In addition, the risks set out in this Draft Prospectus are not exhaustive. Additional risks and uncertainties, whether known or unknown, may in the future have material adverse effect on our business, financial condition and results of operations, or which we currently deem immaterial, may arise or become material in the future. To obtain a complete understanding of our Company, prospective investors should read this section in conjunction with the sections entitled “Our Business” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” beginning on Page Nos. 68 and 104 of this Draft Prospectus respectively as well as other financial and statistical information contained in this Draft Prospectus. Unless otherwise stated in the relevant risk factors set forth below, we are not in a position to specify or quantify the financial or other risks mentioned herein.

This Draft Prospectus also contains forward-looking statements that involve risks and uncertainties. Our results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including events described below and elsewhere in this Draft Prospectus. Unless otherwise stated, the financial information used in this section is derived from and should be read in conjunction with restated financial information of our Company prepared in accordance with the Companies Act and restated in accordance with the SEBI (ICDR) Regulations, including the schedules, annexure and notes thereto.

Materiality

The Risk factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality.

1. Some events may have material impact quantitatively;
2. Some events may have material impact qualitatively instead of quantitatively.
3. Some events may not be material individually but may be found material collectively.
4. Some events may not be material at present but may be having material impact in future.

INTERNAL RISK FACTORS

1. Uncertainty in relation to continuing effect of the COVID-19 pandemic on our business and operations;

In late calendar 2019, COVID-19, commonly known as “novel coronavirus” was first reported in Wuhan, China. Since then, the virus has progressively spread globally to many countries. The World Health Organization declared the COVID-19 outbreak as a health emergency of international concern on January 30, 2020 and thereafter categorised the outbreak as a pandemic on March 11, 2020.

In order to contain the spread of COVID-19 virus, the Government of India initially announced a 21-days lockdown on March 24, 2020, which, after being subject to successive extensions, is being relaxed currently. During the duration of the lockdown, there were several restrictions in place including travel restrictions and directive to all citizens to not move out of their respective houses unless essential. However, during the initial stages of the lockdown our business operations were temporarily disrupted and we faced limited availability of drivers and customers.

Due to the rising number of infected cases of COVID-19 in the country, there is no certainty if additional restrictions will be put back in place or if another lockdown would be re-imposed to control the spread of the pandemic. We cannot assure you that we may not face any difficulty in our operations due to such restrictions and such prolonged instances of lockdown may adversely affect our business, financial condition and results of operations. Further, our ability to ensure the safety of our workforce and continuity of operations while conforming with measures implemented by the central and state governments in relation to the health and safety of our employees may result in increased costs. In the event a member or members of our senior management team contract COVID-19, it may potentially affect our operations. Further, in the event any of our employees contract COVID-19, we may be required to quarantine our employees and shut down a part of or the entire our offices, as necessary. Risks arising on account of COVID-19 can also threaten the safe operation of our facility, offices, loss

of life, injuries and impact the well-being of our employees. The ultimate impact will depend on a number of factors, many of which are outside our control. These factors include the duration, severity and scope of the pandemic, the impact of the pandemic on economic activity in India and globally, the eventual level of infections in India or in the regions in which we operate, and the impact of any actions taken by governmental bodies or health organizations (whether mandatory or advisory) to combat the spread of the virus. These risks could have an adverse effect on our business, results of operations, cash flows and financial condition. As on the date of this Draft Prospectus, while we have started our operations post lockdown, there is significant uncertainty on the impact of COVID-19 on global and Indian economy and we may not be able to accurately predict its near term or long term impact on our business.

2. ***We face significant competition in our business from Indian and international companies, and we may be unsuccessful in competing against current and future competitors, which could have an adverse impact on the pricing of our services as well as increase the costs associated with growing our customer base.***

The Taxi aggregator industry in India is highly competitive, and we expect that the competition in this industry will continue to increase. Our Industry is fragmented consisting of large established players and niche players. We compete with organized as well as unorganized sector on the basis of availability of consumers. Thus, our customers have the option of choosing any competitor providing similar services. Further, there are no entry barriers in this industry and any expansion in capacity of existing competitors would further intensify competition. If we are not able to compete effectively with existing or future competitors, our business and financial condition could be adversely affected.

Many of our competitors have good operating histories and significantly greater financial resources than we do. The management of some of these competitors may have more experience in implementing their business plan and strategy and may be more successful in increasing the number of customers, as well as increasing the revenues generated. We expect that our costs related to marketing and human resources will increase as our competitors undertake marketing campaigns to enhance their brand name and increase the volume of business conducted through their services. We expect many of our competitors to expend financial and other resources to improve their network and system infrastructure to compete more aggressively. Our inability to adequately address these and other competitive pressures will likely have a negative impact on the level of fees we can charge for our services as well as increase the costs associated with growing our customer base, which is likely to have a material adverse effect on our business, prospects, financial condition and results of operations.

3. ***We continue to explore the diversification of our business and the implementation of new models and services. These diversification and our other strategic initiatives may not be successful, which may adversely affect our business and results of operations.***

In order to achieve our goal, we are constantly evaluating the possibilities of expanding our business through acquisitions and/or starting new services. Our key strategic initiatives, which include our diversification plans, are:

- Maintain continued emphasis on innovation and customization of our services;
- Pursue enhancement and diversification of our advertising revenue streams;
- Further strengthen our brand recall;
- Capture a greater percentage of our Corporate Customers' recruitment budgets;
- Expand the scope and geographical presence of our business;

Although we believe that there are synergies between our current business and our expansion plans, we do not have any experience or expertise in these new areas. These new businesses and modes of delivery and the implementation of our strategic initiatives may pose significant challenges to our administrative, financial and operational resources, and additional risks, including some of which we are not aware of. The early stages and evolving nature of some of our businesses also make it difficult to predict competition and consumer demand therein. Our strategic initiatives require capital and other resources, as well as management attention, which could place a burden on our resources and abilities. In addition, we cannot assure you that we will be successful in implementing any or all of our key strategic initiatives. If we are unable to successfully implement some or all of our key strategic initiatives in an effective and timely manner, or at all, our ability to maintain and improve our leading market position may be negatively impacted, which may have an adverse effect on our business and prospects, competitiveness, market position, brand name, financial condition and results of operations. Please refer chapter titled "Our Business" beginning on Page No. 68 of this Draft Prospectus.

4. ***If we are unable to source business opportunities effectively, we may not achieve our financial objectives.***

Our ability to achieve our financial objectives will depend on our ability to identify, evaluate and accomplish business opportunities. To grow our business, we will need to hire, train, supervise and manage new employees and to implement systems capable of effectively accommodating our growth. However, we cannot assure you that any such employees will contribute to the success of our business or that we will implement such systems effectively. Our failure to source business opportunities effectively could have a material adverse effect on our business, financial condition and results of operations. It is also possible that the strategies used by us in the future may be different from those presently in use. No assurance can be given that our analyses of market and other data or the strategies we use or plans in future to use will be successful under various market conditions.

5. *Any slowdown in the cab and its ancillary industries can impact our business, results of operations, financial condition and cash flows.*

The services provided by our Company are to public at large. Thus, the performance of our Company is heavily dependent on the purchase power of people. For details of our Industry and services provided by us, please refer to the chapter titled “*Our Industry*” and “*Our Business*” beginning on Page Nos. 61 and 68 respectively of this Draft Prospectus. There exists a strong relationship between Taxi aggregator industry and purchase power of people. Any economic slowdown, both globally and in regions, in which we operate, may significantly affect our revenues and our growth prospects.

6. *We have a limited operating history and may be subject to risks inherent in early stage companies, which may make it difficult for you to evaluate our business and prospects.*

Although we were incorporated in 2012, we have a limited operating history upon which you can evaluate our business and prospects. You must consider our business and prospects in light of the risks and difficulties we face as an early stage company with a limited operating history and should not rely on our past results as an indication of our future performance. In particular, our management may have less experience in implementing our business plan and strategy compared to our more well-established competitors, including our strategy to increase our market share and build our brand name. In addition, we may face challenges in planning and forecasting accurately as a result of our limited historical data and inexperience in implementing and evaluating our business strategies. Our inability to successfully address these risks, difficulties and challenges as a result of our inexperience and limited operating history may have a negative impact on our ability to implement our strategic initiatives, which may have an adverse effect on our business, prospects, financial condition and results of operations.

7. *Brand recognition is important to the success of our business, and our inability to build and maintain our brand names will harm our business, financial condition and results of operation.*

Brand recognition is important to the success of our business. Establishing and maintaining our brand names in the recruitment and the Taxi aggregator industry or for people relying on services is critical to the success of the customer acquisition process of our business. Although we have expended and expect to continue to expend a significant amount of resources, financial and otherwise, on establishing and maintaining our brands, no assurance can be given that our brand names will be effective in attracting and growing user and client base for our businesses or that such efforts will be cost-effective, which may negatively affect our business, financial condition and results of operations.

8. *We may not be able to sustain effective implementation of our business and growth strategy.*

The success of our business will largely depend on our ability to effectively implement our business and growth strategy. In the past we have generally been successful in execution of our business but there can be no assurance that we will be able to execute our strategy on time and within the estimated budget in the future. If we are unable to implement our business and growth strategy, this may have an adverse effect on our business, financial condition and results of operations.

9. *If we are unable to adequately address the financial, operational, network and system infrastructure and human resources challenges of managing a rapidly growing business it may have a negative impact on our ability to implement our strategic initiatives.*

We have experienced significant growth over the past several years and expect our business to continue to grow if we are successful in implementing our key strategic initiatives. The growth of our business has required the significant attention of our management and expenditure of other resources and will likely continue to strain our finances, network and system infrastructure and personnel. In order to properly manage this planned growth, we must continuously improve our operational and financial systems, expand our network and system infrastructure, retain and hire qualified personnel, and enhance the effectiveness of our financial control and procedures. As a result, we may not achieve our desired growths in user base and customers, which could have a material adverse effect on our business, prospects, financial condition and results of operations. We depend on certain key management personnel and the loss of one or more of such personnel may adversely affect our business.

