Factors affecting any of these industries in general, or any of our customers in particular, could have a cascading adverse effect on our business, financial condition and results of operations. Such factors include, but are not limited to, the following:

- a) seasonality of demand for our customers' products, which may cause our manufacturing capacities to be underutilized during specific periods;
 - b) our customers' failure to successfully market their products or to compete effectively;
 - c) change in any registration requirements or non-renewal of registrations or imposition of a regulatory ban, or trade sanctions imposed across the country or any such restrictions on the business or product or customer's final product;
 - d) loss of market share, which may lead our customers to reduce or discontinue the purchase of our products;
 - e) economic conditions of the markets in which our customers operate;
 - f) regulatory issues faced by these industries in India and internationally;
 - g) downturns or industry cycles that impact demand; and
 - h) changes in technology or consumer tastes and requirements that alter demands for our products.
3. ***Our business is dependent and will continue to depend on our manufacturing facilities, and we are subject to certain risks in our manufacturing process. Any slowdown or shutdown in our manufacturing operations or strikes, work stoppages or increased wage demands by our employees that could interfere with our operations could have an adverse effect on our business, financial condition and results of operations.***

We conduct our operations through one manufacturing facilities at Plot No B-47 Survey No. 243, Village Shah, Taluka Mangrol, Surat 394 421, Gujarat, India. The processing unit is located in the premises of Gujarat Agro Infrastructure Mega Food Park Near Town of Mota Miya Mangrol, Taluka Mangrol, District Surat, Gujarat, India. Our business is dependent upon our ability to manage our manufacturing facilities, which are subject to various operating risks, including those beyond our control, such as the breakdown, failure of equipment or industrial accidents, severe weather conditions and natural disasters. Any significant malfunction or breakdown of our machinery, our equipment, our reactors, our automation systems, our any other systems or any other part of our manufacturing processes or systems (together, our “**Manufacturing Assets**”) may entail significant repair and maintenance costs and cause delays in our operations. While we have not had such instances during the last three financial years (Fiscal 2021 to Fiscal 2023) where our Company was affected, we cannot assure you that we shall not experience any malfunction or breakdown of our Manufacturing Assets in the future. If we are unable to repair Manufacturing Assets in a timely manner or at all, our operations may need to be suspended until we procure the appropriate Manufacturing Assets to replace them. In addition, we may be required to carry out planned shutdowns of our facilities for maintenance, statutory inspections, customer audits and testing, or may shut down certain facilities for capacity expansion and equipment upgrades.

Success of our operations depend on availability of labour and good relationships with our labour force. As of the date of this Draft Red Herring Prospectus, our employees are not members of any organised labour unions. Strikes and lockouts as a result of disputes with our labour force may adversely affect our operations. While we have not had instance of strikes, lockouts or labour disputes in the past, we cannot assure you that we shall not experience any strikes or lockouts on account of labour disputes in the future. Such events could disrupt our operations and may have a material adverse effect on our business, financial condition and results of operations.

Further, we may be subject to manufacturing disruptions due to contraventions by us of any of the conditions of our regulatory approvals, which may require our manufacturing facilities to cease, or limit, production until the disputes concerning such approvals are resolved.

Although we have not experienced any disruptions at our manufacturing facilities in the past till the date of this Draft Red Herring Prospectus, we cannot assure you that there will not be any disruptions in our operations in the future. Our inability to effectively respond to such events and rectify any disruption, in a timely manner and at an acceptable cost, could lead to the slowdown or shutdown of our operations or the under-utilization of our manufacturing facilities, which in turn may have an adverse effect on our business, financial condition and results of operations.

4. ***The top ten customers of our product and top ten suppliers for raw material contribute a substantial part of our total revenue and source of Raw Material. We do not have long term agreement with the customer or supplier. The loss of any Customer or a decrease in the volume of order by any customer or any disruption in supply of raw material by any supplier may adversely affect our revenues and profitability.***

For the period ended December 31, 2023 the Revenue from top Ten customers was 44.17% of the total turnover on the basis of Standalone financials. The loss of any customer or a decrease in the volume of orders may severely affect our revenues and profitability, if we are unable to develop and maintain a continuing relationship with our key customer or develop and maintain relationships with other new customers. The loss of a significant customer or a number of significant customers due to any reason whether internal or external related to their business may have a material adverse effect on our business and results of operations. The Management is of the view that due to lower production capacity we are unable to fulfil the demand of our existing customers where in case of loss of any customer we shall have ready buyer with us due to extremely high demand of the product. Any decline in our Quality standards, growing competition and any change in the demand for our services by these customers may adversely affect our ability to retain them.

For the period ended December 31, 2023 the purchase of Raw Material from top 10 suppliers was 74.33% of the total purchase of material on the basis of Standalone financials. The loss of any supplier due to any reason or disruption of the supply by the supplier, if we are not able to agree with the terms and conditions for the supply of material or we are not able to find the alternative supplier of raw material with same terms and conditions at which we are buying the material, may severely affect our revenue and profitably.

5. We have not yet placed orders in relation to the funding Capital Expenditure towards construction of factory building which is proposed to be financed from the Issue proceeds of the IPO. In the event of any delay in placing the orders, or in the event the vendors are not able to provide the equipment in a timely manner, or at all, may result in time and cost over-runs and our business, prospects and results of operations may be adversely affected. Our proposed capacity expansion plans via one of our proposed manufacturing facilities are subject to the risk of unanticipated delays in implementation due to factors including delays in construction, obtaining regulatory approvals in timely manner and cost overruns.

We intend to use a part of the Net Proceeds for Funding Capital Expenditure towards construction of factory building at our proposed manufacturing facility to expand capacities in our existing product segments.

Total estimated cost as per certificate dated March 18, 2024 issued by the Chartered Engineer in respect of Funding Capital Expenditure towards construction of factory building at our proposed manufacturing facility is ₹340.00 Lakhs. We are yet to place orders for the capital expenditure for the Proposed Project. We have not entered into any definitive agreements to utilize the Net Proceeds for this object of the Issue and have relied on the quotations received from third parties for estimation of the cost. While we have obtained the quotations from various vendors in relation to such capital expenditure, most of these quotations are valid for a certain period of time and may be subject to revisions, and other commercial and technical factors. Additionally, in the event of any delay in placement of such orders, the proposed schedule implementation and deployment of the Net Proceeds may be extended or may vary accordingly. We cannot assure you that we will be able to undertake such capital expenditure within the cost indicated by such quotations or that there will not be cost escalations.

Our Proposed Project may be subject to potential problems and uncertainties that construction projects face including cost overruns or delays. Problems that could adversely affect our expansion plans include labour shortages, increased costs of equipment or manpower, inadequate performance of the equipment and machinery installed in our manufacturing facilities, delays in completion, defects in design or construction, the possibility of unanticipated future regulatory restrictions, delays in receiving governmental, statutory, environmental and other regulatory approvals, incremental pre operating expenses, taxes and duties, interest and finance charges, working capital margin, environment and ecology costs and other external factors which may not be within the control of our management. Further, there can be no assurance that our budgeted costs may be sufficient to meet our proposed capital expenditure requirements. If our actual capital expenditures significantly exceed our budgets, or even if our budgets were sufficient to cover these projects, we may not be able to achieve the intended economic benefits of these projects, which in turn may materially and adversely affect our financial condition, results of operations, cash flows, and prospects. There can be no assurance that we will be able to complete the aforementioned expansion and additions in accordance with the proposed schedule of implementation and any delay could have an adverse impact on our growth, prospects, cash flows and financial condition. A contractor has not been appointed for the said factory building and the appointment will occur after the receipt of IPO proceeds.

The Proposed Project will require us to obtain various approvals, which are routine in nature. For further details, see “Objects of the Issue” beginning on page 85. In addition to such pending approvals, we will also need to apply for certain additional approvals required for the Proposed Project after construction of factory building. There can be no assurance that we will be able to obtain these registrations and approvals including approvals in relations to power and water procurement in a timely manner or at all. Further, in the event of any unanticipated delay in receipt of such approvals, the proposed schedule implementation and deployment of the Net Proceeds may be extended or may vary accordingly. For details, see “Objects of the Issue” beginning on page 85.

6. Within the parameters as mentioned in the chapter titled “Objects of this Issue” beginning on page 85 of this Red

Herring Prospectus, our Company's management will have flexibility in applying the proceeds of the Issue. The fund requirement and deployment mentioned in the Objects of this Issue have not been appraised by any bank or financial institution.

We intend to use Net Proceeds towards meeting the funding of capital expenditure for setting up a new manufacturing unit and installation of Plant and Machinery thereon and for purchase of plant and machinery at our existing manufacturing facility and General Corporate Purposes. We intend to deploy the Net Proceeds in financial year 2024-25 and such deployment is based on certain assumptions and strategy which our Company believes to implement in future. The funds raised from the Issue may remain idle on account of change in assumptions, market conditions, strategy of our Company etc., For further details on the use of the Net Proceeds, please refer chapter titled "*Objects of the Issue*" beginning on page 85 of this Draft Red Herring Prospectus.

Since, the proceeds from Issue is less than ₹10,000 Lakhs, there is no mandatory requirement of appointing an independent monitoring agency for overseeing the deployment of utilization of funds raised through this Issue. The deployment of funds for the purposes described above is at the discretion of our Company's Board of Directors and the that the same shall be subject to compliance of applicable laws in this regard. The fund requirement and deployment are based on internal management estimates and has not been appraised by any bank or financial institution. Accordingly, within the parameters as mentioned in the chapter titled "*Objects of the Issue*" beginning on page 85 of this Draft Red Herring Prospectus, the Management will have significant flexibility in applying the proceeds received by our Company from the Issue. Further our company has already purchased non agriculture open land for proposed plant situated at Ledger (Khata) No. 714, Bearing Block No. 451/B/1, Rev. Survey No. 391/B 392 of Moje Village, Taluka Mangrol, District Surat 394 410, Gujarat, India for setting up a new manufacturing unit. If our management comes across any lucrative opportunity in terms of government subsidies, strategic location, economical manpower etc., our Company may evaluate such potential opportunity in future. Our Board of Directors will monitor the proceeds of this Issue. However, audit committee will monitor the utilization of the proceeds of this Issue and prepare the statement for utilization of the proceeds of this Issue. However, in accordance with Section 27 of the Companies Act, 2013, and relevant provisions of SEBI ICDR Regulations, 2018, a company shall not vary the objects of the Issue without our Company being authorised to do so by our shareholders by way of special resolution and other compliances in this regard. Our Promoters and controlling shareholders shall provide exit opportunity to such shareholders who do not agree to the proposal to vary the objects, at such price, and in such manner, as may be prescribed by SEBI, in this regard.

7. There are certain discrepancies and non-compliances noticed in some of our financial reporting and/or records relating to filing of returns and deposit of statutory dues with the taxation and other statutory authorities.

In the past, our company has at several instances, delayed in filing our GST returns, EPF returns and deposit of statutory dues, as a result of which, we have been required to pay the late filing fees along with interest on delayed deposit of due taxes and statutory dues. Although the late filing fees and interest on late deposits levied are small, if we continue this practice, the accumulated amounts of each delay may adversely affect our cash flows. Further no-show cause notice has been issued against our Company till date, in respect of above. In the event of any cognizance being taken by the concerned authorities in respect of above, actions may be taken against our Company and its directors, in which event the financials of our Company and our directors may be affected.

Further our Company has a foreign subsidiary (details of which are mentioned elsewhere in this document), and we were required to consolidate the financials of the Subsidiary with that of our Company in terms of Section 129 of the Companies Act, 2013. However, we have not been able to do so due to oversight and as a corrective measure, have got the consolidation done in the restated financial statements as mentioned in this Draft Red Herring Prospectus.

Although no cognizance has been taken by the authority in any of the above matters till date and no notice in respect of same have been served by the concerned authorities till date, we are not sure that no such notice shall be issued in future or at all and in any such event we may be subjected to a penalty. However, if any action is taken by the concerned authority in the matter and in the event of any penalty being imposed against the Company by the concerned authority, the financials of the company shall be adversely affected. As regards corrective measure company has appointed compliance officer to ensure that all the compliance related matters are taken care of on real time basis and have further intacted the internal controls to ensure that the flaws are cured in time.

