OVERVIEW OF TEXTILE INDUSTRY

India’s textiles sector is one of the oldest industries in Indian economy dating back several centuries. India's overall textile exports during FY 2017-18 stood at US\$ 39.2 billion.

The Indian textiles industry is extremely varied, with the hand-spun and hand-woven textiles sectors at one end of the spectrum, while the capital intensive sophisticated mills sector at the other end of the spectrum. The decentralised power looms/ hosiery and knitting sector form the largest component of the textiles sector. The close linkage of the textile industry to agriculture (for raw materials such as cotton) and the ancient culture and traditions of the country in terms of textiles make the Indian textiles sector unique in comparison to the industries of other countries. The Indian textile industry has the capacity to produce a wide variety of products suitable to different market segments, both within India and across the world. 2. We have experienced negative cash flows from our operating, investing and financing activities for few years

The details of cash flows of our Company are as follows:

Particular	As on January 31, 2019	As on September 12, 2018	For the year ended on March 31,		
			2018	2017	2016
Net Cash generated from Operating activities	(84.48)	(20.06)	124.36	(74.95)	164.30
Net Cash flow from Investing activities	68.65	(4.10)	(78.03)	19.00	(94.58)
Net Cash Flow from financing activities	10.67	(9.66)	(109.86)	46.62	(204.50)

Cash flow of a Company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and to make new investments without raising finance from external resources. Any operating losses or negative cash flows could adversely affect our results of operations and financial conditions. If we are not able to generate sufficient cash flows, it may adversely affect our business and financial operations.

3. Certain qualifications have been noted by our Auditors in their report on the Restated Financial Statements for non-provision for Gratuity Payment as required under the Payment of Gratuity Act 1972.

Our Auditors have provided certain qualifications in their report on the Restated Financial Statements for the period ended January 31, 2019, September 12, 2018 and the financial year ended March 31, 2018, 2017 and 2016 relating to

the financial statements for our Company is as follows: As per Accounting Standard- 15 (Employee Benefits) issued by the Institute of Chartered Accountants of India, our Company is required to assess its gratuity liability each year on the basis of actuarial valuation and make provision for gratuity liability. However, our Company has not provided for gratuity liability in the financial statement and has not taken any actuarial valuation report for this year. So we are not in position to provide effect in Restated financial statements and to that extent the profit & loss account of the company does not represent true & fair result of the company performance. Our Company has not complied with accounting standards 15 and Section 4A of the Payment of Gratuity Act, 1972, in the past. Although no show cause notice in respect of the same has been received by the Company till date. Any penalty imposed for such non-compliance could affect our financial conditions to that extent. In relation to gratuity we have not received any notice/communication from the relevant authority, for the previous defaults till date.

4. Our results of operations may be materially adversely affected by our failure to anticipate and respond to changes in fashion trends and consumer preferences in a timely manner

Our results of operations depend upon the continued demand by consumers for our products. We operate in an industry that is highly competitive and where customers' purchases are highly subjective and sensitive to trends and fashion tastes. Creativity and being abreast with the latest fashion trends are one of the key attributes for success in this industry. For our Company to remain competitive in respect of appealing designs, our designers have to keep themselves abreast with the latest global trends, and fashion demands and more importantly understand the requirements of the customers. If we are unable to anticipate consumer preferences or industry changes, or if we are unable to modify our products on a timely basis, we may lose customers to our competitors, or may be forced to reduce our sales realization on products by having to offer them at a discount, thereby reducing our margins.

5. We are subject to the restrictive covenants of banks in respect of the Loan/Credit Limit and other banking facilities availed from them.

Our financing arrangements contain restrictive covenants whereby we are required to obtain approval from our lenders, regarding, among other things such as information about assets and financial condition of the Company and statements on total amount due and outstanding to other lenders, submission of quarterly stock and book debts and creditor's statement, happening of any event likely to have substantial effect on Company's business or profit, etc. There can be no assurance that such consents will be granted or that we will be able to comply with the financial covenants under our financing arrangements. In the event we breach any financial or other covenants contained in certain of our financing arrangements, we may be required under the terms of such financing arrangements to immediately repay our borrowings either in whole or in part, together with any related costs. This may adversely impact our results of operations and cash flows.

For further details on the Credit facilities availed by the Company, please see "*Financial Indebtedness*" on page 182 of the Prospectus.

6. We have entered into, and may continue to enter into related party transactions and there can be no assurance that such transactions have been on favourable terms

Our Company has entered into related party transactions with our Promoters, Directors and the Promoter Group in past and for the period ended January 31, 2019. While our Company believes that all such transactions have been conducted on arms-length basis, there can be no assurance that it could not have been achieved on more favourable terms had such transactions not been entered into with related parties. Furthermore, it is likely that our Company will enter into related party transactions in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operation. For details, please refer to "Annexure 31 - Related Party Transactions" under section titled "Financial Statements as restated" on page 145 of this Prospectus.

7. Our Company operates under several statutory and regulatory permits, licenses and approvals. Our inability to obtain, renew or maintain the statutory and regulatory licenses permits and approvals required to operate our business may have an adverse effect on our business & operations

We require certain statutory and regulatory permits and approvals to undertake our business activities. We are required to renew such permits and approvals, from time to time, and will be required to obtain new permits and approval, if we increase the scope of our business.

Certain statutory and regulatory permits, licenses and approvals are still in the name of our Partnership Firm which has been converted into our Company in September 2018. While we have made, or are in the process of making, applications for the transfer/registration of some of such permits, licenses and approvals in the name of our Company,

there can be no assurance that we will be able to obtain any such transfer / registration in a timely manner or at all. Further, we have not made applications for the transfer / registration applications of some of such permits, licenses and approvals in the name of our Company. Any failure or delay in obtaining such approvals, permits and licenses, or the transfer/registration thereof in the name of our Company, may affect our ability to continue our operations, which may in turn have an adverse effect on our business and results of operations.

For more information on the status of our material statutory and regulatory permits, please refer to the Chapter titled “**Government and Other Approvals**” beginning on page 188 of this Prospectus.

8. We are highly dependent upon few suppliers for our raw material for our current manufacturing facilities. In an eventuality where our suppliers are unable to deliver us the required materials in a time-bound manner it may have a material adverse effect on our business operations and profitability.

For the Financial Year ended as on March 31, 2018, our top 10 suppliers contributed around 76.94% and top 5 suppliers contributed around 61.92% of our purchases. In the event of a delay, inadequacy or default in deliveries by any of our vendors, we may not be able to source our raw material on an adequate and timely basis or on commercially acceptable terms. A major disruption to the timely and adequate supplies of our raw materials could adversely affect our production and thereby our business, results of operations and financial condition. Any problems faced by our suppliers in their manufacturing facilities resulting in delays or non-adherence to quality requirements could adversely impact our ability to meet our customers’ requirements in time and our operations would be affected to the extent we are unable to line up supplies from alternate suppliers.

9. We may suffer loss of income, if our products/designs are duplicated by our competitors.

As our industry is fashion oriented, there is constant need for updating and innovation. Hence, designs in our industry change on a frequent basis. Our success highly depends upon the adaptability of the designs as per the latest trends and the acceptance of the product in the market. If any of our designs hits the market and receives over whelming response, our competitors may tend to copy our design to increase their market share and revenues and take due advantage; thus hampering market. Since our designs are not registered, we may not be able to claim our rights over it and could suffer loss of income thereby affecting our results of operations.

10. We do not generally enter into long term supply agreements with our suppliers for supply of material accordingly may face disruptions in supply from our current suppliers.

We are dependent on our suppliers for our materials requirements. However, we do not have any long-term supply agreements or contracts or commitments in relation to the same or for any other materials used in our fabrication process. Any interruptions in the manufacturing operations of the suppliers could affect our ability to receive an adequate supply of quality products at reasonable prices. Additionally, any price volatility of these materials and our inability to adjust to the same could adversely affect our results of operations and profitability. Further any deterioration in the quality of the material procured could adversely affect our results of operations and profitability.

11. We could become liable to our customers, suffer adverse publicity and incur substantial costs as a result of defects in our products, which in turn could adversely affect the value of our brand, and our sales could be diminished if we are associated with negative publicity.

Any failure or defect in our products could result in a claim against us for damages, regardless of our responsibility for such failure or defect. We currently carry no products liability insurance with respect to our products. Although we attempt to maintain quality standards, we cannot assure that all our products would be of uniform quality, which in turn could adversely affect the value of our brand and our sales could be diminished if we are associated with negative publicity.

Also, our business is dependent on the trust of our customer have in quality of our products. Any negative publicity regarding our company, brand or products, including those arising from drop in quality of merchandise from our vendors, mishaps resulting from the use of our products, or any other unforeseen events could affect our reputation and our results from operations.

12. Exchange rate fluctuations may adversely affect the Company's financial performance

For FY 2018, more than 90% of our revenues are derived from exports, our Company is exposed to foreign exchange rate risks primarily in relation to the export of products. Accordingly, adverse movements in foreign exchange rates may increase procurement costs and adversely affect the Company's results of operations. While our Company has been hedging itself against the currency fluctuations in order to appropriately mitigate risks, which we believe is adequate to protect the Company from such fluctuations, there can be no assurance that the risks arising out of the same can be fully mitigated.

13. We operate in a highly competitive environment and may not be able to maintain our market position, which may adversely impact our business, results of operations and financial condition

The apparel industry in particular, is highly and increasingly competitive and our results of operations and financial condition are sensitive to, and may be materially adversely affected by, competitive pricing and other factors. Competition may result in pricing pressures, reduced profit margins or lost market share or a failure to grow our market share, any of which could substantially harm our business and results of operations.

However, the domestic apparel segment is fragmented and continues to be dominated by unorganised and regional suppliers. We believe that in order to compete effectively, we must maintain our brand image and reputation, be flexible and innovative in responding to rapidly changing market demands and consumer preferences and offer consumers a wide variety of high quality apparel at competitive prices.

Many of our competitors, have significant competitive advantages, including longer operating histories, larger and broader customer bases, more established relationships with a broader set of suppliers, greater brand recognition and greater financial, research and development, marketing, distribution and other resources than we do. Our competitors also may be able to respond more quickly and effectively than we can to new or changing opportunities, standards or consumer preferences, which could result in a decline in our revenues and market share. There can be no assurance that we can effectively compete with our competitors in the future, and any such failure to compete effectively may have a material adverse effect on our business, financial condition and results of operations.

