1. Summary of Industry

Copper is a very essential metal for economic activity. Infrastructure development in major countries such as China and India and the global trend towards the use of cleaner energy will continue to support the growth for demand in copper. Currently 17% of total refined copper production comes from recycling only. The growing demand from the power sector in view of Government laying thrust on renewable energy and increasing demand from the households for consumer durables will increase demand for copper in India

INTERNAL RISK FACTORS

BUSINESS RELATED RISKS

- 1. The novel coronavirus (Covid-19) pandemic outbreak and steps taken to control the same have significantly impacted our business, results of operations, financial condition and cash flows and further impact will depend on future developments, which are highly uncertain.***

The rapid and diffused spread of COVID-19 and global health concerns relating to this outbreak have had a severe negative impact on all businesses, including the industry in which our Company operates. The COVID-19 pandemic could continue to have an impact that may worsen for an unknown period of time. In view of the onslaught of second wave of the virus and the forecast of a third wave, this pandemic may continue to cause unprecedented economic disruption in India and in the rest of the world. The scope, duration and frequency of such measures and the adverse effects of COVID-19 remain uncertain and could be severe.

At this point of time, our Company cannot predict by when our Company’s operation shall resume to normalcy, or at all. Further if in case due to any third or consequent wave of Coronavirus, or surge in new and deadly variants of the Virus if another lockdown is imposed in the country, we may face huge losses and our business operations could be severely impacted. Any such interruptions or disruptions could cause delays in the completion of our orders and commitments made to clients, or cause damage to the goods in transit. Any of these consequences may result in loss of business and/or claims for compensation from our clients, which may have an adverse effect on our results of operations and financial condition.

- 2. There are outstanding litigations involving our Company and its subsidiary which, if determined against us, may adversely affect our business and financial condition.***

As on the date of this Draft Letter of Offer, our Company and/or our subsidiary is involved in certain legal proceedings. These legal proceedings are pending at different levels of adjudication before various courts and tribunals. The amounts claimed in these proceedings have been disclosed to the extent ascertainable and include amounts claimed jointly and/or severally from us and/or other parties, as the case may be. We cannot assure you that these legal proceedings will be decided in favour of our Company, or that no further liability will arise out of these proceedings. We may incur significant expenses in such legal proceedings and we may have to make provisions in our financial statements, which could increase our expenses and liabilities. Any adverse decision may adversely affect our business, results of operations and financial condition.

Any adverse order in these proceedings could materially impact our business, results of operations and financial condition. For further details, please refer to the chapter titled “*Outstanding Litigation and Material Developments*” on page 137 of this Draft Letter of Offer.

3. *Our Equity Shares have been suspended by the BSE in the past for certain non-compliances of the Listing Agreement.*

Our Equity Shares have been suspended from trading by the BSE for certain non-compliances with the provisions of the Listing Agreement in the past. Although suspension has been revoked on January 20, 2020 and we have been compliant with the provision so the Listing Regulations for the last 12 months and this issue is made under Part B of Schedule VI of the ICDR Regulations, we could face similar action in case of any non-compliance by way of the Stock Exchange and/or SEBI imposing penalties, issuing warnings and show cause notices against us and/or taking actions as provided under the SEBI Act, Listing Regulations and applicable SEBI Circulars. Any such adverse regulatory action or development could affect our business reputation, divert management attention, and result in a material adverse effect on our business prospects and financial performance and on the trading price of the Equity Shares.

4. *Our Company's business is dependent on few customers. Any loss of such customers or a significant reduction in purchases by such customers could adversely affect our business, results of operations and financial conditions.*

We generate 100% of our revenues only from 2 customers, one being our subsidiary Rashtriya Metal Industries Limited. In case any of our clients were to stop further orders or discontinue their operations or change their line of business, we would lose all our revenue and this could in turn adversely affect our business, revenues and our profitability.

Further, we do not have any exclusive agents, dealers or distributors and have not entered into any agreements with any of the market intermediaries for selling or marketing our products. If there occurs any change in the market conditions or in the requirements of our customers, or if we fail to identify and understand evolving industry trends, preferences or fail to meet our customers' demands, it might have a direct impact on our revenue and customer base. The inability to procure new orders on a regular basis or at all may adversely affect our business, revenues, cash flows and operations.

5. *We are exposed to the risk of delays or non-payment by our clients and other counterparties, which may also result in cash flow mismatches.*

We are exposed to counter party credit risk in the usual course of our business dealings with our clients or other counterparties who may delay or fail to make payments or perform their other contractual obligations. For the Fiscal ending March 31, 2021, and 2020 our trade receivables were ₹212.93 lakhs and ₹24.92 lakhs, respectively on a standalone basis and Rs 9941.90 lacs and Rs.5526.80 lacs respectively on a consolidated basis.

The financial condition of our clients and other counterparties may be affected by the performance of their business which may be impacted by several factors including general economic conditions. For instance, the on-going pandemic has led to a slowdown in the economy which has directly/ indirectly impacted the industries in which our clients' function. Due to the current scenario, we might be exposed to an increased risk of payment delays and/or defaults of payments. Such delays in payments may require our Company to make a working capital investment. We cannot assure you that payments from all or any of our clients will be received in a timely manner or to that extent will be received at all. If any of our client's default in making its payments, or if an order in which our Company has invested significant resources is delayed, cancelled or does not proceed to completion, it could have a material adverse effect on our Company's results of operations and financial condition.

The credit period offered by our intermediaries or suppliers is generally lesser than what we generally grant our clients. The longer credit period granted to our clients compared to that offered by our suppliers may potentially result in certain cash flow mismatches. We cannot assure you that we will not experience any significant cash flow mismatches in the future or that our cash flow management measures will function properly, or at all. If we fail to properly manage the possible cash flow

mismatches, our financial condition, results of operations and cash flows could be materially and adversely affected.

- 6. *Our subsidiary does not have any firm tie-up for the supply of raw materials and sources from Government Parties, like the Ordinance Factory, Ambernath, Maharashtra and also from other private suppliers. Any interruption in the supply of such products and in its price could adversely affect our business, results of operations and financial condition***

Key raw materials required by our Subsidiary are procured by our Subsidiary from the third- party suppliers. Hence, our Subsidiary is significantly dependent on them for supply. Purchase orders are placed for purchase of raw materials based on our anticipated requirements. Our Subsidiary does not have any long terms contracts with fixed inventory requirements and consideration in this regard. Absence of such long-term contracts with our suppliers exposes our subsidiary and in turn our Company to the price volatility of raw materials. In case of unexpected increase in the prices of any of the raw materials, the increase in the selling price of the same may not be in proportion to the increase in raw material price, which may adversely affect our sales, cash flow and our overall profitability. Further, if the supplier is unable to supply the raw materials on commercially reasonable terms or the quantity that is required it may adversely affect our production schedule and we may have to purchase raw materials at a higher rate from the market, which may eventually affect our profitability.

- 7. *Our Company has experienced negative cash flow in the past and may continue to do so in the future, which could have a material adverse effect on our business, prospects, financial condition, cash flows and results of operations.***

Our Company has experienced negative net cash flow in operating and financing activities in the past, the details of which are provided below:

Particulars	Standalone		Consolidated	
	March 31, 2021	March 31, 2020	March 31, 2021	March 31, 2020
Net Cash Flow from/(used in) Operating Activities	(268.89)	(58.36)	6437.01	6288.88
Net Cash Flow from / (used in) Investment Activities	0.11	51.30	(4894.38)	(2895.87)
Net Cash Flow from/(used in) Financing Activities	255.89	(12.77)	(567.31)	(3247.47)

We may incur negative cash flows in the future which may have a material adverse effect on our business, prospects, results of operations and financial condition.

- 8. *Our Company requires significant amount of working capital for a continuing growth. Our inability to meet our working capital requirements may adversely affect our results of operations.***

Our business requires a significant amount of working capital. Any delay in the receipt of payments from our customers may increase our working capital requirement. Further, if a customer defaults in making payment it could affect our profitability and liquidity and decrease the capital reserves that are otherwise available for other uses. In general, we take provisions for bad debts, including those arising from such defaults based primarily on ageing and other factors such as special circumstances relating to special customers. There can be no assurance that such payments will be remitted by our clients to us on a timely basis. All of these factors may result, or have resulted, in increase in the amount of receivables and short-term borrowings. Continued increase in working capital requirements may adversely affect our financial condition and results of operations. We may also have large cash flows, including among others, losses resulting from adverse political conditions, foreign exchange risks and other liability claims. Moreover, we may require additional finance facility in the future to satisfy our working capital needs.

9. *Our Promoter and members of the Promoter Group have significant control over the Company and have the ability to direct our business and affairs; their interests may conflict with your interests as a shareholder.*

After the completion of the Issue, our Promoter and the members of the Promoter Group will hold approximately 58.37% of the paid-up equity share capital of our Company assuming full subscription to the Rights Entitlement in the Issue. Our Promoter and the members of the Promoter Group holding Equity Shares in our Company, have undertaken to fully subscribe for their Rights Entitlement. They reserve the right to subscribe for their Rights Entitlement pursuant to any renunciation made by any member of the Promoter Group to another member of the Promoter Group. Such subscription for Equity Shares over and above their Rights Entitlement, if allotted, may result in an increase in their percentage shareholding above their current percentage shareholding. So long as the Promoters have a majority holding, they will be able to elect the entire Board and control most matters affecting us, including the appointment and removal of the officers of our Company, our business strategy and policies and financing. Further, the extent of the Promoter's shareholding in our Company may result in the delay or prevention of a change of management or control of our Company, even if such a transaction may be beneficial to the other shareholders of our Company.

10. *We have certain contingent liabilities and our financial condition and profitability may be adversely affected if any of these contingent liabilities materialize.*

As of March 31, 2021, our contingent liabilities and commitments (to the extent not provided for) as disclosed in the notes to our consolidated Audited Financial Information aggregated to ₹ 3486.48 lakhs. The details of our contingent liabilities are as follows:

Particulars	(₹ in lakhs)
Outstanding Bank Guarantees	1517.16
Disputed Sales Tax, Excise and Service Tax Show Cause Notices against the Subsidiary	1969.32
Total	3486.48

For further details of contingent liability, see the section titled — “*Financial Information*” on page 87 of this Draft Letter of Offer. Furthermore, there can be no assurance that we will not incur similar or increased levels of contingent liabilities in the future.