- 10. *Our success depends upon our Directors and the Key Managerial Personnel. Disassociation of our Directors or any failure to retain such key managerial personnel could have an adverse impact on our business, financial conditions and results of operations.***

Our success depends heavily on retaining the services of our directors and key management personnel. If any one or more of such personnel cease to work with us and we are unable to find suitable replacement personnel in a timely and cost efficient manner, our business may be disrupted and we may not be able to achieve our business objectives, including our ability to manage our rapid growth and successfully implement our strategic initiatives. In addition, we will need to hire more employees as we continue to implement our key strategy of building on our leading market position and expanding our business. Competition for qualified personnel in the areas in which we compete remains intense and the pool of qualified candidates is limited. Our inability to attract, hire and retain qualified staff on a cost efficient basis may have a material adverse effect on our business, prospects, financial condition, results of operations and ability to successfully implement our growth strategies.

- 11. *If third parties are able to circumvent our technological protection measures which are put in place for the protection of our data and on-line content protection or systematically copy our on-line content, our business would be adversely affected.***

Third parties have in the past collected, and third parties may in the future collect, listings and other information from our websites and start online portals displaying the same information. If we fail to prevent third parties from circumventing our technological protection measures or if we fail to successfully prosecute third parties from using or copying our website content, our business would be adversely affected.

- 12. *Our Promoters and Promoter Group will continue to retain majority control over the Company after the Issue, which will allow them to influence the outcome of matters submitted to shareholders for approval.***

Upon completion of the Issue, our Promoters and Promoter Group will own [●]% of the Post-Offer Equity Share capital of the Company. As a result, the Promoters and Promoter Group will have the ability to exercise significant influence over all matters requiring shareholders' approval, including the election of directors and approval of significant corporate transactions. The Promoters and Promoter Group will also have an effective veto power with respect to any shareholder action or approval requiring a majority vote. Such concentration of ownership may also have the effect of delaying, preventing or deterring a change in control. For further details of Promoters' shareholding, please refer chapter titled "Capital Structure" beginning on Page No. 44 of this Draft Prospectus.

- 13. *Our Promoter and Directors have interests in the Company which may result in a conflict of interest, which may have an adverse effect on our business.***

Our Promoters hold Equity Shares in our Company and are also part of key management of the Company and may be deemed to be interested to the extent of any remuneration, fees and dividend payable to them and other distributions in respect of the Equity Shares. Further, some of our Promoters have also given certain unsecured loans to the Company. For further details, please refer chapters titled "Our Management" and "Financial Statements – Related Party Transactions" beginning on Page Nos. 85 and 100 respectively of this Draft Prospectus.

- 14. *Our financing requirements and the deployment of the net proceeds of the Issue are based on management estimates and have not been independently appraised.***

Our financing requirements and the deployment of the net proceeds of the Issue are based on management estimates and have not been appraised by any bank or financial institution. In view of the highly competitive nature of the industry in which we operate, we may have to revise our management estimates from time to time and consequently our financing requirements and the expected deployment of the net proceeds of the Issue may also change.

- 15. *Our revenues and profits are difficult to predict and can vary significantly from year on year, which may impact our ability to pay dividend and which could cause the price of our Equity Shares to fluctuate.***

Our revenues are dependent on several factors such as, ability to attract fresh talent in the industry and general market conditions. For further details please refer chapter titled "Management's Discussion and Analysis of Financial Condition and Results of Operations" beginning on Page No. 104 of this Draft Prospectus. The combination of these factors may result in significant variations in revenues and profits and as a result of the same year on year results may not be comparable and should not be relied upon as indicative of future performance. Any significant shortfall in revenue may have an adverse effect on our business, operating results and financial condition.

16. *Our Company does not own the registered office and other premises from which we operate. Any dispute in relation to the lease of our premises would have a material adverse effect on our business and results of operations.*

Our Company operates from rented and leased premises. If any of the owners of these premises do not renew the agreements under which we occupy the premises or renew such agreements on terms and conditions that are unfavorable to our Company, it may suffer a disruption in our operations or have to pay increased rentals which could have a material adverse effect on our business, financial condition and results of operations. Any dispute in relation to the lease of our premises would have a material adverse effect on our business and results of operations. For more information, please refer chapter titled “*Our Business*” on Page No. 68 of this Draft Prospectus.

17. *For providing better service to our customers, we have to rely a lot on our IT systems.*

We rely extensively on our IT systems to provide connectivity across our business functions through our Software, hardware and network systems. Any failure in our IT systems or loss of connectivity or any loss of data arising from such failure can impact us adversely.

18. *Increases in fuel, food, labor, energy and other costs could adversely affect our operating results.*

Factors such as inflation, increased fuel prices and increased vehicle rental or maintenance costs may increase the costs incurred by Drivers and carriers when providing services through our platform. Many of the factors affecting Driver and carrier costs are beyond the control of these parties. In many cases, these increased costs may cause Drivers and carriers to spend less time providing services on our platform or to seek alternative sources of income. A decreased supply of Drivers or consumer on our platform would decrease our network liquidity, which could harm our business and operating results.

19. *We will require additional capital to support the growth of our business, and this capital might not be available on reasonable terms or at all.*

To continue to effectively compete, we will require additional funds to support the growth of our business and allow us to invest in new products, offerings, and markets. If we raise additional funds through further issuances of equity or convertible debt securities, our existing stockholders may suffer significant dilution, and any new equity securities we issue may have rights, preferences, and privileges superior to those of existing stockholders. Certain of our existing debt instruments contain, and any debt financing we secure in the future could contain, restrictive covenants relating to our ability to incur additional indebtedness and other financial and operational matters that make it more difficult for us to obtain additional capital with which to pursue business opportunities. For example, our existing debt instruments contain significant restrictions on our ability to incur additional secured indebtedness. We may not be able to obtain additional financing on favorable terms, if at all. If we are unable to obtain adequate financing or financing on terms satisfactory to us when required, our ability to continue to support our business growth and to respond to business challenges and competition may be significantly limited.

20. *Our Company may be affected by changes in technology that relate to our business.*

Our Company operates in the Taxi aggregator industry based on technology which is constantly changing and is significantly governed and affected by scientific breakthroughs, developments, innovation, government policy and laws pertaining to information technology as well as intellectual property. These factors can affect the demand, pricing and value of our services which have already been developed and which are in the course of being developed. Our continued growth will depend upon our ability to sustain cutting edge technology solutions, adapt to the updated / superior / modified technology which we may be required to use with time and to train our executives in order to utilize the technology and the talents of our human resource to their maximum potential. In the event that we fail to adapt and match pace with the growth in technology and adoption of the same through sufficient training of our executives, the same may adversely affect our business, prospects, the results of operations and financial condition.

21. *Our revenues and profits are dependent on several factors. Any adverse change in these factors or in combination of these factors may affect our business operations and the financial condition and consequently, our ability to pay dividends.*

Our revenues and profits are dependent on several factors such as retaining our key managerial personnel, our compliance with laws, managing costs and expenses, maintaining adequate inventory levels and general market conditions. Any adverse change in these factors or a combination of these factors may adversely affect our business operations and the financial condition. Further, our ability to pay dividends will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditures, lender’s approvals and other factors. Therefore, there can be no assurance that we shall have distributable funds or that we will declare dividends.

22. *Delays or defaults in payments from our clients could result into a constraint on our cash flows.*

The efficiency and growth of our business depends on timely payments received from our clients. In the event, our clients default or delay in making payments and clearing their dues, we may not have adequate resources to fund our business and implement our growth plans. This could have an adverse effect on the results of operations and our financial condition.

23. *Our Company's future success depends upon our ability to effectively implement our business and growth strategies, failing which, our growth and business may be adversely affected.*

Our Company's success will depend substantially on our ability to effectively implement our business and growth strategies. Our Company may not be able to execute our strategies in a timely manner or within our budget estimates or be able to meet the expectations of our consumers and other stakeholders. We believe that our Company's business and growth strategies will place significant demands on our senior management and other resources and will require us to develop and improve operational, financial and other internal controls. Any inability to manage our business and growth strategies may adversely affect our Company's business, prospects, the results of operations and financial condition.

24. *Any future acquisitions, joint ventures, partnerships, strategic alliances, tie-ups or investments could fail to achieve expected synergies and may disrupt our business and harm the results of operations and our financial condition.*

Our success will depend, in part, on our ability to expand our business in response to changing technologies, customer demands and competitive pressures. We have, in the past, explored and continue to explore opportunities on our own, through collaborations, tie-ups, strategic alliances, partnerships or joint venture across the country and regions of focus. In some circumstances, we may also decide to acquire, or invest in, complementary technologies instead of internal development. While we are currently evaluating opportunities and negotiating with several potential partners, we have not entered into any definitive agreements. The risks we face in connection with acquisitions may include integration of product and service offerings, co-ordination of R&D and marketing functions and the diversion of management's time and focus from operating our business to addressing challenges pertaining to acquisition and integration. Our failure to address these risks or other problems encountered in connection with our acquisitions and investments could result in our failure to realise the anticipated benefits of these acquisitions or investments, cause us to incur unanticipated liabilities, and harm our business generally.

25. *Our ability to pay dividend in the future will depend upon future earnings, financial conditions, cash flows, working capital and capital expenditure requirements.*

Our Company has not declared and paid dividend in the past. Our Company cannot give any assurance that dividend will be paid in future. The declaration and payment of any dividend in the future will be recommended by our Board of Directors, at their discretion, and will depend on a number of factors like our earnings, cash generated from operations, capital requirements and overall financial condition of our Company.

26. *We have entered into and may in the future enter into related party transactions.*

We have in the course of our business entered into, and will continue to enter into, transactions with related parties. Our Company has entered into several related party transactions with our related parties. For more information regarding our related party transactions, please refer chapter titled "*Financial Statements – Related Party Transactions*" beginning on Page No. 100 of this Draft Prospectus. We cannot assure you that we will receive similar terms in our related party transactions in the future. While we believe that all of our related party transactions are in compliance with applicable law, we cannot assure you that we could not have achieved more favourable terms had such transactions been entered into with unrelated parties. Further, the Companies Act, 2013 has brought into effect significant changes to the Indian company law framework including specific compliance requirements such as obtaining prior approval from audit committee, board of directors and shareholders for certain related party transactions. We cannot assure you that such transactions, individually or in the aggregate, will not have an adverse effect on our reputation, cash flows, business, results of operations and financial condition.