14. We operate in a highly competitive environment and may not be able to maintain our market position, which may adversely impact our business, results of operations and financial condition

Our Company has entered into certain transactions with our related parties including our Promoters, Promoters Group, Directors and their relatives. While we believe that all such transactions have been conducted on the arm's length basis, we cannot assure you that we might have obtained more favourable terms had such transactions been entered into with unrelated parties. Furthermore, it is likely that we may enter into related party transactions in the future. We cannot assure you that such transactions, individually or in the aggregate, will always be in the best interests of our minority shareholders and will not have an adverse effect on our business, results of operations, cash flows and financial condition. For details, please refer "Financial Statements – Related Party Transactions" on page no. 143 of this Prospectus.

15. A significant portion of our revenues is derived from the exports of our products and any reduction in the exports may adversely affect our revenues, business, results of operations and prospects

The exports of our products contributed 83.35%, 87.14 % and 97.16 %, 98.60 % and 99.48 % of our revenues from operations (net) for the period ended January 31, 2019, September 12, 2018 and the Fiscals 2018, 2017 and 2016, respectively. While we have experienced growth of our operations through exports, we currently, and expect to, continue for the short and medium term to, depend on our revenues from exports of our products. We may experience reduction in cash flows and liquidity, and our results of operations may be adversely affected, if our exports and revenues in this consumer sub- category are reduced for any reason.

16. Our historical revenues have been significantly dependent on our few customers and our inability to maintain such business may have an adverse effect on our results of operations.

For the year ended March 31, 2018, sales to our top 10 customers contributed around 98.21% and top 5 customers contributed around 89.73% of our revenues from operations. Our business from customers is dependent on our continuing relationship with such customers, the quality of our products and our ability to deliver on their orders, and there can be no assurance that such customers will continue to do business with us in the future on commercially acceptable terms or at all. If our customers do not continue to purchase products from us, or reduce the volume of products purchased from us, our business prospects, results of operations and financial condition may be adversely affected. Significant dependence on them may increase the potential volatility of our results of operations and exposure to individual contract risks. In the event that any of these customers discontinue purchase of products from us, our results of operations and financial condition may be adversely affected.

17. We have not identified any alternate source of raising the working capital mentioned as our ‘Objects of the Issue’. Any shortfall in raising/meeting the same could adversely affect our growth plans, operations and financial performance

As on date, we have not made any alternate arrangements for meeting our working capital requirements for the Objects of the Issue. Further, we have not identified any alternate source of working capital funding and hence any failure or delay on our part to raise money from this issue or any shortfall in the issue proceeds could adversely affect our growth plans. We meet our working capital requirements through our owned funds, internal accruals and debt. Any shortfall in our net owned funds, internal accruals and our inability to raise debt would result in us being unable to meet our working capital requirements, which in turn will negatively affect our financial condition and results of operations. For further details please refer to the chapter titled “*Objects of the Issue*” beginning on page 64 of this Prospectus.

18. The corporate office, Showroom and factory premises of our Company are not owned by us

The Corporate office and showroom at Unit No A-2/79/178, Shah & Nahar Industrial Estate, Sitaram Jadhav Marg, Lower Parel, Mumbai- 400013, Maharashtra, India and factory premises of our Company at BTS 68, 01 ground floor SK International, HDIL Industrial Park, Chandansar, Virar East-401305, Palghar Maharashtra, India is owned by our Promoters, namely Mr. Hitesh Shrawankumar Sadh and Mr. Shrawankumar P. Sadh and the said premises have been taken by our Company on leasehold /leave and license basis for 60 months starting from January 04, 2019. In the event of expiry, non-renewal or early termination of the lease/ leave and license arrangement or in case of disassociation of our promoters with our Company, we may have to vacate the said premises at a short notice. Further we will be required to return the said premises to the Licensor, unless renewed. There can be no assurance that the term of the agreements will be renewed and in the event the Licensor terminates or does not renew the agreements on commercially acceptable terms, or at all, and we are required to vacate our offices, we may be required to identify alternative premises and enter into fresh lease or leave and license agreement. Such a situation could result in loss of business, time overruns and may adversely affect our operations and profitability.

19. Competition from Other established competitors

Our Company’s business is driven with various factors like intense competition from established as well as unorganized players. Our competition depends on several factors which includes quality, price and most importantly to upgrade with the latest trend to reap optimum sales.

We believe that we operate a comprehensive business model encompassing scarves & beachwear. We operate in unrecognized highly competitive market. Even with a diversified product portfolio and quality approach we have to face intense competitive pressures.

Our competition varies for our products and regions. We compete with other manufacturers on the basis of product range, product quality, and product price including factors, based on reputation, regional needs, and customer convenience. While these factors are key parameters in client’s decisions matrix in purchasing goods; product range, product quality and product price is often the deciding factor in most deals. Our Company faces competition from several other domestic and foreign brands present in the market as also new brands that may enter in the market in the future.

20. All our locations including registered office, manufacturing unit and warehouses are currently located in Mumbai and Palghar dist. of Maharashtra. Any significant disruption, due to social, political or economic factors or natural calamities or civil disruptions in this region may have an adverse effect on our business and prospect.

All our locations including registered office, manufacturing unit and warehouses are currently located in Mumbai and Palghar dist. in Maharashtra respectively and any significant disruption, due to social, political or economic factors or natural calamities or civil disruptions, impacting this region may adversely affect operations. Further, our factory and warehouses are subject to operating risks, such as performance below expected levels of efficiency, labour disputes, natural disasters, industrial accidents and statutory and regulatory restrictions. Our distributors and franchisees rely significantly on the timely delivery of our products and our ability to provide an uninterrupted supply of our products is critical to our business. Any disruption of operations at our factory and warehouses could result in delayed delivery of our product, which in turn may lead to disputes and legal proceedings with them on account of any losses suffered by them or any interruption of their business operations due to such delay or defect. While our strategic objectives include geographical expansion across India, in the event that we are unable to make available our products in a prompt manner

and within the requisite timelines or if there is a lapse in coordination across stores located countrywide, our business, financial condition and prospects may be adversely affected.

- 21. *Our business is seasonal in nature in domestic market with the October-December quarter being our best quarter. Any substantial decrease in our sales during this quarter can have a material adverse impact on our financial performance.***

Currently, we are engaged mainly in Exports business of scarves and beachwear and entered in domestic business where our business exhibits seasonality due to the bunching up of festivals in the third quarter of our financial year (October-December quarter) in India, in which historically we have reported higher sales. Also, in export business in summer season our sales increases as compared to other season. We are impacted by seasonal variations in sales volumes, which may cause our revenues to vary significantly between different quarters in a Fiscal. Typically, we see an increase in our business before Diwali and during end of season sales. Any substantial decrease in sales other than the October-December quarter could have a material adverse effect on our financial condition and results of operations.

- 22. *We are dependent on our Promoter, Management and key personnel and the loss of or our inability to attract or retain such persons could adversely affect our business, results of operations and financial condition.***

Our performance depends largely on the efforts and abilities of our Promoters and our Managing Director, and other key personnel. We believe that the inputs and experience of our Management are valuable for the development of business and operations and the strategic directions taken by our Company. We cannot assure you that we will be able to retain these employees or find adequate replacements in a timely manner, or at all. We may require a long period of time to hire and train replacement personnel when qualified personnel terminate their employment with our Company. We may also be required to increase our levels of employee compensation and provide bonuses and perquisites more rapidly than in the past to remain competitive in attracting employees that our business requires. The loss of the services of such persons, and the inability to find suitable replacements in a timely manner, may have an adverse effect on our business and our results of operations. The continued operations and growth of our business is dependent upon our ability to attract and retain personnel who have the necessary and required experience and expertise. Competition for qualified personnel with relevant industry expertise in India is intense. A loss of the services of our key personnel may adversely affect our business, results of operations and financial condition.

- 23. *Conflicts of interest may arise out of common business objects shared by our Company and our Promoter Group entities***

Some of our Promoter Group entities are in the same line of business as our Company. Those promoter group members may compete with our existing business or any future business that we may undertake or that their interests will not conflict with ours. Any such conflicts could have a material adverse effect on our reputation, business, results of our operations. For further details please refer to the chapter titled "***Our Promoters and Promoter Group***" beginning on page 135 of this Prospectus.

- 24. *We may be unable to grow our business in additional geographic regions or international markets, which may adversely affect our business prospects and results of operations.***

We seek to grow our retail network and product reach to new geographies and intend to grow the sales of our products to customers. Further, expansion into new international markets is important to our long-term growth. Competing successfully in international markets requires additional management attention and resources to tailor our services to the unique aspects of each new country. We may face various risks, including legal and regulatory restrictions, increased advertising and brand building expenditure, challenges caused by distance, language and cultural differences, our inexperience with such markets and currency exchange rate fluctuations. These and other risks could adversely affect any international expansion or growth, which could have an adverse effect on our business, results of operations and financial condition.

25. ***Any failure in our quality control processes may have an adverse effect on our business, results of operations and financial condition. We may face product liability claims and legal proceedings if the quality of our products does not meet our customers' expectations.***

Our products may contain quality issues or undetected errors or defects, resulting from the design or manufacture of the product or raw materials used in the product as per international standard. We have implemented quality control processes and regularly conduct inspections of raw materials sourced from suppliers and finished products manufactured by us on the basis of our internal quality standards. However, we cannot assure you that we may adhere to such standards and that our quality control processes will not fail or the quality tests and inspections conducted by us are accurate at all times. Any shortcoming in the raw materials procured by us or in the production of our products due to failure of our quality assurance procedures, negligence, human error or otherwise, may damage our products and result in deficient products. We may also face the risk of legal proceedings and product liability claims being brought against us by various entities including customers and online retailers, for defective products sold. We cannot assure you that we will not experience any material product liability losses in the future or that we will not incur significant costs to defend any such claims. A product liability claim may adversely affect our reputation and brand image, as well as entail significant costs which could have a material adverse effect on our business, financial condition, results of operations and prospects.