11. *We have in past entered into related party transactions and we may continue to do so in the future.*

As of March 31, 2021, we have entered into several related party transactions with our Promoter, individuals and entities forming a part of our promoter group, our Directors and the entities in which they hold directorships. In addition, we have in the past also entered into transactions with other related parties. Our Company has entered into related party transactions for the Fiscal ended March 31, 2021. For further details, please refer to the chapter titled — “*Audited Financial Information- Annexure V- Notes to Audited Financial Statements- Note 40 -Related Party Disclosures*” at page 169.

While we believe that all our related party transactions have been conducted on an arm's length basis, we cannot assure you that we may not have achieved more favorable terms had such transactions been entered into with unrelated parties. There can be no assurance that such transactions, individually or taken together, will not have an adverse effect on our business, prospects, results of operations and financial condition, including because of potential conflicts of interest or otherwise. In addition, our business and growth prospects may decline if we cannot benefit from our relationships with them in the future.

12. Our Company has taken certain unsecured loans, which may be recalled at any time.

As on June 30, 2021, our Company has outstanding unsecured loans aggregating to ₹ 260.00 lakhs on a standalone basis which have been extended by our Subsidiary, Rashtriya Metal Industries Limited and may be recalled by it at any time. In the event, our subsidiary seeks repayment of this loan, our Company would need to find alternative sources of financing, which may not be available on commercially reasonable terms, or at all. If we are unable to arrange for any such financing arrangements, we may not have adequate working capital to undertake new projects or complete our ongoing projects. Therefore, any such demand may adversely affect our business, financial condition and results of operations.

13. Our Subsidiary is dependent on third party transportation providers for delivery of raw materials from our suppliers and delivery of our products to our customers. Our Subsidiary has not entered into any formal contracts with our transport providers and any failure on part of such service providers to meet their obligations may adversely affect our business, financial condition and results of operation.

To ensure smooth functioning of our operations, our subsidiary needs to maintain continuous supply and transportation of the raw materials required from the supplier transportation of our products to our customers, which may be subject to various uncertainties and risks. We are significantly dependent on third party transportation providers for the delivery of raw materials to us and delivery of our products to our customers. Uncertainties and risks such as transportation strikes or delay in supply of raw materials and products is likely to have an adverse effect on our supplies and deliveries to and from our customers and suppliers. Additionally, raw materials and products may be lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. A failure to maintain a continuous supply of raw materials or to deliver our products to our customers in a timely, efficient and reliable manner may adversely affect our business, results of operations and financial condition.

Further, our Subsidiary has not entered into any long-term agreements with our transporters for our manufacturing units and the costs of transportation are generally based on mutual terms and the prevailing market price. In the absence of such agreements, we cannot assure that the transport agencies would fulfill their obligations or would not commit a breach of the understanding with us. In the event that the finished goods or raw materials suffer damage or are lost during transit, we may not be able to prosecute the agencies due to lack of formal agreements. Further, the transport agencies are not contractually bound to deal with us exclusively, our subsidiary and consequently our Company may face the risk of our competitors offering better terms or prices, which may cause them to cater to our competitors alongside us or on a priority basis, which might adversely affect our business, results of operations and financial condition.

14. Our future fund requirements, in the form of further issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the Shareholders depending upon the terms on which they are eventually raised.

We may require additional capital from time to time depending on our business needs. Any further issue of Equity Shares or convertible securities would dilute the shareholding of the existing Shareholders and such issuance may be done on terms and conditions, which may not be favourable to the then existing Shareholders. If such funds are raised in the form of loans or debt or preference shares, then it may substantially increase our fixed interest/dividend burden and decrease our cash flows, thus adversely affecting our business, results of operations and financial condition.

15. Our success largely depends upon the knowledge and experience of our Promoter, Directors and our Key Managerial Personnel. Loss of any of our directors and key managerial personnel or our ability to attract and retain them could adversely affect our business, operations and financial condition.

Our Company depends on the management skills and guidance of our Promoter and Directors for development of business strategies, monitoring its successful implementation and meeting future challenges. Further, we also significantly depend on the expertise, experience and continued efforts of our Key Managerial Personnel. Some of our employees have been associated with our Company since a long period of time and have been integral to the growth and in the success of our Company. Our future performance will depend largely on our ability to retain the continued service of our management team. If one or more of our directors or Key Managerial Personnel are unable or unwilling to continue in his/her present position, it could be difficult for us to find a suitable or timely replacement and our business could be adversely affected. There is significant competition for management and other skilled personnel in the industry in which we operate, and it may be difficult to attract and retain the personnel we require in the future. There can be no assurance that our competitors will not offer better compensation packages and incentives to such Key Managerial Personnel. In the event we are not able to attract and retain talented employees, as required for conducting our business, or we experience high attrition levels which are largely out of our control, or if we are unable to motivate and retain existing employees, our business, financial condition and operations may be adversely affected. For further details on our Directors and Key Managerial Personnel, please refer to the chapter titled — “Our Management” on page 75 of this Draft Letter of Offer.

16. We and our Subsidiary do not own any intellectual property and we face the risk of infringement from our competitors. In case our Company or our Subsidiary infringes on the intellectual property rights of others, our business may be adversely affected.

We and our Subsidiary are exposed to the risk that other entities may pass off their products as that of our Subsidiary by imitating our brand name and attempting to create counterfeit products, as we or our Subsidiary do not own any registered patent, trademark or copyright. We believe that there may be other companies or vendors which operate in the unorganized segment using our brand names. Any such activities may harm the reputation of our brand and sales of our products, which could in turn adversely affect our financial performance. We along with our Subsidiary rely on protections available under Indian law, which is uncertain and evolving, and could involve substantial risks to us. Notwithstanding the precautions we take to protect our intellectual property rights, it is possible that third parties may copy or otherwise infringe on our rights, which may have an adverse effect on our business, results of operations, cash flows and financial condition including that of our subsidiary.

Furthermore, our efforts including that by our Subsidiary to protect our intellectual property may not be adequate and may lead to erosion of our and our Subsidiary’s business value and our operations could be adversely affected. We or our Subsidiary may need to litigate in order to determine the validity of such claims and the scope of the proprietary rights of others. Any such litigation could be time consuming, continuous supply of raw materials or to deliver our costly and the outcome cannot be guaranteed. We may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect its intellectual property, which might adversely affect our business, results of operations and financial condition.

17. We do not own the premises used by our Company as our Registered Office. We have further not entered into any formal agreement with the lessor for the use of the Registered Office as a Lessee. Disruption of our rights as licensee/ lessee or termination of the agreements by our licensors/lessors would adversely impact our operations and, consequently, our business.

As on the date of this Draft Letter of Offer, we do not own any property. Our Registered Office have been taken on lease by our Company from third parties, For details, please refer to the chapter titled “Our Business- Our Immovable Properties” on page 75 of this Draft Letter of Offer.

We have not entered into any formal agreement for utilization of premises where our registered office is situated. The owners of such premises may demand that we vacate the Registered Office at any point in time and in that event, the Company would need to arrange for the Registered office on an urgent basis at such rent as may be applicable as per the market rate applicable upon happening of such event which may adversely affect our profitability as additional expenditure would need to be incurred for the same.

There is no assurance that our Company will be able to enter into the lease agreements or deeds entered into with third parties in a timely manner or at all. Further, there is no assurance that we will not face any disruption of our rights as a lessee/ licensee and that such leave and license and lease agreements will not be terminated prematurely by the licensor/lessor. Any such non-renewal or early termination or any disruption of our rights as lessee / licensee might adversely affect our business operations

18. We do not have any insurance cover currently and our inability to procure and/or maintain adequate insurance cover in connection with our business may adversely affect our operations and profitability.

Our operations are subject to inherent risks and hazards which may adversely impact our profitability, such as fire, riots, third party liability claims, and natural disasters. We do not have any insurance policy currently hence our Company is not insured against earthquake, fire, shock, terrorism, etc. There are many events that could cause significant damages to our operations, or expose us to third-party liabilities, whether or not known to us, for which we may not be insured, which in turn may expose us to certain risks and liabilities. If we were to incur a significant liability for which we are not insured, it could adversely affect our results of operations and financial position.

19. Our Company including our Subsidiary is subject to foreign exchange control regulations which can pose a risk of currency fluctuations.

Our Company and our Subsidiary are involved in various business transaction with international clients and has to conduct the same in accordance with the rules and regulations prescribed under FEMA. Such international operations make us susceptible to the risk of currency fluctuations, which may directly affect our operating results including that of our Subsidiary. In case we and our Subsidiary are unable to adhere to the timelines prescribed under the applicable laws or are unable to mitigate the risk of currency fluctuation, it could adversely affect our business, results of operations, financial conditions and cash flows including that of our Subsidiary.

20. The Equity Shares of our Company are not frequently traded on the Stock Exchanges.

The Equity Shares of our Company are not frequently traded on the Stock Exchanges, as per Regulation 2(1)(j) of SEBI Takeover Regulations, which defines a frequently traded share. We cannot assure you that there might not be any adverse effect of the same on the market value of our Equity Shares or our business, results of operations and financial condition.

21. Our ability to pay dividends in the future may be affected by any material adverse effect on our future earnings, financial condition or cash flows.

We have not paid any dividends in the last five years and our ability to pay dividends in future will depend on our earnings, financial condition and capital requirements. We may be unable to pay dividends in the near or medium term, and our future dividend policy will depend on our capital requirements and financing arrangements in respect of our operations, financial condition and results of operations. We have not declared in the past five years and may not do so in the future also.

22. The deployment of funds is entirely at our discretion and as per the details mentioned in the chapter titled "Objects of the Issue".

As the issue size shall be less than ₹10,000 lakhs, under Regulation 82 of the SEBI ICDR Regulations it is not required that a monitoring agency be appointed by our Company, for overseeing the deployment

and utilisation of funds raised through this Issue. Therefore, the deployment of the funds towards the Objects of this Issue is entirely at the discretion of our Board of Directors and is not subject to monitoring by external independent agency. Our Board of Directors along with the Audit Committee will monitor the utilisation of Issue proceeds and shall have the flexibility in applying the proceeds of this Issue. For further details, please refer to the chapter titled — “*Objects of the Issue*” on page 56 of this Draft Letter of Offer.

23. Of the total promoters’ shareholding 7 shares (1 share each held by 7 individuals) are not dematerialized.

Of the total of 143,007 shares of Rs.10/- each held under the Promoters Category, 7 shares, one share each held by 7 individuals who are not related to our promoters or Promoter Group, but categorized under the Promoter Category are not dematerialized and as all efforts to trace them have not been successful, the submission is made to the exchange to eliminate them from the Promoter’s category.