27. *Third party industry and statistical data in this Draft Prospectus may be incomplete, incorrect or unreliable.*

Neither Lead Manager nor we have independently verified the data obtained from the official and industry publications and other sources referred in this Draft Prospectus and therefore, while we believe them to be true, there can be no assurance that they are complete or reliable. Such data may also be produced on different bases from those used in the industry publications we have referenced. The discussion of matters relating to India, its economy and our industry in this Draft Prospectus are subject to the caveat that the statistical and other data upon which such discussions are based may be incomplete or unreliable. Industry sources and publications are also

prepared based on information as of specific dates and may no longer be current or reflect current trends. Industry sources and publications may also base their information on estimates, projections, forecasts and assumptions that may prove to be incorrect. While industry sources take due care and caution while preparing their reports, they do not guarantee the accuracy, adequacy or completeness of the data or report and do not take responsibility for any errors or omissions or for the results obtained from using their data or report. Accordingly, investors should not place undue reliance on, or base their investment decision on this information, refer chapter titled “Our Industry” beginning on Page No. 61 of this Draft Prospectus.

28. *Our efforts to protect our intellectual property and to avoid infringing on the intellectual property rights of others may not be successful, which could affect the reputation of our brands and business operations.*

Our Company has a registered trademark. For further details, please refer chapter titled “Government and other approvals” beginning on Page No. 115 of this Draft Prospectus. We believe that our trademark is key driver to sustain our branding. The infringement or the inability to protect our intellectual property rights could materially and adversely affect our business, financial condition, results of operations and prospects. We believe that our intellectual property rights give us a competitive advantage that protects the goodwill, promote our brand name recognition, enhance our competitiveness and otherwise support our business goals and objectives. The precautions we take to protect our intellectual property rights may be inadequate and unauthorized use or other misappropriation of our trademarks may cause a decline in our revenues and force us to incur costs related to enforcing our rights or protecting and promoting our brands. While we have taken and will continue to take protective actions with respect to our intellectual property, these actions may not be sufficient to prevent, and we may not be aware of all incidents of, unauthorized usage or imitation by others. Moreover, other parties may challenge the validity, scope and protection of our intellectual property. Any such unauthorized usage or imitation of our intellectual property, including the costs related to enforcing our rights, any legal action or time could adversely affect our business and results of operations.

29. *We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule.*

The proposed fund requirement for strategic investments and re-payment or pre-payment of debts as detailed in the chapter titled “Objects of the Issue” is to be funded from the proceeds of the Initial Public Offering. However, we have not identified any alternate source of funding to meet our funding requirements either through our owned funds, internal accruals or debt and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule, and we may have to obtain additional borrowings. We therefore, cannot assure that we would be able to execute our future plans/strategy within the given timeframe. For further details, please refer the chapter titled to the chapter titled “Objects of the Issue” beginning on Page No. 53 of this Draft Prospectus.

30. *There is no monitoring agency appointed by our Company and the deployment of funds are at the discretion of our Management and our Board of Directors, though it shall be monitored by our Audit Committee.*

As per SEBI (ICDR) Regulations, appointment of monitoring agency is required only for Issue size above Rs.100 crores. Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds in terms of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the stock exchange and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

31. *Delay in raising funds from the IPO could adversely impact the implementation schedule.*

The proposed fund requirement, as detailed in the section titled “Objects of the Issue” is to be funded from the proceeds of this IPO. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule. We, therefore, cannot assure that we would be able to execute our future plans/strategy within the estimated time frame.

32. *We have incurred significant losses since inception except last fiscal. We expect our operating expenses to increase significantly in the foreseeable future, and we may not achieve profitability.*

We have incurred significant losses since inception except FY 2019-20. We incurred operating losses of Rs. 106.88 lakhs and Rs. 43.64 lakhs in the financial year ended March 31 2019 and 2018, respectively. We will need to generate and sustain increased revenue levels and decrease proportionate expenses in future periods to achieve profitability in many of our largest markets and even if we do, we may not be able to maintain or increase profitability. We anticipate that we may incur losses in the near term as a result of expected substantial increases in our operating expenses, as we continue to invest in order to: increase the number of drivers and consumers. These

efforts may prove more expensive than we anticipate, and we may not succeed in increasing our revenue sufficiently to offset these expenses. Many of our efforts to generate revenue are new and unproven and any failure to adequately increase revenue or contain the related costs could prevent us from attaining or increasing profitability.

33. *Our workplace culture and forward-leaning approach created operational, compliance and cultural challenges and a failure to address these challenges would adversely impact our business, financial condition, operating results and prospects.*

Our workplace culture and forward-leaning approach created significant operational and cultural challenges that have in the past harmed and may in the future continue to harm our business results and financial condition. Our focus on aggressive growth and intense competition, and our prior failure to prioritize compliance has led to increased regulatory scrutiny. Recent changes in our company's cultural norms and composition of our leadership team together with our ongoing commitment to address and resolve our historical cultural and compliance problems and promote transparency and collaboration may not be successful and regulators may continue to perceive us negatively, which would adversely impact our business, financial condition, operating results and prospects.

34. *Our success depends on our ability to retain vendors, and our failure to do so could harm our ability to grow our business and execute our business strategies.*

We rely on the skills, expertise and experience of our vendors to provide quality services to our customers. Our performance and success substantially depends on the ability to attract and retain our vendors. Although some of the vendors have been with us for a long period of time, there can be no assurance that any vendor will not leave us in the future. Our success is also highly dependent on our continuous ability to identify, hire, train, retain and motivate highly qualified vendors. Further, if we fail to identify suitable replacements of our departed vendors, our business and operation could be adversely affected and our future growth and expansions may be inhibited.

35. *The nature of our business exposes us to liability claims and contract disputes and our indemnities may not adequately protect us. Any liability in excess of our reserves or indemnities could result in additional costs, which would reduce our profits.*

We highly depend on our vendors for provision of service. We may be subject to claims resulting from defects arising services provided by the vendors within the booking period. Failure to effectively cover ourselves against any of these reasons could expose us to substantial costs and potentially lead to material losses. In addition, if there is a customer dispute regarding our performance or workmanship, the customer may delay or withhold payment to us.

36. *Our business depends on retaining and attracting high-quality personnel, and continued attrition, future attrition, or unsuccessful succession planning could adversely affect our business.*

Our success depends in large part on our ability to attract and retain high-quality management, operations, engineering and other personnel who are in high demand are often subject to competing employment offers and are attractive recruiting targets for our competitors. Challenges related to our culture and workplace practices and negative publicity we experience have in the past led to significant attrition and made it more difficult to attract high-quality employees. Future challenges related to our culture and workplace practices or additional negative publicity could lead to further attrition and difficulty attracting high-quality employees. Future leadership transitions and management changes may cause uncertainty or a disruption to our business and may increase the likelihood of senior management or other employee turnover. The loss of qualified executives and employees or an inability to attract, retain and motivate high-quality executives and employees required for the planned expansion of our business, may harm our operating results and impair our ability to grow.

37. *Our Company has unsecured loans, which are repayable on demand. Any demand from lenders for repayment of such unsecured loans, may adversely affect our business operations and financial condition of our Company.*

As on March 31, 2020, our Company has availed of unsecured loans aggregating to Rs. 97.50 lacs from various parties which are repayable on demand. We do not have formal agreement with our lenders. For more information regarding the unsecured loans, please refer the chapter titled "Financial Statements" beginning on Page No. 100 of this Draft Prospectus. Any demand from the lenders for repayment of such unsecured loans may adversely affect the financial condition and result of operations of our Company.

38. *Our Company has lapsed/delayed in making the required filings under Companies Act, 2013. Our Company has not complied with certain statutory provisions under the Companies Act, 2013. Such non-compliances/lapses may attract penalties.*

Our Company is required to make filings under various rules and regulations as applicable under the Companies Act, 2013 and under the applicable provisions of the Companies Act, 1956. Some of which have not been done within the stipulated time period at some instances. Due to these delays in filings, our Company had on several occasions paid the requisite late fees. Details of such delayed filings in last 5 years are as follows:

Particulars	Financial Year	Due date for filing	Actual date of filing
PAS-3	2018-2019	10-12-2018	14-12-2018
MGT-7	2016-2017	25-12-2017	29-11-2017
AOC-4	2016-2017	25-12-2017	30-10-2017
MGT-7	2015-2016	25-12-2016	29-11-2016
AOC-4	2015-2016	25-12-2016	30-10-2016
MGT-7	2014-2015	06-05-2016	29-11-2015
AOC-4	2014-2015	06-05-2016	30-10-2015

The abovementioned filings have been already made with the concerned Registrar of Companies by paying requisite late fees. Although, we have not received any show-cause notice in respect of the above, such delay/non-compliance may in the future render us liable to statutory penalties and could have serious consequences on our operations. While this could be attributed to technical lapses and human errors, our Company has now appointed a whole time Company Secretary and is in the process of setting up a system to ensure that requisite filings are done appropriately with the requisite timeline.

In the past, there have been instances of incorrect data filings with the ROC, some of which have subsequently been corrected and filed along with the payment of requisite fees, as specified under the Companies Act, 1956 or 2013 as the case may be. However, it cannot be assured that even in future no such penalty will be levied. Therefore, if the authorities impose monetary penalties on us or take certain punitive actions against our Company or its Directors/Officers in relation to the same, our business, financial condition and results of operations could be adversely affected.

39. Unavailability of some documents and information pertaining to Litigations and Defaults involving our Promoter Group Entities may have adverse impact on our business and reputation.

Promoter Group Entities namely M/s Qubit Fintech LLP, M/s Purushottam Das Ganesh Narain and M/s Enticing India have not applied for TAN till date due to which the status of TDS is not unavailable to us. There can be no assurances that there will not be any action from concerned authority over such non-compliance or that there is no default with respect to TAN and TDS. Any such penalty for non-compliance levied or defaults which may be found later may lead to severe loss to financial position and operations of our Promoter Group Entities and may also damage reputation of our Company/Promoters.

40. If we fail to maintain an effective system of internal controls, we may not be able to successfully manage or accurately report our financial risks.

Effective internal controls are necessary for us to prepare reliable financial reports and effectively avoid fraud. Moreover, any internal controls that we may implement, or our level of compliance with such controls, may deteriorate over time, due to evolving business conditions. There can be no assurance that additional deficiencies in our internal controls will not arise in the future, or that we will be able to implement and continue to maintain adequate measures to rectify or mitigate any such deficiencies in our internal controls.

41. We could be harmed by drivers and employees misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.

Driver and employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our drivers and employees may also commit errors that could subject us to claims and proceedings for alleged negligence as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

RISK RELATING TO OBJECTS OF THE ISSUE

42. The requirement of funds in relation to the objects of the Issue has not been appraised includes utilization for general corporate purposes and is based on management estimates. We may have to revise our management estimates from time to time and which may affect our funding requirements.