26. ***Our inability to protect or use our intellectual property rights may adversely affect our business as Trademark of our logo and brand is not registered and we are in the process of seeking registration of trademark of our logo. There is no assurance that this application shall result in us being granted registration in a timely manner. Failure to protect our intellectual property may adversely affect our reputation, goodwill and business operations.***

Our Company's business is driven by the value of our brands. Our Company has our primary apparel brands, namely

, and newly launched own domestic brand

for

Beachwear/Holiday wear garments and  trademark in segment of clothing, footwear and headgear. Our logo and brand, has not been registered and as a result of the same the use of the words "SK International Export Limited" in the corporate and trading names by any third parties may lead consumers to confuse them with our Company and if they experience any negative publicity, it could have an adverse effect on our business, results of operations and financial condition. We are also exposed to the risk that other entities may pass off their products as ours by imitating our brand name, packaging material and attempting to create counterfeit products. We believe that there may be other companies or vendors which operate in the unorganized segment using our trade name or brand names. Any such activities may harm the reputation of our brand and sales of our products, which could in turn adversely affect our financial performance. We rely on protections available under Indian law, which may not be adequate to prevent unauthorized use of our intellectual property by third parties. This confusion might also lead to our Company losing business to such competitors and might adversely affect our goodwill. Further, since it is not registered we do not enjoy the statutory protections accorded to a registered trademark and are subject to the various risks arising out of the same, including but not limited to infringement or passing off our name and logo by a third party. Maintaining the reputation of our brands, corporate name, logo and the goodwill associated with these trademarks is critical to our success. Substantial erosion in the value of our brand names could have a material adverse effect on our business, financial condition, results of operations and prospects. For further details please refer to section titled "***Government and Other Approvals***" on page no. 188 of this Prospectus.

- 27. *Our funding requirements and proposed deployment of the Net Proceeds are based on management estimates and have not been independently appraised, and may be subject to change based on various factors, some of which are beyond our control.***

Our funding requirements and deployment of the Net Proceeds are based on internal management estimates based on current market conditions, and have not been appraised by any bank or financial institution or other independent agency. Furthermore, in the absence of such independent appraisal, or the requirement for us to appoint a monitoring agency in terms of the SEBI ICDR Regulations, our funding requirements may be subject to change based on various factors which are beyond our control. For further details, please see the section titled “Objects of the Issue” beginning on page 64 of this Prospectus.

- 28. *If we are not able to implement our growth strategies or manage our growth, our business and financial condition could be adversely affected.***

We have a strategy to grow our portfolio substantially. Such a growth strategy will place significant demands on our management as well as our financial, accounting and operating systems. We cannot assure you that we will be able to execute this strategy within the estimated budget, or as anticipated by us. Our failure to execute our growth strategy may result in our inability to increase or even maintain our prior rates of growth. As we expand our operations, we may be unable to manage our business efficiently, which may result in increased costs and affect the quality of our products, and may adversely affect our reputation. Such expansion also increases the challenges involved in preserving a uniform culture, our set of values and work environment across our business operations, developing and improving our internal administrative infrastructure, particularly our financial, operational, communications, internal control and other internal systems, recruiting, training and retaining management, technical and marketing personnel.. Our failure to manage our growth could have an adverse effect on our business and financial condition.

- 29. *Our Promoters will continue to retain majority shareholding in our Company after this Issue which will allow it to exercise significant influence over us.***

Our Promoters have control over our Company in terms of their shareholding, through our Board of Directors and through operational control. Accordingly, our promoters will continue to exercise significant influence over our business policies and affairs and all matters requiring shareholders’ approval, including the composition of our Board of Directors, the approval of mergers, strategic acquisitions or joint ventures or the sales of substantially all our assets, and the policies for dividends, lending, investments and capital expenditure. This concentration of ownership may also delay, defer or even prevent a change in control of our Company and may make the completion of certain transactions more difficult or impossible without the support of these shareholders. We also cannot control the actions of our Promoters, including any non-performance, default by or bankruptcy. In order to establish or preserve relationships with our Promoter, we may agree to assume risks and contribute resources that are proportionately greater than the returns we expect to receive in such transactions. Such agreements may reduce our income and returns on these investments compared to what we would have received if our assumed risks and contributed resources were proportionate to our returns. Any of these factors could potentially materially and adversely affect our operations and profitability.

- 30. *Certain agreements may be inadequately stamped or may not have been registered as a result of which our operations may be adversely affected***

Some of the agreements to which the Company is a party may not be adequately stamped or registered. The effect of inadequate stamping is that the document is not admissible as evidence in legal proceedings and parties to that agreement may not be able to legally enforce the same, except after paying differential stamp duty and/or penalty for inadequate stamping. The effect of non-registration of an instrument is that the title to the property does not transfer in favor of the transferee and therefore, making the instrument unenforceable. Any potential dispute due to non-compliance of local laws relating to stamp duty and registration may adversely impact the operations of our Company.

31. *The loss or shutdown of operations at our factory premises may have a material adverse effect on our business, financial condition and results of operations*

Our factory premises are subject to various operating risks, such as the breakdown or failure of equipment, power supply or processes, performance below expected levels of output or efficiency, obsolescence, labour disputes, natural disasters, industrial accidents and the need to comply with the directives of relevant state government authorities. The occurrence of any of these risks could significantly affect our operating results. Further, our results of operations are also dependent on the successful operation of our manufacturing facilities. Long periods of business disruption could result in a loss of customers and erosion of our brand name. Although we take precautions to minimize the risk of any significant operational problems at our manufacturing facilities, our business, financial condition and results of operations may be adversely affected by any disruption of operations at our manufacturing facilities, including due to any of the factors mentioned above.

32. *Changes in technology may render our current technologies obsolete or require us to make substantial capital investments*

Modernization and technology up gradation is essential to reduce costs and increase the output. Our technology and machineries may become obsolete or may not be upgraded timely, hampering our operations and financial conditions and we may lose our competitive edge. Although we believe that we have installed upgraded technology and that the chances of a technological innovation are not very high in our sector we shall continue to strive to keep our technology, plant and machinery in line with the latest technological standards. In case of a new found technology in the fabrication business, we may be required to implement new technology or upgrade the machineries and other equipment's employed by us. Further, the costs in upgrading our technology and modernizing the plant and machineries are significant which could substantially affect our finances and operations. For further details, kindly refer section titled "***Our Business***" beginning on page 94 of this Prospectus.

33. *We are subject to risks associated with rejection of our products consequential to defects, which could generate adverse publicity or adversely affect our business, results of operations or financial conditions.*

Defects, if any, in our products could lead to rejection of sold products and consequential replacement liability. In the event our Company fails to replace the defective products in a timely or at all, the same could consequently lead to a negative publicity of our product thereby affecting our value, our business, results of operations, or financial condition. We cannot assure you that such claims will be brought against us in the future or that such claims will be settled in our favour. Any such successful claims against us could adversely affect our results of operations.

34. *Any delay or default in payment from our customers could result in the reduction of our profits and affect our cash flows*

Our operations involve extending credit, to our customers in respect of our products. Consequently, we face the risk of the uncertainty regarding the receipt of these outstanding amounts. Accordingly, we had and may continue to have high levels of outstanding receivables. For the period ended January 31, 2019, September 12, 2018 and fiscal years ended 2017-18, 2016-17, 2015-16, our trade receivables were Rs. 252.73, Rs. 158.12 Lakhs, Rs. 11.42 Lakhs, Rs. 57.29 Lakhs and Rs. 62.75 Lakhs, respectively, which is equivalent to 37.44%, 1.35%, 7.11% and 7.06% respectively of our total revenues for the same periods respectively as per restated standalone financial statements.

35. *There is no monitoring agency appointed by our Company and the deployment of funds are at the discretion of our Management and our Board of Directors, though it shall be monitored by our Audit Committee*

As per SEBI (ICDR) Regulations, 2018, appointment of monitoring agency is required only for Issue size above Rs. 10,000.00 Lakhs. Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds in terms of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the stock exchange and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

36. *Our insurance coverage may not adequately protect us against certain operating risks and this may have as adverse effect on the results of our business*

Our policies for covering these risks through insurance may not always be effective or adequate. We may not have identified every risk and further may not be insured against every risk, including operational risk that may occur and the occurrence of an event that causes losses in excess of the limits specified in our policies or losses arising from events or risks not covered by insurance policies or due to the same being inadequate, could materially harm our financial condition and future results of operations. There can be no assurance that any claims filed will be honoured fully or timely under our insurance policies. Also, our financial condition may be affected to the extent we suffer any loss or damage that is not covered by insurance or which exceeds our insurance coverage. In addition, we may not be able to renew certain of our insurance policies upon their expiration, either on commercially acceptable terms or at all. For details on insurance policies taken by our Company please see page 94 in chapter titled “*Our Business*” of the Prospectus.

37. *Our ability to pay any dividends in future will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditure*

Our Company has not been paying dividend as the status was of partnership firm. The amount of our future dividend payments, if any, will depend upon our Company’s future earnings, financial condition, cash flows, working capital requirements, capital expenditures, applicable Indian legal restrictions and other factors. There can be no assurance that our Company will be able to pay dividends or not in the foreseeable future.

External Risk Factors

38. *Changes in market trends, fashion and consumer preferences and increase in competition that are largely beyond our control could adversely affect our business, financial condition, results of operations and prospects.*

Fashion industry is very sensitive to change as per market trend. Any change in the latest fashion can render the old stock obsolete and increase in competition with close competitors will reduce the demand. Also factors such as change in trend, fashion and customer preference are generally beyond our control. Some or all of our concepts may become less attractive in light of changing consumer preferences or better design by competitors, and we may be unable to adapt to such changes in a timely manner. Our results of operations are dependent on our ability to anticipate, gauge and respond to such changes in customer preferences and design new products or modify our existing products in line with changes in fashion trends as well as customer demands and preferences. Any change in consumer preferences that decreases demand could adversely affect our business, financial condition, results of operations and prospects.

39. *Political, economic or other factors that are beyond our control may have an adverse effect on our business and results of operations.*

We are dependent on domestic, regional and global economic and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent to a large extent on the health of the economy in which we operate. There have been periods of slowdown in the economic growth of India. Demand for our services may be adversely affected by an economic downturn in domestic, regional and global economies. Economic growth in the countries in which we operate is affected by various factors, including political instability, terrorism or military conflict, global economic uncertainty and liquidity crisis and volatility in exchange currency rates. Consequently, any future slowdown in the Indian economy could harm our business, results of operations, financial condition and cash flows.

Further, a change in the government or a change in the macro-economic policies may adversely affect economic conditions prevalent in the areas in which we operate in general and our business in particular. High rates of inflation in India may increase our costs without proportionately increasing our revenues thereby decreasing our operating margins which may adversely affect our business, financial conditions and results of operations.