24. Deliveries under our copper sales agreements can be suspended or cancelled by our customers in certain cases.

Under each of our copper sales agreements, we or our customers may suspend or cancel delivery of copper during a period of force majeure. Events of force majeure under these agreements include acts of nature, labour strikes, fires, floods, wars, transportation delays, government actions or other events that are beyond the control of the parties. Any suspension or cancellation by our customers of deliveries under our copper or other sales contracts that are not replaced by deliveries under new contracts or sales on the spot market would reduce our cash flow and could adversely affect our financial condition and results of operations.

25. Our business as well as that of our Subsidiary business may be affected by planned and unplanned outages and other material disruptions.

Industrial disruptions, work stoppages, refurbishments, installation of new plants, geotechnical issues, accidents or sustained bad weather at our and our Subsidiary’s operations can result in production losses and delays in delivery of products, which may adversely affect our profitability including that of our Subsidiary

26. Our copper hedging activities may not achieve the intended results and may adversely affect our results of operations and financial condition.

From time to time, we hedge exposures of our copper business to LME price fluctuations. Nonetheless, we cannot assure that our commodity hedging activities will adequately protect us from price fluctuations. Further, our hedging may at times limit our ability to benefit from favorable price movements

27. Changes in the market prices of non-ferrous metals like copper, zinc etc. could adversely affect our and our Subsidiary’s revenues and profitability.

The prices we pay for copper and the prices we and our Subsidiary charge for our copper products and other non-ferrous metals are based on the LME price for copper.

28. Changes in customs duties may have a material adverse effect on our and Subsidiary’s results of operations and financial condition.

The customs duties on imported copper have been reduced over the last few years. Imports of copper metal are currently subject to a customs duty of 5%. The government of India may reduce customs duties further in the future, although the timing and extent of such reductions cannot be predicted. Since we and Subsidiary sell a significant part of our copper production in the domestic market, any reduction in these customs duties will increase additional competition foreign copper producers which may force

our Subsidiary to reduce our prices or decrease its domestic market share and consequently adversely affect our result of operations, our revenues and financial condition.

29. Our consolidated operations are subject to extensive regulations and may be adversely affected by present or future violations or enforcement actions.

Our consolidated operations are subject to extensive regulations including regulations relating to pollution and protection of the environment and worker health and safety. National, state and local authorities in India, regulate the industries in which we operate with respect to matters such as labour conditions, royalties, permit and licensing requirements, planning and development, tax registrations, supply of water, environmental compliance (including, for example, compliance with waste and waste water treatment and disposal, air emissions, discharges and forest and soil conservation requirements), plant and wildlife protection, reclamation and restoration of properties after operations are complete, surface subsidence from underground mining and the effects that mining, smelting and refining operations have on groundwater quality and availability.

Numerous governmental permits, approvals and leases are required for our consolidated operations. We are required to prepare and present to national, state or local authorities data pertaining to the effect or impact that any proposed exploration, mining or production activities may have upon the environment.

30. We have not commissioned an industry report for the disclosures made in the chapter titled “Industry Overview” and made disclosures on the basis of the data available on the internet and such data has not been independently verified by us.

We have neither commissioned an industry report, nor sought consent from the quoted website source for the disclosures which need to be made in the chapter titled “Industry Overview” of this Draft Letter of Offer. We have made disclosures in the said chapter on the basis of the relevant industry related data available online for which relevant consents have not been obtained. We have not independently verified such data. We cannot assure you that any assumptions made are correct or will not change and, accordingly, our position in the market may differ from that presented in this Draft Letter of Offer. Further, the industry data mentioned in this Draft Letter of Offer or sources from which the data has been collected are not recommendations to invest in our Company. Accordingly, investors should read the industry related disclosure in this Draft Letter of Offer in this context.

ISSUE SPECIFIC RISKS

31. Our Company will not distribute the Draft Letter of Offer and Application Form to certain overseas Shareholders who have not provided an address in India for service of documents.

Our Company will dispatch this Draft Letter of Offer, the Abridged Draft Letter of Offer, Rights Entitlement Letter and Application Form (the “Offering Materials”) to such Shareholders who have provided an address in India for the service of documents. The Offering Materials will not be distributed to addresses outside India on account of restrictions that apply to the circulation of such materials in various overseas jurisdictions. However, the Companies Act requires companies to serve documents at any address, which may be provided by the members as well as through e- mail. Presently, there is a lack of clarity under the Companies Act, 2013, and the rules thereunder, with respect to the distribution of Offering Materials to retail individual shareholders in overseas jurisdictions where such distribution may be prohibited under applicable laws of such jurisdictions.

32. SEBI has recently, by way of circulars dated January 22, 2020, May 6, 2020, January 19, 2021 and October 01, 2021, streamlined the process of rights issues. You should follow the instructions carefully, as stated in such SEBI circulars and in this Draft Letter of Offer.

The concept of crediting Rights Entitlements into the demat accounts of the Eligible Equity Shareholders has recently been introduced by the SEBI. Accordingly, the process for such Rights Entitlements has been recently devised by capital market intermediaries. Eligible Equity Shareholders

are encouraged to exercise caution, carefully follow the requirements as stated in the SEBI circulars dated January 22, 2020, May 6, 2020, January 19, 2021 and October 01, 2021, and ensure completion of all necessary steps in relation to providing/updating their demat account details in a timely manner. For details, see “*Terms of the Issue*” on page 148.

In accordance with Regulation 77A of the SEBI ICDR Regulations read with the SEBI Rights Issue Circular, the credit of Rights Entitlements and Allotment of Rights Equity Shares shall be made in dematerialized form only. Prior to the Issue Opening Date, our Company shall credit the Rights Entitlements to (i) the demat accounts of the Eligible Equity Shareholders holding the Equity Shares in 35ematerialized form; and (ii) a demat suspense escrow account opened by our Company, for the Eligible Equity Shareholders which would comprise Rights Entitlements relating to (a) Equity Shares held in a demat suspense account pursuant to Regulation 39 of the SEBI Listing Regulations; or (b) Equity Shares held in the account of IEPF authority; or (c) the demat accounts of the Eligible Equity Shareholder which are frozen or details of which are unavailable with our Company or with the Registrar on the Record Date; or (d) credit of the Rights Entitlements returned/reversed/failed; or (e) the ownership of the Equity Shares currently under dispute, including any court proceedings.

33. The R-WAP/B-WAP payment mechanism facility proposed to be used for this Issue may be exposed to risks, including risks associated with payment gateways.

In accordance with SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/78 dated May 6, 2020 and January 19, 2021, a separate web based application platform, i.e., the R-WAP/referred to as B-WAP by our Registrar facility (accessible at www.bigshareonline.com), has been instituted for making an Application in this Issue by Original Resident Shareholders. Further, R-WAP/B-WAP is only an additional option and not a replacement of the ASBA process. On R-WAP, the Original Resident Shareholders can access and fill the Application Form in electronic mode and make online payment using the internet banking or UPI facility from their own bank account thereat. For details, see “*Terms of the Issue*” on page 148. Such payment gateways and mechanisms are faced with risks such as:

- keeping information technology systems aligned and up to date with the rapidly evolving technology;
- in the payment services industries;
- scaling up technology infrastructure to meet requirements of growing volumes;
- applying risk management policy effectively to such payment mechanisms;
- keeping users’ data safe and free from security breaches; and
- effectively managing payment solutions logistics and technology infrastructure.

Further, R-WAP/B-WAP is a new facility which has been instituted due to challenges arising out of COVID-19 pandemic. We cannot assure you that R-WAP/B-WAP facility will not suffer from any unanticipated system failure or breakdown or delay, including failure on part of the payment gateway, and therefore, your Application may not be completed or rejected. These risks are indicative and any failure to manage them effectively can impair the efficacy and functioning of the payment mechanism for this Issue. Since Application process through R-WAP/B-WAP is different from the ASBA process, there can be no assurance that investors will not find difficulties in accessing and using the R-WAP/B-WAP facility.

34. The entitlement of Rights Equity Shares to be allotted to investors applying for Allotment in physical form, will be kept in abeyance.

In accordance with the SEBI ICDR Regulations, the option to receive the Rights Equity Shares in physical form will not be available after a period of six months from the date of coming into force of the SEBI ICDR Regulations, i.e., May 10, 2019. Since, the Rights Equity Shares offered pursuant to this Issue will be Allotted only after May 10, 2019, the entitlement of Rights Equity Shares to be Allotted to the Applicants who have applied for Allotment of the Rights Equity Shares in physical form will be kept in abeyance in electronic mode by our Company until the Applicants provide details of their demat

account particulars to the Registrar. Pursuant to a press release dated December 3, 2018 issued by the SEBI, with effect from April 1, 2019, a transfer of listed Equity Shares cannot be processed unless the Equity Shares are held in dematerialized form (except in case of transmission or transposition of Equity Shares).

35. Any future issuance of Equity Shares, or convertible securities or other equity-linked securities by our Company may dilute your shareholding and any sale of Equity Shares by our Promoter or members of our Promoter Group may adversely affect the trading price of the Equity Shares.

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by our Company may dilute your shareholding in our Company; adversely affect the trading price of the Equity Shares and our ability to raise capital through an issue of our securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. We cannot assure you that we will not issue additional Equity Shares. The disposal of Equity Shares by any of our Promoter and Promoter Group, or the perception that such sales may occur may significantly affect the trading price of the Equity Shares. We cannot assure you that our Promoter and Promoter Group will not dispose of, pledge or encumber their Equity Shares in the future.

36. You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares of an Indian company are generally taxable in India. Accordingly, you may be subject to payment of long-term capital gains tax in India, in addition to payment of STT, on the sale of any Equity Shares held for more than 12 months. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short-term capital gains tax in India. Capital gains arising from the sale of the Equity Shares may be partially or completely exempt from taxation in India in cases where such exemption is provided under a treaty between India and the country of which the seller is a resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on gains made upon the sale of the Equity Shares.

37. You may not receive the Equity Shares that you subscribe in the Issue until fifteen days after the date on which this Issue closes, which will subject you to market risk.

