

GST is a destination-based tax levied on supply of goods and services. GST is levied on all transactions such as sale, transfer, purchase, barter, lease, or import of goods and/or services. India adopted a dual GST model, meaning that taxation is administered by both the Union and State Governments. Transactions made within a single state are levied with Central GST (CGST) by the Central Government and State GST (SGST) by the Government of that State. For inter-State transactions and imported goods or services, an Integrated GST (IGST) is levied by the Central Government. GST will be levied on all stages of the supply chain till the final sale to consumers, providing ITC the supply chain. There will be four tax rates namely 5%, 12%, 18% and 28%. The rates of GST applied are subject to variations based on the goods or services.

IV. Environment Laws

The three major statutes in India which seek to regulate and protect the environment against pollution and related activities in India are the Water (Prevention and Control of Pollution) Act 1974, the Air (Prevention and Control of Pollution) Act, 1981 and the Environment (Protection) Act, 1986. The basic purpose of these statutes is to control, abate and prevent pollution. In order to achieve these objectives, Pollution Control Boards ("**PCB**") which are vested with diverse powers to deal with water and air pollution, have been set up in each state. The PCBs are responsible for setting the standards for maintenance of clean air and water, directing the installation of pollution control devices in industries and undertaking investigations to ensure that industries are functioning in compliance with the standards prescribed.

The Environment (Protection) Act, 1986

The Environment Protection Act ("**EPA**") has been enacted with the objective of protecting and improving the environment and for matters connected therewith. As per the EPA, the Central Government has been

given the power to take all such measures for the purpose of protecting and improving the quality of the environment and to prevent environmental pollution. Further, the Central Government has been given the power to give directions in writing to any person or officer or any authority for any of the purposes of the EPA, including the power to direct the closure, prohibition or regulation of any industry, operation or process.

The Water (Prevention and Control of Pollution) Act, 1974

The Water (*Prevention and Control of Pollution*) Act ("**Water Act**") prohibits the use of any stream or well for the disposal of polluting matter, in violation of the standards set out by the concerned PCB. The Water Act also provides that the consent of the concerned PCB must be obtained prior to opening of any new outlets or discharges, which are likely to discharge sewage or effluent. The Water (Prevention and Control of Pollution) Cess Act, 1977 ("**Water Cess Act**") and Water (Prevention and Control of Pollution) Cess Rules, 1978 ("**Water Cess Rules**").

The Water Cess Act has been enacted to provide for the levy and collection of a cess on water consumed by persons carrying on certain industries by local authorities constituted under the Water Act, with a view to augment the resources of the central and State PCBs for the prevention and control of water pollution. The Water Cess Rules have been notified under Section 17 of the Water Cess Act and provide, inter alia, for the standards of the meters and places where they are to be affixed and the furnishing of returns by consumers.

Air (Prevention and Control of Pollution) Act, 1981

The Air (Prevention and Control of Pollution) Act ("**Air Act**") requires that any industry or institution emitting smoke or gases must apply in a prescribed form and obtain consent from the state PCB prior to commencing any activity. The state PCB is required to grant, or refuse, consent within four months of receipt of the application. The consent may contain conditions relating to specifications of pollution control equipment to be installed.

V. Intellectual Property Laws

The Copyright Act, 1957

The Copyright Act, 1957 ("**Copyright Act**") governs copyright protection in India. Under the Copyright Act, a copyright may subsist in original literary, dramatic, musical or artistic works, cinematograph films, and sound recordings. While copyright registration is not a prerequisite for acquiring or enforcing a copyright in an otherwise copyrightable work, registration constitutes *prima facie* evidence of the particulars entered therein and may expedite infringement proceedings. Once registered, copyright protection of a work lasts for a period of sixty years from the demise of the author. Reproduction of a copyrighted work for sale or hire, issuing of copies to the public, performance or exhibition in public, making a translation of the work, making an adaptation of the work and making a cinematograph film of the work without consent of the owner of the copyright are all acts which amounts to an infringement of copyright.