8. There are certain discrepancies and non-compliances noticed in some of our statutory compliances reporting and/or records relating to filing of returns with the concerned Registrar of Companies.

In the past, our company although passed due resolution in respect of the appointment of its statutory auditors for F.Y. 2021-22 & 2022-23, in its AGM held for the respective years, failed to file form ADT-1 in respect of same for F.Y. 2021-22 & 2022-23 irrespective of the fact that in F.Y. 2020-21, the appointment was made only for one year. Later as the auditor resigned w.e.f. December 20, 2023 wherein the period of appointment was mentioned as December 01, 2020 till December 20, 2023, which evidently shows that the office of statutory auditor of the Company did not vacate during the years of default. and non-filing of the above form was missed out only as a part of clerical omission.

Further the Company was required to file its financial statements for in form AOC-4 XBRL for F.Y. 2022-23 in XML format. The Company however failed to do so for the year and filed its financial statements for the F.Y. 2022-23 in AOC-4 without converting it into XBRL format. Although due compliance has been made by filing the financial statements in AOC-4 (non XBRL) and although the Companies (Filing of documents and forms in Extensible Business Reporting Language) Rules, 2011 does not provide any penalty for the non-compliance, we are not sure if any action shall not be taken the competent authority or at all.

Further the Company had made an allotment of 2,400 shares each on January 12, 2019 and January 13, 2019 on preferential basis. However, the funds in respect of same had been received in the regular bank account of the Company instead of a separate bank account wherein no other transactions had been conducted till the date of receipt of the application money. However, post receipt of the application money, the Company undertook other transactions as well in the said account but the allotment money was duly maintained till the date of allotment. This transaction may be considered a violation of the provisions of Section 42 of the Companies Act, 2013.

Further, the Company also undertook business transactions before the filing of form INC-20A (declaration of commencement of business) on January 09, 2019 which is in violation of the provisions of Section 10A(1).

Although no cognizance has been taken by the authority in any of the above matters till date and no notice in respect of same have been served by the concerned Registrar of Companies till date, we are not sure that no such notice shall be issued in future or at all and in any such event we may be subjected to a penalty. However, if any action is taken by the concerned registrar in the matter and in the event of any penalty being imposed against the Company by the concerned authority, the financials of the company shall be adversely affected. As regards corrective measure company has appointed compliance officer to ensure that all the compliance related matters are taken care of on real time basis and have further intacted the internal controls to ensure that the flaws are cured in time.

9. We derive a significant part of our revenue from major customers. If one or more of such customers choose not to source their requirements from us or to terminate their contracts with us, our business, financial condition and results of operations may be adversely affected.

Our operations are dependent on the requirements of our customers, from our Top Ten Customers, we generate ₹7,738.63 lakhs of revenue, which is 44.17% of the Total Revenue generated as on December 31, 2023 on the basis of Standalone financials. We are an innovation driven enterprise and to produce new products which attracts higher cost. Thus, the cost of the new product is comparatively higher than the usual product. This thus raises the price of the product and thus involves the risk of acceptance by the customer. As a result, number of potential consumer of our product/ services may reduce which will ultimately affect our potential revenue in future to that extent. Accordingly, any failure to retain these customers and/or negotiate and execute contracts on terms that are commercially viable, with these select customers, could adversely affect our business, financial condition and results of operations. In addition, any defaults or delays in payments by a major customer or the insolvency or financial distress by a major customer may have an adverse effect on business, financial condition and results of operations.

Cancellation by customers or delay or reduction in their orders or instances where anticipated orders fail to materialize can result in mismatch between our inventories of raw materials and of manufactured products, thereby increasing our costs relating to maintaining our inventory and reduction of our margins, which may adversely affect our profitability and liquidity. Further, we may not find any customers or purchasers for the surplus or excess capacity, in which case we would be forced to incur a loss. Further, our inability to find customers for surplus products may result in excessive inventories which may become obsolete and may be required to be written off in the future.

Additionally, our customers have high standards for product quality and quantity as well as delivery schedules. Any failure to meet our customers' expectations could result in the cancellation or non-renewal of contracts or purchase orders. There are also a number of factors, other than our performance that could cause the loss of a customer. Customers may demand price reductions, set-off any payment obligations, require indemnification for themselves or their affiliates, or replace their

existing products with alternative products, any of which may have an adverse effect on our business, financial condition, results of operations and prospects.

10. The Processing of Raw Cashew nuts involves number of stages and during the process the cashew nuts may get broken resulting in reduction in sale price.

Raw Cashew Nuts are processed through number of stages, such as cleaning, Boiling and Cooling, De shelling, drying, Moistening and peeling, sorting, drying and grading, etc. It consists of deshelling the raw cashew nutshell to free the kernel, without splitting the precious whole kernel, then various other process is to be done. During the above various stages of process Cashew Nuts may get broken. So whole process is required to be handled with utmost care by trained and skilled workers. If it is not handled with due care, during process the cashew nuts will be broken. If the percentage of such broken nuts are increased, we have to sell the broken cashew nuts at lesser price than what the whole cashew nut gets and it will have adverse effect on our sale and profitability.

11. The prices we are able to obtain for our commodities products that we trade depend largely on prevailing market prices.

The price of the commodities products traded by us has a significant impact on our profits. Some of our core products such as Sugar, Rice, Pulses, Wheat flour etc have been subject to price fluctuations resulting from weather, domestic and foreign trade policies, shifts in supply and demand and other factors beyond our control. As a result, any fluctuation in prices could have a material adverse effect on our Company and our results of operations.

12. Our existing and proposed manufacturing facility are concentrated in a single region i.e., Surat, Gujrat and the inability to operate and grow our business in this particular region may have an adverse effect on our business, financial condition, results of operations, cash flows and future business prospects.

All our facilities like registered office, manufacturing units and processing unit is located in Surat, Gujrat and we propose to set up our proposed facility in Surat, Gujrat as well, which exposes us to risks of concentration. Our success depends on our ability to successfully manufacture and deliver our products to meet our customer demand. Although in the past we have not experienced instances of operating risks, however our manufacturing facilities are susceptible to damage or interruption or operating risks, such as human error, power loss, breakdown or failure of equipment, power supply or processes, performance below expected levels of output or efficiency, obsolescence, loss of services of our external contractors, terrorist attacks, acts of war, break-ins, earthquakes, other natural disasters and industrial accidents and similar events. It is also subject to operating risk arising from compliance with the directives of relevant government authorities. Operating risks may result in personal injury and property damage and in the imposition of civil and criminal penalties. If our Company experiences delays in production or shutdowns at our facility due to any reason, including disruptions caused by disputes with its workforce or any external factors, our Company's operations will be significantly affected, which in turn would have a material adverse effect on its business, financial condition and results of operations.

Further, any materially adverse social, political or economic development, civil disruptions, or changes in the policies of the state government or state or local governments in this region could adversely affect our manufacturing operations, and require a modification of our business strategy, or require us to incur significant capital expenditure or suspend our operations. Any such adverse development affecting continuing operations at our manufacturing facilities could result in significant loss due to an inability to meet customer contracts and production schedules, which could materially affect our business reputation within the industry. The occurrence of or our inability to effectively respond to, any such events or effectively manage the competition in the region, could have an adverse effect on our business, results of operations, financial condition, cash flows and future business prospects. Further, continuous addition of industries in and around our manufacturing facilities without commensurate growth of its infrastructural facilities may put pressure on the existing infrastructure therein, which may adversely affect our business.

13. If We are not able to procure Quality Raw Material in a timely manner, our business, results of Operations and financial conditions may be adversely affected.

The main Raw Material required is Raw Cashew Nuts (RCN) for our products. The RCN is agro based product and are subject to price fluctuations as a result of seasonality, weather, demand in local and international market and other factors. We try to maintain our raw material cost by timing our purchases and delivery months. We typically do not enter into long term supply arrangements for procurement of raw materials. We enter into short term contracts for procurement of raw material. Several criteria can be used to specify the cashew nuts quality such as colour, shape, brightness, exterior aspect. Our profitability will depend upon on our ability to anticipate and react to changes in the cost of our material and to procure raw material in time. If we are not able to procure the raw material in timely manner, the cost of raw material will increase and we may not be able to get the desired quality of raw material and which will adversely affect our business, results of

operation and financial conditions.

14. The average cost of acquisition of Equity shares by our Promoters is lower than the Issue price. Our promoters average cost of acquisition of Equity shares in our Company is lower than the Issue Price of Equity shares as given below.:

Sr. No.	Name of Promoters	No of Equity Shares held	Weighted Average Cost of Acquisition (in ₹) *
1.	Hozefa S Jawadwala	59,24,100	0.03
2.	Satyanarayan Patro	59,24,400	0.03
3.	Ashok Patel	1,99,500	0.03

6.	Sonali Malla	3,00,000	Nil
7.	Sumita A Patel	60,000	Nil
8.	Farida Firoz Hathiyari	60,000	Nil

**The average cost of acquisition of Equity Shares by our Promoter has been calculated by taking into account the amount paid by them, by way of fresh issuance or transfer, the Equity Shares less amount received by them for the sale of Equity Shares through transfer, if any and the net cost of acquisition has been divided by total number of shares held as on date of the Draft Red Herring Prospectus.*

15. Risk Associated with foreign Subsidiary Company.

Investing in our company could involves risks associated with our foreign subsidiary operations i.e Supreme Commodities DMCC, including potential challenges related to financial reporting and compliance. As such, fluctuations in foreign currency exchange rates, diverse regulatory environments, and cultural differences may impact our ability to accurately report financial results and adhere to regulatory requirements. Additionally, differences in accounting standards and tax regulations between jurisdictions may pose complexities in consolidating financial statements and ensuring compliance across our global operations. These factors could lead to increased administrative burdens, potential penalties for non-compliance, and adverse effects on our financial performance, ultimately impacting the value of our securities. Investors should carefully consider these risks before making any investment decisions.

16. We are subject to strict quality requirements and any product defect issues or failure by us or our raw material suppliers to comply with quality standards may lead to the cancellation of existing and future orders, recalls and exposure to potential product liability claims.

We face an inherent business risk of exposure to product defects and subsequent liability claims if the use of any of our products results in personal injury or property damage. We may not be able to meet the quality standards imposed by our customers and applicable to our manufacturing processes, which could have a material adverse effect on our business, financial condition, results of operations and cash flows.

If any of our products are defective, we may be, inter alia, (i) responsible for damages relating to any defective products, (ii) required to replace or recall such products or (iii) incur significant costs to defend any such claims. The failure by us or any of our suppliers to achieve or maintain compliance with customer requirements or quality standards may disrupt our ability to supply products sufficient to meet demand until compliance is achieved or, until a new supplier has been identified and evaluated. The quality of raw materials will have an impact on the quality of the finished products and in turn affect our brand image, business and revenue. There is no assurance that our products will always meet the satisfaction of our customers' quality standards. Our failure to comply with applicable regulations could cause adverse consequences to be imposed on us, including injunctions, civil penalties, suspensions or seizures or recalls of products, operating restrictions and criminal prosecutions, all of which could harm our business. There can be no assurance that if we need to engage new suppliers to satisfy our business requirement, we will be able locate new suppliers in compliance with customer requirements in a timely manner, or at all. Failure to do so could lead to the cancellation of existing and future orders and have a material adverse effect on our business and revenue. However, no such instances occurred in the past.

17. If we are unable to accurately estimate the demand for our products, our business, financial condition and results of operation may be adversely affected.

The purchase of raw materials for our products is based primarily on forecasts, projections and requirements prepared by our marketing team. These forecasts are based on past sales as well as anticipated demand, which is based to a certain extent on the subjective assessment by our marketing team. If we are unable to accurately forecast demand for our products it would lead to excess supply or a shortage in supply of raw materials from our suppliers, which would have a material adverse impact on our business, financial condition and results of operations.