The Equity Shares that you subscribe in the Issue may not be credited to your demat account with the depository participants until approximately 15 days from the Issue Closing Date. You can start trading such Equity Shares only after receipt of the listing and trading approval in respect thereof. There can be no assurance that the Equity Shares allocated to you will be credited to your demat account, or that trading in the Equity Shares will commence within the specified time period, subjecting you to market risk for such period.

38. There is no guarantee that our Equity Shares will be listed in a timely manner or at all which may adversely affect the trading price of our Equity Shares.

In accordance with Indian law and practice, final approval for listing and trading of the Equity Shares will not be granted by the Stock Exchanges until after those Equity Shares have been issued and allotted. Approval will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on Stock Exchanges. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares. Further, historical trading prices, therefore, may not be indicative of the prices at which the Equity Shares will trade in the future which may adversely impact the ability of our shareholders to sell the Equity Shares or the price at which shareholders may be able to sell their Equity Shares at that point of time.

39. Holders of Equity Shares could be restricted in their ability to exercise pre-emptive rights under Indian law and could thereby suffer future dilution of their ownership position.

Under the Companies Act, any company incorporated in India must offer its holders of equity shares pre-emptive rights to subscribe and pay for a proportionate number of shares to maintain their existing ownership percentages prior to the issuance of any new equity shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by holders of three-fourths of the shares voted on such resolution, unless our Company has obtained government approval to issue without such rights. However, if the law of the jurisdiction that you are in does not permit the exercise of such pre-emptive rights without us filing an offering document or registration statement with the applicable authority in such jurisdiction, you will be unable to exercise such pre-emptive rights unless we make such a filing. We may elect not to file a registration statement in relation to pre-emptive rights otherwise available by Indian law to you. To the extent that you are unable to exercise pre-emptive rights granted in respect of the Equity Shares, your proportional interests in us would be reduced.

40. Fluctuation in the exchange rate between the Indian Rupee and foreign currencies may adversely affect the value of our Equity Shares, independent of our operating results.

On listing, our Equity Shares will be quoted in Indian Rupees on the Stock Exchanges. Any dividends in respect of our Equity Shares will also be paid in Indian Rupees and subsequently converted into the relevant foreign currency for repatriation, if required. Any adverse movement in currency exchange rates during the time that it takes to undertake such conversion may reduce the net dividend to foreign investors. In addition, any adverse movement in currency exchange rates during a delay in repatriating outside India the proceeds from a sale of Equity Shares, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the proceeds received by equity shareholders. For example, the exchange rate between the Rupee and the U.S. dollar has fluctuated substantially in recent years and may continue to fluctuate substantially in the future, which may adversely affect the trading price of our Equity Shares and returns on our Equity Shares, independent of our operating results.

41. Sale of Equity Shares by our Promoter or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.

Any instance of disinvestments of equity shares by our Promoter or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

42. Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

EXTERNAL RISK FACTORS

43. The outbreak of Novel Coronavirus, or outbreak of any other severe communicable disease could have a potential impact on our business, financial condition and results of operations.

The outbreak, or threatened outbreak, of any severe epidemic caused due to viruses (particularly the Novel Coronavirus) could materially adversely affect overall business sentiment and environment, particularly if such outbreak is inadequately controlled. The spread of any severe communicable disease may also adversely affect the operations of our customers and suppliers, which could adversely affect

our business, financial condition and results of operations. The outbreak of Novel Coronavirus and increased cases including varied versions of the outbreak has resulted in authorities implementing several measures such as travel bans and restrictions, quarantines, shelter in place orders, and lockdowns. These measures have impacted and may further impact our workforce and operations, the operations of our customers, and those of our respective vendors and suppliers and the adverse effects of Novel Coronavirus remain uncertain and could be severe. Our ability to meet our ongoing disclosure obligations might be adversely affected, despite our best efforts in the event of our employees contracting Novel Coronavirus or any other epidemic disease resulting into compulsory quarantine and related actions. In addition, our revenue and profitability could be impacted to the extent that a natural disaster, health epidemic or other outbreak harms the Indian and global economy in general, like the one created by Covid-19.

The extent to which the Novel Coronavirus further impacts our results will depend on future developments, which are highly uncertain and cannot be predicted, including new information which may emerge concerning the severity of the coronavirus and the actions taken globally to contain the coronavirus or treat its impact, among others. Existing insurance coverage may not provide protection for all costs that may arise from all such possible events. The degree to which Novel Coronavirus impacts our results will depend on future developments, which are highly uncertain and cannot be predicted, including, but not limited to, the duration and spread of the outbreak, its severity, the actions taken to contain the outbreak or treat its impact, and how quickly and to what extent normal economic and operating conditions can resume. The above risks can threaten the safe operation of our facilities and cause disruption of operational activities, environmental harm, loss of life, injuries and impact the wellbeing of our people.

Further in case the lockdown is extended, it could result in muted economic growth or give rise to a recessionary economic scenario, in India and globally, which could adversely affect the business, prospects, results of operations and financial condition of our Company.

44. Significant differences exist between Ind AS, Indian GAAP and other accounting principles, such as US GAAP and International Financial Reporting Standards (“IFRS”), which investors may be more familiar with and consider material to their assessment of our financial condition.

Our audited summary statements of assets and liabilities as at March 31, 2021 and audited summary statements of profit and loss (including other comprehensive income), cash flows and changes in equity for the Fiscal 2021 have been prepared in accordance with the Indian Accounting Standards notified under Section 133 of the Companies Act, 2013, read with the Ind AS Rules and restated in accordance with the SEBI ICDR Regulations, the SEBI Circular and the Prospectus Guidance Note.

We have not attempted to quantify the impact of US GAAP, IFRS or any other system of accounting principles on the financial data included in this Draft Letter of Offer, nor do we provide a reconciliation of our financial statements to those of US GAAP, IFRS or any other accounting principles. US GAAP and IFRS differ in significant respects from Ind AS and Indian GAAP. Accordingly, the degree to which the Audited Financial Information included in this Draft Letter of Offer will provide meaningful information is entirely dependent on the reader’s level of familiarity with Ind AS, Indian GAAP and the SEBI ICDR Regulations. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Draft Letter of Offer should accordingly be limited.

45. Political, economic or other factors that are beyond our control may have adversely affect our business and results of operations.

The Indian economy is influenced by economic developments in other countries. These factors could depress economic activity which could have an adverse effect on our business, financial condition and results of operations. Any financial disruption could have an adverse effect on our business and future financial performance.

We are dependent on domestic, regional and global economic and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent to a large extent on the health of the economy in which we operate. There have been periods of slowdown in the economic growth of India. Demand for our products may be adversely affected by an economic downturn in domestic, regional and global economies.

Economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports, global economic uncertainty and liquidity crisis, volatility in exchange currency rates, and annual rainfall which affects agricultural production.

Consequently, any future slowdown in the Indian economy could harm our business, results of operations and financial condition. Also, a change in the government or a change in the economic and deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margins.

46. A slowdown in economic growth in India could cause our business to suffer.

We are incorporated in India, and all of our assets and employees are located in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations are significantly affected by factors influencing the Indian economy. A slowdown in the Indian economy could adversely affect our business, including our ability to grow our assets, the quality of our assets, and our ability to implement our strategy.

Factors that may adversely affect the Indian economy, and hence our results of operations, may include:

- any increase in Indian interest rates or inflation;
- any scarcity of credit or other financing in India;
- prevailing income conditions among Indian consumers and Indian corporations;
- changes in India's tax, trade, fiscal or monetary policies;
- political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighboring countries;
- prevailing regional or global economic conditions; and
- other significant regulatory or economic developments in or affecting India

Any slowdown in the Indian economy or in the growth of the sectors we participate in or future volatility in global commodity prices could adversely affect our borrowers and contractual counterparties. This in turn could adversely affect our business and financial performance and the price of our Equity Shares.

47. Inflation in India could have an adverse effect on our profitability and if significant, on our financial condition.

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of salaries, and other expenses relevant to our business.

High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to pass on to our customers, whether entirely or in part, and the same may adversely affect our business and financial condition. In particular, we might not be able to reduce our costs or increase our rates to pass the increase in costs on to our customers. In such case, our business, results of operations, cash flows and financial condition may be adversely affected.

Further, the GoI has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

48. Any downgrading of India's debt rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India's credit ratings international debt by international rating agencies may adversely affect our ability to raise additional overseas financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our ability to fund our growth on favourable terms or at all, and consequently adversely affect our business and financial performance and the price of our Equity Shares.

49. The occurrence of natural or man-made disasters could adversely affect our results of operations, cash flows and financial condition. Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tsunamis, tornadoes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations, cash flows or financial condition. In addition, any deterioration in international relations, especially between India and its neighboring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares. In addition, India has witnessed local civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business.

Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

50. We are subject to regulatory, economic, social and political uncertainties and other factors beyond our control.

We are incorporated in India and we conduct our corporate affairs and our business in India. Consequently, our business, operations, financial performance will be affected by interest rates, government policies, taxation, social and ethnic instability and other political and economic developments affecting India.

Factors that may adversely affect the Indian economy, and hence our results of operations may include:

- any exchange rate fluctuations, the imposition of currency controls and restrictions on the right to convert or repatriate currency or export assets;
- any scarcity of credit or other financing in India, resulting in an adverse effect on economic conditions in India and scarcity of financing for our expansions;
- prevailing income conditions among Indian customers and Indian corporations;
- epidemic or any other public health in India or in countries in the region or globally, including in India's various neighbouring countries;
- hostile or war like situations with the neighboring countries;
- macroeconomic factors and central bank regulation, including in relation to interest rates movements which may in turn adversely impact our access to capital and increase our borrowing costs;
- decline in India's foreign exchange reserves which may affect liquidity in the Indian economy;
- downgrading of India's sovereign debt rating by rating agencies; and
- difficulty in developing any necessary partnerships with local businesses on commercially acceptable terms and/or a timely basis.

Any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy or certain regions in India, could adversely affect our business, results of operations and financial condition and the price of the Equity Share.

51. Financial instability in other countries may cause increased volatility in Indian financial markets.

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, particularly emerging market countries in Asia. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss of investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our business, our future financial performance and the prices of the Equity Shares.

The outbreak of Novel Coronavirus has significantly affected financial markets around the world. Any other global economic developments or the perception that any of them could occur may continue to have an adverse effect on global economic conditions and the stability of global financial markets, and may significantly reduce global market liquidity and restrict the ability of key market participants to operate in certain financial markets. Any of these factors could depress economic activity and restrict our access to capital, which could have an adverse effect on our business, financial condition and results of operations and reduce the price of our Equity Shares. Any financial disruption could have an adverse effect on our business, future financial performance, shareholders' equity and the price of our Equity Shares.