We intend to use the net proceeds of the Issue for the purposes described in the section titled “*Objects of the Issue*” beginning on Page No. 53 of this Draft Prospectus. The objects of the Issue have not been appraised by any bank or financial institution. These estimates are based on current conditions and are subject to changes in external circumstances or costs, or in other financial condition, business or strategy, as discussed further below and are based on management estimates. Based on the competitive nature of the industry, we may have to revise our management estimates from time to time and consequently our funding requirements may also change.

43. *The deployment of funds to be raised from the present Issue of shares is at our discretion and no independent agency has been appointed to monitor its deployment.*

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the BSE Startups Platform of BSE Limited. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

47. *Any future issuance of Equity Shares may dilute your shareholding and sales of our Equity Shares by our Promoter or other major shareholders may adversely affect the trading price of the Equity Shares.*

Any future equity issuances by us, including in a primary offering, may lead to the dilution of investors' shareholdings in our Company. Any future equity issuances by us or sales of our Equity Shares by our Promoter or other major shareholders may adversely affect the trading price of the Equity Shares. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Equity Shares.

48. *There is no existing market for our Equity Shares and we cannot assure you that such a market will develop. The stock price may be volatile, and you may be unable to resell your shares at or above the Issue price or at all.*

Prior to this Offer, there has been no public market for our Equity Shares and an active trading market may not develop or be sustained upon the completion of this Offer. The Issue Price of the Equity Shares offered hereby may not be indicative of the market price of the Equity Shares after this Offer. The market price of our Equity Shares after this Issue will be subject to significant fluctuations in response to among other factors:

1. Any failure to comply with the financial and restrictive covenants under our financing arrangements;
2. Our ability to retain and hire key employees or maintain good relations with our workforce;
3. Impact of any reduction in revenue from our services or defects in our services;
4. Realization of Contingent Liabilities, if any;
5. Any disruption in Taxi aggregator industry or strikes by our employees/drivers may affect our service capability;

6. Increased competition in industries/sector in which we operate;
7. General economic and business conditions in India and in the markets in which we operate and in the local, regional and national economies;
8. Changes in laws and regulations relating to the Sectors in which we operate;
9. Political instability or changes in the Government in India or in the government of the states where we operate could cause us significant adverse effects;
10. Any adverse outcome in the legal proceedings in which we are/get involved;
11. Failure to obtain any applicable approvals, licenses, registrations and permits in a timely manner;
12. Occurrence of natural or man-made disasters could adversely affect our results of operations and financial condition and
13. Our inability to successfully diversify our service offerings may adversely affect our growth and negatively impact our profitability.

Even though a Market Maker has been appointed for our stock, since there has been no public market for our Company's Equity Shares, an active trading market on the Indian Stock Exchanges may not develop or be sustained after the Offer. The Issue price of the Equity Shares may bear no relationship to the market price of the Equity Shares after the Offer. The market price of the Equity Shares after the Issue may be subject to significant fluctuations in response to, among other factors, variations in our Company's operating results, market conditions specific to the packaging sector in India, developments relating to India and volatility in the Stock Exchanges and securities markets elsewhere in the world.

49. *The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the Issue Price and you may not be able to sell your Equity Shares at or above the Issue Price.*

The Issue Price of our Equity Shares has been determined by the management and the lead manager on numerous factors and may not be indicative of the market price of our Equity Shares after the Offer. For further information please refer the chapter titled "*Basis for Issue Price*" beginning on Page No. 57 of this Draft Prospectus. The market price of our Equity Shares could be subject to significant fluctuations after the Offer, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Amongst the factors that could affect our share price are:

- Quarterly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts;
- Speculation in the press or investment community;
- General market conditions; and
- Changes in economic, legal and regulatory factors (both domestic and international) unrelated to our performance such as global recession, imposition of trade / non-trade barriers and sanctions etc.

50. *You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under the Income-tax Act, 1961, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India except any gain realised on the sale of shares on a Stock Exchange held for more than 12 months will not be subject to capital gains tax in India if the Securities Transaction Tax ("STT") has been paid on the transaction. The STT will be levied on and collected by an Indian Stock Exchange on which equity shares are sold. Any gain realised on the sale of shares held for more than 12 months to an Indian resident, which are sold other than on a recognised Stock Exchange and as a result of which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realised on the sale of shares on a Stock Exchange held for a period of 12 months or less will be subject to short term capital gains tax. Further, any gain realised on the sale of listed equity shares held for a period of 12 months or less which are sold other than on a recognised stock exchange and on which no STT has been paid, will be subject to short term capital gains tax at a relatively higher rate as compared to the transaction where STT has been paid in India.

In Finance Bill 2017, Section 10(38) was amended to provide that exemption under this section for income arising on transfer of equity share acquired on or after 1st day of October, 2004 shall be available only if the acquisition of share is chargeable to STT under Chapter VII of the Finance (No 2) Act, 2004. In this case, this provision becomes effective, sale shares acquired on or after 1st day of October, 2004 on which STT was not charged will attract tax under provisions of Long Term Capital Gains.

As per Finance Bill 2018, exemption under section 10(38) for income arising from long term gains on transfer of equity share shall not be available on or after 1st day of April, 2018 if the long term capital gains exceeds ₹1,00,000/- p.a. Such income arising from long term gains on transfer of equity share on or after 1st day of April, 2018 in excess of ₹1,00,000/- p.a. shall be chargeable at the rate of 10%.

Capital gains arising from the sale of shares will be exempt from taxation in India in cases where an exemption is provided under a tax treaty between India and the country of which the seller is a resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdictions on gains arising from a sale of the shares subject to relief available under the applicable tax treaty or under the laws of their own jurisdiction.

EXTERNAL RISKS

Industry Risks

51. *Changes in government regulations or their implementation could disrupt our operations and adversely affect our business and results of operations.*

Our business & industry is regulated by different laws, rules and regulations framed by the Central and State Government. These regulations can be amended/ changed on a short notice at the discretion of the Government. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change adversely, we may incur increased costs or be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations.

52. *Malpractices by some players in the industry affect overall performance of emerging Companies.*

The industry in which our Company operates is subject to risk associated with unethical business practices such as unethical marketing, dishonest advertising, questionable pricing practices, inaccurate claims with regards to safety and quality of the service etc. Consumers' attitude toward the industry today is dominated by a sense of mistrust, paving a way for regulators for stricter entry barriers and introduction of code of conducts; making the entire industry environment regulated and controlled. Malpractices by some players in the industry affects the overall performance of the emerging Companies like our as the industry norms are applicable to all at parity. Any unethical business practices by any industry player or intermediary may impact our business and results of operations.

Other Risks

53. *Significant differences exist between Indian GAAP and other accounting principles, such as US GAAP and IFRS, which may be material to investors' assessments of Our Company's financial condition. Our failure to successfully adopt IFRS may have an adverse effect on the price of our Equity Shares. The proposed adoption of IFRS could result in our financial condition and results of operations appearing materially different than under Indian GAAP.*

Our financial statements, including the financial statements provided in this Draft Prospectus, are prepared in accordance with Indian GAAP. We have not attempted to quantify the impact of IFRS or U.S. GAAP on the financial data included in this Draft Prospectus, nor do we provide a reconciliation of our financial statements to those of U.S. GAAP or IFRS. U.S. GAAP and IFRS differ in significant respects from Indian GAAP. For details, refer chapter titled "*Certain Conventions, Presentation of Financial, Industry and Market Data*" beginning on Page No. 12 of this Draft Prospectus. Accordingly, the degree to which the Indian GAAP financial statements included in this Draft Prospectus will provide meaningful information is entirely dependent on the reader's level of familiarity with Indian accounting practices. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Draft Prospectus should accordingly be limited.

India has decided to adopt the "Convergence of its existing standards with IFRS" and not the "International Financial Reporting Standards" ("IFRS"), which was announced by the MCA, through the press note dated January 22, 2010. These "IFRS based / synchronized Accounting Standards" are referred to in India as IND (AS). Public companies in India, including our Company, may be required to prepare annual and interim financial statements under IND (AS). The MCA, through a press release dated February 25, 2011, announced that it will implement the converged accounting standards in a phased manner after various issues, including tax related issues, are resolved. Further, MCA Notification dated February 16, 2015, has provided an exemption to the Companies proposing to list their shares on the SME Exchange as per Chapter IX of the SEBI ICDR Regulations and hence the adoption of IND (AS) by a SME exchange listed Company is voluntary. Accordingly, we have made no attempt to quantify or identify the impact of the differences between Indian GAAP and IFRS or to quantify the

impact of the difference between Indian GAAP and IFRS as applied to its financial statements. There can be no assurance that the adoption of IND-AS will not affect our reported results of operations or financial condition. Any failure to successfully adopt IND-AS may have an adverse effect on the trading price of our Equity Shares. Currently, it is not possible to quantify whether our financial results will vary significantly due to the convergence to IND (AS), given that the accounting principles laid down in the IND (AS) are to be applied to transactions and balances carried in books of accounts as on the date of the applicability of the converged standards (i.e., IND (AS)) and for future periods.

Moreover, if we volunteer for transition to IND (AS) reporting, the same may be hampered by increasing competition and increased costs for the relatively small number of IND (AS)-experienced accounting personnel available as more Indian companies begin to prepare IND (AS) financial statements. Any of these factors relating to the use of converged Indian Accounting Standards may adversely affect our financial condition.

54. *Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business and financial performance.*

Our business and financial performance could be adversely affected by unfavourable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations applicable to us and our business. Please refer to chapter titled “*Key Industry Regulations and Policies*” beginning on Page No. 74 of this Draft Prospectus for details of the laws currently applicable to us. There can be no assurance that the Government of India may not implement new regulations and policies which will require us to obtain approvals and licenses from the Government of India and other regulatory bodies or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the applicability, interpretation and implementation of any amendment to, or change to governing laws, regulation or policy in the jurisdictions in which we operate may have a material adverse effect on our business, financial condition and results of operations. In addition, we may have to incur expenditures to comply with the requirements of any new regulations, which may also materially harm our results of operations. Any unfavourable changes to the laws and regulations applicable to us could also subject us to additional liabilities.

GST has been implemented with effect from July 1, 2017 and has replaced the indirect taxes on goods and services such as central excise duty, service tax, central sales tax, state VAT and surcharge currently being collected by the central and state governments. The GST is expected to increase tax incidence and administrative compliance. Given the limited availability of information in the public domain concerning the GST, we are unable to provide any assurance as to the tax regime following implementation of the GST. The implementation of this new structure may be affected by any disagreement between certain state Governments, which could create uncertainty. Any future amendments may affect our overall tax efficiency, and may result in significant additional taxes becoming payable.

