In addition, the risks set out in this Draft Prospectus are not exhaustive. Additional risks and uncertainties, whether known or unknown, may in the future have material adverse effect on our business, financial condition and results of operations, or which we currently deem immaterial, may arise or become material in the future. To obtain a complete understanding of our Company, prospective investors should read this section in conjunction with the sections entitled “Our Business” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” beginning on Page Nos. 61 and 95 of this Draft Prospectus respectively as well as other financial and statistical information contained in this Draft Prospectus. Unless otherwise stated in the relevant risk factors set forth below, we are not in a position to specify or quantify the financial or other risks mentioned herein.

This Draft Prospectus also contains forward-looking statements that involve risks and uncertainties. Our results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including events described below and elsewhere in this Draft Prospectus. Unless otherwise stated, the financial information used in this section is derived from and should be read in conjunction with restated financial information of our Company prepared in accordance with the Companies Act and restated in accordance with the SEBI (ICDR) Regulations, including the schedules, annexure and notes thereto.

Materiality

The Risk factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality.

1. Some events may have material impact quantitatively;
2. Some events may have material impact qualitatively instead of quantitatively.
3. Some events may not be material individually but may be found material collectively.
4. Some events may not be material at present but may be having material impact in future.

INTERNAL RISK FACTORS

1. Uncertainty in relation to continuing effect of the COVID-19 pandemic on our business and operations;

In late calendar 2019, COVID-19, commonly known as “novel coronavirus” was first reported in Wuhan, China. Since then, the virus has progressively spread globally to many countries. The World Health Organization declared the COVID-19 outbreak as a health emergency of international concern on January 30, 2020 and thereafter categorized the outbreak as a pandemic on March 11, 2020.

In order to contain the spread of COVID-19 virus, the Government of India initially announced a 21-days lockdown on March 24, 2020, which, after being subject to successive extensions, is being relaxed currently. During the duration of the lockdown, there were several restrictions in place including travel restrictions and directive to all citizens to not move out of their respective houses unless essential. However, during the initial stages of the lockdown our business operations were temporarily disrupted and we faced limited availability of drivers and customers.

Due to the rising number of infected cases of COVID-19 in the country, there is no certainty if additional restrictions will be put back in place or if another lockdown would be re-imposed to control the spread of the pandemic. We cannot assure you that we may not face any difficulty in our operations due to such restrictions and such prolonged instances of lockdown may adversely affect our business, financial condition and results of operations. Further, our ability to ensure the safety of our workforce and continuity of operations while conforming with measures implemented by the central and state governments in relation to the health and safety of our employees may result in increased costs. In the event a member or members of our senior management team contract COVID-19, it may potentially affect our operations. Further, in the event any of our employees contract COVID-19, we may be required to quarantine our employees and shut down a part of or the entire our offices, as necessary. Risks arising on account of COVID-19 can also threaten the safe operation of our facility, offices, loss of life, injuries and impact the well-being of our employees. The ultimate impact will depend on a number of factors, many of which are outside our control. These factors include the duration, severity and scope of the pandemic, the impact of the pandemic on economic activity in India and

globally, the eventual level of infections in India or in the regions in which we operate, and the impact of any actions taken by governmental bodies or health organizations (whether mandatory or advisory) to combat the spread of the virus. These risks could have an adverse effect on our business, results of operations, cash flows and financial condition. As on the date of this Draft Prospectus, while we have started our operations post lockdown, there is significant uncertainty on the impact of COVID-19 on global and Indian economy and we may not be able to accurately predict its near term or long term impact on our business.

- 2. We face significant competition in our business from Indian and international companies, and we may be unsuccessful in competing against current and future competitors, which could have an adverse impact on the pricing of our services as well as increase the costs associated with growing our customer base.***

The AR/VR industry in India is highly competitive, and we expect that the competition in this industry will continue to increase. Our Industry is fragmented consisting of large established players and niche players. We compete with organized as well as unorganized sector on the basis of availability of consumers. Thus, our customers have the option of choosing any competitor providing similar services. Further, there are no entry barriers in this industry and any expansion in capacity of existing competitors would further intensify competition. If we are not able to compete effectively with existing or future competitors, our business and financial condition could be adversely affected.

Many of our competitors have good operating histories and significantly greater financial resources than we do. The management of some of these competitors may have more experience in implementing their business plan and strategy and may be more successful in increasing the number of customers, as well as increasing the revenues generated. We expect that our costs related to marketing and human resources will increase as our competitors undertake marketing campaigns to enhance their brand name and increase the volume of business conducted through their services. We expect many of our competitors to expend financial and other resources to improve their network and system infrastructure to compete more aggressively. Our inability to adequately address these and other competitive pressures will likely have a negative impact on the level of fees we can charge for our services as well as increase the costs associated with growing our customer base, which is likely to have a material adverse effect on our business, prospects, financial condition and results of operations.

- 3. We continue to explore the diversification of our business and the implementation of new models and services. These diversification and our other strategic initiatives may not be successful, which may adversely affect our business and results of operations.***

In order to achieve our goal, we are constantly evaluating the possibilities of expanding our business through new models, innovations and/or starting new services. Our key strategic initiatives, which include our diversification plans, are:

- Maintain continued emphasis on innovation and customization of our services;
- Pursue enhancement and diversification of our advertising revenue streams;
- Strengthen our brand recall;

Although we believe that there are synergies between our current business and our expansion plans, we do not have any experience or expertise in these new areas. These new businesses and modes of delivery and the implementation of our strategic initiatives may pose significant challenges to our administrative, financial and operational resources, and additional risks, including some of which we are not aware of. The early stages and evolving nature of some of our businesses also make it difficult to predict competition and consumer demand therein. Our strategic initiatives require capital and other resources, as well as management attention, which could place a burden on our resources and abilities. In addition, we cannot assure you that we will be successful in implementing any or all of our key strategic initiatives. If we are unable to successfully implement some or all of our key strategic initiatives in an effective and timely manner, or at all, our ability to maintain and improve our leading market position may be negatively impacted, which may have an adverse effect on our business and prospects, competitiveness, market position, brand name, financial condition and results of operations. Please refer chapter titled “Our Business” beginning on Page No. 61 of this Draft Prospectus.

- 4. If we are unable to source business opportunities effectively, we may not achieve our financial objectives.***

Our ability to achieve our financial objectives will depend on our ability to identify, evaluate and accomplish business opportunities. To grow our business, we will need to hire, train, supervise and manage new employees and to implement systems capable of effectively accommodating our growth. However, we cannot assure you that any such employees will contribute to the success of our business or that we will implement such systems effectively. Our failure to source business opportunities effectively could have a material adverse effect on our business, financial condition and results of operations. It is also possible that the strategies used by us in the future may be different from those presently in use. No assurance can be given that our analyses of market and other data or the strategies we use or plans in future to use will be successful under various market conditions.

5. Any slowdown in the AR/VR and its ancillary industries can impact our business, results of operations, financial condition and cash flows.

The services provided by our Company is majorly used by companies engaged in real estate, entertainment, education and gaming industry. Thus, the performance of our Company is heavily dependent on the purchase power of aforementioned businesses. For details of our Industry and services provided by us, please refer to the chapter titled “Our Industry” and “Our Business” beginning on Page Nos. 56 and 61 respectively of this Draft Prospectus. Any economic slowdown, both globally and in industries, in which we operate, may significantly affect our revenues and our growth prospects.