The Global Economy

The global economy is projected to grow 6.0 percent in 2021 and 4.9 percent in 2022. The 2021 global forecast is unchanged from the April 2021 World Economic Outlook, but with offsetting revisions. The Indian Economy

Gross Domestic Product (GDP) is the sum of private consumption, gross investment in the economy, government investment, government spending and net foreign trade (difference between exports and imports). Sectorial GDP Growth is as under:

Gross value added (GVA) Indian Economy

is the measure of the value of goods and services produced in an economy. GVA gives picture of supply side where as GDP represents consumption. Sector wise estimated contribution to GVA is provided below:

In view of the global COVID-19 pandemic and consequent nationwide lockdown measures implemented since March, 2020, the data flow from the producing units was impacted. As some of these units are yet to resume operations, the response rate has been lower than usual. Consequently, the Quick Estimates are likely to undergo revision and will be incorporated in subsequent releases as per the revision policy of IIP.

Outlook for the Indian Economy

With the benefit of hindsight of almost 4 months that have gone past during the financial year FY22 with the second lockdown and subsequent calibrated opening up being witnessed, the outlook for the Indian economy on almost all counts would look seemingly better than FY21 on account of a negative base effect. The lockdown induced pandemic had pushed growth down to the negative region of 7.3% in FY21. It was expected that subsequently growth would be rapid in FY22 with both the negative base effect as well as the pent-up demand for consumption and investment helping to accelerate the process. However, the advent of the second wave of the virus in the beginning of the financial year which led to state induced lockdowns has upended this assumption to an extent. Business, as seen ex post, has been better equipped to face the lockdown and while activity did reduce across the country as well as sectors, the impact was less severe. The reverse migration which took place in large numbers last year was of a lower magnitude this time. SMEs were again under pressure in this phase, but as they were operating at less than normal potential they were not pushed back that severely. Therefore, while projections on growth have come down significantly from March, the drop is less damaging this time. (Source: Care Ratings, 2021)

GDP growth for FY22 GDP growth for the year is expected to be 8.8-9% with GVA growth of 7.8%. The growth rate though impressive should be viewed against a decline of 7.3% in growth in FY21. The main drivers of the economy would be agriculture and industry. Services will not be able to reach its potential even at 8.2% growth as the second lockdown has affected sectors like hotels and restaurants, tourism, retail malls and entertainment in particular. Non-Ferrous Metal Industry in India

The Non-Ferrous Metals (NFM) industry consists of a host of productive activities along different levels of the value chain which include upstream operations like mining, smelting, recycling, refining and secondary processing and fabrication of intermediaries further downstream.

The non-ferrous metals industry constitutes several sub-sectors –

- 1) Base metals (aluminium, copper, zinc, lead, nickel, tin)
- 2) Precious metals (silver, gold, palladium, other platinum group metals)
- 3) Minor metals including refractory metals (e.g. tungsten, molybdenum, tantalum, niobium, chromium) and
- 4) Specialty metals (e.g. cobalt, germanium, indium, tellurium, antimony, and gallium).

Copper is the second largest non-ferrous metals market in India in terms of production. In FY17, primary copper output totalled 0.8 million tonnes. By 2020, India is poised to become the world's fourth largest copper market, growing at a CAGR of ~6.1% per annum from FY16-FY20.

Figure 2: Demand – Supply of primary copper (All figures in million tonnes)

Import-Export Scenario

India is heavily dependent on imports of copper ores and concentrates in order to fulfil 96% of the demand, while the domestic availability satisfies only about 4%.

A review of global best practices in the non-ferrous metals industry throws up many lessons for India. The domestic industry can certainly thrive on Government support by recognising this industry as one of strategic importance.

- The recognition of industry's significance to end-use sectors such as infrastructure and manufacturing is critical
- A cluster-focused development of the industry is another step required to boost the development of the domestic industry
- Government assistance in the form of infrastructure support, cheap and abundant electricity supply, relaxation in import duties on raw materials and recycling equipment and other taxation incentives would also go a long way

- India also urgently needs to ensure that existing regulations (Hazardous Waste Mgmt. Rules, Battery Management Rules, E-Waste Rules enacted by MOEF&CC) pertaining to the import and use of metal scrap are strictly implemented and monitored by SPCBs/ SPCCs

Additionally, in a bid to cut dependency on metal scrap imports and support a sustainable recycling ecosystem, drafting of end-of-waste and end-of-life guidelines for metal scrap should be considered as an important initiative. One of the key challenges faced by the non-ferrous metals industry is its heavy dependence on scrap metal imports. A major share of metal scrap demand is served by imports owing to the underdeveloped metal scrap collection, segregation and processing infrastructure in the domestic market. Given India's population and metal consumption, the gap between demand and supply of metal scrap is glaring. However, scrap generation domestically has been rising year after year, thanks to the excess recycling capacity in the country. India also imports scrap from other countries over and above what is locally generated.

Another cause for concern is the reliance on imports of metal ores and concentrates, especially for copper. The domestic supply of copper ores and concentrates serves only 4% of the Indian demand, while imports make up for 96%. India's non-ferrous metals industry is also plagued by the inverted duty structure. It essentially means that select downstream products such as copper wires, zing ingots and aluminium foil etc. are imported from certain countries under trade agreements at lower tariffs than the imports of raw materials for producing primary metal in India. This has an adverse impact on domestic producers and puts them at an unfair disadvantage. A collaborative effort between the Government and industry is required to provide a fillip to the industry and to ensure that the domestic non-ferrous metals industry is globally competitive.

Introduction to the Indian Metal Industry

Metals industry has two segments: Ferrous and Non-Ferrous Metals.

Major non-ferrous metals include aluminium, copper, lead and zinc. The non-ferrous metals industry, with its far-reaching linkages across various downstream sectors, is of great economic significance. While the demand for non-ferrous metals in India is expected to rise with the Government's 'Make in India' and 'Smart City' initiatives, the industry is also preparing to face challenges to reduce costs and support technological innovation.

Copper is the second largest non-ferrous metal in India in terms of production. The country has come a long way since being a net importer of refined copper, with exports of refined copper markedly increasing over the years. However, India continues to import significant volumes of copper ores and concentrates from Chile, Australia and Indonesia. The demand for copper in India will remain strong, driven by rapidly increasing electricity generation and consumption.

Major applications of copper are in electrical sectors viz, transformers, motors, generators, switchgears, house wiring etc. The metal finds usage across numerous applications including but not limited to defence, spacecraft, railways, power cables, electronics & communications, auto ancillaries, and consumer durables such as air conditioning, refrigeration.

3.2 Significance of Non-Ferrous Metals Industry

The NFM industry has high significance in the Indian economy and resultant from its widespread use across a number of industries of both economic and strategic significance. It forms a predictable part of economic growth as it provides basic raw-feed to a wide range of key industries including defence, engineering, electrical and electronics, infrastructure, automobile and railways. These six sectors also form the core of Government's schemes and programmes such as:

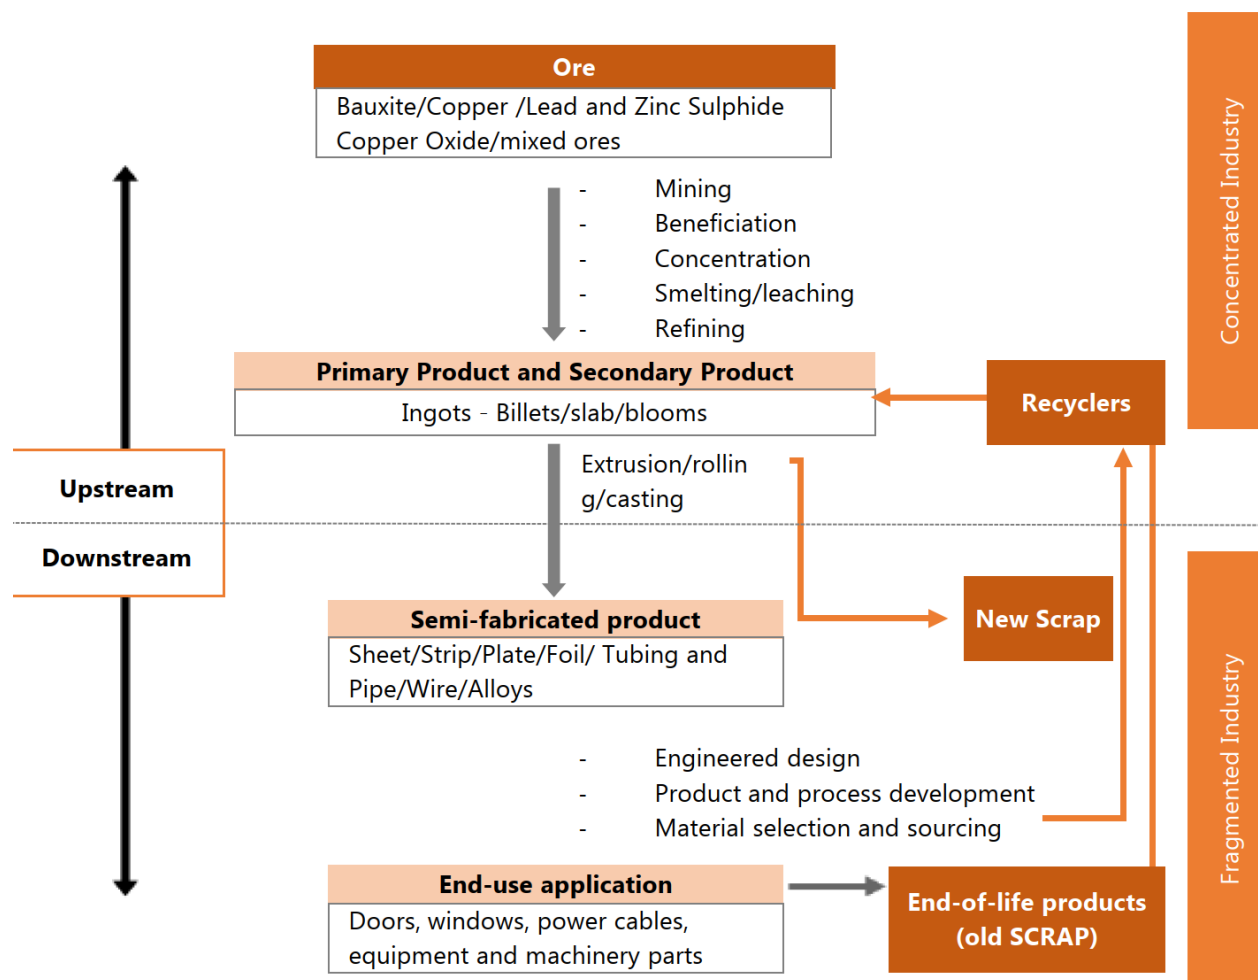

- Make in India
- Power for All
- Smart Cities Scheme,
- National Solar Mission and Housing for All, among others

The NFM industry generates large-scale employment both directly and indirectly.