The Trade Marks Act, 1999

Indian trademark law permits the registration of trademarks for goods and services. The Trade Marks Act, 1999 ("**Trademark Act**") governs the statutory protection of trademarks and for the prevention of the use of fraudulent marks in India. An application for trademark registration may be made by individual or joint applicants and can be made on the basis of either use or intention to use a trademark in the future. Once granted, trademark registration is valid for ten years, unless cancelled. If not renewed after ten years, the mark lapses and the registration have to be restored. The Trademark (Amendment) Act, 2010 has been enacted by the government to amend the Trademark Act to enable Indian nationals as well as foreign nationals to secure simultaneous protection of trademark in other countries. It also seeks to simplify the law relating to transfer of ownership of trademarks by assignment or transmission and to align the law with international practice.

VI. Other laws

The Indian Contract Act, 1872

The Indian Contract Act, 1872 ("**Contract Act**") codifies the way in which a contract may be entered into, executed, implementation of the provisions of a contract and effects of breach of a contract. A person is free to contract on any terms he chooses. The Contract Act consists of limiting factors subject to which contract may be entered into, executed and the breach enforced. It provides a framework of rules and regulations that govern formation and performance of contract. The contracting parties themselves decide the rights and duties of parties and terms of agreement.

The Specific Relief Act, 1963

The Specific Relief Act, 1963 ("**SR Act**") is complimentary to the provisions of the Contract Act and the Transfer of Property Act, as the Act applies both to movable property and immovable property. The SR Act applies in cases where the Court can order specific performance of a contract. Specific relief can be granted only for purpose of enforcing individual civil rights and not for the mere purpose of enforcing a civil law. 'Specific performance' means Court will order the party to perform his part of agreement, instead of imposing on him any monetary liability to pay damages to other party.

The Companies Act, 2013

The Companies Act, 2013 ("**CA 2013**") has been introduced to replace the existing Companies Act, 1956 in a phased manner. The Act primarily regulates the formation, financing, functioning and winding up of companies. The CA 2013 prescribes regulatory mechanism regarding all relevant aspects, including organizational, financial and managerial aspects of the company. It plays a fundamental role in protecting the investors and the shareholders and balances it with different aspects of company autonomy. The Ministry of Corporate Affairs has also issued Rules complementary to the Act, establishing the procedure to be followed by the companies in order to comply with the substantive provisions of the CA 2013.

Competition Act, 2002

The Competition Act, 2002 ("**Competition Act**") aims to prevent anti-competitive practices that cause or are likely to cause an appreciable adverse effect on competition in the relevant market in India. The Competition Act regulates anticompetitive agreements, abuse of dominant position and combinations. The Competition Commission of India which became operational from May 20, 2009 has been established under the Competition Act to deal with inquiries relating to anti-competitive agreements and abuse of dominant position and regulate combinations. The Competition Act also provides that the Competition Commission has the jurisdiction to inquire into and pass orders in relation to an anti-competitive agreement, abuse of dominant position or a combination, which even though entered into, arising or taking place outside India or signed between one or more non-Indian parties, but causes an appreciable adverse effect in the relevant market in India.

The Consumer Protection Act, 1986

The Consumer Protection Act ("**COPRA**") aims at providing better protection to the interests of consumers and for that purpose makes provisions for the establishment of authorities for the settlement of consumer disputes. The COPRA provides a mechanism for the consumer to file a complaint against a trader or service provider in cases of unfair trade practices, restrictive trade practices, defects in goods, deficiency in services; price charged being unlawful and goods being hazardous to life and safety when used. The COPRA provided for a three tier consumer grievance redressal mechanism at the national, state and district levels.

The Transfer of Property Act, 1882

The Transfer of Property Act, 1882 ("**TP Act**") as amended, establishes the general principles relating to transfer of property in India. It forms a basis for identifying the categories of property that are capable of

being transferred, the persons competent to transfer property, the validity of restrictions and conditions imposed on the transfer and the creation of contingencies and vested interest in the property. It also provides for the rights and liabilities of the vendor and purchaser in a transaction of sale of land.