6. We have a limited operating history and may be subject to risks inherent in early stage companies, which may make it difficult for you to evaluate our business and prospects.

Although we were incorporated in 2015, we have a limited operating history upon which you can evaluate our business and prospects. We booked our revenues only in fiscal 2020 with a revenue of Rs. 10.45 lacs and PAT of Rs. 1.93 Lacs. You must consider our business and prospects in light of the risks and difficulties we face as an early stage Company with a limited operating history and should not rely on our past results as an indication of our future performance. In particular, our management may have less experience in implementing our business plan and strategy compared to our more well-established competitors, including our strategy to increase our market share and build our brand name. In addition, we may face challenges in planning and forecasting accurately as a result of our limited historical data and inexperience in implementing and evaluating our business strategies. Our inability to successfully address these risks, difficulties and challenges as a result of our inexperience and limited operating history may have a negative impact on our ability to implement our strategic initiatives, which may have an adverse effect on our business, prospects, financial condition and results of operations.

7. Our top 5 customers contribute majority of our revenues from operations. Any loss of business from one or more of them may adversely affect our revenues and profitability.

Our top 5 customers contributed 80.07% of our revenues for the period ended November 26, 2020 based on restated financial statements. Further, our top 5 customers contributed 71.43% of our revenues for the year ended March 31, 2020 based on restated financial statements. However, our top customers may vary from period to period depending on the demand and thus the composition and revenue generated from these clients might change as we continue to add new customers in normal course of business. Since our business is concentrated among relatively few significant customers, we could experience a reduction in our results of operations, cash flows and liquidity if we lose one or more of these customers or the amount of business we obtain from them is reduced for any reason, including but not limited on account of any dispute or disqualification.

Accordingly, we cannot assure you that the customers which contribute to the major part of our revenue stream will pay us the amounts due to us on time, or at all. In the event any of our significant customers fail to fulfil their respective obligations, our business, financial condition and results of operations would be adversely affected. While we believe we have maintained good and long term relationships with our customers. However, there can be no assurance that we will continue to have such long term relationship with them. We cannot assure that we shall generate the same quantum of business, or any business at all, from these customers, and loss of business from one or more of them may adversely affect our revenues and profitability.

8. We require a number of approval in the ordinary course of our business. Some of the approval are required to be transferred in the name of ‘Adjia Technologies Limited’ from ‘Adjia Technologies Private Limited’ pursuant to name change of our company and any failure or delay in obtaining the same in a timely manner may adversely affect our operations.

Pursuant to our conversion from a private limited company to a public limited company in the year 2020, we need to take necessary steps for transferring the approval of our company in the new name. For more information, see chapter “Government and Other Statutory Approvals” on page 105 of this Draft Prospectus.

9. There have been some instances of non-filing/delays /incorrect filings in the past with certain statutory authorities. If the authorities impose monetary penalties on us or take certain punitive actions against our Company in relation to the same, our business, financial condition and results of operations could be adversely affected.

In the past, there have been some instances of non-filings or incorrect filings or delays in filing statutory forms with the RoC, which have subsequently been filed along with the payment of additional fees, as specified by RoC. Except as mentioned in this Draft Prospectus, till date, there has been no penalty levied on the Company for such delays/defaults. However, it cannot be assured that even in future no such penalty will be levied. Therefore, if the authorities impose monetary penalties on us or take certain punitive actions against our Company or its Directors/Officers in relation to the same, our business, financial condition and results of operations could be adversely affected.

10. Brand recognition is important to the success of our business, and our inability to build and maintain our brand names will harm our business, financial condition and results of operation.

Brand recognition is important to the success of our business. Establishing and maintaining our brand names in the AR/VR industry or for people relying on services is critical to the success of the customer acquisition process of our business. Although, we expect to allocate significant amount of resources, financial and otherwise, on establishing and maintaining our brands, no assurance can be given that our brand names will be effective in attracting and growing user and client base for our businesses or that such efforts will be cost-effective, which may negatively affect our business, financial condition and results of operations.

11. We depend on certain brand names and our corporate name and logo that we may not be able to protect and/or maintain.

Our ability to market and sell our products depends upon the recognition of our brand names and associated consumer goodwill. We have not yet applied trademark registration for our Corporate Logo and Corporate Name. Consequently, we do not enjoy the statutory protections accorded to registered trademarks in India for our Company. There is no guarantee that the application for registration of our logo will be accepted in favour of the Company. This may affect our ability to protect our trademark in the event of any infringement of our intellectual property. In the absence of such registrations, competitors and other companies may challenge the validity or scope of our intellectual property right over these brands or our corporate name or logo. As a result, we may be required to invest significant resources in developing new brands or names, which could materially and adversely affect our business, financial condition, results of operations and prospects. In addition to same, our failure to comply with existing or increased regulations, or the introduction of changes to existing regulations, could adversely affect our business, financial condition, results of operations and prospects.

12. Our success depends upon our Directors and the Key Managerial Personnel. Disassociation of our Directors or any failure to retain such key managerial personnel could have an adverse impact on our business, financial conditions and results of operations.

Our success depends heavily on retaining the services of our directors and key management personnel. If any one or more of such personnel cease to work with us and we are unable to find suitable replacement personnel in a timely and cost efficient manner, our business may be disrupted and we may not be able to achieve our business objectives, including our ability to manage our rapid growth and successfully implement our strategic initiatives. In addition, we will need to hire more employees as we continue to implement our key strategy of building on our leading market position and expanding our business. Competition for qualified personnel in the areas in which we compete remains intense and the pool of qualified candidates is limited. Our inability to attract, hire and retain qualified staff on a cost efficient basis may have a material adverse effect on our business, prospects, financial condition, results of operations and ability to successfully implement our growth strategies.

13. Our Promoter and Promoter Group will continue to retain majority control over the Company after the Issue, which will allow them to influence the outcome of matters submitted to shareholders for approval.

Upon completion of the Issue, our Promoter and Promoter Group will own [●]% of the Post-Offer Equity Share capital of the Company. As a result, the Promoter and Promoter Group will have the ability to exercise significant influence over all matters requiring shareholders' approval, including the election of directors and approval of significant corporate transactions. The Promoter and Promoter Group will also have an effective veto power with respect to any shareholder action or approval requiring a majority vote. Such concentration of ownership may also have the effect of delaying, preventing or deterring a change in control. For further details of Promoter' shareholding, please refer chapter titled "Capital Structure" beginning on Page No. 41 of this Draft Prospectus.

14. Conflicts of interest may arise out of common business undertaken by Promoter Group entity.

Exposit Immersive Solutions Private Limited, our Promoter Group Entity is carrying out similar activities as those conducted by our Company. As a result, conflicts of interests may arise in allocating business opportunities amongst our Company, promoter group entity in circumstances where our respective interests diverge. In cases of conflict, our Promoter may favour other company in which our Promoter has interests. There can be no assurance that our Promoter or members of the Promoter Group will not compete with our existing business or any future business that we may undertake or that their interests will not conflict with ours. Any such present and future conflicts could have a material adverse effect on our reputation, business, results of operations and financial condition.

15. Our Promoter and Directors have interests in the Company which may result in a conflict of interest, which may have an adverse effect on our business.