3.3 Non-Ferrous Metals Industry - Value Chain

The non-ferrous metals industry has two segments: Primary and Secondary. The primary segment essentially comprises the players manufacturing metals from respective ores with partial presence in selected downstream/value added products. The secondary segment refers to the recycling industry. This segment manufactures metal from scrap. The segment features a large number of downstream players manufacturing various value-added products. The secondary segment, on the other hand, is highly competitive and fragmented, with a large number of players in both the organised and unorganised sectors.

In the copper industry, primary metal is usually in the form of copper cathodes, billets, cakes and continuous cast copper rods. The semi-fabricated or downstream products are typically in the form of rods, profiles, wires, tubes, sheets and strips.

Overview and Industry Structure of Copper Industry

One of the oldest metals, copper is an important non-ferrous base metal used in industry-wide applications. Compared to global markets, India has limited copper ore reserves, constituting to just about 2% of the world reserves. India ranks seventh in global refined copper production and fifth in copper smelter production globally. In addition, the country is a net exporter of refined copper. Hindustan Copper Limited (HCL) (public sector), Hindalco Limited and Vedanta Industries Limited (both private sector) are the three dominant players in the Indian copper market.

Copper mines in India are less in number and are mainly concentrated in the states of Rajasthan, Madhya Pradesh, Bihar and Jharkhand. Rajasthan has the largest reserves of copper ore in the country. Hindustan Copper has all the operating copper mining leases in India. Due to limited reserves availability in the country, India relies heavily on imports to fulfil ~ 96% of the demand of copper ore.

Domestic production of refined copper has been growing at a robust CAGR of 13%, recording a level of production of 494 000'MT in FY 2012-13 to the highest level of production of 795 000'MT. in FY 2016-17. Hindalco and Vedanta primarily dominate the Indian refined copper production. Indian smelters are running at about 74% of their capacities, which is at the same level as of world capacity utilisation.

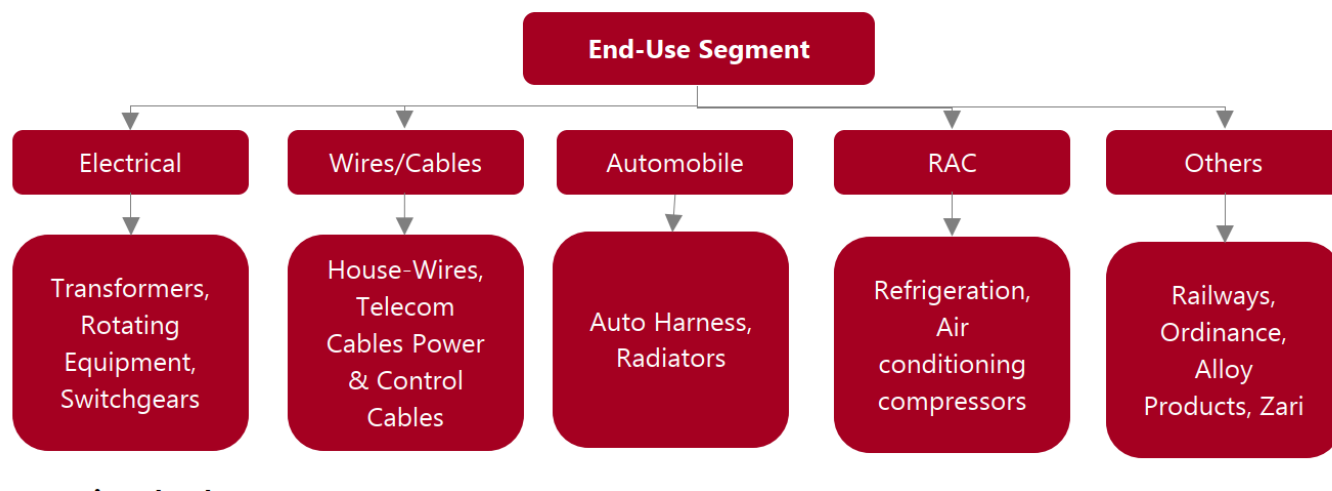

The primary copper consumption has seen a non-linear and only a marginal increase over the last decade. During 2007-16, primary copper consumption grew by only about 4%. Consumption rose from 2007 to 2010, declined during

2010-14 and then picked up again in the past two years. This is largely in line with the overall trajectory of the economy and the metals sector. The primary copper consumption decline is also in line with increased consumption of copper scrap. Refined copper consumption in the Indian economy has recorded a CAGR of 2.51% from FY 2012-13 to FY 2016-17. There was a surge in the consumption during FY 2015-16 owing to a reported drop in LME Copper prices.

Copper and copper alloys are transformed by downstream industries for use in end-use products such as automobiles, appliances, electronics, wires and cables and a whole range of other copper-dependent products. Demand for primary copper has grown at a CAGR of 14% over the past five years, thanks to robust growth in the electrical sector and consumer durables segment.

India offers a huge growth potential for copper consumption over the next 20-25 years. India's copper consumption largely comes from the electrical industry in contrast with the rest of the world. The electrical and telecommunication applications consume more than half of the total copper consumed in India. The transportation sector is a distant second with an 8% share. The consumer durables and construction sectors, each consume about 7%, and engineering goods sector's consumption is about 6%.

India's Copper Industry End-use segments

India's copper consumption largely comes from the electrical industry in contrast with the rest of the world. The electrical and telecommunication applications consume more than half of the total copper consumed in India. The transportation sector is a distant second with an 8% share. The consumer durables and construction sectors, each consume about 7%, and engineering goods sector's consumption is about 6%.

Electrical and Telecommunication applications: Copper finds its typical use in electrical applications ranging from common electrical wiring to photovoltaic cells. Besides overhead transmission line wiring which uses aluminium, a majority of electrical wirings are still made from copper.

Busbars, conductors that distribute power, transformers, and motor windings also use copper owing to its conductivity. Additionally, copper is also used in the following: electronic connectors, printed circuit boards (PCBs), micro-chips, vacuum tubes, welding electrodes and electromagnets.

Copper is also one of the components used in the production of wind turbines which can contain 4-5 metric tonne (MT) of the metal per wind mill. In terms of telecommunications applications, finely twisted copper wires are used in wiring for local area network (LAN) internet lines.

Transportation: In automobiles, copper and brass radiators and oil coolers are commonly used. Some of the modern uses of copper and its alloys in automobile industry include on-board navigation systems, anti-lock braking systems, and heated seats. Further, copper also forms a component of wiring for glass defrost systems, fittings, fasteners, and Brass screws, hydraulic lines, bronze sleeve bearings and wiring for window and mirror controls. The total weight of copper in a vehicle ranges from 15 kgs for a small-size car like hatchbacks to 30 kgs for a high-end vehicle.

The growing demand for hybrid and electric cars will further boost copper consumption. On an average, electric cars contain roughly 25 kgs of copper. Further, metal foils and copper chemicals are incorporated into both nickel-metal hydride and lithium-ion batteries that power fuel-efficient vehicles, while cast copper rotors have been used as an alternative to rare earth magnet motors.

Copper also find its use in high speed rail networks. High-speed trains can use up to 10 MT of copper per kilometre of track, whereas powerful locomotives contain as much as 8 MT of the base metal. Copper is also used in railway signalling systems. Copper has some use in the aviation industry as about 2% of an airliner's weight can be attributed to copper, which includes as much as ~190km of wiring.

Consumer Durables and Electronics: Consumer durables such as air conditioners and refrigerators make use of copper tubes as heat exchangers because of its excellent thermal conductivity and heat dissipation property. The cathode ray tubes present in TVs as well as magnetron used in a microwave ovens are made of copper. The metal is also used in microprocessors and heat-sinks.

Construction: Copper tubing is now the standard material used for potable water and heating systems in buildings. This is largely due to its bacteriostatic properties i.e. copper's ability to inhibit growth of bacterial and viral organisms in water. Medical gas pipeline is an upcoming potential market for copper tubes. In addition, the base metal is also used for decorative and architectural hardware in buildings. Copper alloys such as brass and bronze are particularly preferred for such applications. The proposed affordable Housing for all programme will auger well for copper consumption demand in the building and construction sector.

Import – Export Scenario

India is deficient in copper ores & concentrates owing to lack of copper mines in the country and thus heavily relies on imports to fulfil the industry's needs. One of the primary reasons for declining imports of copper ores and concentrates is the growing imports of refined copper and semi-fabricated copper products. Another reason for the fall in imports is the increasing protectionist curbs on exports by the Government of Indonesia, a major exporter of copper ores and concentrates. This is an alarming scenario as this means India engages in less copper refining, a high value and high margin process. The domestic industry is rather dependent more on low cost imports.

India's most important imports source for the import of copper ores and concentrates is the South American nation of Chile, the world's largest producer. India majorly exports to China, Singapore, Taiwan, Malaysia, South Korea, Oman, Indonesia and Saudi Arabia. During FY 2012-13 China imported 88% of India's refined copper exports vis-à-vis to now China only imports 37% of India's refined copper exports for FY2016-17.

As recycled copper alone cannot meet the industry demands, India is dependent on copper produced from mineral ores. Since FY 2015-16, there been a substantial increase in the imports of unrefined copper. From FY 2015-16 to FY 2016-17, there has been a y-o-y increase in imports of unrefined copper by 25.20%. This is could be related to the increase in domestic consumption of refined copper as well.

Due to the increase in copper supply and demand for copper, India has emerged as a net exporter of Refined Copper. Although India is a net exporter of copper, there is a significant proportion of import of downstream products. Of the total, refined copper production over 50% is being exported. India majorly exports to China, Singapore, Taiwan, Malaysia, South Korea, Oman, Indonesia and Saudi Arabia. During FY 2012-13 China

imported 88% of India's refined copper exports vis-à-vis current level of ~ 37% of India's refined copper exports for the FY 2016-17. As China is a manufacturing country, the demand for copper supersedes their domestic production. India's exports of copper scrap are negligible in comparison to the exports of primary copper and copper products.