18. Our manufacturing facility is critical to our business operations and any shutdown of our manufacturing facilities may have an adverse effect on our business, results of operations and financial condition.

Our manufacturing facility is located at Gujarat. Our success depends on our ability to successfully manufacture and deliver our products to meet our customer demand. Our manufacturing facility is susceptible to damage or interruption or operating risks, such as human error, power loss, breakdown or failure of equipment, power supply or processes, performance below expected levels of output or efficiency, obsolescence, loss of services of our external contractors, terrorist attacks, acts of war, break-ins, earthquakes, other natural disasters and industrial accidents and similar events. It is also subject to operating risk arising from compliance with the directives of relevant government authorities. Operating risks may result in personal injury and property damage and in the imposition of civil and criminal penalties.

If our Company experiences delays in production or shutdowns at our facility due to any reason, including disruptions caused by disputes with its workforce or any external factors, our Company's operations will be significantly affected, which in turn would have a material adverse effect on its business, financial condition and results of operations. As of now no such instances of shutdown of manufacturing unit or operating risks have occurred in our unit.

Further, continuous addition of industries in and around our manufacturing facility without commensurate growth of its infrastructural facilities may put pressure on the existing infrastructure therein, which may adversely affect our business. Further, the spiraling cost of living around our manufacturing facility may push our manpower costs higher, which may reduce our margin and cost competitiveness.

19. We do not have long-term agreements with suppliers for our raw materials and an increase in the cost of, or a shortfall in the availability or quality of such raw materials could have an adverse effect on our business, financial condition and results of operations.

During the Stub period ended on December, 2023, and for the Financial Year ended March 31, 2023, March 31, 2022 and March 31, 2021 on standalone basis, our Cost of Goods Sold (cost of materials consumed, Purchase of stock in trade and changes in inventories of finished goods) was ₹4,270.62 Lakhs, ₹6,099.43 Lakhs, ₹1,725.45 Lakhs and ₹3,989.15 respectively on standalone basis, which represented 50.82%, 76.55%, 26.16% and 10.21% of our revenue from operations. The raw materials we use in our manufacturing process are primarily sourced from third party suppliers in India and parts of Africa. In addition, we usually do not enter into long-term supply contracts/ agreements with any of our raw material suppliers and typically source raw materials from the open market. The absence of long-term contracts/agreements at fixed prices exposes us to volatility in the prices of raw materials that we require and we may be unable to pass these costs onto our customers, which may reduce our profit margins. We face a risk that one or more of our existing suppliers may discontinue their supplies to us, and any inability on our part to procure raw materials from alternate suppliers in a timely manner, or on commercially acceptable terms, may adversely affect our business, financial condition and results of operations.

The quality of our products is primarily derived from the quality of our raw materials, and any deterioration in the quality of raw materials supplied to us will have an adverse effect on the quality of our products, market reputation and sales volumes. There can be no guarantee that we will be able to maintain our current line-up of suppliers or adequate supply of such raw materials at all times.

Further our Company has outstanding dues of trade payables during the stub period ended on December 31, 2023, and for the Financial Year ended March 31, 2023, March 31, 2022 and March 31, 2021 of ₹1,459.21 Lakhs, ₹1,888.99 Lakhs, ₹951.49 Lakhs and ₹1,767.05 Lakhs respectively on standalone basis. Any delay in payment to our creditors may impact our long-standing relations with our suppliers and may result in stoppage of timely or at all delivery of raw material. Any such disruption would impact the production and overall financial position of our Company.

Our business depends on the continuity of our relationship with our customers. There can be no assurance that we will be successful in maintaining such relationships or increasing the number of such relationships. If we are not able to maintain existing relationships with our current customers or if we are not able to develop new relationships, including if we are not able to provide services on a timely basis or offer services that meet the needs of the customers, the number of customers could decline in the future and as a result, our business, prospects, results of operations and financial condition could be adversely affected in the future.

20. If we are not able to attract and retain sufficient qualified and trained personnel at our processing and packaging units which may adversely affect our business.

The processing of Raw Cashew nut required skilled employees so that the Company can get less quantity of broken cashew nuts. The company has employed skilled stag for the processing of cashew nuts. The Company has to keep Good Human Resources policy and the incentives to keep the skilled staff for a longer period. There can be no assurance that efficiency rates of our personnel will increase or maintained throughout their working. We have migrated from manual to automation in our plant however we still require Semi skilled Resources to perform the job which are readily available and enough resources are available to train them within our premises. Any significant adverse change efficiency in our personnel could also affect our productivity adversely, which may result in to loss of customers, revenue, profitability etc. If we are not able to replace the required skilled staff in case of labour unrest in timely manner then our business operation may be severely affected, financial condition and results of operations may be adversely affected.

21. Our Company has not entered into any written agreements or contracts with our customers for sale of our products.

We have not entered into any type of long/short agreement with any of the buyer. Though, we are getting order on regular basis from our customers, we cannot assure you that in future we will be getting the orders from all the customers on regular basis. In absence of any type of written agreement with our customers, we are always at the risk of losing customers in this competitive market. Loss of any of the significant customer will lead our company in to loss of business, revenue and financial conditions.

22. Any failure in our quality control and procurement process may adversely affect our business, results of operations and financial condition.

The success of our business depends upon the procurement of qualitative Raw Material from the market. several criteria can be used to specify the cashew nuts quality such as colour, shape, brightness, exterior aspect. The most important criterion is the quality of the kernel inside the shell. There are four main criteria used to assess the quality of the RCN: the Out-turn, the defective nut rate, the nut count, and moisture. We procure our raw material from various African Countries like Benin, Tanzania, Burkina Faso, Senegal, Cote d'Ivoire. We check the quality of RCN before buying from the suppliers. The quality of raw material has a direct impact on the quality of finished products. If we are not able to maintain control on check of quality of raw material then our customers may lose faith in the quality of our products and could in turn refuse to further deal in our products, which could have a severe impact on our revenue and business operations. However, no such instances occurred in the past.

23. We have been recently converted into public limited company and any non-compliance with the provisions of Companies Act, 2013 may attract penalties against our Company which could impact our financial and operational performance and reputation.

The Company was converted in to Limited Company pursuant to a special resolution passed by our shareholders at the Extra-Ordinary General Meeting held on January 18, 2024 and consequently the name of our Company was changed to "Alea Commodities Limited" and a fresh certificate of incorporation was issued by the Registrar of Companies, Mumbai dated February 28, 2024. However, consequent to the aforesaid conversion, our Company is required to observe compliance with various provisions pertaining to public limited companies of the Companies Act. Further, our Company is going to the public for further requirement of funds and needs to comply with provisions of SEBI ICDR Regulations and SEBI (LODR) Regulations. Though our Company will take due care to comply with the provisions of the Companies Act and other applicable laws and regulations. In case of our inability to timely comply with the requirements or in case of any delay, we may be subject to penal action from the concerned authorities which may have an adverse effect on our financial and operational performance and reputation.

24. The procurement of raw material is subject to seasonal factors. Consequently, our inability to accurately forecast demand for our products, may have an adverse effect on our business, results of operations, cash flows and financial condition.

RCN is an agricultural product and cultivation of the raw material is seasonal. The cashew nuts are harvested during February to May. On account of seasonality of the raw material forecast for the demand for the finished goods and procurement of raw material for production is very important. Any misjudgment in the procurement of Raw Material will result into either out of stock raw material at competitive price or surplus in stock which will block the working capital funds in turn affect the business, result of operations, cash flow and financial conditions.

25. Our success largely depends upon the knowledge and experience of our Promoters, Directors, our Key Managerial

Personnel and Senior Management as well as our ability to attract and retain personnel with technical expertise. Any loss of our Promoter, Directors, Key Managerial Personnel, Senior Management or our ability to attract and retain them and other personnel with technical expertise could adversely affect our business, financial condition and results of operations.

Our success largely depends upon the knowledge and experience of our Promoters, Directors, Key Managerial Personnel and Senior Management as well as our ability to attract and retain skilled personnel. Any loss of our Promoters, Directors, Key Managerial Personnel and Senior Management or our ability to attract and retain them and other skilled personnel could adversely affect our business, financial condition and results of operations. We depend on the management skills and guidance of our Promoter for development of business strategies, monitoring their successful implementation and meeting future challenges. Further, we also significantly depend on the expertise, experience and continued efforts of our Key Managerial Personnel and Senior Management. Our future performance will depend largely on our ability to retain the continued service of our management team. If one or more of our Key Managerial Personnel or Senior Management are unable or unwilling to continue in his or her present position, it could be difficult for us to find a suitable or timely replacement and our business, financial condition and results of operations could be adversely affected.

In addition, we may require a long period of time to hire and train replacement personnel when personnel with technical expertise terminate their employment with us. We may also be required to increase our levels of employee compensation more rapidly than in the past to remain competitive in attracting and retaining personnel with technical expertise that our business requires. The loss of the services of such persons could have an adverse effect on our business, results of operations, cash flows and financial condition.

There is significant competition for management and other skilled personnel in our industry in which we operate, and it may be difficult to attract and retain the personnel we require in the future. There can be no assurance that our competitors will not offer better compensation packages, incentives and other perquisites to such skilled personnel. If we are not able to attract and retain talented employees as required for conducting our business, or if we experience high attrition levels which are largely out of our control, or if we are unable to motivate and retain existing employees, our business, financial condition and results of operations may be adversely affected. For further information, see “*Our Management*” on page 157 of this Draft Red Herring Prospectus.

26. The occurrence of natural or man-made disasters could adversely affect our results of operations and financial condition.

The occurrence of natural disasters, including floods, earthquakes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations or financial condition. The spread of pandemic diseases, or the occurrence of natural disasters, in India or the international markets we purchase, could restrict the level of economic activities generally or slow down or disrupt our business activities, which could in turn adversely affect our business, financial condition and results of operations.

27. Our ability to maintain our competitive position and to implement our business strategy is dependent to a significant extent on our senior management team and other key personnel, in particular, our Promoters.

We depend on our current senior management for the implementation of our strategy and the operation of our day-to-day activities. Furthermore, relationships of members of senior management are important to the conduct of our business. Competition for experienced management personnel in the business sectors we operate in is intense, the pool of qualified candidates is limited, and we may not be able to retain our senior executives or key personnel or attract and retain skilled senior executives or key personnel in the future. Consequently, there can be no assurance that these individuals will continue to make their services available to us in the future. Any significant loss of senior management or key personnel could materially and adversely affect our business, financial condition, results of operations and prospects. In addition, if any member of our senior management team or any of our other key personnel joins a competitor or forms a competing business unit, we may consequently lose our proprietary know-how for the benefit of our competitors. Our success depends heavily upon the continuing services of our Promoter who has been the leader since our inception. Our Promoter currently serves as our Managing Director and his experience and vision have played a key role in obtaining our current market position. If our Promoter is unable or unwilling to continue to serve in his present position, we may not be able to replace him with an executive of similar capacity or at all, and our business, financial condition, results of operations and prospects may be materially and adversely affected.

28. We have to update the name of our company in some of the statutory approvals and certificates due to the Change in the name upon conversion of our Company in to Public Limited Company.

Some of our statutory approvals and certificates are in the name of Aelea Commodities Private Limited. Since our Company

has been converted from Private limited to Public Limited pursuant to a special resolution passed by our shareholders at the Extra-Ordinary General Meeting held on January 18, 2024 and consequently the name of our Company was changed as “Aelea Commodities Limited” we have to update the name Aelea Commodities Limited on the statutory approvals and certificates. We cannot assure that we will be able to update the said documents in a timely manner.

For more information about the licenses required in our business, please refer section “Government and other approvals” beginning on page 213 of this Draft Red Herring Prospectus.

29. We face competition from both domestic as well as multinational corporations and our inability to compete effectively may have a material adverse impact on our business, financial condition and results of operations.