Our Promoter hold Equity Shares in our Company and are also part of key management of the Company and may be deemed to be interested to the extent of any remuneration, fees and dividend payable to them and other distributions

in respect of the Equity Shares. For further details, please refer chapters titled “*Our Management*” and “*Financial Statements*” beginning on Page Nos. 79 and 92 respectively of this Draft Prospectus.

Prior to this, he did have limited business exposure in the industry in which our Company is operating. Although he has been successfully running the business operations, lack of vintage experience to address the risks frequently encountered by industry, may adversely affect our operations.

17. *Our financing requirements and the deployment of the net proceeds of the Issue are based on management estimates and have not been independently appraised.*

Our financing requirements and the deployment of the net proceeds of the Issue are based on management estimates and have not been appraised by any bank or financial institution. In view of the highly competitive nature of the industry in which we operate, we may have to revise our management estimates from time to time and consequently our financing requirements and the expected deployment of the net proceeds of the Issue may also change.

18. *Our revenues and profits are difficult to predict and can vary significantly from year on year, which may impact our ability to pay dividend and which could cause the price of our Equity Shares to fluctuate.*

Our revenues are dependent on several factors such as, ability to attract fresh talent in the industry and general market conditions. For further details please refer chapter titled “*Management’s Discussion and Analysis of Financial Condition and Results of Operations*” beginning on Page No. 95 of this Draft Prospectus. The combination of these factors may result in significant variations in revenues and profits and as a result of the same year on year results may not be comparable and should not be relied upon as indicative of future performance. Any significant shortfall in revenue may have an adverse effect on our business, operating results and financial condition.

19. *Our Company does not own the registered office. Any dispute in relation to the lease of our premise would have a material adverse effect on our business and results of operations.*

Our Company operates from rented and leased premise. If any of the owners of these premise do not renew the agreements under which we occupy the premise or renew such agreements on terms and conditions that are unfavorable to our Company, it may suffer a disruption in our operations or have to pay increased rentals which could have a material adverse effect on our business, financial condition and results of operations. Decrease in quality of our service provider may affect our Company’s reputation and results of operations. Though our business has not experienced any disruptions in the past, any future event may have an adverse effect on our business.

21. *We will require additional capital to support the growth of our business, and this capital might not be available on reasonable terms or at all.*

To continue to effectively compete, we will require additional funds to support the growth of our business and allow us to invest in new products, offerings, and markets. If we raise additional funds through further issuances of equity or convertible debt securities, our existing stockholders may suffer significant dilution, and any new equity securities we issue may have rights, preferences, and privileges superior to those of existing stockholders. Certain of our existing debt instruments contain, and any debt financing we secure in the future could contain, restrictive covenants relating to our ability to incur additional indebtedness and other financial and operational matters that make it more difficult for us to obtain additional capital with which to pursue business opportunities. For example, our existing debt instruments contain significant restrictions on our ability to incur additional secured indebtedness. We may not be able to obtain additional financing on favorable terms, if at all. If we are unable to obtain adequate financing or financing on terms satisfactory to us when required, our ability to continue to support our business growth and to respond to business challenges and competition may be significantly limited.

Company, please refer chapter title “*Capital Structure*” and “*Summary of Offer Document*” beginning on page 41 and 14, respectively of this Draft Prospectus.

23. *Our Company may be affected by changes in technology that relate to our business.*

Our Company operates in the AR/VR industry based on technology which is constantly changing and is significantly governed and affected by scientific breakthroughs, developments, innovation, government policy and laws pertaining to information technology as well as intellectual property. These factors can affect the demand, pricing and value of our services which have already been developed and which are in the course of being developed. Our continued growth will depend upon our ability to sustain cutting edge technology solutions, adapt to the updated / superior / modified technology which we may be required to use with time and to train our executives in order to utilize the technology and the talents of our human resource to their maximum potential. In the event that we fail to adapt and match pace with the growth in technology and adoption of the same through sufficient training of our executives, the same may adversely affect our business, prospects, the results of operations and financial condition.

24. *Our revenues and profits are dependent on several factors. Any adverse change in these factors or in combination of these factors may affect our business operations and the financial condition and consequently, our ability to pay dividends.*

Our revenues and profits are dependent on several factors such as retaining our key managerial personnel, our compliance with laws, managing costs and expenses, maintaining adequate inventory levels and general market conditions. Any adverse change in these factors or a combination of these factors may adversely affect our business operations and the financial condition. Further, our ability to pay dividends will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditures, lender’s approvals and other factors. Therefore, there can be no assurance that we shall have distributable funds or that we will declare dividends.

25. *Delays or defaults in payments from our clients could result into a constraint on our cash flows.*

The efficiency and growth of our business depends on timely payments received from our clients. In the event, our clients default or delay in making payments and clearing their dues, we may not have adequate resources to fund our business and implement our growth plans. This could have an adverse effect on the results of operations and our financial condition.

26. *We have incurred losses since inception except last fiscal. We expect our operating expenses to increase significantly in the foreseeable future, and we may not achieve profitability.*

We have incurred losses since inception except FY 2019-20. We incurred operating losses of Rs. 0.26 lakhs and 0.13 Lakhs in the financial year ended March 31 2019 and 2018, respectively. We will need to generate and sustain increased revenue levels and decrease proportionate expenses in future periods to achieve profitability in many of our largest markets and even if we do, we may not be able to maintain or increase profitability. We anticipate that we may incur losses in the near term as a result of expected substantial increases in our operating expenses, as we continue to invest in order to: increase the number of drivers and consumers. These efforts may prove more expensive than we anticipate, and we may not succeed in increasing our revenue sufficiently to offset these expenses. Many of our efforts to generate revenue are new and unproven and any failure to adequately increase revenue or contain the related costs could prevent us from attaining or increasing profitability.

27. *Our Company has negative cash flows from its operating activities in the past 2 of the past 3 fiscal years, details of which are given below. Sustained negative cash flow could impact our growth and business.*

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flows in future, it may adversely affect our business and financial operations.

28. *The shortage or non-availability of power facilities may adversely affect our business processes and have an adverse impact on our results of operations and financial condition.*

Our business processes requires substantial amount of power facilities. We do not have arrangements for alternative/ independent sources of power supply as of now. We are mainly dependent on local electricity service provider for meeting our electricity requirements, there may be factors beyond our control affecting the supply of power. Any power failure may lead to increased costs, thereby affecting the profitability.

29. *Our Company's future success depends upon our ability to effectively implement our business and growth strategies, failing which, our growth and business may be adversely affected.*

Our Company's success will depend substantially on our ability to effectively implement our business and growth strategies. Our Company may not be able to execute our strategies in a timely manner or within our budget estimates or be able to meet the expectations of our consumers and other stakeholders. We believe that our Company's business and growth strategies will place significant demands on our senior management and other resources and will require us to develop and improve operational, financial and other internal controls. Any inability to manage our business and growth strategies may adversely affect our Company's business, prospects, the results of operations and financial condition.

30. *Our ability to pay dividend in the future will depend upon future earnings, financial conditions, cash flows, working capital and capital expenditure requirements.*

Our Company has not declared and paid dividend in the past. Our Company cannot give any assurance that dividend will be paid in future. The declaration and payment of any dividend in the future will be recommended by our Board of Directors, at their discretion, and will depend on a number of factors like our earnings, cash generated from operations, capital requirements and overall financial condition of our Company.