Secondary Non-Ferrous Industry

The secondary non-ferrous metals industry incorporates recycling industry (companies that manufacture metal from scrap) and as well as a large number of secondary producers. Secondary producers are players who manufacture value added products like foils, extrusions, dry batteries, castings etc. either by procuring the metal from the primary producers or from scrap.

The secondary segment plays an important role in this highly competitive and fragmented industry, with a large number of players both in the organised and unorganised segments. The fragmented nature of the industry has made it difficult to regulate and modernise it. In India, the scrap collection, segregation and recycling infrastructure remain poor.

The secondary production of metals through recycling requires significantly lower resources as compared to the requirement for primary production and contributes significantly to meet the total demand of non-ferrous metals in India.

Metal recycling policy

India has witnessed strong growth in the recycling industry since 2010. Focus on metals recycling has increased rapidly due to the growing emphasis on environment conservation and sustainable development. This has increased metal recycling share in the total metal production significantly with time, and is almost in parity with the global level.

National Non-Ferrous Metal Scrap Recycling Framework

The Government of India through its National Non-ferrous Metal Scrap Recycling Framework, 2020 seeks to use life cycle management approach for better efficiency in mineral value chain process. It envisages bringing both product and processing stewardship to enhance Non-Ferrous Metal recycling.

The main objectives of this framework are:

1. To promote a formal and well organized recycling ecosystem by adopting energy efficient processes for recycling leading to lower carbon footprints and to work towards sustainable development and intergenerational equity.
2. To minimize the effect of end of life products on landfills and environmental pollution by promoting an environmentally sound processing and recycling system for secondary industry.
3. To work towards economic wealth creation, job creation and increased contribution to GDP through metal recycling;
4. To adopt data based analysis and policy making at all stages of recycling chain to determine and utilize opportunities available for enhancing extraction of non-ferrous metals, improve trade and commerce and derive economic benefits from scientific recycling.
5. To promote 6Rs principles of Reduce, Reuse, Recycle, Recover, Redesign and Remanufacture through scientific handling, processing and disposal of all types of non-ferrous scrap, through authorized centers /facility.
6. To produce high quality scrap for quality secondary production thus minimizing the dependency on imports.
7. To shift towards a circular economy in the coming years for base metals, critical raw materials and other essential materials.
8. To achieve technological leadership in scientific methodology, process know-how, facilities and best practices for collection, processing and value addition in entire scrap recycling process.

9. Create a mechanism for treating metal scrap and residues produced from dismantling and shredding facilities in compliance to Hazardous & Other Wastes (Management & Trans-boundary Movement) Rules, 2016 issued by MoEF&CC.
10. To evolve a responsive ecosystem by involving all stakeholders.

The implementation guidelines that have been laid down for recycling of metal scrap are :-

1. This Framework envisages setting up of a central authority for recycling of metals which may be called as Metal Recycling Authority. The Authority will act as facilitator to implement the Non-Ferrous Metal Scrap Recycling Framework.
2. The government will work towards establishing standards for Quality of scrap used for recycling.
3. Standard procedures for recycling and processing of scrap will be laid down in consonance with MoEFCC rules/guidelines for environment protection.
4. A mechanism for registration of segregators, dismantlers, recyclers, collection centers etc. will be developed for facilitating the recycling activities to transition to an organized sector.
5. Necessary steps will be undertaken for introduction of periodic inspection and review of the activities of scrap dismantling and recycling units.
6. Technology up-gradation and adoption of Best Available Technology (BAT) for scrap recycling to be promoted in line with existing environmental compliances. Provisions to be laid down to maximize recovery of material from all forms of waste, scrap and End of Life Products.
7. An institutional mechanism will be set up for carrying out detailed studies and advance research related to recycling of metals.
8. The government will encourage and provide support to Research & development (R&D) in Metal scrap recycling.
9. Specified metal recycling zones with facility for collection, segregation, dismantling etc. of metal scrap will be developed. Urban local bodies shall earmark areas and develop collection centers for recyclable wastes (including metal scrap). Such a facility will act as supply source of raw materials for the recycling units and will be equipped with testing facilities to assess the quality of the recovered material.
10. It is proposed to set up Urban Mines, envisaged as a location to collect and hold large quantities of similar materials. The size of Urban Mine may be as per material requirement.
11. Provision for fiscal and non fiscal incentives for registered recycling units may be made to promote formal recycling operations and simultaneously discourage informal operations by reducing cost of ownership of operations.
12. Financial assistance and concessions may be provided to recyclers setting up a new recycling unit in MSME in consultation with Ministry of Finance and other stakeholders.
13. Process Standards, like Recycling Industry Operating Standards (RIOS) established by Institute of Scrap Recycling Industries (ISRI) or similar, will be put in place.
14. Minimum infrastructure requirement will be put in place for recycling units with clear minimum standards and criteria for the processing of recyclables to produce consistent, high quality streams of recyclable material which may, inter-alia, include:-
 - a. Appropriate equipment and use best available technology for recycling activities.
 - b. Unit handling imported scrap be equipped with radioactive detection equipment.
 - c. Adequate space for equipment, storage and handling of segregated wastes.
 - d. Adequate competent and trained manpower to operationalize and manage facility in a safe and eco-friendly manner.
 - e. Re-melting centers certification to laid down process standards to provide a systematic framework to achieve measurable continual improvement in their Quality, Environmental, Health and Safety (QEH&S) performance.
 - f. Adoption of updated BIS guidelines on occupational health and safety management (Occupational Health & Safety Management System as per IS 18001 & IS ISO 45001) to ensure safe operating practices. Also, engagement of competent and trained manpower to process scrap is to be encouraged.
 - g. Maintaining record of stock and flow of scrap and recycled metal including finished goods, energy use, water use, material use and environmental emissions etc. on a digital platform. This information is to be periodically submitted to administrative authority.

- h. Scrap trading and recycling units to share the data with the concerned government agency periodically as decided by the Competent Authority.
- 15. Efforts to strengthen and have a well organized Scrap Supply Chain will be made.
- 16. An Online market platform/ exchange platform for recycled/secondary metal will be developed. Auctions of Scrap, Waste and End of Life Materials by various organizations to authorized scrap distributors/aggregators/ recyclers will be facilitated.
- 17. Recyclers may explore the possibility of entering into collection contracts with industrial and commercial establishments.
- 18. Continuous efforts will be made to organize and formalize value chains and improve ease of doing business with domestic and international partners.
- 19. Number of collection and processing centers in the organized sector will be increased.
- 20. Persistent efforts will be made to facilitate market uptake of recycled material/product by introduction of Quality certification mechanism for recycled secondary metal. Recycled metal will be certified for its physico-chemical quality by accredited agencies, to enable its uptake by goods producers/manufacturers.
- 21. A „recycled“ logo may be put on all recycled products to highlight circular economy.
- 22. It will be the government“s endeavour to lay down „Minimum Recycled Content Requirement“ for manufacturing of select products. Basis for Opinion

We conducted our audit of the consolidated financial statements in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Act. Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Group in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India (ICAI) together with the ethical requirements that are relevant to our audit of the consolidated financial statements under the provisions of the Act and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. We believe that the audit evidence obtained by us is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

We have determined that there are no key audit matters to be communicated in our report.

Other Information

The Holding Company's Board of Directors is responsible for preparation and presentation of the other information. The other information comprises the information included in the Board's Report including Annexures to Board's Report, but does not include the standalone financial statements, consolidated financial statements and our auditors' report thereon.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained during the course of our audit or otherwise appear to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Management's Responsibilities for the Consolidated Financial Statements

The Holding Company's Board of Directors is responsible for the preparation and presentation of these consolidated financial statements in term of the requirements of the Companies Act, 2013 that give a true and fair view of the consolidated financial position, consolidated financial performance including other comprehensive income, consolidated cash flows and consolidated statement of changes in equity of the Group in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards specified under section 133 of the Act read with Rule 7 of the Companies (Accounts) Rules, 2014. safeguarding the assets of the Group and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the consolidated financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error, which have been used for the purpose of preparation of the consolidated financial statements by the Directors of the Holding Company, as aforesaid.

In preparing the consolidated financial statements, the respective management of the companies included in Group are responsible for assessing the ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate or to cease operations, or has no realistic alternative but to do so.

The respective Board of Directors of the companies included in the Group are also responsible for overseeing the financial reporting process of the Group.

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
 - v. evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
 - vi. obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group of which we are the independent auditors and whose financial information we have audited, to express an opinion on the Consolidated Financial Statements. We are responsible for the direction, supervision and performance of the audit of the financial statements of such entities included in the consolidated financial statements of which we are the independent auditors. For the other entities included in the consolidated financial statements, which have been audited by other auditors, such other auditors remain responsible for the direction, supervision and performance of the audits carried out by them. We remain solely responsible for our audit opinion.

We communicate with those charged with governance of the Holding Company, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

(B) Basis of Preparation of Consolidated Financial Statements

The consolidated financial statements comprise the financial statements of the Company and its subsidiary as at 31st March, 2020.

Subsidiary

Subsidiary is the entity over which the company has control. Control is achieved when the company is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Specifically, the company controls an investee if and only if the company has:

- Power over the investee (i.e. existing rights that give it the current ability to direct the relevant activities of the investee)
- Exposure, or rights, to variable returns from its involvement with the investee, and
- The ability to use its power over the investee to affect its returns.

The group re-assesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of controls. Consolidation of a subsidiary begins when the group obtains control over the subsidiary and ceases when the group loses control of the subsidiary.

(C) Consolidation procedure

The consolidated financial statements have been prepared on the following basis:

- The financial statements of the Company and its subsidiary are combined on a line by line basis by adding together like items
- Profits or losses resulting from intra-group transactions that are recognised in assets, such as inventory, trade receivables are eliminated in full.
- Offset (eliminate) the carrying amount of the parent's investment in each subsidiary and the parent's portion of equity of each subsidiary.
- Non-controlling Interest's share of profit / loss of consolidated subsidiary for the year is identified and adjusted against the income of the group in order to arrive at the net income attributable to shareholders of the Company.
- Non-controlling Interest's share of net assets of consolidated subsidiary is identified and presented in the Consolidated Balance Sheet separate from liabilities and the equity of the Company's shareholders.