40. *Various trade restrictions and sanctions may materially and adversely affect our business, financial condition and results of operations.*

Our Company is engaged in Manufacturing and trading of women and men's apparels like scarves, shawls, sarongs, headband & bandanas, Beachwear garments in all qualities like silk, viscose, cotton, polyester & wool. We have also entered into the Kids segment, Baby wear, shawls, Pareos, night wear and fashion accessories and also ethnic wears like Salwar Kameez & dupattas. Our business may be affected by trade restrictions implemented by countries or territories in which our customers are located. Further, we are subject to risks relating to changes in trade policies, tariff regulations, or other trade restrictions which can adversely impact trade volume between countries and within the country. At an international level, there may be trade restrictions imposed on sanctioned countries by other countries and international organizations, which may affect our business. In addition, international trade, political issues and conflicts may cause delays and interruptions to cross-border transportation and result in limitations on our geographical coverage. If we are unable to perform our services to and from countries with trade restrictions in a timely manner or at all, it may lead to a decrease in our operating margins which may adversely affect our business, financial conditions and results of operations.

41. *Our ability to raise capital outside India may be constrained by Indian law, which may adversely affect our financial condition, results of operations and prospects.*

Under India's policy on external commercial borrowing ("ECB"), as notified by the RBI and currently in force ("ECB Policy"), ECB by an eligible borrower under the manufacturing sector is permitted under the automatic route up to US\$ 750 million in a year, with a minimum average maturity of one year for ECB up to US\$ 50 million for companies in the manufacturing sector, three years for ECB up to US\$ 50 million and five years for ECB beyond US\$ 50 million, for permissible end-uses. End uses for ECB which are not permitted include investment in capital market, equity investment in India, working capital, general corporate purposes, repayment of existing Indian Rupee denominated borrowings, investment in real estate or purchase of land (except when used for affordable housing as defined in the Harmonised Master List of Infrastructure Sub-sectors notified by Government of India, construction and development of SEZ and industrial parks/integrated townships) and on-lending or investment for acquisition of a company or part thereof (other than an overseas subsidiary or joint venture, subject to existing laws and regulations governing overseas direct investment by Indian companies). Further, the ECB Policy limits the all-in-cost with a spread over 450 basis points per annum over the London Interbank Offered Rate for six months or applicable benchmark for the respective currency. ECB not complying with these requirements is permitted with prior approval of the RBI, in accordance with the ECB Policy. In addition, there are certain routine procedural and disclosure requirements in relation to any such ECB.

These limitations on ECB may constrain our ability to raise cost effective funding for implementing asset purchases, refinancing existing indebtedness, or financing acquisitions and other strategic transactions in the future, which may adversely affect our business, financial condition, results of operations and prospects.

42. *Financial instability in other countries may cause increased volatility in the Indian financial markets. In the event that the current difficult conditions in the global credit markets continue or if there are any significant financial disruptions, such conditions may materially and adversely affect our business, future financial performance and the trading price of the Equity Shares.*

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, particularly emerging market countries in Asia. Financial turmoil in Europe and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. Recently, the currencies of a few Asian countries including India suffered depreciation against the U.S. Dollar owing to amongst other reasons, the announcement by the U.S. government reducing its quantitative easing measures.

A loss of investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability could

also have a negative impact on the Indian economy. Financial disruptions could occur again and may harm our business, future financial performance and the prices of the Equity Shares.

The global credit and equity markets have experienced substantial dislocations, liquidity disruptions and market corrections. The dislocation of the sub-prime mortgage loan market in the United States since September 2008, and the more recent European sovereign debt crisis, has led to increased liquidity and credit concerns and volatility in the global credit and financial markets. These and other related events have had a significant adverse effect on the global credit and financial markets as a whole, including reduced liquidity, greater volatility, widening of credit spreads and a lack of price transparency in the global credit and financial markets. Recent concerns relating to the U.S. Federal Reserve's decision to raise interest rates in the United States have led to increased volatility, particularly in the stock and currency markets in emerging economies. In response to such developments, legislators and financial regulators in the United States and other jurisdictions, including India, implemented a number of policy measures designed to add stability to the financial markets.

However, the overall impact of these and other legislative and regulatory efforts on the global financial markets is uncertain, and they may not have the intended stabilizing effects, and therefore, if such liquidity and credit concerns, financial volatility or disruptions occur again, our business, our future financial performance and the prices of the Equity Shares may be adversely affected. Further, in the event that the current difficult conditions in the global credit markets continue or if there are any significant financial disruption, our lenders may implement new credit policies, adopt new pre-qualification criteria or procedures, raise interest rates or add restrictive covenants in loan agreements, some or all of which may significantly increase our financing costs. Such conditions may material and adversely affect our business, future financial performance and the trading price of the Equity Shares.

43. *The occurrence of natural or man-made disasters may adversely affect our business, results of operations and financial condition.*

Given the nature of our operations and the mobility required in meeting customer demands, the occurrence of natural disasters, including hurricanes, floods, tsunamis, earthquakes, tornadoes, fires, explosions, pandemic disease and manmade disasters, including acts of terrorism and military actions, may adversely affect our financial condition or results of operations. We are particularly susceptible to accidents, system failures, adverse geological, ecological or weather conditions, natural disasters, demographic and population changes and other unforeseen events and circumstances across India. While we are covered by our insurance policies for such contingencies, any disruptions, damage or destruction of our facilities may temporarily affect our ability to meet our clients' demand and the loss of any one of our key clients or a significant reduction in demand from clients located in these locations may adversely affect our business, results of operations and financial condition.

44. *Terrorist attacks, communal disturbances, civil terrorist attacks and other acts of violence or war involving may adversely affect the financial markets and our business.*

Terrorist attacks and other acts of violence or war may negatively affect the markets on which our Equity Shares trade and also adversely affect the worldwide financial markets. These acts may also result in a loss of business confidence, and adversely affect our business. Some of the locations we operate in have witnessed civil unrest including communal disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic and political events may have a negative impact on us. Such incidents may also create a greater perception that investment in Indian companies involves a higher degree of risk and may have an adverse impact on our business and the price of our Equity Shares. Further, we cannot predict the effects on our business of heightened security measures, threatened terrorist attacks, efforts to combat terrorism, military action against a foreign state or other similar events. It is possible that one or more of these events could be directed at Indian or foreign ports, borders, railroads or highways. Heightened security measures or other events are likely to slow the movement of freight, within or across Indian States and may adversely affect our business and results of operations. Any of these events could also negatively affect the economy and consumer confidence, which could cause a downturn in the transportation industry. In addition, any deterioration in the relations between India and its neighbouring countries may result in investor concern about stability in the region, which may materially and adversely affect the price of our Equity Shares.

45. *If there is any change in tax laws or regulations, or their interpretation, such changes may significantly affect our financial statements for the current and future years, which may have a material adverse effect on our financial position, business and results of operations.*

Having our business operations in multiple jurisdictions, we are subject to varying central and state tax regimes. The applicable categories of taxes and tax rates also vary significantly from jurisdiction to jurisdiction, which may be amended from time to time. The final determination of our tax liabilities involves the interpretation of local tax laws and related regulations in each country as well as the significant use of estimates and assumptions regarding the scope of

future operations and results achieved and the timing and nature of income earned and expenditure incurred. Our business and financial performance may be adversely affected by unfavorable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations applicable to us and our business or the regulator enforcing them in any one of those countries may adversely affect our results of operations. For instance, as of July 1, 2017, GST in India replaced taxes levied by central and state governments with a unified tax regime in respect of the supply of goods and services for all of India, which we believe will result in fundamental changes to India's third-party logistics industry. To the extent that we are entitled to certain tax benefits in India which are available for a limited period of time, our profitability will be affected if such benefits will no longer be available, or are reduced or withdrawn prematurely or if we are subject to any dispute with the tax authorities in relation to these benefits or in the event we are unable to comply with the conditions required to be complied with in order to avail ourselves of each of these benefits. See "*Statement of Special Tax Benefits*" beginning on page 72 of this Prospectus for details in relation to possible tax benefits available to our Company. In the event that any adverse development in the law or the manner of its implementation affects our ability to benefit from these tax incentives, our business, results of operations, financial condition and prospects may be adversely affected. Changes in the operating environment, including changes in tax law, could impact the determination of our tax liabilities for any given tax year. Taxes and other levies imposed by the Government of India that affect our industry include income tax, goods and services tax and other taxes, duties or surcharges introduced from time to time. The tax scheme in India is extensive and subject to change from time to time and any adverse changes in any of the taxes levied by the Government of India may adversely affect our competitive position and profitability. We cannot assure you that the Government of India may not implement new regulations and policies which will require us to obtain approvals and licenses from the Government of India and other regulatory bodies or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the applicability, interpretation and implementation of any amendment to, or change to governing laws, regulation or policy in the countries in which we operate may materially and adversely affect our business, results of operations and financial condition. In addition, we may have to incur expenditure to comply with the requirements of any new regulations, which may also materially harm our results of operations. We are also subject to these risks in all our overseas operations depending on each specific country. Any unfavourable changes to the laws and regulations applicable to us could also subject us to additional liabilities. As a result, any such changes or interpretations may adversely affect our business, financial condition and financial performance. Further, changes in capital gains tax or tax on capital market transactions or sale of shares may affect investor returns. Our business and the price of the Equity Shares may be adversely affected by the implementation of GAAR.

The Government of India has also proposed provisions relating to GAAR which came into effect from April 1, 2017. The GAAR provisions intend to catch arrangements declared as "impermissible avoidance arrangements", which is any arrangement the main purpose or one of the main purposes of which is to obtain a tax benefit and which satisfy at least one of the following tests:

- (i) creates rights, or obligations, which are not ordinarily created between persons dealing at arm's length;
- (ii) results in misuse, or abuse, of the provisions of the tax laws;
- (iii) lacks commercial substance or is deemed to lack commercial substance, in whole or in part; or
- (iv) is entered into, or carried out, by means, or in a manner, which are not ordinarily employed for bona fide purposes.

The onus to prove that the transaction is not an "impermissible avoidance agreement" is on the assessee, i.e., an arrangement shall be presumed, unless it is proved to the contrary by the assessee, to have been entered into, or carried out, for the main purpose of obtaining a tax benefit, if the main purpose of a step in, or a part of, the arrangement is to obtain a tax benefit, notwithstanding the fact that the main purpose of the whole arrangement is not to obtain a tax benefit. If GAAR provisions are invoked, then the tax authorities will have wide powers, including denial of tax benefit or a benefit under a tax treaty which may have an adverse tax impact on us.