For more information regarding our related party transactions, please refer chapter titled "*Financial Statements*" beginning on Page No. 92 of this Draft Prospectus. We cannot assure you that we will receive similar terms in our related party transactions in the future. While we believe that all of our related party transactions are in compliance with applicable law, we cannot assure you that we could not have achieved more favourable terms had such transactions been entered into with unrelated parties. Further, the Companies Act, 2013 has brought into effect significant changes to the Indian Company law framework including specific compliance requirements such as obtaining prior approval from audit committee, board of directors and shareholders for certain related party transactions. We cannot assure you that such transactions, individually or in the aggregate, will not have an adverse effect on our reputation, cash flows, business, results of operations and financial condition.

32. *We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule.*

The proposed fund requirement as detailed in the chapter titled "*Objects of the Issue*" is to be funded from the proceeds of the Initial Public Offering. However, we have not identified any alternate source of funding to meet our funding requirements either through our owned funds, internal accruals or debt and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule, and we may have to obtain additional borrowings. We therefore, cannot assure that we would be able to execute our future plans/strategy within the given timeframe. For further details, please refer the chapter titled to the chapter titled "*Objects of the Issue*" beginning on Page No. 49 of this Draft Prospectus.

The proposed fund requirement, for funding purchase of equipment, marketing initiatives, primarily, as detailed in the section titled "*Objects of the Issue*" is to be funded from the proceeds of this IPO. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule. We, therefore, cannot assure that we would be able to execute our future plans/strategy within the estimated time frame.

35. *Our workplace culture and forward-leaning approach created operational, compliance and cultural challenges and a failure to address these challenges would adversely impact our business, financial condition, operating results and prospects.*

Our workplace culture and forward-leaning approach created significant operational and cultural challenges that have in the past harmed and may in the future continue to harm our business results and financial condition. Our focus on aggressive growth and intense competition, and our prior failure to prioritize compliance has led to increased regulatory scrutiny. Recent changes in our Company's cultural norms and composition of our leadership team together with our ongoing commitment to address and resolve our historical cultural and compliance problems and promote transparency and collaboration may not be successful and regulators may continue to perceive us negatively, which would adversely impact our business, financial condition, operating results and prospects.

36. *Our business depends on retaining and attracting high-quality personnel, and continued attrition, future attrition, or unsuccessful succession planning could adversely affect our business.*

Our success depends in large part on our ability to attract and retain high-quality management, operations, engineering and other personnel who are in high demand are often subject to competing employment offers and are attractive recruiting targets for our competitors. Challenges related to our culture and workplace practices and negative publicity we experience have in the past led to significant attrition and made it more difficult to attract high-quality employees. Future challenges related to our culture and workplace practices or additional negative publicity could lead to further attrition and difficulty attracting high-quality employees. Future leadership transitions and management changes may cause uncertainty or a disruption to our business and may increase the likelihood of senior management or other employee turnover. The loss of qualified executives and employees or an inability to attract, retain and motivate high-quality executives and employees required for the planned expansion of our business, may harm our operating results and impair our ability to grow.

37. *If we fail to maintain an effective system of internal controls, we may not be able to successfully manage or accurately report our financial risks.*

Effective internal controls are necessary for us to prepare reliable financial reports and effectively avoid fraud. Moreover, any internal controls that we may implement, or our level of compliance with such controls, may deteriorate over time, due to evolving business conditions. There can be no assurance that additional deficiencies in our internal controls will not arise in the future, or that we will be able to implement and continue to maintain adequate measures to rectify or mitigate any such deficiencies in our internal controls.

38. *Industry information included in this Draft Prospectus has been derived from industry reports and unsolicited digital media articles. There can be no assurance that such third-party statistical, financial and other industry information is either complete or accurate.*

10. Any adverse outcome in the legal proceedings in which we are/get involved;
11. Failure to obtain any applicable approvals, licenses, registrations and permits in a timely manner;
12. Occurrence of natural or man-made disasters could adversely affect our results of operations and financial condition and
13. Our inability to successfully diversify our service offerings may adversely affect our growth and negatively impact our profitability.

Even though a Market Maker has been appointed for our stock, since there has been no public market for our Company's Equity Shares, an active trading market on the Indian Stock Exchanges may not develop or be sustained after the Offer. The Issue price of the Equity Shares may bear no relationship to the market price of the Equity Shares after the Offer. The market price of the Equity Shares after the Issue may be subject to significant fluctuations in response to, among other factors, variations in our Company's operating results, market conditions specific to the packaging sector in India, developments relating to India and volatility in the Stock Exchanges and securities markets elsewhere in the world.

46. *The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the Issue Price and you may not be able to sell your Equity Shares at or above the Issue Price.*

The Issue Price of our Equity Shares has been determined by the management and the lead manager on numerous factors and may not be indicative of the market price of our Equity Shares after the Offer. For further information please refer the chapter titled "*Basis for Issue Price*" beginning on Page No. 53 of this Draft Prospectus. The market price of our Equity Shares could be subject to significant fluctuations after the Offer, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Amongst the factors that could affect our share price are:

- Quarterly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts;
- Speculation in the press or investment community;
- General market conditions; and
- Changes in economic, legal and regulatory factors (both domestic and international) unrelated to our performance such as global recession, imposition of trade / non-trade barriers and sanctions etc.

47. *You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under the Income-tax Act, 1961, capital gains arising from the sale of equity shares in an Indian Company are generally taxable in India except any gain realized on the sale of shares on a Stock Exchange held for more than 12 months will not be subject to capital gains tax in India if the Securities Transaction Tax ("STT") has been paid on the transaction. The STT will be levied on and collected by an Indian Stock Exchange on which equity shares are sold. Any gain realized on the sale of shares held for more than 12 months to an Indian resident, which are sold other than on a recognized Stock Exchange and as a result of which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realized on the sale of shares on a Stock Exchange held for a period of 12 months or less will be subject to short term capital gains tax. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less which are sold other than on a recognized stock exchange and on which no STT has been paid, will be subject to short term capital gains tax at a relatively higher rate as compared to the transaction where STT has been paid in India.

In Finance Bill 2017, Section 10(38) was amended to provide that exemption under this section for income arising on transfer of equity share acquired on or after 1st day of October, 2004 shall be available only if the acquisition of share

is chargeable to STT under Chapter VII of the Finance (No 2) Act, 2004. In this case, this provision becomes effective, sale shares acquired on or after 1st day of October, 2004 on which STT was not charged will attract tax under provisions of Long Term Capital Gains.

As per Finance Bill 2018, exemption under section 10(38) for income arising from long term gains on transfer of equity share shall not be available on or after 1st day of April, 2018 if the long term capital gains exceeds ₹1,00,000/- p.a. Such income arising from long term gains on transfer of equity share on or after 1st day of April, 2018 in excess of ₹1,00,000/- p.a. shall be chargeable at the rate of 10%.

Capital gains arising from the sale of shares will be exempt from taxation in India in cases where an exemption is provided under a tax treaty between India and the country of which the seller is a resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdictions on gains arising from a sale of the shares subject to relief available under the applicable tax treaty or under the laws of their own jurisdiction.