We face competition in our business based on pricing, relationships with customers, product quality, customization, and innovation. We face pricing pressures from companies, that are able to produce such products at competitive costs and consequently, may supply their products at cheaper prices. We are unable to assure you that we shall be able to meet the pricing pressures imposed by such domestic or multinational competitors which would adversely affect our business, financial condition and results of operations. Additionally, some of our competitors may have greater financial, research and technological resources, larger sales and marketing teams and more established reputation. They may also be in a better position to identify market trends, adapt to changes in industry, innovate and develop new products, offer competitive prices due to economies of scale and also ensure product quality and compliance.

30. Our business requires us to obtain and renew certain registrations, licenses and permits from government and regulatory authorities and the failure to obtain and renew them in a timely manner may adversely affect our business operations.

Our business operations require us to obtain and renew certain approvals, licenses, registration and permits from time to time from the different authorities, some of which may expire and for which we may have to make an application for obtaining the approval or its renewal. If we fail to maintain such registrations and licenses or comply with applicable conditions, then such respective regulatory can impose fine on our company or suspend and/or cancel the approval/licenses which may affect our business adversely.

For more information about the licenses required in our business, please refer section “Government and other approvals” beginning on page 213 of this Draft Red Herring Prospectus.

31. In addition to normal remuneration, other benefits and reimbursement of expenses to our Promoters and Directors; they are interested to the extent of their shareholding and dividend entitlement thereon in our Company and for the transactions entered into between our Company and themselves as well as between our Company and our Group Company / Entities.

Our Promoters and Directors are interested in our Company to the extent of their shareholding and dividend entitlement thereon in our Company, in addition to normal remuneration or benefits and reimbursement of expenses. Our Promoters and Directors are interested in the transactions entered into between our Company and themselves as well as between our Company and Our Group Company / Entity which may be or may not be at Arms’ Length Price and in Ordinary Course of Business. If the transactions are executed not on Arms’ Length Price and in Ordinary Course of Business, our financial position may get affected to that extent. For details of transactions already executed by our Company with our Promoters, Directors and Group Company / Entities during last three years, please refer to the “Annexure 28-Related Party Transaction” under the Chapter titled “Restated Financial Statements” beginning on page 187 this Draft Red Herring Prospectus.

32. Our inability to successfully implement some or all our business strategies in a timely manner or at all could have an adverse effect on our business. Further, our inability to effectively manage any of these issues may adversely affect our business growth and, as a result, impact our businesses, financial condition and results of operations.

As part of our strategy aimed towards business growth and improvement of market position, we intend to implement several business strategies, which include:

- Expand our existing manufacturing capacities to capitalize on industry opportunities;
- Increasing Operational efficiency;
- Continue to focus on innovation and grow our business across customer segments;
- Enhance customer base by entering new geographies to establish long-term relationships;
- Branding the finished product; and

- Procuring Raw Material in advance to manage price fluctuation and market demands.

For further information, see “*Business Overview- Our Strategies*” beginning on page 133 of this Draft Red Herring Prospectus.

Our strategy may not succeed due to various factors, including our inability to reduce our debt and our operating costs, our failure to develop new products and services with sufficient growth potential as per the changing market preferences and trends, our failure to execute agreements with our technology partners, our failure to effectively market these new products and services or foresee challenges with respect to our business initiatives, our failure to sufficiently upgrade our infrastructure, machines, automation, equipment and technology as required to cater to the requirement of changing demand and market preferences, our failure to maintain highest quality and consistency in our operations or to ensure scaling of our operations to correspond with our strategy and customer demand, changes in GoI policy or regulation, our inability to respond to regular competition, and other operational and management difficulties. Any failure on our part to implement our strategy due to many reasons as attributed aforesaid could be detrimental to our long-term business outlook and our growth prospects and may materially adversely affect our business, financial condition and results of operations. For further details of our strategies, see “*Business Overview*” beginning on page 118 of this Draft Red Herring Prospectus.

Further, our ability to sustain growth depends primarily upon our ability to manage key issues such as our ability to sustain existing relationships with our clients, ability to obtain raw materials at better prices, ability to compete effectively, ability to scaling up our operations, adhering to high quality and execution standards, our ability to expand our manufacturing capabilities and our presence in India as well as globally, the effectiveness of our marketing initiatives, selecting and retaining skilled personnel. Sustained growth also puts pressure on our ability to effectively manage and control historical and emerging risks. Our inability to effectively manage any of these issues and implement our business strategies may adversely affect our business growth and, as a result, impact our businesses, financial condition and results of operations.

33. If we are unable to manage our growth effectively and further expand into new markets our business, future financial performance and results of operations could be materially and adversely affected.

The success of our business will depend on our ability to effectively implement our business and growth strategy. As part of our growth strategy, we aim to, among other things, continue to grow our businesses as and when opportunities exist including by Continuing to strengthen our existing product portfolio with attractive growth and profitability prospects, to strive for cost efficiency, attracting and retaining talented employees and focusing on consistently meeting quality standards.

As we continue to grow our business and expand into newer markets, we may face several challenges, including as set forth below:

- Acquiring new customers;
- Identifying customer requirements and preferences in such markets;
- Obtaining approvals and certifications for our products in such jurisdictions;
- Making accurate assessments of the resources we will require;
- Preserving a uniform culture, values and work environment;
- Developing and improving our internal administrative infrastructure, particularly our financial, operational, communications, internal control and other internal systems;
- Recruiting, training and retaining sufficient skilled management, technical and marketing personnel;
- Maintaining high levels of customer satisfaction; and
- Adhering to expected performance and quality standards.

In pursuing our growth strategy, we will require additional capital investments and cash outlays, which may have a material impact on our cash flows and results of operations.

Our operating expenses and capital requirements may increase significantly pursuant to our expansion plans. Our ability to manage our growth effectively requires us to forecast accurately our sales, growth and manufacturing capacity and to expend funds to improve our operational, financial and management controls, reporting systems and procedures. An inability to implement our future business plan, manage our growth effectively, further expand into new markets or failure to secure the required funding on favourable terms or at all could have a material and adverse effect on our business, future financial performance and results of operations.

34. We have entered into certain transactions with related parties. These transactions or any future transactions with our related parties could potentially involve conflicts of interest.

Our Company has entered into various transactions with related parties. While our Company believes that all such transactions have been conducted on an arm's length basis and contain commercially reasonable terms, there can be no assurance that we could not have achieved more favourable terms had such transactions been entered into with unrelated parties. Related party transactions that entered by the Company for Period ended December 31, 2023 and last three fiscals on the basis of Standalone restated financials and are legitimate business transactions conducted on an arms' length basis, in compliance with the requirements stipulated in Companies Act, 2013, and relevant Accounting Standards and other statutory compliances. We cannot assure you that such transaction, individually or in the aggregate, will always be in the best interests of our Company and/or that it will not have an adverse effect on our business and results of operations.

For details of transactions, please refer to "Annexure 28 - Related Party Transaction" of Standalone Restated Financial Statements of this Draft Red Herring Prospectus.

36. Our insurance coverage may be inadequate to satisfy future claims against us.

We maintain insurance coverage which is typical in our industry which we believe to be commercially appropriate for risks. However, such insurance may not be adequate to cover all our losses or liabilities that may arise from our operations. Our insurance policies contain exclusions and or all limitations on coverage, as a result of which, we may not be able to successfully assert our claims for any liability or loss under the said insurance policies.

Additionally, there may be various other risks and losses, specially arising out of our business agreements, for which we are not insured because such risks are either uninsurable or not insurable on commercially acceptable terms. Furthermore, there can be no assurance that in the future we will be able maintain insurance of the types or at levels which we deem necessary or adequate or at premiums which we deem to be commercially acceptable. The occurrence of an event for which we are not insured, where the loss is in excess of insured limits or where we are unable to successfully assert insurance claims from losses, could result in uninsured liabilities. Further, despite such uninsured losses we may remain obligated for any future financial indebtedness or other obligations related to our business. Any such uninsured losses or liabilities could result in an adverse effect on our business operations, financial conditions and results of operations.

Sale of shares by our promoters or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.

The sale of shares by the promoters or other significant shareholder(s) may significantly affect the trading price of our Equity shares. Further the market price generally may be adversely affected on account of the news about the sale of shares by the promoters. However, the closing of trading windows during the period of financial results may restrict the promoters from selling the shares in the open market.

39. *The issue price of the Equity Shares may not be indicative of market price of our equity shares after the issue and the market price of our Equity shares may decline below the issue price.*

The issue price of our Equity shares is decided on the basis of both qualitative and quantitative factors. The Company had made good progress in establishing its name in the Cashew Nuts production and trading. All such points have been considered in deciding the issue price of the Equity Shares. 41. *Our ability to pay dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures.*

There can be no assurance that we will generate sufficient income to cover the operating expenses and pay dividends to the shareholders. Our ability to pay dividends will also depend on our expansion plans. We may be unable to pay dividends in the near or medium term, and the future dividend policy will depend on the capital requirements and financing arrangements for the business plans, financial condition and results of operations.

44. Certain information contained in this Draft Red Herring Prospectus is based on management estimates and we cannot assure you of the completeness or accuracy of the data.

Certain information contained in this Draft Red Herring Prospectus like our funding requirements and our proposed use of issue proceeds is based solely on management estimates. Such circumstances can have an impact on our financial condition and results of operation.

45. Any variation in the utilisation of the Net Proceeds would be subject to certain compliance requirements, including prior shareholders’ approval.

Our Company intends to use Net Proceeds raised pursuant to the Issue in the manner set out in the section titled “*Objects of the Issue*” beginning on page 85 of this Draft Red Herring Prospectus. In accordance with Section 27 of the Companies Act, 2013, we cannot undertake any variation in the utilisation of the Net Proceeds as disclosed in this Draft Red Herring Prospectus without obtaining the approval of shareholders of our Company through a special resolution. Frauds or other delinquencies by employees could include indulging in transactions that exceed authorized limits or present unacceptable risks to us; hiding unauthorized or unsuccessful trading activities from us; or the improper use of confidential information. Such misconduct could result in unexpected business risks, losses, invite regulatory sanctions and seriously harm our reputation and could even lead to litigation. The precautions we take to prevent and detect these activities may not be effective. Any delinquencies or trading errors on the part of our employees could materially affect our business operations, financial position and/or reputation.

Our Company may complete the Allotment of the Equity Shares even if such events occur, and such events limit the Bidders' ability to sell the Equity Shares Allotted pursuant to the Issue or cause the trading price of the Equity Shares to decline on listing.

EXTERNAL RISK FACTORS

After this Issue, the price of the Equity Shares may be highly volatile, or an active trading market for the Equity Shares may not develop.

The price of the Equity Shares on the stock exchange may fluctuate as a result of the factors, including:

- Volatility in the India and global capital market;
- Company's results of operations and financial performance;
- Performance of Company's competitors;
- Adverse media reports on Company;
- Changes in our estimates of performance or recommendations by financial analysts;
- Significant developments in India's economic and fiscal policies; and
- Significant developments in India's environmental regulations.

Current valuations may not be sustainable in the future and may also not be reflective of future valuations for our industry and our Company. There can be no assurance that an active trading market for the Equity Shares will develop or be sustained after this Issue or that the price at which the Equity Shares are initially traded will correspond to the price at which the Equity Shares will trade in the market subsequent to this Issue.

49. Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, change in regulatory framework, inflation, deflation, foreign exchange fluctuations, consumer credit availability, consumer debt levels, unemployment trends, terrorist threats and activities, worldwide military and domestic disturbances and conflicts, and other matters that influence consumer confidence, spending and tourism.

50. Any changes in the regulatory framework could adversely affect our operations and growth Draft Red Herring Prospects.

Our Company is subject to various regulations and policies. For details see section titled "Key Industry Regulations" beginning on page 144 of this Draft Red Herring Prospectus. Our business and this Draft Red Herring Prospectus could be materially adversely affected by changes in any of these regulations and policies, including the introduction of new laws,

policies or regulations or changes in the interpretation or application of existing laws, policies and regulations. There can be no assurance that our Company will succeed in obtaining all requisite regulatory approvals in the future for our operations or that compliance issues will not be raised in respect of our operations, either of which could have a material adverse effect on our business, financial condition and results of operations.