46. *Public companies in India, including our Company, are required to compute income tax under the ICDS. The transition to ICDS in India is very recent and we may be negatively affected by such transition.*

The Ministry of Finance had issued a notification dated March 31, 2015 notifying ICDS which creates a new framework for the computation of taxable income. However, the Central Board of Direct Taxes ("CBDT"), Ministry of Finance of India, according to its press release dated July 6, 2016, had deferred the applicability of the ICDS with fiscal 2017 being the first assessment year. ICDS deviates in several respects from concepts that are followed under general accounting standards, including Indian GAAP and IND AS. It is often seen that ICDS based calculations of taxable income can differ from Indian GAAP or IND AS-based concepts and they can have the effect of requiring taxable income to be recognized earlier, increasing overall levels of taxation or both. There can be no assurance that the adoption of ICDS will not adversely affect our business, results of operation and financial conditions.

47. *Any downgrading of our debt ratings or of India's sovereign debt rating may adversely affect our business.*

Any downgrading of our credit ratings may increase interest rates on our outstanding debt, increase interest rates for refinancing our outstanding debt, which would increase our financing costs, and materially and adversely affect our ability to raise new capital on a competitive basis, which may adversely affect our profitability and future growth. In addition, any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely affect our ability to raise additional financing and the interest rates and other commercial terms at which such financing is available. This may materially and adversely affect our capital expenditure plans, business and future financial performance and our ability to fund our growth in future.

48. *Inflation in India could have an adverse effect on our profitability and if significant, on our financial condition.*

In the recent past, India has experienced fluctuating wholesale price inflation as compared to historical levels due to the global economic downturn. Continued high rates of inflation may increase our expenses related to salaries or wages payable to our employees, prices of raw materials or any other expenses that we incur. We cannot assure you that we will be able to pass on any additional expenses to our patients or that our revenue will increase proportionately corresponding to such inflation. Accordingly, high rates of inflation in India could have an adverse effect on our profitability and, if significant, on our financial condition.

Risks Relating to the Equity Shares and the Issue

49. *The Equity Shares have never been publicly traded, and, after the Issue, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Issue Price, or at all.*

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Issue. The Issue Price of the Equity Shares is proposed to be determined through a fixed price process and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. Further, the trading prices of publicly traded securities may be highly volatile. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors:

- a) Volatility in the Indian and global securities markets;
- b) Increases and decreases in our customer base or announcements of new services, strategic alliances or agreements by us or by our competitors;
- c) speculation in the press or investment community about, or actual changes in, our business, strategic position, market share, organizational structure, operations, financial condition, financial reporting and results, prospects, or executive team;
- d) changes in estimates of our performance by financial or securities analysts that elect to research and report on the Equity Shares or guidance provided by us, and variations between actual and estimated financial results;
- e) New laws and government regulations applicable to the industry we operate in;
- f) Additions or departures of key management personnel;
- g) Announcements by third parties of significant claims or proceedings against us;
- h) significant developments in India's economic liberalization and deregulation policies or significant developments in India's fiscal regulations or adoption or modification of regulations, policies, procedures or programs applicable to our businesses; or
- i) Adverse media reports on us or the sector we operate in.

General or industry-specific market conditions or stock market performance or domestic or international macroeconomic and geopolitical factors unrelated to our performance may also affect the price of our Equity Shares. If the stock markets experience a loss of investor confidence, the trading price of our Equity Shares may decline for reasons unrelated to our business, financial condition or operating results. Each of these factors, among others, may adversely affect the trading price of our Equity Shares. Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction. Under the Companies Act, prior to issuance of any new equity shares, a public limited company incorporated under Indian law must offer its equity shareholders pre-emptive rights to subscribe to a proportionate number of equity shares to maintain existing ownership, unless such pre-emptive rights are

waived by a special resolution by a three-fourths majority of the equity shareholders voting on such resolution. However, if you are a foreign investor and the law of the foreign jurisdiction that you are in does not permit the exercise of such pre-emptive rights without our filing an offering document or registration statement with the applicable authority in such foreign jurisdiction, you will be unable to exercise such pre-emptive rights, unless we make such a filing. If we elect not to file an offering document or a registration statement, the new securities may be issued to a custodian, who may sell the securities for your benefit. The value the custodian receives on the sale of such securities and the related transaction costs cannot be predicted. In addition, to the extent that the investors are unable to exercise pre-emptive rights granted in respect of the Equity Shares held by them, their proportional interest in our Company may be reduced.

50. *Investors may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under current Indian tax laws and regulations, capital gains arising from the sale of shares in an Indian company are generally taxable in India. However, any gain realized on the sale of listed equity shares on or before March 31, 2018 on a stock exchange held for more than 12 months will not be subject to long term capital gains tax in India if Securities Transaction Tax (“STT”) is paid on the sale transaction and additionally, as stipulated by the Finance Act, 2017, STT had been paid at the time of acquisition of such equity shares on or after October 1, 2004, except in the case of such acquisitions of equity shares which are not subject to STT, as notified by the Central Government under notification no. 43/2017/F. No. 370142/09/2017-TPL on June 5, 2017. However, the Finance Act, 2018, has now levied taxes on such long term capital gains exceeding ₹ 100,000 arising from sale of Equity Shares on or after April 1, 2018, while continuing to exempt the unrealized capital gains earned up to January 31, 2018 on such Equity Shares. Accordingly, you may be subject to payment of long term capital gains tax in India, in addition to payment of STT, on the sale of any Equity Shares held for more than 12 months. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold.

Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India. Capital gains arising from the sale of the Equity Shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India’s ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares.

51. *Foreign investors are subject to foreign investment restrictions under Indian law that limit our ability to attract foreign investors, which may adversely affect the trading price of the Equity Shares.*

Foreign ownership of Indian securities is subject to Government regulation. In accordance with foreign exchange regulations currently in effect in India, under certain circumstances the RBI must approve the sale of the Equity Shares from a non-resident of India to a resident of India or vice-versa if the sale does not meet certain requirements specified by the RBI. Additionally, any person who seeks to convert the Rupee proceeds from any such sale into foreign currency and repatriate that foreign currency from India is required to obtain a no-objection or a tax clearance certificate from the Indian income tax authorities. As provided in the foreign exchange controls currently in effect in India, the RBI has provided that the price at which the Equity Shares are transferred be calculated in accordance with internationally accepted pricing methodology for the valuation of shares at an arm’s length basis, and a higher (or lower, as applicable) price per share may not be permitted. We cannot assure investors that any required approval from the RBI or any other government agency can be obtained on terms favorable to a non-resident investor in a timely manner or at all. Because of possible delays in obtaining requisite approvals, investors in the Equity Shares may be prevented from realizing gains during periods of price increase or limiting losses during periods of price decline.

52. *Any future issuance of Equity Shares may dilute your shareholding and sales of our Equity Shares by our Promoter or other major shareholders may adversely affect the trading price of the Equity Shares.*

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by us, including through exercise of employee stock options may dilute your shareholding in our Company, may lead to the dilution of investors’ shareholdings in our Company. Any future equity issuances by us or sales of our Equity Shares by our Promoters or other significant shareholders may adversely affect the trading price of the Equity Shares, which may lead to other adverse consequences for us including difficulty in raising debt or equity financing. In addition, any perception by investors that such issuances or sales might occur may also affect the trading price of our Equity Shares. We cannot assure you that we will not offer Equity Shares or that our shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

53. *We may not receive final listing and trading approvals from the Stock Exchange and you will not be able to sell immediately on an Indian Stock Exchange any of the Equity Shares you are allotted in the Issue.*

Under the SEBI ICDR Regulations, we are permitted to list the Equity Shares within six working days of the Bid/Issue Closing Date. Consequently, the Equity Shares you purchase in the Issue may not be credited to your dematerialized electronic account with Depository Participants until approximately six working days after the Bid/Issue Closing Date. You can start trading in the Equity Shares only after they have been credited to your dematerialized electronic account and final listing and trading approvals are received from the Stock Exchanges. In accordance with Indian law and practice, final listing and trading approval of our Equity Shares will not be applied for, or granted until after those Equity Shares have been offered and allotted. Approval will require all other relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing our Equity Shares on the stock Exchange. There can be no assurance that final listing and trading approvals will be obtained from the Stock Exchange on time or at all. Any failure or delay in obtaining the approval would restrict your ability to dispose of the Equity Shares.

Further, there can be no assurance that the Equity Shares allocated to you will be credited to your dematerialized electronic account, or that trading in the Equity Shares will commence within the specified time periods. In addition, pursuant to India regulations, certain actions are required to be completed before the Equity Shares can be listed and trading may commence. Investors' book entry or dematerialized electronic accounts with Depository Participants in India are expected to be credited only after the date on which the Issue and allotment is approved by our Board of Directors. There can be no assurance that the Equity Shares allocated to prospective Investors will be credited to their dematerialized electronic accounts, or that trading will commence on time after allotment has been approved by our Board of Directors, or at all.

54. *Our Equity Shares are quoted in Indian Rupees in India, and therefore investors may be subject to potential losses arising out of exchange rate risk on the Indian Rupee and risks associated with the conversion of Indian Rupee proceeds into foreign currency.*

On listing, our Equity Shares will be quoted in Indian Rupees on the Stock Exchange. Any dividends in respect of our Equity Shares will also be paid in Indian Rupees and subsequently converted into the relevant foreign currency for repatriation, if required. Any adverse movement in currency exchange rates during the time that it takes to undertake such conversion may reduce the net dividend to foreign investors. In addition, any adverse movement in currency exchange rates during a delay in repatriating outside India the proceeds from a sale of Equity Shares, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the proceeds received by Equity Shareholders. For example, the exchange rate between the Rupee and the U.S. dollar has fluctuated substantially in recent years and may continue to fluctuate substantially in the future, which may have an adverse effect on the trading price of our Equity Shares and returns on our Equity Shares, independent of our operating results.

SECTION IV-ABOUT THE COMPANY

OUR INDUSTRY

The information in this section has been extracted from various websites and publicly available documents from various industry sources. The data may have been re-classified by us for the purpose of presentation. Neither we nor any other person connected with the Issue has independently verified the information provided in this section. Industry sources and publications, referred to in this section, generally state that the information contained therein has been obtained from sources generally believed to be reliable but their accuracy, completeness and underlying assumptions are not guaranteed and their reliability cannot be assured, and, accordingly, investment decisions should not be based on such information.