48. *Sale of Equity Shares by our Promoter or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.*

Any instance of disinvestments of equity shares by our Promoter or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

49. *Significant differences exist between Indian GAAP and other accounting principles, such as US GAAP and IFRS, which may be material to investors assessments of Our Company's financial condition. Our failure to successfully adopt IFRS may have an adverse effect on the price of our Equity Shares. The proposed adoption of IFRS could result in our financial condition and results of operations appearing materially different than under Indian GAAP.*

Our financial statements, including the financial statements provided in this Draft Prospectus, are prepared in accordance with Indian GAAP. We have not attempted to quantify the impact of IFRS or U.S. GAAP on the financial data included in this Draft Prospectus, nor do we provide a reconciliation of our financial statements to those of U.S. GAAP or IFRS. U.S. GAAP and IFRS differ in significant respects from Indian GAAP. For details, refer chapter titled “*Certain Conventions, Presentation of Financial, Industry and Market Data*” beginning on Page No. 12 of this Draft Prospectus. Accordingly, the degree to which the Indian GAAP financial statements included in this Draft Prospectus will provide meaningful information is entirely dependent on the reader's level of familiarity with Indian accounting practices. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Draft Prospectus should accordingly be limited.

India has decided to adopt the “Convergence of its existing standards with IFRS” and not the “International Financial Reporting Standards” (“IFRS”), which was announced by the MCA, through the press note dated January 22, 2010. These “IFRS based / synchronized Accounting Standards” are referred to in India as IND (AS). Public companies in India, including our Company, may be required to prepare annual and interim financial statements under IND (AS). The MCA, through a press release dated February 25, 2011, announced that it will implement the converged accounting standards in a phased manner after various issues, including tax related issues, are resolved. Further, MCA Notification dated February 16, 2015, has provided an exemption to the Companies proposing to list their shares on the SME Exchange as per Chapter IX of the SEBI ICDR Regulations and hence the adoption of IND (AS) by a SME exchange listed Company is voluntary. Accordingly, we have made no attempt to quantify or identify the impact of the differences between Indian GAAP and IFRS or to quantify the impact of the difference between Indian GAAP and IFRS as applied to its financial statements. There can be no assurance that the adoption of IND-AS will not affect our reported results of operations or financial condition. Any failure to successfully adopt IND-AS may have an adverse effect on the trading price of our Equity Shares. Currently, it is not possible to quantify whether our financial results will vary significantly due to the convergence to IND (AS), given that the accounting principles laid down in the IND (AS) are to be applied to transactions and balances carried in books of accounts as on the date of the applicability of the converged standards (i.e., IND (AS)) and for future periods.

Moreover, if we volunteer for transition to IND (AS) reporting, the same may be hampered by increasing competition and increased costs for the relatively small number of IND (AS)-experienced accounting personnel available as more Indian companies begin to prepare IND (AS) financial statements. Any of these factors relating to the use of converged Indian Accounting Standards may adversely affect our financial condition.

50. *Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business and financial performance.*

Our business and financial performance could be adversely affected by unfavorable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations applicable to us and our business. Please refer to chapter titled “*Key Industry Regulations and Policies*” beginning on Page No. 68 of this Draft Prospectus for details

of the laws currently applicable to us. There can be no assurance that the Government of India may not implement new regulations and policies which will require us to obtain approvals and licenses from the Government of India and other regulatory bodies or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the applicability, interpretation and implementation of any amendment to, or change to governing laws, regulation or policy in the jurisdictions in which we operate may have a material adverse effect on our business, financial condition and results of operations. In addition, we may have to incur expenditures to comply with the requirements of any new regulations, which may also materially harm our results of operations. Any unfavorable changes to the laws and regulations applicable to us could also subject us to additional liabilities.

GST has been implemented with effect from July 1, 2017 and has replaced the indirect taxes on goods and services such as central excise duty, service tax, central sales tax, state VAT and surcharge currently being collected by the central and state governments. The GST is expected to increase tax incidence and administrative compliance. Given the limited availability of information in the public domain concerning the GST, we are unable to provide any assurance as to the tax regime following implementation of the GST. The implementation of this new structure may be affected by any disagreement between certain state Governments, which could create uncertainty. Any future amendments may affect our overall tax efficiency, and may result in significant additional taxes becoming payable.

Further, the general anti avoidance rules (“GAAR”) provisions have been made effective from assessment year 2018-19 onwards, i.e.; financial Year 2017-18 onwards and the same may get triggered once transactions are undertaken to avoid tax. The consequences of the GAAR provisions being applied to an arrangement could result in denial of tax benefit amongst other consequences.

In the absence of any precedents on the subject, the application of these provisions is uncertain. The application of various Indian tax laws, rules and regulations to our business, currently or in the future, is subject to interpretation by the applicable taxation authorities. If such tax laws, rules and regulations are amended, new adverse laws, rules or regulations are adopted or current laws are interpreted adversely to our interests, the results could increase our tax payments (prospectively or retrospectively) and/or subject us to penalties. Further, changes in capital gains tax or tax on capital market transactions or sale of shares could affect investor returns. As a result, any such changes or interpretations could have an adverse effect on our business and financial performance.

51. *Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.*

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

52. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

53. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfers of shares between non- residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

54. *The extent and reliability of Indian infrastructure could adversely affect our Company's results of operations and financial condition.*

India's physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy; disrupt the transportation of goods and supplies, and costs to doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition.

55. *Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

56. *Natural calamities could have a negative impact on the Indian economy and cause our Company's business to suffer.*

India has experienced natural calamities such as earthquakes, tsunamis, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

57. *Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.*

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

GLOBAL ECONOMIC OUTLOOK

The COVID-19 pandemic is inflicting high and rising human costs worldwide. Protecting lives and allowing health care systems to cope have required isolation, lockdowns, and widespread closures to slow the spread of the virus. The health crisis is therefore having a severe impact on economic activity. As a result of the pandemic, the global economy is projected to contract sharply by 3 percent in 2020, much worse than during the 2008–09 financial crisis. In a baseline scenario, which assumes that the pandemic fades in the second half of 2020 and containment efforts can be gradually unwound, the global economy is projected to grow by 5.8 percent in 2021 as economic activity normalizes, helped by policy support. There is extreme uncertainty around the global growth forecast. The economic fallout depends on factors that interact in ways that are hard to predict, including the pathway of the pandemic, the intensity and efficacy of containment efforts, the extent of supply disruptions, the repercussions of the dramatic tightening in global financial market conditions, shifts in spending patterns, behavioural changes (such as people avoiding shopping malls and public transportation), confidence effects, and volatile commodity prices. Many countries face a multi layered crisis comprising a health shock, domestic economic disruptions, plummeting external demand, capital flow reversals, and a collapse in commodity prices.

The COVID-19 pandemic differs markedly from past triggers of downturns. Infections reduce labour supply. Quarantines, regional lockdowns, and social distancing, curtail mobility, with particularly acute effects on sectors that rely on social interactions (such as travel, hospitality, entertainment, and tourism). Workplace closures disrupt supply chains and lower productivity. Layoffs, income declines, fear of contagion, and heightened uncertainty make people spend less, triggering further business closures and job losses. There is a de facto shutdown of a significant portion of the economy. Health care expenditures necessarily rise sharply above what had been expected. These domestic disruptions spill over to trading partners through trade and global value chain linkages, adding to the overall macroeconomic effects.

The economic impact is already visible in the countries most affected by the outbreak. For example, in China, industrial production, retail sales, and fixed asset investment dropped dramatically in January 2020 and February 2020. As more countries are forced to respond to the pandemic with stringent quarantine and containment efforts of the kind seen, for example, in China, Italy, and Spain, this will necessarily entail similar sharp economic activity slowdowns from closures of nonessential workplaces, travel restrictions, and behavioural changes. Initial jobless claims in the United States during the fourth week of March, for example, exceeded 6.6 million, compared with about 280,000 just two weeks before. And surveys of purchasing managers pointed to plummeting economic activity in March in the euro area, Japan, and the United States.