51. Civil disturbances, extremities of weather, regional conflicts and other political instability may have adverse effects on our operations and financial performance.

Certain events that are beyond our control such as earthquake, fire, floods and similar natural calamities may cause interruption in the business undertaken by us. Our operations and financial results and the market price and liquidity of our equity shares may be affected by changes in Indian Government policy or taxation or social, ethnic, political, economic or other adverse developments in or affecting India.

52. The price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not develop.

Prior to this Issue, there has been no public market for our Equity Shares. Our Company and the Book Running Lead Manager have appointed S S Securities Limited as Designated Market Maker for the equity shares of our Company. However, the trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India's fiscal regime, volatility in the Indian and global securities market, performance of our competitors, the Indian Capital Markets and Finance industry, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnership, joint ventures, or capital commitments.

53. Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse impact on our business, financial condition and results of operations.

Taxes and other levies imposed by the Central or State Governments in India that impact our industry include income tax and GST and other taxes, duties or surcharges introduced on a permanent or temporary basis from time to time. There can be no assurance that these tax rates/slab will continue in the future. Any changes in these tax rates/slabs could adversely affect our financial condition and results of operations.

54. If inflation were to rise in India, we might not be able to increase the prices of our products at a proportional rate in order to pass costs on to our clients thereby reducing our margins.

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of transportation, wages, raw materials and other expenses relevant to our business. High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to adequately pass on to our clients, whether entirely or in part, and may adversely affect our business and financial condition. In particular, we might not be able to reduce our costs or entirely offset any increases in costs with increases in prices for our products. In such case, our business, results of operations, cash flows and financial condition may be adversely affected. Further, the Government has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

55. Significant differences exist between Indian GAAP and AS, on one hand, and other accounting principles, such as U.S. GAAP, IFRS and IndAS, on the other hand, which may be material to investors' assessments of our financial condition.

Our restated financial statements for the period between April 1, 2023 to December 31, 2023 as well as for the years ended Financial Years 2023, 2022 and 2021 have been prepared in accordance with the AS, read with the Companies (Accounting Standards) Rules, 2015. We have not attempted to quantify the impact of US GAAP or IFRS or IndAS on the financial data included in this Draft Red Herring Prospectus, nor do we provide a reconciliation of our financial statements to those of US GAAP or IFRS. IndAS, US GAAP and IFRS differ in significant respects from AS. Accordingly, the degree to which the Restated Financial Statements included in this Draft Red Herring Prospectus will provide meaningful information is entirely dependent on the reader's level of familiarity with Indian accounting practices. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Draft Red Herring Prospectus should accordingly be limited.

There can be no assurance that these tax rates/slab will continue in the future. Any changes in these tax rates/slabs could adversely affect our financial condition and results of operations.

57. There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.

Once listed, we would be subject to circuit breakers imposed by stock exchanges in India, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index - based market - wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on circuit breakers is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchanges do not inform us of the percentage limit of the circuit breaker in effect from time to time, and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

58. The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the issue price and you may not be able to sell your Equity Shares at or above the Issue Price.

The Issue Price of our Equity Shares is ₹[●]. This price is being based on numerous factors (For further information, please refer chapter titled “Basis for Issue Price” beginning on page 98 of this Draft Red Herring Prospectus and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price include without limitation the following:

- b) Changes in revenue or earnings estimates or publication of research reports by analysts;
- c) Speculation in the press or investment community;
- d) General market conditions; and
- e) Domestic and international economic, legal and regulatory factors unrelated to our performance.

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the BSE SME Platform. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

60. Sale of Equity Shares by our Promoter or other significant shareholder(s) may adversely affect the Trading price of the Equity Shares.

Any instance of disinvestments of equity shares by our Promoters or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

61. An outbreak of other infectious or virulent diseases, if uncontrolled, may have an adverse effect on our operations.

An outbreak of other infectious or virulent diseases, such as severe acute respiratory syndrome, the COVID-19 virus and its variants, the H1N1 virus, avian influenza (bird flu), the Zika virus or the Ebola virus, if uncontrolled, may

have a material adverse effect on the economies of certain countries and our operations. If any of our employees or the employees of our suppliers and/or customers are infected with such diseases or if a significant portion of our workforce refuses to work for fear of contracting an infectious disease, our Company, our suppliers and/or our customers may be required to shut down operations for a period of time, and this could adversely affect our business, results of operations and financial condition.

62. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required.

Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection or a tax clearance certificate from the income tax authority. Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020, issued by the DPIIT, Government of India, investments where the beneficial owner of the Equity Shares is situated in or is a citizen of a country which shares land border with India, can only be made through the Government approval route, as prescribed in FDI Policy. These investment restrictions shall also apply to subscribers of offshore derivative instruments. We cannot assure you that any required approval from the RBI or any other governmental agency can be obtained on any particular terms or at all.

63. Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

64. Financial instability in Indian Financial Markets could adversely affect our Company's results of operation and financial condition.

In this globalized world, the Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, say in the United States of America, Europe, China or other emerging economies, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil. Any prolonged financial crisis may have an adverse impact on the Indian economy, thereby resulting in a material and adverse effect on our Company's business, operations, financial condition, profitability and price of its Shares. Stock exchanges in India have in the past experienced substantial fluctuations in the prices of listed securities.

they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

66. Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency a magnitude, which may negatively affect our stock prices.

67. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection / tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

68. Natural calamities could have a negative impact on the Indian economy and cause Our Company's business to suffer.

India has experienced natural calamities such as earthquakes, tsunami, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

69. Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

70. Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

500	24	500	16.67%

However, such fund requirements and deployment of funds have not been verified or appraised by any bank, financial institution, or any other external agency or party. We may have to revise our funding requirements and deployment schedule on account of a variety of factors such as our financial and market condition, business and strategy, competition, contractual terms and conditions and negotiation with lenders, variation in cost estimates and other external factors such as changes in the business environment and interest, which may not be within the control of our management. This may entail rescheduling or revising the planned expenditure and funding requirements, including the expenditure for a particular purpose at the discretion of our management, subject to compliance with applicable laws. For details in relation to the discretion available to our management in respect of use of the Net Proceeds. In furtherance, that such alternate arrangements would be available to fund any such shortfalls. Further, in case of variations in the actual utilization of funds earmarked for the purposes set forth above, increased fund requirements for a particular purpose may be financed by surplus funds, if any, available in respect of the other purposes for which funds are being raised in the Issue, subject to compliance with applicable laws. We are yet to place orders for any of the components of the Proposed Objects. The Proposed Objects may be subject to the risk of unanticipated delays in implementation, cost overruns and other risks and uncertainties. Further, the Objects of the Issue includes orders for purchase of plant and machineries which have not yet been placed. HISTORY OF THE CASHEW

The word cashew comes from the Tupi-Indian word Acaju, which means “nut”. Instead of growing like conventional nuts, they grow out of the base of cashew apples like little tails. However, for this reason, they are the only ‘nut’ that sells solely without a shell. The outer shell causes skin irritation.

The seed has a double shell containing an allergenic phenolic resin containing an anacardic acid. This composition is a potent skin irritant. Chemically, this resin is related to the more well-known allergenic oil urushiol, a toxin in poison ivy. Some people are allergic to cashew nuts. What is much more common is the allergy to the outer coating on the fruit’s skin. The cashew was first discovered by Europeans in Brazil around 1558. Because of the irritating shells, they were thought to be inedible at first. Over time, there was a realization that it was the fruit skin, not the irritating seeds. It was the local native tribe, the Tupi-Indians that showed the Europeans otherwise. Consequently, the Portuguese were shown to roast the cashews to get the irritant off.

Europeans found the cashew seed to be quite tasty. However, they also used the cashew apple pulp to make wine. The natives had learned to eat cashews from the local capuchin monkeys. The primates use primitive tools to break the shells off and throw the nuts in a way.

The Modern History of the Cashew.

As a consequence of finding out how to reach the cashew seed, the Portuguese brought cashews to Goa in about 1560. Ultimately, the nut thrived in the new climate and then travelled to India soon after. The Indian people discovered healing properties in the nut, and cashews became very popular. In the second half of the 16th century, cashews spread to Southeast

Asia and Africa. Eventually, many countries and cultures currently depend on cashew seeds as a food staple and for commerce.

The modern history of cashew shows that they reached the United States around 1905. Afterward, cashews became popular in the mid-1920s when the General Food Corporation started to ship them regularly to the United States and Europe. Ultimately, the cashew became popular. By 1941, looking at the number of imports from India annually was 20,000 tons of cashews

GLOBAL CASHEW PRODUCTION

Cashew nuts are a popular nut. They are also the most expensive nut in the world. The cashew tree is native to South America, and today, it is grown in many countries including India, Vietnam and Nigeria. The cashew plant is a tropical evergreen that can grow up to 30 meters tall and has an average lifespan of 50 years. The cashew tree has a unique shape with leaves on the top of its branches and short leaves on the trunk that provide shade for the lower branches.

From 2010 to 2020, this statistic depicts the global production of cashew nuts (in shell). Globally, roughly 4.18 million metric tons of cashew nuts in shell were produced in 2020, an increase over 2019 output levels.

Africa produced more than half of the world's raw cashew nut output between 2014 and 2018, with West Africa accounting for 42% and East Africa accounting for 10% of annual production, respectively. Asia accounted for 43% of total annual revenue on average, while Latin America and the Caribbean accounted for 5%. Africa accounted for 63 percent of worldwide raw cashew nut production growth between 2000 and 2018.

All 46 countries that produce cashew nuts on a large scale are developing countries, including 18 of the world's least developed countries. However, not all cashew-producing countries participate equally in the global value chain. The majority of cashew nuts harvested in Africa are exported uncooked, before being shelled in primarily two countries: India and Vietnam. Two illustrations demonstrate this pattern: Africa exported 90% of worldwide raw cashew nut exports between 2014 and 2018, whereas India and Vietnam imported 98 percent of global raw cashew nut imports over the same time.

The Cashew Market size is estimated at USD 7.82 billion in 2024, and is expected to reach USD 9.20 billion by 2029, growing at a CAGR of 3.31% during the forecast period (2024-2029).

- In recent years, there has been a global trend that looks favorably at vegan and plant-based diets. People who embrace a plant-based vegan diet prioritize alternative sources of protein instead of those derived from animals, resulting in the soaring demand for nuts and nut-infused foods. An increasing number of cashew-infused product manufacturers have attracted young and old consumers with the launch of new and innovative products, such as cashew-butter yogurt in the United States and roasted spice-coated cashew kernels in India. However, the application of cashew kernels in consumers' diets has been steady in South America, with multinational manufacturers penetrating the market with assorted cashew products, suiting the healthier diet regime across the country. Brazil, on the other hand, has always been a price-sensitive consumer of cashew kernels. The resurgence in the Brazilian economy has been troubled by the mounting fiscal deficit, and thus, it is leading the consumption of cashews to depend heavily on the inflation rates.
- Increasing demand for flavored cashews and favorable government initiatives are further fueling the consumption of cashew nuts in the African region. The consumption of cashew kernels, whole or pieces, has had limited exposition to the consumers in West and East Africa, which is attributed to the untapped retail market for ready-to-eat cashews for the consumers in the region. However, the Competitive Cashew Initiative, formerly known as the African Cashew Initiative, has been playing a vital role in the marketing of high-quality raw cashew kernels in Benin, Côte d'Ivoire, Mozambique, and Ghana, which further enhanced the production and processing efficiencies in these countries in various ways, such as the promotion of SAP software in the cashew value chain in West Ghana.