Global Outlook

Global growth is moderating as the recovery in trade and manufacturing activity loses steam. Despite ongoing negotiations, trade tensions among major economies remain elevated. These tensions, combined with concerns about softening global growth prospects, have weighed on investor sentiment and contributed to declines in global equity prices. Borrowing costs for emerging market and developing economies (EMDEs) have increased, in part as major advanced-economy central banks continue to withdraw policy accommodation in varying degrees. A strengthening U.S. dollar, heightened financial market volatility, and rising risk premiums have intensified capital outflow and currency pressures in some large EMDEs, with some vulnerable countries experiencing substantial financial stress. Energy prices have fluctuated markedly, mainly due to supply factors, with sharp falls toward the end of 2018. Other commodity prices—particularly metals—have also weakened, posing renewed headwinds for commodity exporters.

Economic activity in advanced economies has been diverging of late. Growth in the United States has remained solid, bolstered by fiscal stimulus. In contrast, activity in the Euro Area has been somewhat weaker than previously expected, owing to slowing net exports. While growth in advanced economies is estimated to have slightly decelerated to 2.2 percent last year, it is still above potential and in line with previous forecasts.

EMDE growth edged down to an estimated 4.2 percent in 2018—0.3 percentage point slower than previously projected—as a number of countries with elevated current account deficits experienced substantial financial market pressures and appreciable slowdowns in activity. More generally, as suggested by recent high-frequency indicators, the recovery among commodity exporters has lost momentum significantly, largely owing to country-specific challenges within this group. Activity in commodity importers, while still robust, has slowed somewhat, reflecting capacity constraints and decelerating export growth. In low-income countries (LICs), growth is firming as infrastructure investment continues and easing drought conditions support a rebound in agricultural output. However, LIC metals exporters are struggling partly reflecting softer metals prices. Central banks in many EMDEs have tightened policy to varying degrees to confront currency and inflation pressures.

In all, global growth is projected to moderate from a downwardly revised 3 percent in 2018 to 2.9 percent in 2019 and 2.8 percent in 2020-21, as economic slack dissipates, monetary policy accommodation in advanced economies is removed, and global trade gradually slows. Growth in the United States will continue to be supported by fiscal stimulus in the near term, which will likely lead to larger and more persistent fiscal deficits. Advanced-economy growth will gradually decelerate toward potential, falling to 1.5 percent by the end of the forecast horizon, as monetary policy is normalized and capacity constraints become increasingly binding.

Softening global trade and tighter financing conditions will result in a more challenging external environment for EMDE economic activity. EMDE growth is expected to stall at 4.2 percent in 2019—0.5 percentage point below previous forecasts, partly reflecting the lingering effects of recent financial stress in some large economies (e.g., Argentina, Turkey), with a sharply weaker-than-expected pickup in commodity exporters accompanied by a deceleration in commodity importers. EMDE growth is projected to plateau at an average of 4.6 percent in 2020-21, as the recovery in commodity exporters levels off. Per capita growth will remain anemic in several EMDE regions—most notably, in those with a large number of commodity exporters—likely impeding further poverty alleviation. (Source: Global Economic Prospects-January 2019- www.worldbank.org)

EMDE outlook

Growth outlook

EMDE growth is expected to stall at 4.2 percent in 2019—down 0.5 percentage point relative to previous projections. This reflects the lingering effects of recent financial market stress on several large economies, a lackluster and notably softer-than-envisioned cyclical recovery in commodity exporters, and a further deceleration in commodity importers. Growth across EMDEs in 2019 is expected to be close to the upper bound of estimates of its potential pace—particularly among commodity importers, where slack has largely been exhausted. Growth in EMDEs is foreseen to increase to 4.5 percent in 2020, with a large part of this acceleration reflecting the projected dissipation of severe headwinds in a few large economies (e.g., Argentina, Iran, Turkey). In 2021, EMDE growth is expected to plateau at 4.6 percent as the recovery in commodity exporters matures. Throughout the forecast horizon, the international context is expected to be increasingly less favorable, in light of a projected slowdown in advanced-economy growth, weakening trade and investment, tighter financing conditions, and trade policy uncertainty. These factors will impede further acceleration in EMDE activity. Growth in commodity exporters is projected to pick up to 2.3 percent in 2019—sharply below previous expectations—and plateau at 2.9 percent in both 2020 and 2021. Some large economies that experienced sizable contractions in activity in 2018 are expected to gradually recover over the forecast horizon (e.g., Angola, Argentina, Iran). The outlook for commodity exporters is uneven, however, partly owing to renewed market attention to country-specific vulnerabilities. OVERVIEW OF INDIA'S ECONOMY

After registering GDP growth of over 7 per cent for the third year in succession in 2016-17, the Indian economy is headed for somewhat slower growth, estimated to be 6.5 per cent in 2017-18, as per first Advance Estimates released by CSO. This is slightly lower than the range of 6.5 per cent to 6.75 per cent being currently projected based on recent developments. Even with this lower growth for 2017-18, GDP growth has averaged 7.3 per cent for the period from 2014-15 to 2017-18, which is the highest among the major economies of the world. That this growth has been achieved in a milieu of lower inflation, improved current account balance and notable reduction in the fiscal deficit to GDP ratio makes it all the more creditable. In addition to the introduction of GST, the year also witnessed significant steps being undertaken towards resolution of problems associated with non-performing assets of the banks, further liberalization of FDI, etc., thus strengthening the momentum of reforms. After remaining in negative territory for a couple of years, growth of exports rebounded into positive one during 2016-17 and strengthened further in 2017-18. There was an augmentation in the spot levels of foreign exchange reserves to close to US\$ 414 billion, as on 12th January 2018.

Concerns have been expressed about growing protectionist tendencies in some countries and it remains to be seen as to how the situation unfolds. Additionally, average crude oil (Indian basket) prices have risen by around 14 per cent so far in 2017-(mid-January 2018) vis-à-vis 2016-17. Going by the recent trends, the average crude oil prices could be in the vicinity of US\$ 56-57 per barrel in the current financial year and could rise further by another 10-15 per cent in 2018-19. Some of these factors could have dampening effect on GDP growth in the coming year. However, with world growth likely to witness moderate improvement in 2018, expectation of greater stability in GST, likely recovery in investment levels, and ongoing structural reforms, among others, should be supporting higher growth. On balance, country's economic performance should witness an improvement in 2018-19.

GDP Growth in 2017-18

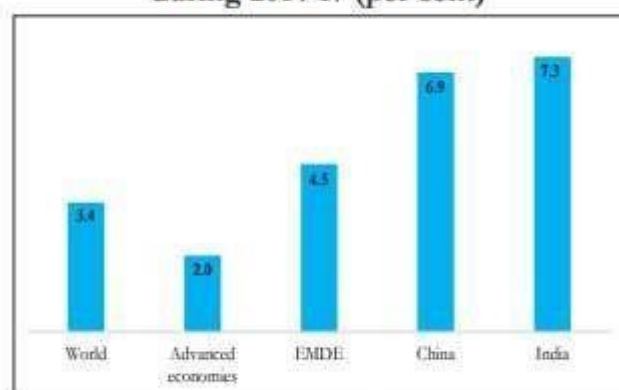

With Gross Domestic Product (GDP) growth averaging 7.5 per cent between 2014-15 and 2016-17, India can be rated as among the best performing economies in the world on this parameter. Although growth is expected to decline to 6.5 per cent in 2017-18, bringing the 4-year average to 7.3 per cent, the broad story of India's GDP growth to be significantly higher than most economies of the world does not alter. The growth is around 4 percentage points higher than global growth average of last 3 years and nearly 3 percentage points more than the average growth achieved by emerging market & developing economies (EMDE) (Figure 1).

As per the first Advance Estimates (1st AE), released by Central Statistics Office (CSO), growth rate of Gross Value Added (GVA) at constant basic prices is estimated at 6.1 per cent in 2017-18, as compared to 6.6 per cent in 2016-17. This is on account of lower growth in 'Agriculture & allied', and 'Industry' sector, which are expected to grow at

per cent and 4.4 per cent respectively. In 2017-18, service sector is expected to grow at 8.3 per cent, as compared to 7.7 per cent in 2016-17 within the services sector, only the growth of 'Public administration, defence & other services' sector is expected to decline in 2017-18

From a low of 5.5 per cent in 2012-13, growth in GDP steadily improved for 3 years and peaked in 2015-16, particularly in fourth quarter (Q4) when it printed 9.1 per cent (GVA growth also peaked in Q4 of 2015-16). However, growth started slowing down from first quarter (Q1) of 2016-17. GDP and GVA growth slowed to 6.1 per cent and 5.6 per cent respectively in Q4 of 2016-17. GDP growth further declined to 5.7 per cent in Q1 of 2017-18. However, the second quarter (Q2) of 2017-18 witnessed reversal of declining trend of GDP growth, with growth increasing to 6.3 per cent. The nominal GDP and GVA growth also picked up to 9.4 per cent and 8.6 per cent respectively in Q2 of 2017-18 (Figure 2).

External Sector

The global economy has been gathering pace and is expected to accelerate from 3.2 per cent in 2016 to 3.7 per cent in 2018. World trade volume growth is projected to increase from 2.4 per cent in 2016 to 4.2 per cent and 4.0 per cent respectively in 2017 and 2018. Commodity prices (fuel and nonfuel) are also expected to grow in contrast to decline in the last few years. India's external sector has continued to be resilient and strong in 2017-18 so far and the balance of payments (BoP) situation continued to be comfortable. Current account deficit (CAD) was 1.8 per cent of GDP, merchandise exports grew by 12 per cent, net services receipts grew by 14.6 per cent, net foreign investment grew by per cent, and external debt indicators improved in H1 of 2017-18. (Source: Economic Survey 2017-18 Volume II www.indiabudget.nic.in)

Prospects of Growth for 2018-19

CSO has estimated the GDP growth in 2017-18 to be 6.5 per cent. However, there are indicators that have emerged in the last few days like manufacturing and services PMI, growth of industrial sector as reflected by higher IIP, automobile sales etc. which seem to suggest that the GDP growth could be a little higher than CSO's estimates and for 2017-18, (it could be in the range of 6.5 to 6.75 per cent). The growth during 2018-19 could be higher, depending on a number of factors. On the positive side, as per IMF's World Economic Outlook released in October 2017, the global growth is expected to accelerate to 3.7 per cent in 2018 from 3.6 per cent in 2017. This can be expected to provide further boost to India's exports, which have already shown acceleration in the current financial year. Remittances have shown signs of revival in the first half of current year and can be expected to pick up, particularly if oil prices maintain their rising trend witnessed in the current year.