Further, the general anti avoidance rules (“GAAR”) provisions have been made effective from assessment year 2018-19 onwards, i.e.; financial Year 2017-18 onwards and the same may get triggered once transactions are undertaken to avoid tax. The consequences of the GAAR provisions being applied to an arrangement could result in denial of tax benefit amongst other consequences.

In the absence of any precedents on the subject, the application of these provisions is uncertain. The application of various Indian tax laws, rules and regulations to our business, currently or in the future, is subject to interpretation by the applicable taxation authorities. If such tax laws, rules and regulations are amended, new adverse laws, rules or regulations are adopted or current laws are interpreted adversely to our interests, the results could increase our tax payments (prospectively or retrospectively) and/or subject us to penalties. Further, changes in capital gains tax or tax on capital market transactions or sale of shares could affect investor returns. As a result, any such changes or interpretations could have an adverse effect on our business and financial performance.

55. *Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.*

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

56. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

57. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

58. *The extent and reliability of Indian infrastructure could adversely affect our Company's results of operations and financial condition.*

India's physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy; disrupt the transportation of goods and supplies, and costs to doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition.

59. *Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

60. *Natural calamities could have a negative impact on the Indian economy and cause our Company's business to suffer.*

India has experienced natural calamities such as earthquakes, tsunami, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

61. *Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.*

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

The fund requirements mentioned above are based on the internal management estimates of our Company and have not been verified or appraised by any bank, financial institution or any other external agency. Consequently, the fund requirements of our Company are subject to revisions in the future at the discretion of the management. In the event of any shortfall of funds for the activities proposed to be financed out of the Net Proceeds as stated above, our Company may re-allocate the Net Proceeds to the activities where such shortfall has arisen, subject to compliance with applicable laws. Further, in case of a shortfall in the Net Proceeds or cost overruns, our management may explore a range of options including utilizing our internal accruals or seeking debt financing.

The fund requirements set out for the aforesaid objects of the Issue are proposed to be met entirely from the Net Proceeds, internal accruals and existing debt financing. Accordingly, we confirm that we are in compliance with the requirement to make firm arrangements of finance under Regulation 230(1)(e) of the SEBI ICDR Regulations through verifiable means towards at least 75% of the stated means of finance, excluding the amount to be raised through the issue and existing identifiable internal accruals.

For further details on the risks involved in our proposed fund utilization as well as executing our business strategies, please refer chapter titled “*Risk Factors*” beginning on Page No. 18 of this Draft Prospectus.

DETAILS OF THE FUND REQUIREMENTS

1) Strategic initiatives and investments

In pursuit of our strategy of inorganic growth through strategic initiatives and alliances, we continue to evaluate opportunities for continued backward integration and to identify targets or partners for forward integration, including by way of selectively evaluating targets or partners for strategic investments, so as to strengthen our range of services and our customer portfolio, and to benefit from economies of scale, leveraging multi-locational operational synergies, knowledge sharing and joining new product platforms in order to strengthen our position as a service provider. Our strategy is to become a part of new businesses with high growth potential, along with their existing customer relationships and product and process competencies, and to integrate and help them grow their businesses through enhanced quality and servicing parameters, integration of services and platforms coupled with our know-how and experience. In particular, we intend to explore opportunities in the cab and other sectors to complement our existing business and to leverage our existing assets to offer our clients a wider, flexible and more comprehensive range of services or products. We may also seek to expand our nationwide operations, based on demand and workforce in various geographies, to fuel our growth, going forward.

Pursuant to our Board's discussion on the Board meeting dated May 10, 2020, we intend to utilise Rs. 300.00 lakhs from the Net Proceeds towards such potential strategic initiatives. As on the date of this Draft Prospectus, we have not entered into any definitive agreements towards any such strategic initiatives. This amount is based on our management's current estimates of the amounts to be utilised towards this Object, considering our discussions and negotiations with potential targets and partners and other relevant considerations. The actual deployment of funds will depend on a number of factors, including the timing, nature, size and number of strategic initiatives undertaken, as well as general factors affecting our results of operation, financial condition and access to capital. These factors will also determine the form of investment for these potential strategic initiatives, i.e., whether they will involve equity, debt or any other instrument or combination thereof. The portion of the Net Proceeds allocated towards this Object may not be the total value or cost of any such strategic initiatives, but is expected to provide us with sufficient financial leverage to enter into binding agreements. In the event that there is a shortfall of funds required for such strategic initiatives, such shortfall shall be met out of the portion of the Net Proceeds allocated for general corporate purposes and/or through our internal accruals or bridge financing or any combination thereof.

2) Repayment and pre-payment of a portion of certain indebtedness availed by our company

Our Company proposes to utilize an estimated amount of upto 40.00 Lakh from the Net Proceeds of the Issue towards repayment/prepayment, in full or in part, of certain identified unsecured loans availed by our Company. Our Company, in order to meet its working capital requirement and expenses incurred in the ordinary course of business, was in need of finance. In the absence of the possibility of raising financial support from banks/financial institutions, based on business considerations, the Company raised, from time to time, unsecured loans from directors, members of the Promoter and Promoter Group and other body corporates including related parties. Given the nature of these borrowings and the terms of repayment, the aggregate outstanding amount of loans may vary from time to time and accordingly, our Company will repay/prepay the amount of principal outstanding as on the date of repayment/prepayment. In case of any surplus after utilization of the Issue Proceeds for the repayment/prepayment of loans, our Company may use such surplus towards General Corporate Purposes subject to total utilization not exceeding 25% of the gross proceeds of the Issue. In the event Net Proceeds are insufficient for the repayment/prepayment of loans, such payment shall be made from the internal accruals of our Company. This would lead to strengthening of the balance sheet of our Company which would serve the following dual purposes:

- As the prequalification criteria for most of the larger projects would require an increased net worth, our Company would strengthen its capability to be eligible to bid for such projects; and
- Our Company would be able to raise need based investments and borrowings.

We believe that such repayment shall help in reducing the outstanding indebtedness of the Company and, enable utilization of the internal accruals for further investment in business growth and expansions. Additionally, it is our bona fide belief that an increased net worth and improved debt-equity ratio of our Company will enable us to improve our credit ratings in future, which will further enable us to reduce our borrowings and increase the availability of non-funded limits from banks/financial institutions, which are essential to secure additional business. Therefore, the repayment of the specified borrowings will improve our ability to raise further resources in the future to fund potential business development opportunities.

The following table provides details of the relevant terms of certain unsecured loans/facilities that are currently availed by our Company, out of which we may repay/prepay, in full or in part, any or all of our respective loans/facilities, without any obligation to any particular lender:

(Rs. in lakhs)

Name of the Lender	Amount Outstanding as on filing of this Draft Propsectus
Mr. Ashok Kumar Agrawal	7.00
Mrs. Saroj Gupta	4.00
Mr. Sahil Agrawal	20.83
Rajcomp Info Services Limited	15.00

3) General corporate purposes

The Net Proceeds will be first utilized towards the Objects as mentioned above. The balance is proposed to be utilized for General corporate purposes, subject to such utilization not exceeding 25% of the Net Proceeds, in compliance with the SEBI ICDR Regulations. Our Company intends to deploy the balance Net Proceeds, if any, for general corporate purposes, subject to above mentioned limit, as may be approved by our management, including but not restricted to, the following:

- strategic initiatives, partnerships, joint ventures and acquisitions;
- brand building and strengthening of promotional & marketing activities; and
- on-going general corporate exigencies or any other purposes as approved by the Board subject to compliance with the necessary regulatory provisions.

The quantum of utilization of funds towards each of the above purposes will be determined by our Board of Directors based on the permissible amount actually available under the head "Utilisation of Net proceeds" and the business requirements of our Company, from time to time. We, in accordance with the policies of our Board, will have flexibility in utilizing the Net Proceeds for general corporate purposes, as mentioned above.

GLOBAL ECONOMIC OUTLOOK

The COVID-19 pandemic is inflicting high and rising human costs worldwide. Protecting lives and allowing health care systems to cope have required isolation, lockdowns, and widespread closures to slow the spread of the virus. The health crisis is therefore having a severe impact on economic activity. As a result of the pandemic, the global economy is projected to contract sharply by 3 percent in 2020, much worse than during the 2008–09 financial crisis. In a baseline scenario, which assumes that the pandemic fades in the second half of 2020 and containment efforts can be gradually unwound, the global economy is projected to grow by 5.8 percent in 2021 as economic activity normalizes, helped by policy support. There is extreme uncertainty around the global growth forecast. The economic fallout depends on factors that interact in ways that are hard to predict, including the pathway of the pandemic, the intensity and efficacy of containment efforts, the extent of supply disruptions, the repercussions of the dramatic tightening in global financial market conditions, shifts in spending patterns, behavioural changes (such as people avoiding shopping malls and public transportation), confidence effects, and volatile commodity prices. Many countries face a multi layered crisis comprising a health shock, domestic economic disruptions, plummeting external demand, capital flow reversals, and a collapse in commodity prices.

The COVID-19 pandemic differs markedly from past triggers of downturns. Infections reduce labour supply. Quarantines, regional lockdowns, and social distancing, curtail mobility, with particularly acute effects on sectors that rely on social interactions (such as travel, hospitality, entertainment, and tourism). Workplace closures disrupt supply chains and lower productivity. Layoffs, income declines, fear of contagion, and heightened uncertainty make people spend less, triggering further business closures and job losses. There is a de facto shutdown of a significant portion of the economy. Health care expenditures necessarily rise sharply above what had been expected. These domestic disruptions spill over to trading partners through trade and global value chain linkages, adding to the overall macroeconomic effects.

The economic impact is already visible in the countries most affected by the outbreak. For example, in China, industrial production, retail sales, and fixed asset investment dropped dramatically in January 2020 and February 2020. As more countries are forced to respond to the pandemic with stringent quarantine and containment efforts of the kind seen, for example, in China, Italy, and Spain, this will necessarily entail similar sharp economic activity slowdowns from closures of nonessential workplaces, travel restrictions, and behavioural changes. Initial jobless claims in the United States during the fourth week of March, for example, exceeded 6.6 million, compared with about 280,000 just two weeks before. And surveys of purchasing managers pointed to plummeting economic activity in March in the euro area, Japan, and the United States.