Cashew Market Trends

This section covers the major market trends shaping the Cashew Market according to our research experts:

Rising Consumption of Cashew as a Healthy Snack

- Edible cashews have been used as a snack for a long time. Cashews are also used as one of the main ingredients in preparing various sweet and savory dishes, especially in Asian cuisine. Moreover, cashews are used in mueslis, energy bars, cookies, chocolates, and ice creams. Cashews are known to be high in nutrients, such as copper, which improve bone health, as one ounce of cashew contains 622 micrograms of copper. Nevertheless, cashews have an inflation-driven consumption pattern, as reported by the International Nut and Dried Fruit Council.
- Cashews are relatively high in fiber compared to peanuts, and they help gain a healthy weight by improving digestive function. Such high-value nutrition has prompted snack manufacturers to launch several cashew-based snacks to meet the demand, such as ready-to-drink cashew milk, which acts as a lactose-free milk substitute. Due to increasing health consciousness among consumers in the European region, there has been a growing trend of cashew nut consumption, making the region one of the leading consumers in the world.
- To meet the rising global demand for cashew nuts, many countries have increased their production capacities across the world. According to National Horticulture Board, in India, Cashew production has increased from 0.70 million metric tons in 2020 to 0.77 million metric tons in 2021. Therefore, the increased consumption of cashew nuts as a healthy snack and rising production are anticipated to drive the cashew market in the coming years.

Asia-Pacific Dominates the Market

Asia-Pacific has been a consistent importer of cashew kernels despite the presence of large cashew-producing countries, such as India and Vietnam, in the region. In terms of consumption, India is the leading country in the world. As Vietnam leads in the production of cashews worldwide, it is also a significant exporter of the same to other international markets.

Asia-Pacific is the largest consumer of cashew nuts in the world. In recent years, there has been an increasing interest in the use of cashew nuts in regular diets and healthy ready-to-eat snacks. The rising number of manufacturers producing innovative cashew-based consumables has taken both young and geriatric consumers by stride. For example, roasted and spice-coated cashew nuts that appeal to the local palate were introduced in India.

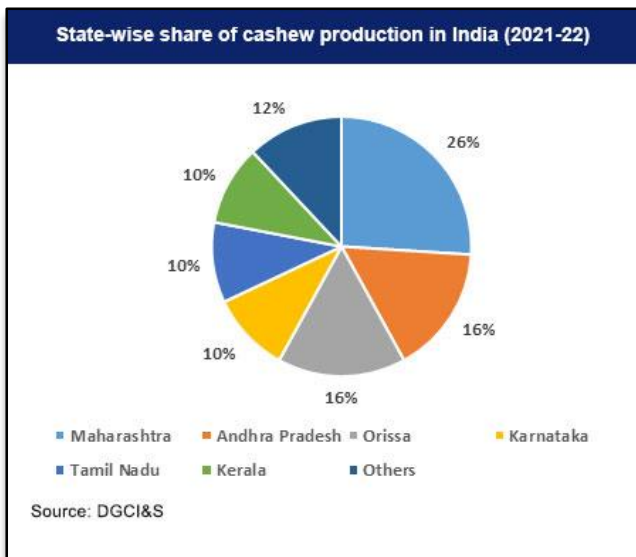

The demand for cashews in Asia has persistently increased as the imports for shelled cashews increased exponentially by over 700% from 4,321 metric tons in 2017 to 30,688 metric tons in 2021 in China, with Vietnam being the major import partner according to the ITC trade map. China leads the region in cashew import, followed by Japan, Thailand, and India, respectively.

Nuts have become a primary component in the Chinese diet since the inception of the National Health Policy called 'Dietary Guidelines for Chinese Residents,' which emphasizes daily nut consumption. The increased cashew nut imports may also be attributed to the new product campaign of selling 'daily nuts,' including cashews, in ready-to-eat packages, by Chinese nut manufacturers, thus driving the cashew nut market in the country.

CASHEW INDUSTRY – AN INDIAN OVERVIEW

India is among the largest cashew-producing countries in the world. The cashew industry has large economic significance as it employs more than 10 lakh people on farms and factories in rural areas. The cultivation of cashews in India covers a total of 0.7 million hectares of land, and the country produces over 0.8 million tonnes (MT) annually. Between 2019-20 and 2021-22, India's cashew nut production grew from 0.70 million tonnes (MT) to 0.77 million tonnes (MT). In India, cashew cultivation is spread along the coastal regions of the peninsula. Cashew is mainly grown in states like Maharashtra, Kerala, Karnataka, Tamil Nadu, Andhra Pradesh, Goa, Orissa, West Bengal, and some parts of the North-Eastern region. According to data published by the National Horticulture Board (NHB), Maharashtra stands first in annual cashew nut production during 2021-22 at 0.20 million tonnes (MT), growing from 0.19 million tonnes cashew nut produced in 2020-21.

Besides the vast scale of cashew production, India is also known for pioneering cashew processing and exporting cashew kernels across the globe. The cashew processing industry was earlier concentrated in Kollam (Kerala), Mangalore (Karnataka), Goa, and Vettapalam (Andhra Pradesh), but now it is spread across many states of India. Over the years, India has emerged as the global processing hub for the cashew industry.

EXPORT TREND

India is the largest cashew exporter, with more than 15% of the world's export share. India primarily exports Cashew Kernels and very small quantities of Cashewnut shell liquid. During 2022-23, the cashew exports by value stood at US\$ 363.19 million as against US\$ 453.1 million in 2021-22, registering a decline of 19.84%. Between April and July 2023, cashew exports stood at US\$ 110.51 million

In terms of volume, India's cashew exports increased from 70.5 million kg in 2020-21 to 76.8 million kg in 2021-22 and then declined to 70.21 million kg in 2022-23. Importing of raw cashew nuts has played a key role in the growth of the Indian cashew industry, which accounts for almost half of the domestic and export demand for cashew kernels in the country. To address the same, the Department of Agriculture, Cooperation and Farmers Welfare (DAC&FW), under the Mission for Integrated Development of Horticulture (MIDH) and Rashtriya Krishi Vikas Yojana (RKVY), had implemented various initiatives that led to increased domestic production of cashew. It includes massive area expansion under cashew cultivation and replacing senile cashew plantations with high-yielding varieties in traditional and non-traditional states. DAC&FW also approved the roadmap program to extend the cashew cultivation area by 1.20 lakh hectares presented by the Directorate of Cashew nut & Cocoa Development (DCCD).

EXPORT DESTINATIONS

India exports cashews to over 60 countries spread across different parts of the world. The key export destinations for India are UAE, Japan, Netherlands, Saudi Arabia, the USA, the UK, Canada, France, Israel, and Italy. As per the APEDA statistics on the exports of cashew kernels and cashew nut shell liquid, UAE was the largest importer of Indian cashews, valued at US\$ 127 million, accounting for 34.9% of overall exports during 2022-23 as compared to US\$ 131.5 million in the previous year. In FY23, in volume terms, India's cashew exports to UAE stood at 17.21 million kg, growing by 3.54% from 16.6 million kg of exports recorded in the previous year.

The Netherlands and Japan were among the top three importers of Indian cashews, with a share of exports at 10% each. India's cashew exports in FY23 to Japan and the Netherlands were valued at US\$ 36 million each. The top 10 importing countries of Indian cashews had a share of 78% of the total exports, which implies the huge significance of traditional markets. This strong growth in cashew exports across export destinations continues to drive economic growth and employment generation in India's key cashew-growing states.

CASHEW KERNELS

Cashew kernels are obtained through processing (roasting / steaming, shelling and peeling) of raw cashewnuts. Cashew Kernels, for commercial purposes, are graded based on their colour, shape and size. The grade details are given under the heading - Commercial Information. Cashew kernels are also available as roasted, salted, flavoured and coated with spices, honey, etc. Value added products like cashew powder, cashew butter, cashew drink, etc. are also available in the market.

Standard specifications for Indian cashew kernels for export have been laid down by the Government of India under the Export (Quality Control and Inspection) Act 1963. Cashew Kernels are graded into white/scorched wholes, pieces, splits, butts etc. Depending on the shape, size & colour of the kernel. The Govt.of India Act prescribes 33 different grades of cashew kernels. Only 26 grades are commercially available and exported. They are:

The individual products under this sub-head are as below:

- W - 180, is the ' King of Cashew ' - They are larger in size and very expensive.
- W - 210, are popularly known as ' Jumbo ' nuts.
- W - 240, it is an attractive grade which is reasonably priced.
- W - 320, are the most popular among cashew kernels and highest in terms of availability, worldwide.
- W - 450, are the smallest and cheapest white whole kernels and hence the favourite among low priced Whole grades.

Scorched wholes are another grade of cashew kernels, which have a slight brown colour due to longer roasting. They have all the other characteristics of white kernels and have the same nutritional qualities. Butts, splits and pieces are priced lower and are ideal for cooking, preparation of sweets and savoury snacks.

GOVERNMENT INITIATIVES

The Government of India and the cashew export promotion council have undertaken several initiatives for the ease of exports and growth of the cashew industry. As non-financial assistance to exporters, many trade delegations, buyer-seller meets, fairs, development workshops, and research and development data are provided. Additionally, in 2018, the Basic Customs Duty on raw cashew nut was reduced to 2.5% from the previous 5%, and the Goods and Services Tax (GST) on the same was reduced to 5% from 12%.

As the cashew industry's domestic demand and exports are heavily dependent on imported raw cashew nuts, the Government of India has taken several steps to support efficient sourcing. These include:

- Changes in import policy for cashew kernel (both broken and whole)
- Revision of the standard inputs output norms (SION) for cashew exports
- Approval of Medium-Term Framework scheme for process mechanization and automation of cashew processing units with a financial outlay of Rs. 60 crore (US\$ 8 million)
- Allowing duty-free import of raw cashew nuts under Duty-Free Tariff Preference (DFTP) Scheme from least developed countries (LDCs)
- The government has also extended financial assistance to the Cashew Export Promotion Council of India (CEPCI) for organizing buyer-seller meet (BSM) and participation in international fairs under Market Access Initiative (MAI) scheme, which supports tapping new markets.

GOVERNMENT BODY

The Cashew Export Promotion Council of India (CEPCI)

The Government of India established the CEPCI in 1955 with the objective of promoting cashew kernels and Cashew nut shell liquid in India. The council provides trade information and statistics to its members and is Operating the government's five-year plan scheme for providing financial assistance to the member exporters.

BRIEF DESCRIPTION ABOUT CASHEW PROCESS -

<p>1. Receive Raw Cashew Nuts (RCN)</p> 	<p>Our company receives raw cashew nuts in the initial phase of the cashew nut processing chain. The process begins with the procurement of freshly harvested cashew nuts sourced from farms and suppliers domestically as well internationally and received at the processing facility.</p>
<p>2. Sun Drying</p> 	<p>Once the cashew nuts are separated from Cashew apple, they are spread on the platform to expose them to sunlight. This is done for a day or two depending on the weather and moisture content in Raw Cashew nuts. Exposure to sunlight turns the cashew nuts brown and is sign that moisture in Cashew nuts has reduced to 7-8% and are completely dried. This also helps to reduce the oil content in shell. Post drying, RCNs are stored in gunny bags till further processing.</p>
<p>3. Grading</p> 	<p>After sun drying, the cashew nuts are sorted and graded based on various factors such as size, colour, and quality. This ensures uniformity in the final product. Raw Cashews are graded for sizes to using sizing machine. This helps in even cutting of nuts after roasting. Trays are used to collect Cashews of different sizes.</p>
<p>4. Roasting</p> 	<p>The graded cashew nuts are roasted to remove the outer shell or hull. Roasting also enhances the flavor of the cashew kernels. Roasting is carried out by steam roasting process for 20 minutes at temperature of 90° Celsius.</p>

5. Nature drying/ cooling of cooked RCN

After roasting, the cashew nuts are allowed to cool naturally. This step helps to stabilize the nuts and make them easier to handle in subsequent processing stages. Once the raw nuts are roasted, they are taken into separate room and are spread on the floor. Roasted nuts are cooled for 2-3 days and then sent for next cutting.

6. Shell Cutting

Once cooled, the roasted cashew nuts undergo shell cutting to extract the edible kernel. This process involves cracking the outer shell without damaging the kernel inside. Roasted and cooled nuts are fed into cutting machines to separate kernels from the shells. Cutting can be done by manual labours or semi-automatic or automatic machine. Skilled labours are required to get maximum unbroken kernel output. This process in our processing unit is entirely handled by women labours. The cashews nuts are then manually removed from the shell. Un-cut cashews are sent back to cutting machine.