There are signs of revival of investment activity in the economy and the recent pick up in the growth of fixed investment can be expected to maintain momentum in the coming year. The policy rates can be expected to remain fairly stable if the inflation rate does not deviate much from its current levels. This, along with the still favourable interest rate regime prevailing in the global markets could provide greater certainty to the investment climate. The

reform measures undertaken in 2017-18 can be expected to strengthen further in 2018-19 and reinforce growth momentum. On the other hand, downside risk to higher growth emanate from higher crude oil prices, which (going by current indications) can be expected to increase by about 10-15 per cent over and above the likely average price of around US\$ 56-57 per barrel (for Indian basket) for 2017-18. Protectionist tendencies in some of the countries could have an impact on exports growth, while the possibility of tightening of monetary conditions in the developed countries could lead to lower capital inflows. This monetary tightening could also lead to the possibility of financial stress and therefore can be a downside risk. On balance, there is a strong possibility of growth in 2018-19 to be higher than what it is expected to be in 2017-18. Growth of GDP in 2018-19 could be in the range of 7.0 to 7.5 per cent. Textile Industry & Market Growth in India

Introduction

India's textiles sector is one of the oldest industries in Indian economy dating back several centuries. India's overall textile exports during FY 2017-18 stood at US\$ 39.2 billion.

The Indian textiles industry is extremely varied, with the hand-spun and hand-woven textiles sectors at one end of the spectrum, while the capital intensive sophisticated mills sector at the other end of the spectrum. The decentralised power looms/ hosiery and knitting sector form the largest component of the textiles sector. The close linkage of the textile industry to agriculture (for raw materials such as cotton) and the ancient culture and traditions of the country in terms of textiles make the Indian textiles sector unique in comparison to the industries of other countries. The Indian textile industry has the capacity to produce a wide variety of products suitable to different market segments, both within India and across the world. (Source: www.ibef.org/industry/textiles.aspx)

Market Size

The Indian textiles industry, currently estimated at around US\$ 150 billion, is expected to reach US\$ 250 billion by 2019. India's textiles industry contributed seven per cent of the industry output (in value terms) of India in 2017-18. It contributed two per cent to the GDP of India and employs more than 45 million people in 2017-18. The sector contributed 15 per cent to the export earnings of India in 2017-18.

The production of raw cotton in India is estimated to have reached 34.9 million bales in FY18[^].

Investment

The textiles sector has witnessed a spurt in investment during the last five years. The industry (including dyed and printed) attracted Foreign Direct Investment (FDI) worth US\$ 2.97 billion during April 2000 to June 2018.

Some of the major investments in the Indian textiles industry are as follows:

In May 2018, textiles sector recorded investments worth Rs 27,000 crore (US\$ 4.19 billion) since June 2017.

The Government of India announced a Special Package to boost exports by US\$ 31 billion, create one crore job opportunities and attract investments worth Rs 800.00 billion (US\$ 11.93 billion) during 2018-2020. As of August 2018, it generated additional investments worth Rs 253.45 billion (US\$ 3.78 billion) and exports worth Rs 57.28 billion (US\$ 854.42 million).

Government Initiatives

The Indian government has come up with a number of export promotion policies for the textiles sector. It has also allowed 100 per cent FDI in the Indian textiles sector under the automatic route.

Initiatives taken by Government of India are:

- The Directorate General of Foreign Trade (DGFT) has revised rates for incentives under the Merchandise Exports from India Scheme (MEIS) for two subsectors of Textiles Industry - Readymade garments and Made ups - from 2 per cent to 4 per cent.
- As of August 2018, the Government of India has increased the basic custom duty to 20 per cent from 10 per cent on 501 textile products, to boost Make in India and indigenous production.
- The Government of India announced a Special Package to boost exports by US\$ 31 billion, create one crore job opportunity and attract investments worth Rs 80,000 crore (US\$ 11.93 billion) during 2018-2020. As of August 2018 it generated additional investments worth Rs 25,345 crore (US\$ 3.78 billion) and exports worth Rs 57.28 billion (US\$ 854.42 million).

- The Government of India has taken several measures including Amended Technology Up-gradation Fund Scheme (A-TUFS), scheme is estimated to create employment for 35 lakh people and enable investments worth Rs 95,000 crore (US\$ 14.17 billion) by 2022.
- Integrated Wool Development Programme (IWDP) approved by Government of India to provide support to the wool sector starting from wool rearer to end consumer which aims to enhance the quality and increase the production during 2017-18 and 2019-20.
- The Cabinet Committee on Economic Affairs (CCEA), Government of India has approved a new skill development scheme named 'Scheme for Capacity Building in Textile Sector (SCBTS)' with an outlay of Rs 1,300 crore (US\$ 202.9 million) from 2017-18 to 2019-20.

Achievements

Following are the achievements of the government in the past four years:

- I-ATUFS, a web-based claims monitoring and tracking mechanism was launched on April 21, 2016.
- 381 new block level clusters were sanctioned.
- 20 new textile parks were sanctioned
- Employment increased to 8.62 million in FY18 from 8.03 in FY15.

Road Ahead

The future for the Indian textile industry looks promising, buoyed by both strong domestic consumption as well as export demand. With consumerism and disposable income on the rise, the retail sector has experienced a rapid growth in the past decade with the entry of several international players like Marks & Spencer, Guess and Next into the Indian market.

High economic growth has resulted in higher disposable income. This has led to rise in demand for products creating a huge domestic market.

DECIDING ON SEASONS PRODUCTS:

The products are designed according to the seasons and for every season there is a product -- this applies to fashion just as much as anything else in life. Fashion divides itself into seasons which sometimes may be tough to keep up with. Current fashion trends and entertainment industry plays a vital role in deciding the seasons product. The cost of production is derived well in advance in terms of Price Range and Process Time. Normally it takes 60-90 days to complete one whole process of production.

SOURCING ALL MATERIALS, FABRICS AND ACCESSORIES:

Sourcing of materials and fabrics can play a vital role in manufacturing and Process Time. The detailed process is being explained as follows:

At first instance, fabric quality is specifically derived. There are so many different types of fabrics variants to choose from. The best start is to have an idea of some material and feel of sample fabrics you might want to work with before you go into its supplies.

Once the fabrics are finalized then crocky designing starts. Crocky Designing is done by the designing team of our company. For designing extensive research is being done.

After our designing team is ready with the design, patterns are made. Patterns are developed making paper based outlines or design which will be used as a template, laid onto the fabric, traced and cut out.

Several type of accessories are required to enhance the beauty of the product. If our garment requires accessories like embroidery, buttons, Laces, stones etc. are then developed and finalized.

RAW MATERIALS:

The Raw Materials for our company are Grey Fabric, Finished Fabric, Threads, We purchase grey/ finished fabrics in a bulk quantity with our specifications, Inks are used for digital printing, threads are used for various purposes like embroidery, stitching, and value additions.

Everything from the feel and fit of the fabric i.e. whether if it fit right and feel of fabric – its design looks small or large. etc is taken care of and if not, we might need to change the fabric, value additions & Other Combinations of works and choice of the designing or the pattern. Sampling is back and forth process, there may come possibility of alterations. Catalogue management team finalizes the designs and its colour variants to create a catalogue and further it is handed over to production team for its further planning. Central Goods and Service Tax Act, 2017

Goods and Services Tax (GST) is a comprehensive indirect tax on manufacture, sale and consumption of goods and services throughout India to replace taxes levied by the central and state governments. It was introduced as The Constitution (One Hundred and First Amendment) Act 2016, following the passage of Constitution 101st Amendment Bill. The GST is governed by GST Council and its Chairman is Union Finance Minister of India - Arun Jaitley. This method allows GST-registered businesses to claim tax credit to the value of GST they paid on purchase of goods or services as part of their normal commercial activity. Administrative responsibility would generally rest with a single authority to levy tax on goods and services. Exports would be considered as zero-rated supply and imports would be levied the same taxes as domestic goods and services adhering to the destination principle in addition to the Customs Duty which will not be subsumed in the GST.

Introduction of Goods and Services Tax (GST) is a significant step in the reform of indirect taxation in India. Amalgamating several Central and State taxes into a single tax would mitigate cascading or double taxation, facilitating a common national market. The simplicity of the tax should lead to easier administration and enforcement. From the consumer point of view, the biggest advantage would be in terms of a reduction in the overall tax burden on goods, which is currently estimated at 25%-30%, free movement of goods from one state to another without stopping at state borders for hours for payment of state tax or entry tax and reduction in paperwork to a large extent.

such adjustments and regroupings to the individual financial statements of the Company, as in our opinion were appropriate and more fully described in Significant Accounting Policies and Notes to Accounts as set out in **Annexure 4** to this Report.

5. Based on the above, we are of the opinion that the Restated Financial Statements have been made after incorporating:
 - a) Adjustments for the changes in accounting policies retrospectively in respective financial period/years to reflect the same accounting treatment as per the changed accounting policy for all reporting periods, if any.
 - b) Adjustments for prior period and other material amounts in the respective financial years/period to which they relate and there are no qualifications which require adjustments.
 - c) There are no extra-ordinary items that need to be disclosed separately in the accounts and qualifications requiring adjustments except as disclosed in the notes to accounts.
 - d) As per Accounting Standard - 15 (Employee Benefits) issued by the Institute of Chartered Accountants of India, the company is required to assess its gratuity/leave encashment liability each year on the basis of actuarial valuation and make provision for gratuity/leave encashment liability. However, company has provided for gratuity/leave encashment expenses in the financial statement and has not taken any actuarial valuation report. So to that extent the profit & loss account of the company does not represent true & fair result of the company performance.
 - e) These Profits and Losses have been arrived at after charging all expenses including depreciation and after making such adjustments/restatements and regroupings as in our opinion are appropriate and are to be read in accordance with the Significant Accounting Policies and Notes to Accounts as set out in **Annexure 4** to this report.

ANNEXURE-4**SIGNIFICANT ACCOUNTING POLICY AND NOTES TO THE RESTATED SUMMARY STATEMENTS****A. BACKGROUND**

Our Company was originally formed as partnership firm constituted under the Partnership Act, 1932 (the "Partnership Act") in the name of M/s S K International (Export) Co., pursuant to a deed of partnership dated Nov 01, 1991. M/s S K International (Export) Co. was thereafter converted from a partnership firm to a public limited company, with the name SK International Export Limited and received a certificate of incorporation from Registrar of Companies, Mumbai on September 13, 2018 bearing Corporate Identification Number (CIN) U18109MH2018PLC314141.