The fast deterioration of the global economic outlook as the epidemic has spread and the breakdown of the OPEC+ (Organization of the Petroleum Exporting Countries, including Russia and other non-OPEC oil exporters) agreement among oil suppliers have weighed heavily on commodity prices. From mid-January to end-March, base metal prices fell about 15 percent, natural gas prices declined by 38 percent, and crude oil prices dropped by about 65 percent (a fall of about \$40 a barrel). Futures markets indicate that oil prices will remain below \$45 a barrel through 2023, some 25 percent lower than the 2019 average price, reflecting persistently weak demand. These developments are expected to weigh heavily on oil exporters with undiversified revenues and exports, particularly on high-cost producers, and compound the shock from domestic infections, tighter global financial conditions, and weaker external demand.

(Source: World Economic Outlook Update, April 2020)

Many uncertainties lie ahead, but assuming our base case for new infections of the novel corona virus to peak in upcoming months, the bulk of the economic pain was concentrated in the first half of 2020, with the global economy contracting on an annualized basis by 0.6% and 2.1%, respectively, in the first and second quarters. If a recovery takes root in the third quarter, the global economy could rebound to 4.8% growth, year on year, in 2021.

Even before the coronavirus outbreak, the post-GFC global economy had been facing the triple challenge of demographics, debt and disinflation, which we last faced in the 1930s. From a big picture perspective, the coronavirus pandemic growth shock foregrounds these structural issues. On the positive side, we are already seeing an aggressive policy response across

the world to shore up businesses and workers, maintain liquidity in markets and inject stimulus to create the necessary conditions for a more robust recovery from this shock to the global economic system.

INDIAN ECONOMIC OVERVIEW

India became the world's fifth largest economy last year, according to data from the IMF's October World Economic Outlook. When ranked by nominal GDP, the country leapfrogged France and the UK. The country's GDP growth has been among the highest in the world in the past decade – regularly achieving annual growth of between 6-7%.

(Source: <https://theprint.in/economy/india-is-now-the-worlds-5th-largest-economy-according-to-imf/369335/>)

India has emerged as the fastest growing major economy in the world and is expected to be one of the top three economic powers of the world over the next 10-15 years, backed by its strong democracy and partnerships.

India's nominal GDP growth rate is estimated at 12 per cent in 2019-20. The estimate for 2018-19 was 11.5 per cent. During Q1 of 2019-20, GDP (at constant 2011-12 prices) grew by 5 per cent. India has retained its position as the third largest startup base in the world with over 8,900-9,300 startups, with about 1,300 new start-ups being founded in 2019, according to a report by NASSCOM. India also witnessed the addition of 7 unicorns in 2019 till August, taking the total tally up to 24. India's labour force is expected to touch 160-170 million by 2020, based on rate of population growth, increased labour force participation, and higher education enrolment, among other factors, according to a study by ASSOCHAM and Thought Arbitrage Research Institute. India's foreign exchange reserves were US\$ 448.59 billion in the week up to November 22, 2019, according to data from the RBI.

India is expected to achieve the ambitious goal of doubling farm income by 2022. The agriculture sector in India is expected to generate better momentum in the next few years due to increased investments in agricultural infrastructure such as irrigation facilities, warehousing and cold storage. Furthermore, the growing use of genetically modified crops will likely improve the yield for Indian farmers. India is expected to be self-sufficient in pulses in the coming few years due to concerted efforts of scientists to get early-maturing varieties of pulses and the increase in minimum support price. The government of India targets to increase the average income of a farmer household at current prices to Rs. 219,724 (US\$ 3,420.21) by 2022-23 from Rs 96,703 (US\$ 1,505.27) in 2015-16. Going forward, the adoption of food safety and quality assurance mechanisms such as Total Quality Management (TQM) including ISO 9000, ISO 22000, Hazard Analysis and Critical Control Points (HACCP), Good Manufacturing Practices (GMP) and Good Hygienic Practices (GHP) by the food processing industry will offer several benefits.

Though, the Indian economy had been experiencing significant slowdown over the past few quarters, there was a strong hope of recovery in the last quarter of the current fiscal. However, the new coronavirus epidemic has made the recovery extremely difficult in the near to medium term. The outbreak has presented fresh challenges for the Indian economy now, causing severe disruptive impact on both demand and supply side elements which has the potential to derail India's growth story. Consumption is getting impacted due to job losses and decline in income levels of people particularly the daily wage earners due to slowing activity in several sectors including retail, construction, entertainment, etc. With widespread fear and panic now increasing among people, overall confidence level of consumers has dropped significantly, leading to postponement of their purchasing decisions. Greater uncertainty about the future course and repercussion of Covid-19 has also made the financial market extremely volatile, leading to huge crashes and wealth erosion, which in turn is impacting consumption levels. On the supply side, shutdown of factories and the resulting delay in supply of goods from China has affected many Indian manufacturing sectors which source their intermediate and final product requirements from China. Some sectors like automobiles, pharmaceuticals, electronics, chemical products etc. are facing an imminent raw material and component shortage. This is hampering business sentiment and affecting investment and production schedules of companies. Besides having a negative impact on imports of important raw materials, the slowdown in manufacturing activity in China and other markets of Asia, Europe and the US is impacting India's exports to these countries as well.

Given the challenges that the businesses and people are facing currently, the Indian economy is most likely to experience a lower growth during the last quarter of the current fiscal. In case the spread of corona virus continues, growth may remain subdued in the first quarter of FY 20-21 as well. Most multilateral agencies and credit rating agencies have therefore revised their 2020 and 2021 growth projections for India keeping in view the negative impact of coronavirus-induced travel restrictions, supply chain disruptions, subdued consumption and investment levels on the growth of both global and the Indian economy.

OVERVIEW OF GLOBAL AR/VR INDUSTRY

The augmented reality (AR) market is projected to grow from USD 15.3 billion in 2020 to USD 77.0 billion by 2025; it is expected to grow at a CAGR of 38.1% from 2020 to 2025. The virtual reality (VR) market is projected to grow from USD 6.1 billion in 2020 to USD 20.9 billion by 2025; it is expected to grow at a CAGR of 27.9% from 2020 to 2025. The increasing demand for AR devices and applications in healthcare, rising investments in AR market, and growing demand for AR in retail and e-commerce sectors due to COVID-19 are the key factors driving the AR market growth. The availability of affordable VR devices, growing adoption of HMDs in different industries, advancement of technologies and growing digitization, penetration of HMDs in gaming and entertainment sectors after COVID-19, and high investments in VR market are the key factors driving the VR market growth.

The objective of the report is to define, describe, and forecast the augmented reality and virtual reality market based on technology, offering, device type, application, and region.

Impact of COVID-19 on current augmented reality and virtual reality market size and forecast

The COVID-19 pandemic is expected to positively impact the growth of the AR and VR market for the healthcare application, as AR VR HMDs are expected to be majorly adopted by medical professionals as protective gear in the near future. COVID-19 has negatively impacted the supply chain of the market due to lockdowns and low cross-border trade. Due to the COVID-19 pandemic, the global consumer market for AR & VR is expected to witness sluggish growth in the coming years. The shutdown of consumer markets worldwide has affected the sale of products such as HMDs and projectors. However, the market for VR is expected to regain its complete momentum by 2023.