7. Oscillator Cum Vibrator

Vibrating equipment is used to separate the waste shells from the edible kernels. The shells are conveyed away from the processing line for disposal. The cooked raw cashew after shelling is separated into empty shells, cashew kernels, uncut and half cut. Oscillator separates the removed cashew kernels easily. Vibrator separates the uncut, half cut and empty shells. With this system lot of manual labour can be eliminated for sorting and makes the process easy and time efficient.

Waster Shell Conveyor

After separating the cashew kernels and the shells. Shells will be carried out using this conveyor.

8. Working Tables

The kernels are manually scooped and inspected on working tables. This allows operators to separate whole kernels from any uncut or damaged pieces. The utilization of working tables plays a pivotal role in the efficient processing of cashew nuts within the industry. These tables provide a dedicated workspace where skilled personnel can perform various tasks with precision and organization. In the context of cashew nut processing, working tables are often equipped with specialized tools and equipment necessary for activities such as grading, sorting, and quality control.

➤ Manual Scooping of Kernels & Separating un-cuts

In the final stages of cashew nut processing, some kernels may persistently cling to the inner shell and necessitate meticulous removal by factory staff. This delicate operation is known as scooping, a manual process that demands precision and skill. The scooping tool, typically a sharp needle, is employed to delicately extract the cashew kernel from its stubborn enclosure. The intricate nature of this task requires the expertise of trained personnel who adeptly navigate the contours of the shell to retrieve the remaining kernels. Despite technological advancements in other facets of cashew processing, scooping remains a hands-on process, underscoring the importance of human expertise in ensuring the quality and completeness of the final cashew product.

9. Drying Cashew Kernels

The separated cashew kernels are dried further to remove any remaining moisture. Proper drying helps to extend the shelf life of the kernels and prevent spoilage. The cut cashews are then dried in hot chamber for upto 8 hours with a temperature of around 81° Celsius. Post drying, the nuts are cooled for one day.

10. Humidifier

During the drying process, a humidifier may be used to control the humidity levels in the processing environment. This ensures optimal drying conditions for the cashew kernels. The cashew kernels are either exposed atmospheric or artificial humidity to increase the moisture content from 3% to 5%. This is done to make nuts less fragile to minimize the risk of breakage during transport.

11. Peeling

After drying, the cashew kernels undergo a peeling process to remove the thin outer skin or testa. This step improves the appearance and texture of the kernels. This is done by using automatic peeling machine and skipped kernels are peeled manually using a knife.

12. Separator

A separator is used to separate whole cashew kernels from any broken or fragmented pieces. This ensures that only high-quality kernels are included in the final product. This specialized equipment employs a systematic approach to segregate these components, ensuring the final product meets the desired quality standards. The separator's functionality involves precise mechanisms that distinguish between whole kernels, halves, and the outer testa, allowing for efficient sorting. This step is crucial in achieving uniformity and enhancing the overall quality of the processed cashew kernels.

13. Cashew Kernels Grader

The graded cashew kernels are sorted based on size and quality using specialized grading equipment. This ensures uniformity in the final product packaging. Cashew kernels undergo a meticulous grading process, where they are categorized into distinct classifications based on their shape, size, and color. This grading system includes designations such as white/scorched wholes, pieces, splits, butts, and more.

14. Packing

The sorted and graded cashew kernels are packaged into bags or containers for distribution and sale. Proper packaging helps to protect the kernels from contamination and ensures freshness until they reach the consumer. Packaging cashew nuts for storage, transportation, and sale requires careful consideration to maintain the product's quality and freshness.

Such efforts aim to enhance brand awareness among consumers, ultimately driving marketing effectiveness. Branding not only elevates customer satisfaction and loyalty but also fosters greater brand recognition, which are pivotal factors in sustaining and expanding market reach.

Procuring Raw Material in advance to manage price fluctuation and market demands

To effectively manage price fluctuations and meet market demands, our company adopts a proactive approach to procuring raw materials, particularly Raw Cashew Nuts (RCN), which serve as the primary ingredient for our products. The Ivory Coast, renowned as the leading global producer of RCN, is a key source for us, with India following closely as the second-largest producer. Given the inherent susceptibility of RCN prices to various factors such as seasonal variations, weather conditions, and market dynamics, we recognize the importance of strategic procurement practices. Rather than committing to long-term supply agreements, we prefer to engage in short-term contracts, allowing us to adapt swiftly to changing market conditions.

Quality remains paramount in our procurement strategy, with a keen focus on the kernel within the shell. While factors such as color, shape, brightness, and exterior appearance are considered, the evaluation of RCN quality primarily revolves around four key criteria: Out-turn, defective nut rate, nut count, and moisture content. By aligning our procurement activities with market fluctuations and leveraging our understanding of RCN quality parameters, we aim to optimize our raw material costs while ensuring a consistent and high-quality supply chain. This approach enables us to remain agile and responsive in meeting the evolving needs of our customers and the demands of the market.

Whereas if the supply of goods or services happens between the states called as inter-state transactions and IGST will be collected. Exports are considered as zero-rated supply and imports are levied the same taxes as domestic goods and services adhering to the destination principle in addition to the Customs Duty which has not been subsumed in the GST.

National Environmental Policy, 2006

The Policy seeks to extend the coverage, and fill in gaps that still exist, in light of present knowledge and accumulated experience. This policy was prepared through an intensive process of consultation within the Government and inputs from experts. It does not displace but builds on the earlier policies. It is a statement of India's commitment to making a positive contribution to international efforts. This is a response to our national commitment to a clean environment, mandated in the Constitution in Articles 48 A and 51 A (g), strengthened by judicial interpretation of Article 21. The dominant theme of this policy is that while conservation of environmental resources is necessary to secure livelihoods and well-being of all, the most secure basis for conservation is to ensure that people dependent on particular resources obtain better livelihoods from the fact of conservation, than from degradation of the resource. Following are the objectives of National Environmental Policy:—

- Conservation of Critical Environmental Resources
- Intra-generational Equity: Livelihood Security for the Poor

- Inter-generational Equity
- Integration of Environmental Concerns in Economic and Social Development
- Efficiency in Environmental Resource Use
- Environmental Governance
- Enhancement of resources for Environmental Conservation

Historical cost comprises of the purchase price including duties and non-refundable taxes, borrowing cost if capitalization criteria are met, directly attributable expenses incurred to bring the asset to the location and condition necessary for it to be capable of being operated in the manner intended by management and initial estimate of decommissioning, restoring and similar liabilities.

Subsequent costs related to an item of property, plant and equipment are recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the group and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognized when replaced. All other repairs and maintenance are recognized in statement of profit and loss during the reporting period when they are incurred.

An item of property, plant and equipment is derecognized on disposal or when no future economic benefits are expected from its use or disposal. The gains or losses arising from de-recognition are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the statement of profit and loss when the asset is de-recognized.

g. DEPRECIATION AND AMORTISATION

Depreciation is calculated using the Straight Line method over their estimated useful lives. The estimates of useful lives of tangible assets are as follows:

Class of Assets	Useful life as per schedule II	Useful Life as per Company
Leasehold Land		99 years
Building	60 Years	60 Years
Office equipment	5 Years	5 years
Computers	3 years	3 years
Electrical Installations	10 years	10 years
Furniture and fixtures	10 years	10 years
Plant and Machinery	15 years	15 years
Vehicles	8 years	8 years

h. INVENTORIES:

Inventories of traded goods are valued at lower of cost and net realizable value. Cost comprises of all costs of purchase and other costs incurred in bringing the inventories to their present location and condition . Cost formula used is FIFO/weighted average basis.

Net realizable value is the estimated selling price in the ordinary course of business, less estimated cost necessary to make the sale.

Annexure 4: Statement of Consolidated Notes to the Restated Financial Information

i. IMPAIRMENT OF ASSETS:

The Group assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) net selling price and its value in use. The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining net selling price, recent market transactions are taken into account, if available. If no such transactions can be identified, an appropriate valuation model is used.

The Company bases its impairment calculation on detailed budgets and forecast calculations which are prepared separately for each of the Company's cash-generating units to which the individual assets are allocated. These budgets and forecast calculations are generally covering a period of five years. For longer periods, a long term growth rate is calculated and applied to project future cash flows after the fifth year.

Impairment losses of continuing operations are recognised in the statement of profit and loss.

An assessment is made at each reporting date as to whether there is any indication that previously recognised impairment losses may no longer exist or may have decreased. If such indication exists, the Company estimates the asset's or cash-generating unit's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the statement of profit and loss.

Annexure 4: Statement of Consolidated Notes to the Restated Financial Information

j. RETIREMENT BENEFITS:

(i) Short-term employee benefits

Short term employee benefits are recognised as an expense at the undiscounted amount in the statement of Profit and loss for the year which includes benefits like salary, wages, bonus and are recognised as expenses in the period in which the employee renders the related service

(ii) Post employment benefits:

Defined Contribution Plan

'Retirement benefit in the form of provident fund is a defined contribution scheme. The Company has no obligation, other than the contribution payable to the provident fund. The Company recognises contribution payable to the provident fund scheme as an expenditure, when an employee renders the related service. If the contribution payable to the scheme for service received before the balance sheet date exceeds the contribution already paid, the deficit payable to the scheme is recognised as a liability after deducting the contribution already paid. If the contribution already paid exceeds the contribution due for services received before the balance sheet date, then excess is recognised as an asset to the extent that the pre payment will lead to, for example, a reduction in future payment or a cash refund.

Defined benefit Plans

Unfunded Plan: The Company has a defined benefit plan for Post-employment benefit in the form of Gratuity.

Liability for the above defined benefit plan is provided on the basis of valuation, as at the Balance Sheet date, carried out by an independent actuary. The actuarial method used for measuring the liability is the Projected Unit Credit method.

Accumulated leave, which is expected to be utilised within the next 12 months, is treated as short-term employee benefit. The Company measures the expected cost of such absences as the additional amount that it expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

'The Company recognises termination benefit as a liability and an expense when the Company has a present obligation as a result of past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. If the termination benefits fall due more than 12 months after the balance sheet date, they are measured at present value of future cash flows using the discount rate determined by reference to market yields at the balance sheet date on government bonds.

k. BORROWING COST

Borrowing costs are interest, commitment charges and other costs incurred by an enterprise in connection with Short Term/ Long Term borrowing of funds. Borrowing cost directly attributable to acquisition or construction of qualifying assets are capitalized as a part of the cost of the assets, upto the date the asset is ready for its intended use. All other borrowing costs are recognized in the Statement of Profit and Loss in the year in which they are incurred.

Annexure 4: Statement of Consolidated Notes to the Restated Financial Information

I. EARNINGS PER SHARE:

The earnings in ascertaining the Company's EPS comprises the net profit after tax attributable to equity shareholders and includes the post tax effect of any extraordinary items. The number of shares used in computing basic EPS is the weighted average number of shares outstanding during the year.

Diluted earnings per share is computed by dividing the profit/(loss) after tax attributable to Equity Shareholders (including the post tax effect of extra ordinary items, if any) as adjusted for dividend, interest and other charges to expense or income relating to the dilutive potential equity shares, by the weighted average number of equity shares which could have been issued on conversion of all dilutive potential equity shares. Potential equity shares are deemed to be dilutive only if their conversion to equity shares would decrease the net profit per share from continuing ordinary operations. Potential dilutive equity shares are deemed to be converted as at the beginning of the period, unless they have been issued at a later date. Dilutive potential equity shares are determined independently for each period.

m. TAXATION:

Tax expense for the year comprising current tax & deferred tax are considered in determining the net profit for the year. Provision is made for current tax and based on tax liability computed in accordance with relevant tax laws applicable to the Company. Provision is made for deferred tax for all timing difference arising between taxable incomes & accounting income at currently enacted or substantively enacted tax rates, as the case may be. Deferred tax assets (other than in situation of unabsorbed depreciation and carry forward losses) are recognized only if there is reasonable certainty that they will be realized and are reviewed for the appropriateness of their respective carrying values at each Balance Sheet date. Deferred tax assets, in situation of unabsorbed depreciation and carry forward losses under tax laws are recognised only to the extent that where is virtual certainty supported by convincing evidence that sufficient future taxable income will be available against which such deferred tax assets can be recognised. Deferred Tax Assets and Deferred Tax Liability are been offset wherever the Company has a legally enforceable right to set off current tax assets against current tax liability and where the Deferred Tax Asset and Deferred Tax Liability relate to Income taxes is levied by the same taxation authority.

n. PROVISIONS, CONTINGENT LIABILITIES AND CONTINGENT ASSETS:

(i) Provisions

A provisions is recognized when the Company has a present obligation as a result of past event, if it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of obligation.