B. STATEMENT OF SIGNIFICANT ACCOUNTING POLICIES**1. BASIS OF PREPARATION OF FINANCIAL STATEMENTS**

The Restated Summary Statement of Assets and Liabilities of the Company as on January 31, 2019, March 31, 2018, March 31, 2017 and March 31, 2016, and the Restated Summary Statement of Profit and Loss and Restated Summary Statements of Cash Flows for the period ended on January 31, 2019 and for the year ended on March 31, 2018, March 31, 2017 and March 31, 2016 and the annexure thereto (collectively, the "**Restated Financial Statements**" or "**Restated Summary Statements**") have been extracted by the management from the Audited Financial Statements of the Company for the period ended January 31, 2019 and for the year ended March 31, 2018, March 31, 2017 and March 31, 2016.

The financial statements are prepared and presented under the historical cost convention and evaluated on a going-concern basis using the accrual system of accounting in accordance with the accounting principles generally accepted in India (Indian GAAP) and the requirements of the Companies Act, including the Accounting Standards as prescribed by the Companies (Accounting Standards) Rules, 2014 as per section 133 of the Companies Act, 2013.

The Company has been formed through conversion of a partnership firm to a Limited Company; therefore financial statement has been prepared in format as suggested in Schedule III of Companies Act, 2013.

2. USE OF ESTIMATES

The preparation of financial statements in conformity with Generally Accepted Accounting Principles (GAAP) requires the management of the Company to make estimates and assumptions that affect the reported balances of assets and liabilities and disclosures relating to the contingent liabilities, if any, as at the date of the financial statements and reported amounts of income and expenses during the year. Examples of such estimates include value of residual stock items, etc. The difference between the actual results and estimates are recognized in the period in which results are known or materialized.

3. FIXED ASSETS

Fixed assets are stated at historical cost less accumulated depreciation and impairment losses. Cost includes purchase price and all other attributable cost to bring the assets to its working condition for the intended use.

Subsequent expenditures related to an item of tangible asset are added to its book value only if they increase the future benefits from the existing asset beyond its previously assessed standard of performance.

4. DEPRECIATION**Tangible Fixed Assets**

The Company (erstwhile Partnership Firm) has followed method of Depreciation as mentioned in Section 32 of Income Tax Act, 1961. Since the Firm has been converted into a Limited Company with effect from September 13, 2018, depreciation for the period up to September 12 2018 has been calculated as per Income Tax Act, 1961 only.

Intangible Fixed Assets

The Company will follow Straight Line Method of amortization of such assets over 5 years on pro-rata basis.

5. BORROWING COSTS

Borrowing cost includes interest and amortization of ancillary costs incurred in connection with the arrangement of borrowings. Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalized as part of the cost of the respective asset. All other borrowing costs are expensed in the period they occur.

6. IMPAIRMENT OF ASSETS

The company assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the company estimates the asset's recoverable amount. An asset's (including goodwill) recoverable amount is the higher of an asset's net selling price and its value in use. The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining net selling price, recent market transactions are taken into account, if available. If no such transactions can be identified, an appropriate valuation model is used. After impairment, depreciation/ amortization is provided on the revised carrying amount of the asset over its remaining useful life.

7. INVESTMENTS

Investments, which are readily realizable and intended to be held for not more than one year from the date on which such investments are made, are classified as current investments. All other investments are classified as long-term investments.

On initial recognition, all investments are measured at cost. The cost comprises purchase price and directly attributable acquisition charges such as brokerage, fees and duties.

Current investments are carried in the financial statements at lower of cost and fair value determined on an individual investment basis. Long-term investments are carried at cost. However, provision for diminution in value is made to recognize a decline other than temporary in the value of the investments.

On disposal of an investment, the difference between its carrying amount and net disposal proceeds is charged or credited to the statement of profit and loss.

8. INVENTORIES

The inventories of the stock items are valued at lower of Cost and Estimated net realizable value. Cost is ascertained on FIFO basis. Management carries out the physical verification of the stock at the end of year/period and based on such exercise quantity, major A class stock item is ascertained. Residual Inventory items are valued best of estimate of the management.

9. REVENUE RECOGNITION

- i) Revenue from sale of goods is recognized on the transfer of title in the goods which generally coincides with dispatch and is stated net of discounts and sales tax.
- ii) Other income is accounted for on accrual basis in accordance with Accounting Standards (AS) 9- "Revenue Recognition".

10. FOREIGN CURRENCY TRANSACTIONS

Transaction denominated in foreign currencies are normally recorded at the exchange rate prevailing at the time of the transaction and any income or expenses on account of exchange difference either on settlement or on translation is recognized in the Statement of profit and Loss except in case where they relate to acquisition of fixed assets in which case they are adjusted with the carrying cost of such assets.

11. EMPLOYEE BENEFITS

- a) Provision for Gratuity :-

The Management has decided to apply pay-as-you-go method for payment of gratuity and not followed Projected Unit Credit method. So amount of gratuity will be accounted in the Profit & Loss A/c in the financial year in which the employee retires and provision will not be made on yearly basis and Gratuity to be expanded on pay

as you go method and profit and loss is overstated to that effects.

b) Leave Encashment :-

12. SEGMENT ACCOUNTING

(i) Business Segment

The Company operates in one Business Segment only and hence no separate information for business segment wise disclosure is required.

(ii) Geographical Segment

The Company operates in one Geographical Segment namely “within India” and hence no separate information for geographic segment wise disclosure is required.

13. ACCOUNTING FOR TAXES ON INCOME

Tax expense comprises of current and deferred tax. Current income tax is measured at the amount expected to be paid to the tax authorities in accordance with the Income-tax Act, 1961 enacted in India. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date.

(i) Deferred income taxes reflect the impact of timing differences between taxable income and accounting income originating during the current year and reversal of timing differences for the earlier years. Deferred tax is measured using the tax rates and the tax laws enacted or substantively enacted at the reporting date.

(ii) Deferred tax liabilities are recognized for all taxable timing differences. Deferred tax assets are recognized for deductible timing differences only to the extent that there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realized. In situations where the Company has unabsorbed depreciation or carry forward tax losses, all deferred tax assets are recognized only if there is virtual certainty supported by convincing evidence that they can be realized against future taxable profits.

The carrying amount of deferred tax assets are reviewed at each reporting date. The company writes-down the carrying amount of a deferred tax asset to the extent that it is no longer reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available against which deferred tax asset can be realized. Any such write-down is reversed to the extent that it becomes reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available.

14. CONTINGENT LIABILITIES AND PROVISIONS

Provisions are recognized only when there is a present obligation as a result of past events and when a reliable estimate of the amount of obligation can be made.

Contingent Liability is disclosed for

- a) Possible obligation which will be confirmed only by future events not wholly within the control of the Company or
- b) Present obligations arising from the past events where it is not probable that an outflow of resources will be required to settle the obligation or a reliable estimate of the amount of the obligation cannot be made.
- c) Contingent Assets are not recognized in the financial statements since this may result in the recognition of income that may never be realized.

A disclosure for a contingent liability is made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. Where there is a possible obligation or a present obligation that the likelihood of outflow of resources is remote, no provision or disclosure is made.

15. EARNINGS PER SHARE:

In determining the Earnings Per share, the company considers the net profit after tax which does not include any post tax effect of any extraordinary / exceptional item. The number of shares used in computing basic earnings per share is the weighted average number of shares outstanding during the period.

The company has been formed on conversion of partnership Firm into company with paid up equity share capital of Rs. 5,35,19,540 divided into 53,51,954 equity shares of Rs 10 each. Hence, EPS for all years of reporting period have been calculated by considering the number of shares outstanding post conversion of partnership into company (i.e 53,51,540 shares).

16. CASH FLOW:

Section 6: Issue Procedure in Book Built Issue

This being Fixed Price Issue, this section is not applicable for this Issue.

Section 7: Allotment Procedure and Basis of Allotment

Basis of Allotment

Allotment will be made in consultation with BSE SME (The Designated Stock Exchange). In the event of oversubscription, the allotment will be made on a proportionate basis in marketable lots as set forth here:

The total number of Shares to be allocated to each category as a whole shall be arrived at on a proportionate basis

i.e. the total number of Shares applied for in that category multiplied by the inverse of the over subscription ratio (number of applicants in the category x number of Shares applied for).

The number of Shares to be allocated to the successful applicants will be arrived at on a proportionate basis in marketable lots (i.e. Total number of Shares applied for into the inverse of the over subscription ratio).

For applications where the proportionate allotment works out to less than 6,000 Equity Shares the allotment will be made as follows:

Each successful applicant shall be allotted 6,000 Equity Shares;

The successful applicants out of the total applicants for that category shall be determined by the drawl of lots in such a manner that the total number of Shares allotted in that category is equal to the number of Shares worked out as per (2) above.

If the proportionate allotment to an applicant works out to a number that is not a multiple of 6,000 Equity Shares, the applicant would be allotted Shares by rounding off to the lower nearest multiple of 6,000 Equity Shares subject to a minimum allotment of 6,000 Equity Shares.

If the Shares allotted on a proportionate basis to any category is more than the Shares allotted to the applicants in that category, the balance available Shares for allocation shall be first adjusted against any category, where the allotted Shares are not sufficient for proportionate allotment to the successful applicants in that category, the balance Shares, if any, remaining after such adjustment will be added to the category comprising of applicants applying for the minimum number of Shares. If as a result of the process of rounding off to the lower nearest multiple of 6,000 Equity Shares, results in the actual allotment being higher than the shares offered, the final allotment may be higher at the sole discretion of the Board of Directors, upto 110% of the size of the offer specified under the Capital Structure mentioned in this Prospectus.

The above proportionate allotment of shares in an Issue that is oversubscribed shall be subject to the reservation for Retail Individual applicants as described below:

As per Regulation 32(4) of the SEBI (ICDR) Regulations 2018, as the Retail Individual Investor category is entitled to minimum fifty percent on proportionate basis, the retail individual investors shall be allocated that higher percentage. Remaining to Individual applicants other than retail individual investors and other investors including corporate bodies or institutions, irrespective of the number of specified securities applied for;

The unsubscribed portion in either of the categories specified in (a) or (b) above may be available for allocation to the applicants in the other category, if so required.