Augmented Reality and Virtual Reality Market Dynamics

Driver: Increasing demand for AR devices and applications in healthcare

AR plays an important role in the healthcare sector. AR can be used to provide a virtual view of a patient, in which a surgeon can see the condition of the patient's body parts. This can help the surgeon to conduct minimally invasive surgeries. The use of AR modeling and 3D visualization is expected to help the healthcare sector. The use of AR for improving fitness, teaching complex subjects to medical students, training doctors, managing pharmacy, and caring and supporting patients after they leave the hospital is driving the growth of the AR market in this sector.

Restraint: Limited user interface affecting navigation performance of AR apps Security and privacy issues associated with AR

Security and privacy issues are the major challenges faced by the AR industry. These issues have emerged due to the inconsistencies in AR programming and negligence and oversight of both the developers and end users of AR apps and devices. Few AR applications do not have capabilities to secure user identity and privacy. The primary issue is that there are no regulations that define the dos and don'ts associated with the AR environment. This implies that AR technology can incorporate malicious intent and lead to users' misuse of personal information. For instance, the try-before-you-buy concept for clothing retailers can be misused. If the concept is not secured well, it can be hijacked. The hacker can overlay a nude body image instead of clothes, which can harm the user's reputation. An unsafe try-before-you-buy app can be manipulated, which is a major factor restraining such apps' growth in the retail clothing sector.

Opportunity: Rise in demand for AR in architecture

The increasing demand for AR in architecture would be a major opportunity for the AR market's growth. AR can be used to project digital information on architectural models. It can also be used to experience a building's interior even when the design of the building is in its initial stages. This will help the architects get an image of the project from the screen to the physical space. Streamlining of the construction process is another application in the construction industry using AR. In architecture, AR systems are used for interior design applications, through which a user can transform 2D drawings into 3D physical models and digital simulations. The AR-based architecture applications help users to choose accurate models and designs before construction by looking at their 3D representation. Using these applications, users can rearrange designs and floorings in a building. They can create and analyze a detailed model to evaluate their designs based on sun exposure, cast shadows, wind pattern, and traffic congestion. Head-mounted displays can be used for site surveying and determining the location of underground cables. They can also be used as a visualization tool to track how the building would respond to the surroundings.

Challenge: Display latency and limited field of view

The major challenge faced by these AR manufacturers is to provide a wide field of view (FOV). The field of view is defined as the extent of the observable world at any given moment. Ideally, a human eye has a visual field of ~200° horizontally and 135° vertically; though, currently, AR and VR are capable of providing a FOV of up to 90°. For AR devices to create immersive experiences, they must capture as much of the FOV as possible. Another major challenge for the AR device and application manufacturers is to offer low latency displays. The errors caused by latency often lead to image lagging, thus posing a major challenge for the AR device and application manufacturers. While playing a game, high input lag makes the gameplay feel sluggish and unresponsive. A lower input lag level allows gamers to enjoy a seamless control experience,

as movements on the screen respond instantly to the commands. This has been one of the biggest technical challenges faced by AR manufacturers. All possible systems are bound to have some threshold latency, which comes from the content frame rate, the display's refresh rate, and input lag. Furthermore, these devices are largely being adopted by healthcare and aerospace & defense applications, where any late response would have catastrophic results.

Semi- and fully immersive technology to play a significant role in the growth of augmented reality and virtual reality market

Most companies are focused on developing immersive video games for users. VR headsets allow users to interact with the virtual world. The increasing demand for semi- and fully immersive VR devices results from enhancements in computing and electronic networking systems. Also, innovations—such as fully immersive VR technology-enabled HMDs that provide a 360° field of view and high resolution to a user—are expected to drive the growth of this market.

Software to play a significant role in the growth of augmented reality and virtual reality market

The AR & VR market for software has witnessed high growth in recent years and is set to lead the AR & VR market for the next 5 years owing to the trend of VR content creation and AR gaming. The mass consumerization would help achieve widespread adoption of AR and VR. Delays in the launching of new AR & VR hardware, coupled with a decline in the sale of AR & VR hardware, has negatively impacted the revenue growth of the AR & VR software market. However, the increasing need for maintaining social distancing to curb the spread of the virus is expected to increase the adoption of AR & VR technologies and create growth opportunities for AR & VR software providers in the retail, consumer, education, and enterprise sectors.

Commercial application expected to grow at a high CAGR in the augmented reality and virtual reality market

There has been a constant evolution over the decades in the way goods and services are promoted and marketed. Technological advancements have changed the traditional methods of marketing and promotion. The advent of the Internet and smartphones, combined with content-based technologies, e.g., AR, has helped enhance marketing activities. Using AR, a buyer can compare the products by superimposing virtual images in the real world. This not only helps the buyers in the decision-making process but is also convenient for sellers. The enhanced buying experience is beneficial for the entire retail industry segment. AR tags can be scanned using AR-enabled smartphones, which not only display the advertisement but also create an interactive environment for the users. By clicking the image or icon, the users can examine and purchase the products through their smartphones or tablets. Such advantages are the major reason for the heavy penetration of AR technology in the marketing and promotion segment.

APAC is expected to lead the augmented reality and virtual reality market and is projected to grow at the highest CAGR from 2020 to 2025

Being an emerging economy, APAC is witnessing major changes in the adoption of new technologies and advancements. Due to the presence of a number of display panel manufacturers in the region, APAC witnesses an increasing adoption of the latest technologies. The AR & VR market in APAC is expected to grow at a high rate in sectors such as healthcare, commercial, and consumer. The increasing number of players in the region is projected to boost the growth of the AR & VR market. The high growth in commercial and consumer markets is the major factor driving the growth of the AR & VR market in APAC. Growing consumer and commercial markets with increasing investments in countries such as Japan, India, and China are expected to boost the growth of the AR & VR market in APAC.

Key Market Players

Major vendors in the augmented reality and virtual reality market include Google (US), PTC (US), Apple (US), Sony (Japan), Samsung Electronics (South Korea), Microsoft (US), HTC (Taiwan), Oculus (US), Seiko Epson (Japan), Lenovo (China), Wikitude (Austria), Magic Leap (US), Blippar (UK), Upskill (US), MAXST (South Korea), EON Reality (US), Vuzix (US), CyberGlove Systems (US), Leap Motion (US), and Sixense Enterprises (US).

OVERVIEW OF AR/VR INDUSTRY IN INDIA

Augmented Reality (AR) and Virtual Reality (VR) have been around, in some form or the other, for over 5 decades now, but it's only in the last 7-10 years that these technologies have really come into their own. Whether it's the ability of VR to enable you to immerse yourself in a location you've never been to in 'real-life', or the ability of AR to enhance your real-world environment, these technologies are here to stay.

With the evolution in hardware devices, especially mobile devices, as well as the growth in technology and platforms, AR and VR have finally come of age, even in India. In fact, the Indian VR market grew by a whopping 104.24% from 2013 to 2017 and is expected to reach an incredible \$153 billion by 2020.

At the same time, it can be said that AR and VR are still in their nascent stages in India. For instance, only 170 AR/VR startups have emerged in the last few years, which is a small number given that close to 1300 startups were born in 2019 alone. Having said that, the industry is very much headed towards take-off and is expected to grow by 76% in the next 5 years.