The Registration Act, 1908

The Registration Act, 1908, as amended, has been enacted with the objective of providing public notice of the execution of documents affecting, *inter alia*, the transfer of interest in immovable property. The purpose of the Registration Act is the conservation of evidence, assurances, title and publication of documents and prevention of fraud. It details the formalities for registering an instrument. Section 17 of the Registration Act identifies documents for which registration is compulsory to bring the transaction to effect and includes, among other things, any non-testamentary instrument which purports or operates to create, declare, assign, limit or extinguish, whether in present or in future, any right, title or interest, whether vested or contingent, in any immovable property of the value of one hundred rupees or more, and a lease of immovable property for any term exceeding one year or reserving a yearly rent.

The Indian Stamp Act, 1899

Under the Indian Stamp Act, ("***Stamp Act***")1899, as amended stamp duty is payable on instruments evidencing a transfer or creation or extinguishment of any right, title or interest in immovable property. Stamp duty must be paid on all instruments specified under the Stamp Act at the rates specified in the schedules to the Stamp Act. The applicable rates for stamp duty on instruments chargeable with duty vary from State to State.

Shops and Commercial Establishments legislations in various states

Under the provisions of local shops and commercial establishment legislations applicable in the states in which establishments are set up, establishments are required to be registered under the respective legislations. Contravention to provision of shops and commercial establishment legislations may entail penalty including imprisonment along with fine. These legislations regulate the condition of work and employment in shops and commercial establishments and generally prescribe obligations in respect of registration, opening and closing hours, daily and weekly working hours, holidays, leave, health and safety measures and wages for overtime work, among others.

Municipality Laws

Pursuant to the Constitution (Seventy-Fourth Amendment) Act,1992 the respective state legislatures in India have power to endow the municipalities with power to implement schemes and perform functions in relation to matters listed in the Twelfth Schedule to the Constitution of India. The respective States of India have enacted laws empowering the municipalities to issue trade license for operating stores and implementation of regulations relating to such license along with prescribing penalties for non-compliance.

b. Factors that may affect our Results of operations

Points mentioned in the Risk Factors given in this Prospectus and other important factors could cause actual results to differ materially from the expectations including among others:

- **General economic and business conditions**

As our Company operating in India, we are affected by the general economic conditions in the country. The Indian economy has grown over the past several years. This improved performance was propelled by the growth in industrial activity due to liberal policies adopted by the Government of India promoting small and medium enterprises and increasing their contribution to GDP. The growth prospects of the business of our Company and our ability to implement the strategies will also be influenced by the macro economic growth.

- **Our ability to successfully implement our strategy and growth and expansion plans**

Our growth plans are extensive and would put significant demands on our management team and other resources. Any delay in implementation of our strategy and growth and expansion plans could impact our Company's roll out schedules and cause cost and time over runs affecting our operations.

- **Changes in laws and regulations that apply to the industry**

There are various laws and regulations applicable to our industry that we have to comply/ follow. These rules and regulations that we are bound to be compliant with tend to change over period of time. Failure to comply with changing laws and regulations or to obtain or renew the necessary permits and approvals may adversely affect our business.

- **Change in Technology**

Technology is a driving factor that affects overall operations in manufacturing Industry. In order to achieve Company's objectives, we constantly need to upgrade and apply improved technology. We are continuously emphasizing on significant upgradation of manufacturing facility to improve product quality and turnaround time. Any failure to update our facility with the latest technology might affect our scale of operations.

- **Changes in fiscal, economic or political conditions in India;**

External factors such as terrorist attacks, acts of war or geopolitical and social turmoil in India or certain parts of the world could constrain our ability to do business, increase the costs and negatively affect our financial performance.