The fast deterioration of the global economic outlook as the epidemic has spread and the breakdown of the OPEC+ (Organization of the Petroleum Exporting Countries, including Russia and other non-OPEC oil exporters) agreement among oil suppliers have weighed heavily on commodity prices. From mid-January to end-March, base metal prices fell about 15 percent, natural gas prices declined by 38 percent, and crude oil prices dropped by about 65 percent (a fall of about \$40 a barrel). Futures markets indicate that oil prices will remain below \$45 a barrel through 2023, some 25 percent lower than the 2019 average price, reflecting persistently weak demand. These developments are expected to weigh heavily on oil exporters with undiversified revenues and exports, particularly on high-cost producers, and compound the shock from domestic infections, tighter global financial conditions, and weaker external demand.

(Source: World Economic Outlook Update, April 2020)

Many uncertainties lie ahead, but assuming our base case for new infections of the novel corona virus to peak in upcoming months, the bulk of the economic pain was concentrated in the first half of 2020, with the global economy contracting on an annualized basis by 0.6% and 2.1%, respectively, in the first and second quarters. If a recovery takes root in the third quarter, the global economy could rebound to 4.8% growth, year on year, in 2021.

Even before the coronavirus outbreak, the post-GFC global economy had been facing the triple challenge of demographics, debt and disinflation, which we last faced in the 1930s. From a big picture perspective, the coronavirus pandemic growth shock foregrounds these structural issues. On the positive side, we are already seeing an aggressive policy response across the world to shore up businesses and workers, maintain liquidity in markets and inject stimulus to create the necessary conditions for a more robust recovery from this shock to the global economic system.

INDIAN ECONOMIC OVERVIEW

India became the world's fifth largest economy last year, according to data from the IMF's October World Economic Outlook. When ranked by nominal GDP, the country leapfrogged France and the UK. The country's GDP growth has been among the highest in the world in the past decade – regularly achieving annual growth of between 6-7%.

(Source: <https://theprint.in/economy/india-is-now-the-worlds-5th-largest-economy-according-to-imf/369335/>)

India has emerged as the fastest growing major economy in the world and is expected to be one of the top three economic powers of the world over the next 10-15 years, backed by its strong democracy and partnerships.

India's nominal GDP growth rate is estimated at 12 per cent in 2019-20. The estimate for 2018-19 was 11.5 per cent. During Q1 of 2019-20, GDP (at constant 2011-12 prices) grew by 5 per cent. India has retained its position as the third largest startup base in the world with over 8,900-9,300 startups, with about 1,300 new start-ups being founded in 2019, according to a report by NASSCOM. India also witnessed the addition of 7 unicorns in 2019 till August, taking the total tally up to 24. India's labour force is expected to touch 160-170 million by 2020, based on rate of population growth, increased labour force participation, and higher education enrolment, among other factors, according to a study by ASSOCHAM and Thought Arbitrage Research Institute. India's foreign exchange reserves were US\$ 448.59 billion in the week up to November 22, 2019, according to data from the RBI.

India is expected to achieve the ambitious goal of doubling farm income by 2022. The agriculture sector in India is expected to generate better momentum in the next few years due to increased investments in agricultural infrastructure such as irrigation facilities, warehousing and cold storage. Furthermore, the growing use of genetically modified crops will likely improve the yield for Indian farmers. India is expected to be self-sufficient in pulses in the coming few years due to concerted efforts of scientists to get early-maturing varieties of pulses and the increase in minimum support price. The government of India targets to increase the average income of a farmer household at current prices to Rs. 219,724 (US\$ 3,420.21) by 2022-23 from Rs 96,703 (US\$ 1,505.27) in 2015-16. Going forward, the adoption of food safety and quality assurance mechanisms such as Total Quality Management (TQM) including ISO 9000, ISO 22000, Hazard Analysis and Critical Control Points (HACCP), Good Manufacturing Practices (GMP) and Good Hygienic Practices (GHP) by the food processing industry will offer several benefits.

Though, the Indian economy had been experiencing significant slowdown over the past few quarters, there was a strong hope of recovery in the last quarter of the current fiscal. However, the new coronavirus epidemic has made the recovery extremely difficult in the near to medium term. The outbreak has presented fresh challenges for the Indian economy now, causing severe disruptive impact on both demand and supply side elements which has the potential to derail India's growth story. Consumption is getting impacted due to job losses and decline in income levels of people particularly the daily wage earners due to slowing activity in several sectors including retail, construction, entertainment, etc. With widespread fear and panic now increasing among people, overall confidence level of consumers has dropped significantly, leading to postponement of their purchasing decisions. Greater uncertainty about the future course and repercussion of Covid-19 has also made the financial market extremely volatile, leading to huge crashes and wealth erosion, which in turn is impacting consumption levels. On the supply side, shutdown of factories and the resulting delay in supply of goods from China has affected many Indian manufacturing sectors which source their intermediate and final product requirements from China. Some sectors like automobiles, pharmaceuticals, electronics, chemical products etc. are facing an imminent raw material and component shortage. This is hampering

business sentiment and affecting investment and production schedules of companies. Besides having a negative impact on imports of important raw materials, the slowdown in manufacturing activity in China and other markets of Asia, Europe and the US is impacting India's exports to these countries as well.

Given the challenges that the businesses and people are facing currently, the Indian economy is most likely to experience a lower growth during the last quarter of the current fiscal. In case the spread of corona virus continues, growth may remain subdued in the first quarter of FY 20-21 as well. Most multilateral agencies and credit rating agencies have therefore revised their 2020 and 2021 growth projections for India keeping in view the negative impact of coronavirus-induced travel restrictions, supply chain disruptions, subdued consumption and investment levels on the growth of both global and the Indian economy.

OVERVIEW OF TAXI INDUSTRY

Taxi transportation industry in India is quite unique and diverse when compared to the other countries. It is the growing industry attracting many start-ups to join with its huge potential. Broadly this business historically can be divided into pre-aggregator era and post-aggregator era. The Cab Aggregator mainly addressed all the major open problems say like the availability of the cabs at right time, behavior of the drivers, security with the tracking the vehicles using the technology. Cab Aggregator basically do not own the vehicles, the only thing they do is the coordination between the customers and the drivers using the technology like GPS / GPRS (Global Positioning System / General Packet radio service). Taxi Industry is basically divided into organized and Un-organized business. Till 2007 almost all the industry is not so formal, as most of the business is being handled by Individual Car owner.

The taxi service industry has been expanding and has seen a tremendous growth in the past 6-7 years. Only in the past 4 years, 2400 crore rupees of venture capital has been pumped into various companies of this industry. However, in India, the organized sector of the taxi industry constitutes only a minor part of 4 or 5% in terms of number of vehicles. The rest of the cabs are operated by private fleets of 15 to 20 cars and are individually present only in a few cities. The following graph shows the market size of different kind of taxi services in India: Keeping these statistics in mind, it can be concluded that aggregators like Ola and Uber are only a small section of the market has been taken over, leaving them with a large scope and massive opportunity in front of them for expansion. Even though, aggregators like Ola and Uber came into the market much after the original radio taxis like Mega cabs and Meru, the aggregators have already taken over in terms of fleet size, number of cities covered, prices, availability, convenience, offers etc.

According to statistics, the market volume of taxi services in India is more than 2 million rides per day. The market is expected to grow at a CAGR of 13.7 and reach around \$14 billion by 2022. The changing lifestyles of the urban middle class and an increase in the disposable income will drive the market.

It is noteworthy that the organized taxi market is still in its nascent stages and the aggregator companies like Ola and Uber comprise a mere 4-5% of the market in terms of a number of vehicles. The unorganized taxi services across the country still account for around 90% of the market and radio cabs and affiliates like Meru and Savaari make up the remainder.

India - A country known for lowest car ownership across all emerging countries found a new answer to its mobility needs in 2013, when Taxi for sure launched its app based on-demand taxi programme. The very same year, when Uber entered India and launched its services in Bangalore. Till 2014, there were very few takers for on-demand taxis but a lot changed in 2015 when Ola rolled out a much improved and accurate app with broader coverage. Till 2014 and even early 2015, Ola's 20% bookings were made through laptops and desktops. India's weak internet infrastructure and comparatively lower smart phone penetration was prime reason behind this. The smart phone penetration was 6% in India in 2013 and, reached 28% by May 2019. Ola (formerly Olacabs) has acquired TaxiForSure for \$200 mn in a cash and equity deal. In metro cities, the penetration reached 60%-65% by Q1-2015 and that is when and where the revolution of on-demand taxis began in India.

Surging demand for taxi services in India can be attributed to changing lifestyles of travellers and increasing disposable income of consumers, especially in Tier-I and Tier-II cities. The market is witnessing increasing traction as taxis offer hassle free travel experience to customers in addition to various other tangible and intangible offerings such as booking convenience through mobile applications, air conditioning, educated and skilled drivers, multiple payment options, 24x7 customer support, electronic fare meters, GPS enabled vehicles, etc. The radio taxi market is growing at very rapid pace and has a huge headroom for growth. Also, there has been huge investor activity in the segment, which has helped the service providers to upgrade their technology as well as their footprint across the country.

MARKET SEGMENTATION

INDIAN TAXI MARKET SIZE AND FORECAST

The Indian taxi market size was estimated at 1.9 million taxis estimated to generate \$10-\$11 Billion revenue in 2019. The unorganized small fleet operators account for 91% market share in terms of registered taxi fleet. The arrival of on-demand taxi players has helped organize this market to a great extent.

The target user-base of on-demand taxis in India is typically urban with an income of >25,000 INR (\$350)/ month. Although, with growth in share/pool rides, that income threshold has further reduced. In India, both Ola and Uber, earn 78% of their revenue from budget segment rides. Apart from Meru cabs, the cab aggregator have an asset-light business model and don't own any vehicles of their own. They simply charge a 20-25% commission on every ride just for the match they provide between a rider and a driver.

In 2016, Ola and Uber accounted for 400 Million and 260 Million rides each. By 2017, the cumulative figure went up by 12%. In May'19, Ola and Uber had 6.9 Million and 6.3 Million Monthly active users respectively. The car manufacturers in India are capitalizing on the growing popularity of on-demand taxis. The passenger car market leader with 51% market share in India, Maruti launched the second generation Swift Dzire Tour in Oct'17. About 70%+ Toyota Etios is sold to commercial segment. Hyundai now sells cars to taxi segment under Prime brand and post recent (March 2019) investment in Ola is planning to manufacture EVs for ride hailing firms by 2021.