Slowly but steadily, an ecosystem around AR/VR has started emerging in the country. The Indian government has initiated a number of programs to support the VR market. Private funds aren't very far behind. For instance, IDG Ventures India and Axilor ventures are both investing in AR/VR companies through the Frontier Tech Innovators Program.

Apart from the regular suspects like gaming and entertainment, this massive growth in AR/VR is coming from a relatively unexpected area. In the past few years, businesses have found AR/VR technology to be extremely useful in training and communication. This has spearheaded the application of AR/VR in a wide range of industries— automotive, manufacturing, medical, defence, aerospace, education, medicine, and retail. In fact, apart from the surge in demand for healthcare and the increase in defence spending, the demand for AR/VR products in training will be the biggest factor propelling the growth of the industry.

Whether it's enabling surgery simulation or developing immersive experiences for employee training, AR/VR has been at the forefront of this innovation. Tacnic collaborated with Ashirvad pipes to create an interactive session using VR to train workers — using a multilingual Oculus Go base VR 360 training module. This was done by capturing the entire space with animations that focused on the operations of important machines.

While engagement and training of employees is one big use case for AR/VR, engagement of the core audience is also becoming central to the application of AR/VR technology. With organizations across industries — from retail to real estate to healthcare to automobile— incorporating AR/VR to enhance both user and employee experience, this is just the beginning of what could soon emerge as a trillion-dollar industry.

Inability to compete effectively may lead to lower market share

We cannot assure you that this industry will continue to grow at this rate in the future. The ARVR industry in India has just begun few years back and is still in its early stages and may experience slower growth in the future due to various market saturations.

Competition

This ARVR industry is a niche segment, with a handful of established players to cater to such a large market. However, we still face competition in our business from other existing service providers. We provide our services in competitive markets and there are many players in the market providing same services like ours, if we are not able to compete with them through our marketing tactics, we might lose our market share in future. We compete with our competitors on a regional basis.

COVID-19 Pandemic

The current outbreak of COVID-19 pandemic and the preventative or protective actions that governments around the world have taken to counter the effects of the pandemic have resulted in a period of economic downturn and business disruption in India, as well as in countries where our customers and suppliers are located. The World Health Organization declared the outbreak of COVID-19 as a public health emergency of international concern on January 30, 2020 and a pandemic on March 11, 2020. The Government of India announced a nation-wide lockdown on March 24, 2020 and imposed several restrictions. In view of the nationwide lockdown announced by the Government of India to control the spread of COVID-19, our business operations were temporarily disrupted from March 22, 2020. Since then, we have resumed operations in a phased manner as per the Government of India and state government's directives. The future impact of COVID-19 or any other severe communicable disease on our business and results of operations depends on several factors including those discussed in the chapter "Risk Factors" beginning on Page No. 17. We are continue to closely monitor the economic conditions and the effect of COVID-19 and have outlined certain measures to combat the pandemic situation and to minimize the impact on our business.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the FEMA and various regulations made thereunder. The Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“**DIPP**”) makes policy announcements on FDI through press notes and press releases which are notified by the RBI as amendments to the FEMA. The DIPP also issues the Consolidated Foreign Direct Investment Policy (“**FDI Policy**”) from time to time. The regulatory framework pertaining to foreign investment, over a period of time, thus, consists of acts, regulations, master circulars, press notes, press releases, and clarifications among other amendments.

India’s current FDI Policy issued by the DIPP with effect from August 28, 2017, consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DIPP till August 27, 2017. All the press notes, press releases, clarifications on FDI issued by DIPP till August 27, 2017 stand rescinded as on August 28, 2017. In terms of the FDI Policy, Foreign investment is permitted (except in the prohibited sectors) in Indian companies either through the automatic route or the Government route, depending upon the sector in which foreign investment is sought to be made. In terms of the FDI Policy, the work of granting government approval for foreign investment under the FDI Policy and FEMA Regulations has now been entrusted to the concerned Administrative Ministries/Departments.

FDI for the items or activities that cannot be brought in under the automatic route may be brought in through the approval route. Foreign investment is allowed up to 100% under automatic route, subject to applicable laws/ regulations, security and other conditionalities in our Company. For further details kindly refer the chapter titled “*Key Industry Regulations and Policies*” beginning on Page no. 68 of this Draft Prospectus.

RBI has also issued Master Direction-Foreign Investment in India dated January 4, 2018 (“**Master Direction**”). In terms of the Master Direction, an Indian Company may issue fresh shares to persons resident outside India (who are eligible to make investments in India, for which eligibility criteria are as prescribed). Such fresh issue of shares shall be subject to inter-alia, the pricing guidelines prescribed under the Master Directions.

The RBI, in exercise of its power under the FEMA, has also notified Foreign Exchange Management (Non-debt Instruments) Rules, 2019 and Foreign Exchange Management (Mode of Payment and Reporting of Non-Debt Instruments) Regulations, 2019 to prohibit, restrict or regulate, transfer by or issue security to a person resident outside India. SEBI registered FPIs have been permitted to purchase shares of an Indian Company through the Offer, subject to total FPI investment being within the individual FPI/sub account investment limit of less than 10% of the total paid-up equity capital on a fully diluted basis of the Company subject to the total holdings of all FPIs/sub accounts including any other direct and indirect foreign investments in the Company shall not exceed 24% of the paid-up equity capital of the Company on a fully diluted basis. The aggregate limit of 24% in case of FPIs may be increased up to the sectoral cap/statutory ceiling, as applicable, by the Company concerned by passing of resolution by the Board of the Company to that effect and by passing of a special resolution to that effect by its Shareholders. With effect from April 1, 2020, the aggregate limit of 24% shall increase to the sectoral cap applicable to the Indian Company which in case of our Company is 100%. Further, the aggregate limit as provided above may be decreased by the Company to a lower threshold limit of 24% or 49% or 74% as deemed fit, with the approval of its Board of Directors through a resolution and also of its shareholders by means of a special resolution, before 31st March, 2020. In the event the Company decreases its aggregate limit to 24% or 49% or 74%, then it may increase such aggregate limit to 49% or 74% or the sectoral cap or statutory ceiling, respectively as deemed fit, with the approval of its Board of Directors through a resolution and of its shareholders by means of a special resolution. However, once the aggregate limit has been increased to a higher threshold, the Company cannot reduce the same to a lower threshold. Further, eligible NRIs and OCIs investing on repatriation basis are subject to individual investment limit of 5% of the total paid-up equity capital on a fully diluted basis subject to the aggregate paid-value of the shares purchased by all NRIs and OCIs put together on repatriation basis not exceeding 10% of the total paid-up equity capital on a fully diluted basis of the Company. The aggregate limit of 10% in case of NRIs and OCIs together may be raised to 24 % if a special resolution to that effect is passed by the Shareholders of the Company.

The transfer of shares between an Indian resident and a Non-resident does not require prior approval of RBI, subject to fulfilment of certain conditions as specified by DIPP / RBI, from time to time. Such conditions include (i) the activities of the investee Company are under the automatic route under the foreign direct investment (“**FDI**”) Policy and transfer does not attract the provisions of the SEBI (Substantial Acquisition of Shares and Takeovers) Regulations, 2011; (ii) the non-resident shareholding is within the sectoral limits under the FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/RBI.