- **Changes in the foreign exchange control regulations, tariffs and tax laws in India.**

We propose to strengthen our export segment in the future by adding more distributors and tapping new locations. Any change in the foreign exchange control regulation, tariffs and tax laws in India may affect our business plan of strengthening the exports, thus, affecting our operations.

- **Impact of changes in demand-supply**

Economic factors may have both positive as well as negative impacts on the apparel industry. During economic boom periods, people have more disposable income. Hence, the demand for clothing rises, leading to increase in sales for clothing manufacturers, wholesalers and retailers. However, during economic contractions, the effects are opposite. We have a well-diversified portfolio of clothes ranging from affordable clothing to premium clothing segment, thus, changes in demand may affect our operations to some extent.

Revenue from Operations: During the FY 2017-18, our revenue from Operations increased to ₹15,289.06 Lakhs from ₹13,438.82 Lakhs in FY 2016-17 i.e. an increase of approximately 14% on YoY basis. This was on account of backward integration in the manufacturing process leading to lesser turnaround time and increase in output as well as increase in sales price achieved in FY 2017-18 over FY 2016-17.

Other Income: Other Income during FY 2017-18 increased to 136.12 Lakhs from ₹ 63.45 Lakhs in FY 2016-17 accounting for a rise of 115% on YoY basis, such rise was on the accounts on TUF subsidy received during FY 2018.

Expenditure

Manufacturing Expenses: Our manufacturing expenses majorly comprises of cost of raw grey fabric, finished goods and other supplements required for manufacturing process. There is an increase in manufacturing expenses (net of inventory changes) to ₹11,814.76 lakhs for FY 2017-18 as when compared to manufacturing expenses of ₹10,707.37 lakhs for FY 2017, on the account of increase in turnover. However, composition of cost of raw materials for FY 2018 has decreased from 7% to 3 %, contributing directly to operating margins.

Employee Cost: Our employee expenses have decreased to ₹734.14 Lakhs in FY 2017-18 from ₹888.69 Lakhs in FY 2016-17 which is attributable to automation of our manufacturing facility making us less dependent on the manual labor.

Other Expenses: Our other expenses are mainly pertaining to the indirect costs associated with the manufacturing activity. Major cost components covered under other expenses Power & Fuel and Packaging charges. For FY 2017-18, there was an increase in the consumption of power and fuel to increase in output. As the sales have increased, packaging charges increased in the same proportion. Total other expenses incurred in FY 2017-18 have increased to ₹869.11 Lakhs from ₹683.73 Lakhs in FY 2016-17 but is in line with the increase in turnover and historic cost.

Depreciation: During FY 2017-18, there have been major additions in Fixed Assets of the Company to the tune of approximately ₹1125.80 Lakhs of which ₹897.47 lakhs pertained to buying of new plant and machinery. This addition has led to an increase in the depreciation from ₹156.14 Lakhs in FY 2016-17 to ₹188.34 Lakhs in FY 2017-18.

Finance Cost: The overall finance charges during the FY 2017-18 have increased to ₹650 Lakhs from ₹632.95 Lakhs in FY 2016-17. During the year under review, we have borrowed foreign currency funds to the extent of ₹423.70 Lakhs as term loan towards the purpose of Purchase of Digital Printing Machine.

Profit after Tax (PAT)

The PAT for Financial Year 2017-18 has increased to ₹782.11 Lakhs from ₹287.54 Lakhs, an increase of approximately 172% over the previous year. This increase is attributable to increase in revenue by about 13%, increase in operating margin from 9.05% to 12.95% and increase in other income by about 115%.

Comparison of performance for FY 2017 with FY 2016

Total Income

Revenue from Operations: Revenue from operations has remained broadly consistent for FY 2016 and FY 2017. During the FY 2016-17, our revenue from operations was marginally lower when compared to revenue from operation of FY 2015-16. It is attributable to strikes caused due to implementations of GST, absence of job work and export revenue leading to loss of income. Total revenue reported for FY 2017 was ₹13,438.32 lakhs as compared to 13,631.96 lakhs for FY 2016.