The global taxi market is expected to register a CAGR of 22%, during the forecast period, 2019-2024. Reduced taxi fare and ease of booking through the mobile app are the major factors that driven the online booking type taxi service to capture a major share of more than 40% of the global taxi market in 2017. The online booking segment has captured a mammoth share of 40% of the taxi market in the year 2017. There are many reasons which has driven online booking segment towards this. Some of these reasons are ease of booking, reduced taxi fare, and many more.

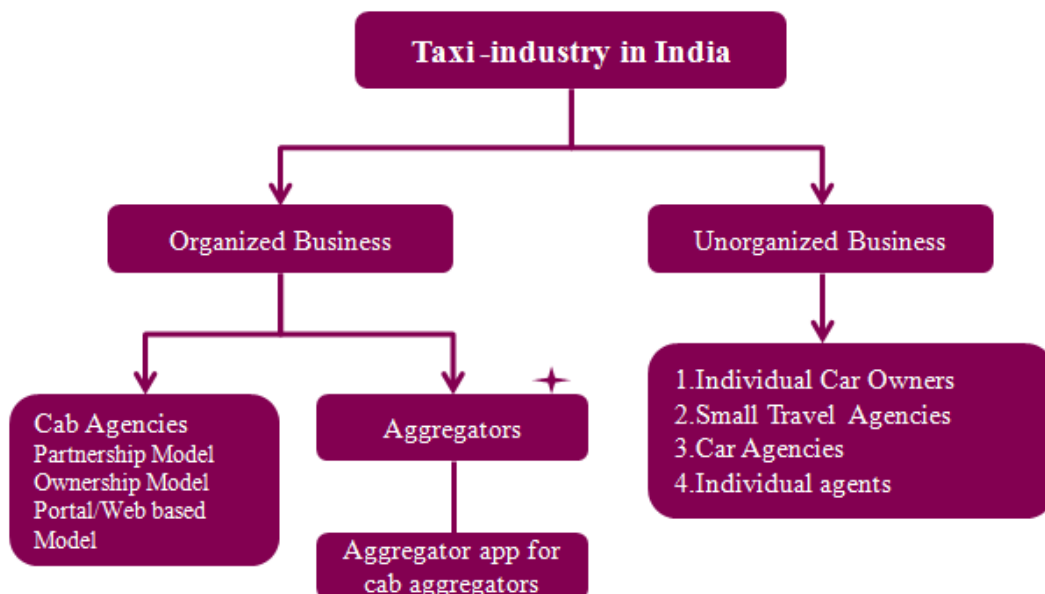

With the increase in smart phone penetration in the countries like Vietnam, China, India, etc, the people have begun preferring ride-sharing services over the traditional taxi services. This trend has encouraged many companies to expand their business on the mobile application platforms. Not only that, it has also helped them to retain their respective market share. Asia-pacific is the region that has taken a huge chunk of the market share which accounts for more than 70% of the global bike/motorcycle taxi. Relatively lower taxi fares and increased traffic congestion as compared to that of other modes of transportation are the driving factors for the growth of bike/motorcycle taxi service in the Asia-Pacific market.

OVERVIEW OF TAXI AGGREGATION INDUSTRY

Taxi transportation industry in India is quite unique and diverse when compared to the other countries. It is the growing industry attracting many start-ups to join with its huge potential. Broadly this business historically can be divided into pre-aggregator era and post-aggregator era. The Cab Aggregators mainly addressed all the major open problems say like the availability of the cabs at right time, behavior of the drivers, security with the tracking the vehicles using the technology.

Cab Aggregators basically do not own the vehicles, the only thing they do is the coordination between the customers and the drivers using the technology like GPS / GPRS (Global Positioning System / General Packet radio service). Taxi Industry is basically divided into organized and Un-organized business. Till 2007 almost all the industry is not so formal, as most of the business is being handled by Individual Car owners.

Online Cab Aggregator Market Trends

The taxi market in India is estimated at \$9 billion; the organized sector constitutes around 6% revenue share of the overall market

The taxi market in India is highly fragmented and unorganized. The unorganized market is constituted of individual car owners and agencies which operate in one or few cities. Owned vehicles segment includes pure-play car rental companies (e.g. Zoom car) and players like Carz on rent and Meru. Aggregators are a new phenomenon driven by rise of start-ups like Ola, Uber. Affiliators are associated with multiple car rental agencies and offer various packages/deals.

Technology has become a key differentiator; players are looking to increase app usage by making their apps more transparent, convenient and flexible

Planned technology initiatives of taxi companies: Increasing number of App languages to provide better flexibility to customers/drivers of tier 2 cities and to ultimately increase the app usage. Showing the route being taken on a real time basis, reducing app lag times and increasing GPS precision, for an enhanced customer experience overall. Incorporating traffic status on routes to ensure that the driver selected for a customer is nearest to the customer on basis of least time to reach the customer. Driver management and suspension through the usage of technology platforms.

Aggregators have started undertaking innovative initiatives like women-only cabs and panic buttons to highlight their focus on customer safety

Ola cabs.com, launched a 'pink cabs' service, driven by women drivers and which will only allow female passengers to board them. The premium service will help Ola compete in a niche segment of the taxi market, dominated by regional players like She Taxi etc.

The organized taxi market in India is a relatively nascent one; multiple aggregators have launched their services recently.

Growth of the organized taxi market in India

Key Growth Drivers	Description
Price competitive alternative to regular public transport	<ul style="list-style-type: none"> ➤ Lack of comfortable public transport options in most Indian cities has led to a growing demand for affordable cab services ➤ Aggregators especially have positioned their product as a price-competitive alternative to autos and regular cabs
High level of customer convenience	<ul style="list-style-type: none"> ➤ App based booking has led to growing customer ease of use ➤ In a very short span of time, companies like Meru, Ola & Uber are receiving 80-90% of booking requests through apps ➤ High punctuality and safety are additional customer benefits
Popularity of aggregation leading to faster scale ups	<ul style="list-style-type: none"> ➤ Even owned taxi companies like Meru are opting for aggregating taxis in order to scale up their fleet rapidly ➤ Aggregator based models will allow expansion to new cities rapidly
Global investor interest	<ul style="list-style-type: none"> ➤ The industry as a whole has seen investments of \$150+million in multiple deals since 2006 and the investor interest shows no signs of abating ➤ Availability of investor funds is allowing players to focus on aggressive expansion, customer acquisition and strengthening of backend technology systems

Evolution of The Organized Taxi Sector in India

Mega Cabs and Fast Track Taxi started out in 2001 itself with small fleets. The market, however, started seeing traction only from 2006 onwards when the likes of Meru Cabs, Easy Cabs and Savaari came up. There are now several competitors eyeing for a piece of the pie.

Phase 1 – Fully Owned Fleets

In the initial phase of the market companies owned the complete fleet with the drivers as salaried employees. This was characterized by high capital costs to the company – car loan EMI's, high maintenance costs. While this model

facilitated rapid expansion, it also came at a huge cost. Caused high stress levels in drivers and there were driver strikes that affected the service.

Bookings were mainly done via telephone calls and cash was the dominant model.

Phase 2 – Fleet Aggregation Model

Companies like Taxi For Sure and Ola started this model where small fleet owners or single car owners can put the company brand on the car, and get registered with them. Cars are free to take up non-company rides, but for every company-initiated ride, they pay the company a fixed percentage as commission. This model had low capital expenditure and lower maintenance costs.

Booking was done via telephone calls as well as through their websites. While cash was still the dominant payment form, in-cab POS terminal for credit / debit cards started being used as well in this phase.

Phase 3 – The Hybrid Model (Current Phase)

In this model part of the fleet is owned by the company and part of the fleet is from an aggregation model, hence providing the best of both worlds – better control on cab availability and service quality while keeping costs low.

Booking are done via telephone, website as well as mobile apps and the payments via cash, card and wallets.

GST is levied on all transactions such as sale, transfer, purchase, barter, lease, or import of goods and/or services. India has adopted a dual GST model, meaning that taxation is administered by both the Union and State Governments. Transactions made within a single state is levied with Central GST (CGST) by the Central Government and State GST (SGST) by the government of that state. For inter-state transactions and imported goods or services, an Integrated GST (IGST) is levied by the Central Government. GST is a consumption-based tax; therefore, taxes are paid to the state where the goods or services are consumed and not the state in which they were produced.

- b) Net worth = Equity Share Capital + Reserves & Surplus
- c) Net Asset Value is being calculated by using the formula: (Restated Net Worth / Actual Number of Equity Shares at end of the year / period)
- d) Return on Net worth (%) is being calculated by using the formula: (Restated Profit After Tax / Restated Networth) *100
- e) Earnings before Interest, Tax & Depreciation and Amortization is being calculated by adding interest, tax expense, depreciation and amortization expense to Restated Profit after tax as per Profit & Loss Statement.

FACTORS AFFECTING OUR RESULT OF OPERATIONS

Except as otherwise stated in the Draft Prospectus and the Risk Factors given in the Draft Prospectus, the following important factors could cause actual results to differ materially from the expectations include, among others:

Inability to compete effectively may lead to lower market share

We cannot assure you that this industry will continue to grow at this rate in the future. The Taxi aggregator industry in India has just begun few years back and is still in its early stages and may experience slower growth in the future due to various market saturations.

Competition

This taxi aggregator industry is a niche segment, with a handful of established players to cater to such a large market. However, we still face competition in our business from other existing service providers. We provide our services in competitive markets and there are many players in the market providing same services like ours, if we are not able to compete with them through our marketing tactics, we might lose our market share in future. We compete with our competitors on a regional basis.

Acceptance of our recently launched services by consumers

The taxi aggregator industry in India is subject to changes in consumer preferences, perceptions and spending habits. Our performance depends on factors which may affect the level and patterns of consumer spending in India. Such factors include consumer preferences, consumer confidence, consumer incomes, consumer perceptions of the safety and quality of our services, and consumer interest in transportation alternatives.

COVID-19 Pandemic

The current outbreak of COVID-19 pandemic and the preventative or protective actions that governments around the world have taken to counter the effects of the pandemic have resulted in a period of economic downturn and business disruption in India, as well as in countries where our customers and suppliers are located. The World Health Organization declared the outbreak of COVID-19 as a public health emergency of international concern on January 30, 2020 and a pandemic on March 11, 2020. The Government of India announced a nation-wide lockdown on March 24, 2020 and imposed several restrictions. In view of the nationwide lockdown announced by the Government of India to control the spread of COVID-19, our business operations were temporarily disrupted from March 24, 2020. Since then, we have resumed operations in a phased manner as per the Government of India and state government's directives. The future impact of COVID-19 or any other severe communicable disease on our business and results of operations depends on several factors including those discussed in the chapter "*Risk Factors*" beginning on Page No. 18. We are continue to closely monitor the economic conditions and the effect of COVID-19 and have outlined certain measures to combat the pandemic situation and to minimize the impact on our business.