(38) FINANCIAL RISK MANAGEMENT

The Group's principal financial liabilities are borrowings, trade and other payables. The main purpose of these financial liabilities is to finance the Group's operations. The Group's principal financial assets include trade and other receivables, investments and cash and cash equivalents that arise directly from its operations. The Group's activities expose it to market risk, liquidity risk and credit risk. Market risk is the risk of loss of future earnings, fair values or future cash flows that may result from a change in the price of a financial instrument. The value of a financial instrument may change as a result of changes in the interest rates, foreign currency exchange rates, commodity prices, equity prices and other market changes that affect market risk sensitive instruments. Market risk is attributable to all market risk sensitive financial instruments, including investments and deposits, foreign currency receivables, payables and borrowings. The Group's overall risk management focuses on the unpredictability of financial market and seeks to minimise potential adverse effects on the financial performance of the Group.

Interest Rate Risk:

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in prevailing market interest rates.

Equity Price Risk

The Group is exposed to equity price risks arising from equity investments. Equity investments are held for strategic rather than trading purposes. The Group does not actively trade in these investments.

Credit Risk:

Credit risk refers to risk that a counterparty will default on its contractual obligations resulting in financial loss to the Group. Credit risk arises primarily from financial assets such as trade receivables, investment in mutual funds, derivative financial instruments, other balances with banks, loans and other receivables. The Group has adopted a policy of only dealing with counterparties that have sufficiently high credit rating. The Group's exposure and credit ratings of its counterparties are continuously monitored and the aggregate value of transactions is reasonably spread amongst the counterparties.

Credit risk arising from trade receivables, investment in mutual funds, derivative financial instruments and other balances with banks is limited and there is no collateral held against these because the counterparties are banks and recognised financial institutions with high credit ratings assigned by the credit rating agencies.

Liquidity Risk:

Liquidity risk is defined as the risk that the Group will not be able to settle or meet its obligations on time or at reasonable price. Prudent liquidity risk management implies maintaining sufficient cash and marketable securities and the availability of funding through an adequate amount of credit facilities to meet obligations when due. The Group's finance team is responsible for managing liquidity, funding as well as settlement management. In addition, processes and policies related to such risks are overseen by senior management. Management monitors the Group's liquidity position through rolling forecasts on the basis of expected cash flows.

Regulatory Risk:

The Group is exposed to risk attached to various statutes, laws and regulations including the Competition Act. The Group is mitigating these risks through regular review of legal compliances carried out through internal scrutiny as well as external compliance audits.

Capital Risk Management:

For the purpose of the Group's capital management, capital includes issued equity capital and all other equity reserves attributable to the equity holders. The primary objective of the Group's capital management policy is to ensure that all times, it remains going concern and safeguard interest of its shareholders and stakeholders.

Commodity Price Risk:

The Group is exposed to the risk of price fluctuations of raw material and trading goods. The Group proactively manages these risks through forward booking, inventory management and proactive vendor development practices.

MARKET RISK- FOREIGN CURRENCY RISK:

The Group is exposed to foreign exchange risk through its sales in overseas and purchases from overseas suppliers in various foreign currencies. Exports of the Group are significantly lower in comparison to its imports. Foreign currency exchange rate exposure is partly balanced by exports of goods and prudent hedging policy.

To,
**The Board of Directors,
SPV Global Trading Limited**

We have reviewed the accompanying Statement of unaudited consolidated financial results of **SPV Global Trading Limited** ("the Company") and its subsidiaries (together referred to as the "Group") for the quarter ended June 30, 2021 (the "Statement") being submitted by the Company pursuant to the requirements of Regulation 33 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 as amended ('the Regulation').

This Statement, which is the responsibility of the Company's management and approved by the Company's Board of Directors, has been prepared in accordance with the recognition and measurement principles laid down in Indian Accounting Standard 34, (Ind AS 34) "Interim Financial Reporting" prescribed under Section 133 of the Companies Act, 2013 as amended, read with relevant rules issued thereunder and other accounting principles generally accepted in India read with the Circular. Our responsibility is to express a conclusion on the Statement based on our review.

We conducted our review of the Statement in accordance with the Standard on Review Engagements (SRE) 2410, "Review of Interim Financial Information Performed by the Independent Auditor of the Entity" issued by the Institute of Chartered Accountants of India. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

We also performed procedures in accordance with the Circular issued by the Securities and Exchange Board of India under Regulation 33(8) of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 as amended, to the extent applicable.

The Statement includes the results of the following entities:

Name of the Entity	Relationship
Rashtriya Metal Industries Limited	Subsidiary
RMIL Real Estate LLP (Subsidiary of Rashtriya Metal Industries Limited)	Subsidiary

Based on our review conducted and procedures performed as stated in above and based on the consideration of the review reports of the other auditors referred below, nothing has come to our attention that causes us to believe that the accompanying Statement, prepared in

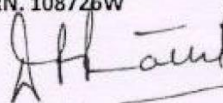

accordance with the recognition and measurement principles laid down in the aforesaid Indian Accounting Standard and other accounting principles generally accepted in India, has not disclosed the information required to be disclosed in terms of Regulation 33 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, as amended, including the manner in which it is to be disclosed, or that it contains any material misstatement.

We did not review the interim financial information/financial results of subsidiaries included in the Statement, whose interim financial information/financial results reflect total revenues of Rs. 11133.026 lacs, total net profit after tax of Rs. 167.90 lacs and total comprehensive income of Rs. 167.90 lacs for the quarter ended June 30, 2021, as considered in the Statement. These interim financial information/ financial results have been reviewed by the other auditors whose reports have been furnished to us by the Management, and our conclusion on the Statement, in so far as it relates to the amounts and disclosures included in respect of these subsidiaries, is based solely on the reports of the other auditors and the procedures performed by us as stated above. Our conclusion on the Statement is not modified in respect this matter.

Attention is drawn to note 3 to the Statement regarding the figures for the quarter ended March 31, 2021, which are the balancing figures between the audited figures in respect of the full financial year and the unaudited year to date figures up to the third quarter of the previous financial year, which were subject to limited review by us.

**Independent Auditor's Review Report on Standalone financial results of SPV
Global Trading Limited pursuant to Regulation 33 of the SEBI (Listing
Obligations and Disclosure Requirements) Regulation, 2015**

To,
**The Board of Directors of
SPV Global Trading Limited**

We have reviewed the accompanying Statement of unaudited Standalone financial results of SPV Global Trading Limited ('the Company') for the quarter ended 30th June, 2021, being submitted by the Company pursuant to the requirements of Regulation 33 of the SEBI (Listing Obligations and Disclosure Requirements) Regulation, 2015, as amended.

This Statement, which is the responsibility of the Company's management and approved by the Company's Board of Directors, has been prepared in accordance with the recognition and measurement principles laid down in the Indian Accounting Standard 34 "Interim Financial Reporting" ("Ind AS 34"), prescribed under Section 133 of the Companies Act, 2013, as amended, read with relevant rules issued thereunder and other accounting principles generally accepted in India. Our responsibility is to issue a report on the Statement based on our review.

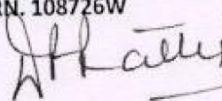

We conducted our review in accordance with the Standard on Review Engagement (SRE)2410, "Review of Interim Financial Information Performed by Independent Auditor of the Entity" issued by the Institute of Chartered Accountants of India. This standard requires that we plan and perform the review to obtain moderate assurance as to whether the financial statements are free of material misstatement. A review is limited primarily to inquiries of company personnel and analytical procedures applied to financial data and thus provides less assurance than an audit. We have not performed an audit and accordingly, we do not express an audit opinion.

Based on our review conducted as above, nothing has come to our attention that causes us to believe that the accompanying Statement, prepared in accordance with recognition and measurement principles laid down in the applicable Indian Accounting Standards as prescribed under Section 133 of the Companies Act, 2013, read with relevant rules issued there under and other recognized accounting practices and policies, has not disclosed the information required to be disclosed in terms of Regulation 33 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, as amended, including the manner in which it is to be disclosed, or that it contains any material misstatement.

Attention is drawn to note 3 to the Statement regarding the figures for the quarter ended March 31, 2021, which are the balancing figures between the audited figures in respect of the full financial year and the unaudited year to date figures up to the third quarter of the previous financial year, which were subject to limited review by us.

OVERVIEW OF OUR BUSINESS

We are engaged in the business trading in a wide spectrum of non-ferrous metals like copper which serves the copper alloy manufacturing industry, which in turn serves many industries such as Automobiles, Electricals, Electronics, horological, coinage, etc. We essentially deal in the trading of copper and copper scrap. Our Company was in the business of trading in shares and securities and was accordingly registered with the Reserve Bank of India as an NBFC. The registration was voluntarily surrendered and RBI has cancelled the NBFC registration w.e.f 02.08.2018. Our Company is currently engaged only in the trading in copper scrap and hold certain business and assets. Further, our Company has entered into trading in virgin metals like Copper Cathodes, Zinc Ingots, Nickel Cathodes, Tin Ingots, Storage and logistics of virgin metals and advisory services on hedging on London Metal Exchange (LME). Our Company proposes to invest in shares and securities of various listed companies and units of Mutual Funds in the future.

Our Business Strategy

Sourcing quality raw material from reliable sources at cheaper prices

We currently procure raw materials from Ordnance Factory Ambernath, Maharashtra and from other domestic sources. We intend to source with the help of the experience of our promoters and other external agencies, high quality raw materials from other suppliers at cheaper prices. These actions are expected to improve margins and reduce costs. We believe our focus on costs will help us improve our profitability and return on capital employed.

Exploring new sources of metal including import of metals

We currently concentrate in trading in Copper and copper alloys. We intend to trade in other virgin metals like Copper Cathodes, Zinc Ingots, Nickel Cathodes, and Tin Ingots. This diversification into other metals, including the import of the same will increase the spectrum of our activities and will supplement our existing marketing strategies in the domestic markets. We have already started trading in these metals in a small scale. We believe this will in the future help us in penetrating new regional markets and therefore improve our profitability.

Evaluate the possibilities of export

Since the demand for refined copper is very high in the international market and India has emerged as a net exporter of refined copper, we intend to evaluate the possibilities of exports and commence exports in the near future. This will supplement our total market and improve margins thereby helping us improve our profitability and return on capital employed. We also plan to apply for Import Export Code and have completed the registration in Government sources.