Other Income: Other Income during FY 2016-17 increased to ₹63.45 Lakhs from ₹17.11 Lakhs in FY 2015-16 accounting for a growth of 271% on YoY basis. This was mainly on account income generated through interest accrued on fixed deposits and Capital & Interest Subsidy Received from Central and State Government as per Textile based Subsidy and Grants Availed.

Expenditure

Manufacturing Expenses: Our manufacturing expenses have increased to ₹11298.54 Lakhs in FY 2016-17 from ₹9537.75 lakhs in FY 2015-16 resulting in an increase of approximately 18% over previous period. Government of India implemented GST during the FY 2017, this led to increase in the cost of the raw materials. The Company is eligible to take credit of the GST paid, however, as the sector was going through the strikes, Company had stock of raw materials in the inventory which could not be converted to finished goods. As a

result, there was an increase of 18% in cost of raw materials despite the turnover being in the same line as of previous FY 2016.

Employee Cost: Our employee expenses have decreased by 25% i.e. from ₹1,187.57 lakhs in FY 2016-17 to ₹888.69 Lakhs in FY 2015-16. This is attributable to revision in Directors Remuneration and decreased dependence on manual labor due to automation of the manufacturing process.

Other Expenses: The cost incurred under this head in FY 2016-17 has increased to ₹683.73 Lakhs from ₹1,281.19 Lakhs in FY 2015-16. As the Company was going through a transition stage due to implementation of GST, Management decided to cut short the business promotion expenses, this has been the only reason for the decrease in Other expenses. All other components of other expenses are related to turnover and have remained in line with the historic costs.

Depreciation: During FY 2016-17, there has been additions of approx. ₹176.85 Lakhs in Plant & Machinery, Building and Office equipment of the Company. Such addition led to an increase in depreciation from ₹133.33 lakhs in FY 2016 to 156.14 lakhs in FY 2017.

Finance Cost: The overall finance charges during the FY 2016-17 have increased to ₹614.59 Lakhs from ₹632.95 Lakhs in FY 2015-16. During the FY 2016-17, we repaid a part of our secured term loan from the banks, however, we raised additional funds in terms of unsecured loans from Related Parties/ Members and Others. We had availed cash credit facility from Bank of Baroda, utilization of such CC facility is more as and when compared to utilization of FY 2016. Increase in finance cost by 3% is attributable to such factors.

Profit after Tax (PAT)

The PAT for Financial Year 2016-17 has increased to ₹287.54 Lakhs from ₹213.57 Lakhs in FY 2015-16, an increase of approximately 35% over the previous year. This increase is attributable to decrease in employment expenses and reduced business promotion cost.

Capital Expenditure

Our Company had incurred capital expenditure of ₹301.91 Lakhs in FY 2015-16, ₹83.27 Lakhs in FY 2016-17, and ₹897.47 Lakhs in FY 2017-18. The purpose of the capital expenditure was to achieve production efficiency and reducing cost of outsourcing job work by installing machineries such as Digital Printing Machine, Paper Printing Machine, Steam Boilers, Other Fabric Processing Machine, and it's Ancillary Machines for Developing our Sample Texting and Digital Printing & Processing Department.

RESTRICTION ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and Foreign Exchange Management Act, 1999 (“FEMA”). While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are Reserve Bank of India (“RBI”) and Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“DIPP”).

The Government of India has from time to time made policy pronouncements on Foreign Direct Investment (“FDI”) through press notes and press releases. The DIPP, has issued consolidated FDI Policy Circular of 2017 (“FDI Policy 2017”), which with effect from August 28, 2017, consolidates and supersedes all previous press notes, press releases and clarifications on FDI Policy issued by the DIPP that were in force. The Government proposes to update the consolidated circular on FDI policy once every year and therefore, FDI Policy 2017 will be valid until the DIPP issues an updated circular.