Significant Developments after March 31, 2020 that may affect our Future Results of Operations

The Directors confirm that there have been no other events or circumstances since the date of the last financial statements as disclosed in the Draft Prospectus which materially or adversely affect or is likely to affect the profitability of our Company or the value of our assets, or our ability to pay liabilities within next twelve months except as mentioned below:

The Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“**DIPP**”) makes policy announcements on FDI through press notes and press releases which are notified by the RBI as amendments to the FEMA. The DIPP also issues the Consolidated Foreign Direct Investment Policy (“**FDI Policy**”) from time to time. The regulatory framework pertaining to foreign investment, over a period of time, thus, consists of acts, regulations, master circulars, press notes, press releases, and clarifications among other amendments.

India’s current FDI Policy issued by the DIPP with effect from August 28, 2017, consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DIPP till August 27, 2017. All the press notes, press releases, clarifications on FDI issued by DIPP till August 27, 2017 stand rescinded as on August 28, 2017. In terms of the FDI Policy, Foreign investment is permitted (except in the prohibited sectors) in Indian companies either through the automatic route or the Government route, depending upon the sector in which foreign investment is sought to be made. In terms of the FDI Policy, the work of granting government approval for foreign investment under the FDI Policy and FEMA Regulations has now been entrusted to the concerned Administrative Ministries/Departments.

FDI for the items or activities that cannot be brought in under the automatic route may be brought in through the approval route. Foreign investment is allowed up to 100% under automatic route, subject to applicable laws/regulations, security and other conditionalities in our Company. (ii) To every such separate meeting, the provisions of these regulations relating to general meetings shall *mutatis mutandis* apply, but so that the necessary quorum shall be at least two persons holding at least one-third of the issued shares of the class in question.

7. The rights conferred upon the holders of the shares of any class issued with preferred or other rights shall not, unless otherwise expressly provided by the terms of issue of the shares of that class, be deemed to be varied by the creation or issue of further shares ranking paripassu therewith.

Provided that the Board of directors may at any time declare any share to be wholly or in part exempt from the provisions of this clause.

(ii) The company's lien, if any, on a share shall extend to all dividends payable and bonuses declared from time to time in respect of such shares.

10. The company may sell, in such manner as the Board thinks fit, any shares on which the company has a lien:

11. (i) To give effect to any such sale, the Board may authorize some person to transfer the shares sold to the purchaser thereof.

(ii) The purchaser shall be registered as the holder of the shares comprised in any such transfer.

12. (i) The proceeds of the sale shall be received by the company and applied in payment of such part of the amount in respect of which the lien exists as is presently payable.

(ii) The residue, if any, shall, subject to a like lien for sums not presently payable as existed upon the shares before the sale, be paid to the person entitled to the shares at the date of the sale.

Calls on shares

13. (i) The Board may, from time to time, make calls upon the members in respect of any monies unpaid on their shares (whether on account of the nominal value of the shares or by way of premium) and not by the conditions of allotment thereof made payable at fixed times:

Provided that no call shall exceed one-fourth of the nominal value of the share or be payable at less than one month from the date fixed for the payment of the last preceding call.

(ii) Each member shall, subject to receiving at least fourteen days' notice specifying the time or times and place of payment, pay to the company, at the time or times and place so specified, the amount called on his shares.

(iii) A call may be revoked or postponed at the discretion of the Board.

14. A call shall be deemed to have been made at the time when the resolution of the Board authorizing the call was passed and may be required to be paid by installments.

15. The joint holders of a share shall be jointly and severally liable to pay all calls in respect thereof.

16. (i) If a sum called in respect of a share is not paid before or on the day appointed for payment thereof, the person from whom the sum is due shall pay interest thereon from the day appointed for payment thereof to the time of actual payment at ten per cent. per annum or at such lower rate, if any, as the Board may determine.

(ii) The Board shall be at liberty to waive payment of any such interest wholly or in part.

17. (i) Any sum which by the terms of issue of a share becomes payable on allotment

or at any fixed date, whether on account of the nominal value of the share or by way of premium, shall, for the purposes of these regulations, be deemed to be a call duly made and payable on the date on which by the terms of issue such sum becomes payable.

(ii) In case of non-payment of such sum, all the relevant provisions of these regulations as to payment of interest and expenses, forfeiture or otherwise shall apply as if such sum had become payable by virtue of a call duly made and notified.

18. The Board—

(a) may, if it thinks fit, receive from any member willing to advance the same, all or any part of the monies uncalled and unpaid upon any shares held by him; and

(b) upon all or any of the monies so advanced, may (until the same would, but for such advance, become presently payable) pay interest at such rate not exceeding, unless the company in general meeting shall otherwise direct, twelve per cent. per annum, as may be agreed upon between the Board and the member paying the sum in advance.

Transfer of shares

19. (i) The instrument of transfer of any share in the company shall be executed by or on behalf of both the transferor and transferee.

(ii) The transferor shall be deemed to remain a holder of the share until the name of the transferee is entered in the register of members in respect thereof.

(a) the transfer of a share, not being a fully paid share, to a person of whom they do not approve; or

(b) any transfer of shares on which the company has a lien.

(a) the instrument of transfer is in the form as prescribed in rules made under sub-section (1) of section 56;

(b) the instrument of transfer is accompanied by the certificate of the shares to which it relates, and such other evidence as the Board may reasonably require to show the right of the transferor to make the transfer; and

(c) the instrument of transfer is in respect of only one class of shares.

22. On giving not less than seven days' previous notice in accordance with section 91 and rules made there under, the registration of transfers may be suspended at such times and for such periods as the Board may from time to time determine:

Provided that such registration shall not be suspended for more than thirty days at any one time or for more than forty-five days in the aggregate in any year.

(ii) Nothing in clause (i) shall release the estate of a deceased joint holder from any liability in respect of any share which had been jointly held by him with other persons.

24. (i) Any person becoming entitled to a share in consequence of the death or insolvency of a member may, upon such evidence being produced as may from time to time properly be required by the Board and subject as hereinafter provided, elect, either—

(a) to be registered himself as holder of the share; or

(b) to make such transfer of the share as the deceased or insolvent member could have made.

(ii) The Board shall, in either case, have the same right to decline or suspend registration as it would have had, if the deceased or insolvent member had transferred the share before his death or insolvency.

25. (i) If the person so becoming entitled shall elect to be registered as holder of the share himself, he shall deliver or send to the company a notice in writing signed by him stating that he so elects.

(ii) If the person aforesaid shall elect to transfer the share, he shall testify his election by executing a transfer of the share.

(iii) All the limitations, restrictions and provisions of these regulations relating to the right to transfer and the registration of transfers of shares shall be applicable to any such notice or transfer as aforesaid as if the death or insolvency of the member had not occurred and the notice or transfer were a transfer signed by that member.

26. A person becoming entitled to a share by reason of the death or insolvency of the holder shall be entitled to the same dividends and other advantages to which he would be entitled if he were the registered holder of the share, except that he shall not, before being registered as a member in respect of the share, be entitled in respect of it to exercise any right conferred by membership in relation to meetings of the company:

Provided that the Board may, at any time, give notice requiring any such person to elect either to be registered himself or to transfer the share, and if the notice is not complied with within ninety days, the Board may thereafter withhold payment of all dividends, bonuses or other monies payable in respect of the share, until the requirements of the notice have been complied with.

Forfeiture of shares

27. If a member fails to pay any call, or installment of a call, on the day appointed for payment thereof, the Board may, at any time thereafter during such time as any part of the call or installment remains unpaid, serve a notice on him requiring payment of so much of the call or installment as is unpaid, together with any interest which may have accrued.

28. The notice aforesaid shall—

(a) name a further day (not being earlier than the expiry of fourteen days from the date of service of the notice) on or before which the payment required by the notice is to be made; and

(b) state that, in the event of non-payment on or before the day so named, the shares in respect of which the call was made shall be liable to be forfeited.

29. If the requirements of any such notice as aforesaid are not complied with, any share in respect of which the notice has been given may, at any time thereafter, before the payment required by the notice has been made, be forfeited by a resolution of the Board to that effect.

30. (i) A forfeited share may be sold or otherwise disposed of on such terms and in such manner as the Board thinks fit.

(ii) At any time before a sale or disposal as aforesaid, the Board may cancel the forfeiture on such terms as it thinks fit.

31. (i) A person whose shares have been forfeited shall cease to be a member in respect of the forfeited shares, but shall, notwithstanding the forfeiture, remain liable to pay to the company all monies which, at the date of forfeiture, were presently payable by him to the company in respect of the shares.

(ii) The liability of such person shall cease if and when the company shall have received payment in full of all such monies in respect of the shares.

32. (i) A duly verified declaration in writing that the declarant is a director, the manager or the secretary, of the company, and that a share in the company has been duly forfeited on a date stated in the declaration, shall be conclusive evidence of the facts therein stated as against all persons claiming to be entitled to the share;

(ii) The company may receive the consideration, if any, given for the share on any sale or disposal thereof and may execute a transfer of the share in favour of the person to whom the share is sold or disposed of;

(iii) The transferee shall thereupon be registered as the holder of the share; and

(iv) The transferee shall not be bound to see to the application of the purchase money, if any, nor shall his title to the share be affected by any irregularity or invalidity in the proceedings in reference to the forfeiture, sale or disposal of the share.

33. The provisions of these regulations as to forfeiture shall apply in the case of nonpayment of any sum which, by the terms of issue of a share, becomes payable at a fixed time, whether on account of the nominal value of the share or by way of premium, as if the same had been payable by virtue of a call duly made and notified.

(b) the holders of stock shall, according to the amount of stock held by them, have the same rights, privileges and advantages as regards dividends, voting at meetings of the company, and other matters, as if they held the shares from which the stock arose; but no such privilege or advantage (except participation in the dividends and profits of the company and in the assets on winding up) shall be conferred by an amount of stock which would not, if existing in shares, have conferred that privilege or advantage.

(c) such of the regulations of the company as are applicable to paid-up shares shall apply to stock and the words "share" and "shareholder" in those regulations shall include "stock" and "stock-holder" respectively.