(ii) Contingent Liability

Contingent Liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only on the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle or a reliable estimate of the amount cannot be made.

Annexure 4: Statement of Consolidated Notes to the Restated Financial Information

o. SEGMENT REPORTING

The Company identifies primary segments based on the dominant source, nature of risks and returns and the internal organisation and management structure.

The accounting policies adopted for segment reporting are in line with the accounting policies of the Company. Segment revenue, segment expenses, segment assets and segment liabilities have been identified to segments on the basis of their relationship to the operating activities of the segment.

Inter-segment revenue is accounted on the basis of transactions which are primarily determined based on market / fair value factors.

Revenue, expenses, assets and liabilities which relate to the Company as a whole and are not allocable to segments on reasonable basis have been included under "unallocated revenue / expenses / assets / liabilities". (Refer note 31)

p. CASH & CASH EQUIVALENTS

Cash & cash equivalents comprise cash and cash on deposit with banks and corporations. The company considers all highly liquid investments with a remaining maturity at the date of purchase of three months or less and that are readily convertible to known amount of cash to be cash equivalents.

q. LEASES

Leases where the Lessor effectively retains substantially all the risks and benefits of ownership of the Leased Asset, are classified as 'Operating Leases'. Lease rentals with respect to assets taken on 'Operating Lease' are charged to Statement of Profit and Loss on a straight line basis over the lease term.

Leases which effectively transfer to the Company substantially all the risks and benefits incidental to the ownership of the leased item are classified as 'Finance Lease'. Assets acquired on Finance Lease which substantially transfer all the risks and rewards of ownership to the Company are capitalized as assets by the Company at the lower of the fair value and the present value of the minimum lease payment and a liability is created for an equivalent amount. Lease rentals payable is apportioned between the liability and finance charge so as to obtain a constant periodic rate of interest on the outstanding liability for each year.

r. Government Grants

Government grants / subsidies received towards specific fixed assets have been deducted from the gross value of the concerned fixed assets and grant / subsidies received during the year towards revenue expenses have been reduced from respective expenses.

Export benefits / incentives are accounted on accrual basis. Accordingly, estimated export benefits against exports affected during the year are taken into account as estimated incentives accrued till the end of the year. In case of License not revalidated after the date of expiry, the proportionate export benefit / incentive taken credit in earlier year(s) is written off in the year of expiry of License.

f. PROPERTY, PLANT AND EQUIPMENT AND INTANGIBLE ASSETS

(i) Tangible Assets

Property, plant and equipment are stated at historical cost less accumulated depreciation, and accumulated impairment loss, if any. Historical cost comprises of the purchase price including duties and non-refundable taxes, borrowing cost if capitalization criteria are met, directly attributable expenses incurred to bring the asset to the location and condition necessary for it to be capable of being operated in the manner intended by management and initial estimate of decommissioning, restoring and similar liabilities.

Subsequent costs related to an item of property, plant and equipment are recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the group and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognized when replaced. All other repairs and maintenance are recognized in statement of profit and loss during the reporting period when they are incurred.

An item of property, plant and equipment is derecognized on disposal or when no future economic benefits are expected from its use or disposal. The gains or losses arising from de-recognition are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the statement of profit and loss when the asset is de-recognized.

g. DEPRECIATION AND AMORTISATION

Depreciation is calculated using the Straight Line method over their estimated useful lives. The estimates of useful lives of tangible assets are as follows:

Class of Assets	Useful life as per schedule II	Useful Life as per Company
Leasehold Land		99 years
Building	60 Years	60 Years
Office equipment	5 Years	5 years

Annexure 4: Statement of Notes to the Restated Standalone Financial Information

i. IMPAIRMENT OF ASSETS:

The Company assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) net selling price and its value in use. The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining net selling price, recent market transactions are taken into account, if available. If no such transactions can be identified, an appropriate valuation model is used.

The Company bases its impairment calculation on detailed budgets and forecast calculations which are prepared separately for each of the Company's cash-generating units to which the individual assets are allocated. These budgets and forecast calculations are generally covering a period of five years. For longer periods, a long term growth rate is calculated and applied to project future cash flows after the fifth year.

Impairment losses of continuing operations are recognised in the statement of profit and loss.

An assessment is made at each reporting date as to whether there is any indication that previously recognised impairment losses may no longer exist or may have decreased. If such indication exists, the Company estimates the asset's or cash-generating unit's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the statement of profit and loss.

Annexure 4: Statement of Notes to the Restated Standalone Financial Information

j. RETIREMENT BENEFITS:

(i) Short-term employee benefits

Short term employee benefits are recognised as an expense at the undiscounted amount in the statement of Profit and loss for the year which includes benefits like salary, wages, bonus and are recognised as expenses in the period in which the employee renders the related service

(ii) Post employment benefits:

Defined Contribution Plan

'Retirement benefit in the form of provident fund is a defined contribution scheme. The Company has no obligation, other than the contribution payable to the provident fund. The Company recognises contribution payable to the provident fund scheme as an expenditure, when an employee renders the related service. If the contribution payable to the scheme for service received before the balance sheet date exceeds the contribution already paid, the deficit payable to the scheme is recognised as a liability after deducting the contribution already paid. If the contribution already paid exceeds the contribution due for services received before the balance sheet date, then excess is recognised as an asset to the extent that the pre payment will lead to, for example, a reduction in future payment or a cash refund.

Defined benefit Plans

Unfunded Plan: The Company has a defined benefit plan for Post-employment benefit in the form of Gratuity. Liability for the above defined benefit plan is provided on the basis of valuation, as at the Balance Sheet date, carried out by an independent actuary. The actuarial method used for measuring the liability is the Projected Unit Credit method.

Accumulated leave, which is expected to be utilised within the next 12 months, is treated as short-term employee benefit. The Company measures the expected cost of such absences as the additional amount that it expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

'The Company recognises termination benefit as a liability and an expense when the Company has a present obligation as a result of past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. If the termination benefits fall due more than 12 months after the balance sheet date, they are measured at present value of future cash flows using the discount rate determined by reference to market yields at the balance sheet date on government bonds.

k. BORROWING COST

Borrowing costs are interest, commitment charges and other costs incurred by an enterprise in connection with Short Term/ Long Term borrowing of funds. Borrowing cost directly attributable to acquisition or construction of qualifying assets are capitalized as a part of the cost of the assets, upto the date the asset is ready for its intended use. All other borrowing costs are recognized in the Statement of Profit and Loss in the year in which they are incurred.

Annexure 4: Statement of Notes to the Restated Standalone Financial Information

I. EARNINGS PER SHARE:

The earnings in ascertaining the Company's EPS comprises the net profit after tax attributable to equity shareholders and includes the post tax effect of any extraordinary items. The number of shares used in computing basic EPS is the weighted average number of shares outstanding during the year.

Diluted earnings per share is computed by dividing the profit/(loss) after tax attributable to Equity Shareholders (including the post tax effect of extra ordinary items, if any) as adjusted for dividend, interest and other charges to expense or income relating to the dilutive potential equity shares, by the weighted average number of equity shares which could have been issued on conversion of all dilutive potential equity shares. Potential equity shares are deemed to be dilutive only if their conversion to equity shares would decrease the net profit per share from continuing ordinary operations. Potential dilutive equity shares are deemed to be converted as at the beginning of the period, unless they have been issued at a later date. Dilutive potential equity shares are determined independently for each period.

m. TAXATION:

Tax expense for the year comprising current tax & deferred tax are considered in determining the net profit for the year. Provision is made for current tax and based on tax liability computed in accordance with relevant tax laws applicable to the Company. Provision is made for deferred tax for all timing difference arising between taxable incomes & accounting income at currently enacted or substantively enacted tax rates, as the case may be. Deferred tax assets (other than in situation of unabsorbed depreciation and carry forward losses) are recognized only if there is reasonable certainty that they will be realized and are reviewed for the appropriateness of their respective carrying values at each Balance Sheet date. Deferred tax assets, in situation of unabsorbed depreciation and carry forward losses under tax laws are recognised only to the extent that where is virtual certainty supported by convincing evidence that sufficient future taxable income will be available against which such deferred tax assets can be recognised. Deferred Tax Assets and Deferred Tax Liability are been offset wherever the Company has a legally enforceable right to set off current tax assets against current tax liability and where the Deferred Tax Asset and Deferred Tax Liability relate to Income taxes is levied by the same taxation authority.

n. PROVISIONS, CONTINGENT LIABILITIES AND CONTINGENT ASSETS:

(i) Provisions

A provisions is recognized when the Company has a present obligation as a result of past event, if it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of obligation.

(ii) Contingent Liability

Contingent Liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only on the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle or a reliable estimate of the amount cannot be made.

(ii) Contingent Assets

Annexure 4: Statement of Notes to the Restated Standalone Financial Information

The Company identifies primary segments based on the dominant source, nature of risks and returns and the internal organisation and management structure.

The accounting policies adopted for segment reporting are in line with the accounting policies of the Company. Segment revenue, segment expenses, segment assets and segment liabilities have been identified to segments on the basis of their relationship to the operating activities of the segment.

Inter-segment revenue is accounted on the basis of transactions which are primarily determined based on market / fair value factors.

Revenue, expenses, assets and liabilities which relate to the Company as a whole and are not allocable to segments on reasonable basis have been included under “unallocated revenue / expenses / assets / liabilities”.

As Company is presenting Consolidated restated financial information, Segment reporting is exempted to be reported in Standalone restated financial information and thereby the same is only reported in Consolidated restated financial information as required by Accounting Standard 17.

p. CASH & CASH EQUIVALENTS

Cash & cash equivalents comprise cash and cash on deposit with banks and corporations. The company considers all highly liquid investments with a remaining maturity at the date of purchase of three months or less and that are readily convertible to known amount of cash to be cash equivalents.

q. LEASES

Leases where the Lessor effectively retains substantially all the risks and benefits of ownership of the Leased Asset, are classified as 'Operating Leases". Lease rentals with respect to assets taken on 'Operating Lease' are charged to Statement of Profit and Loss on a straight line basis over the lease term.

Leases which effectively transfer to the Company substantially all the risks and benefits incidental to the ownership of the leased item are classified as 'Finance Lease'. Assets acquired on Finance Lease which substantially transfer all the risks and rewards of ownership to the Company are capitalized as assets by the Company at the lower of the fair value and the present value of the minimum lease payment and a liability is created for an equivalent amount. Lease rentals payable is apportioned between the liability and finance charge so as to obtain a constant periodic rate of interest on the outstanding liability for each year.

r. Government Grants

Government grants / subsidies received towards specific fixed assets have been deducted from the gross value of the concerned fixed assets and grant / subsidies received during the year towards revenue expenses have been reduced from respective expenses.

Export benefits / incentives are accounted on accrual basis. Accordingly, estimated export benefits against exports affected during the year are taken into account as estimated incentives accrued till the end of the year. In case of License not revalidated after the date of expiry, the proportionate export benefit / incentive taken credit in earlier year(s) is written off in the year of expiry of License.

Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circulars have introduced the UPI Mechanism in three phases in the following manner:

The time duration from public Issue closure to listing continued to be six working days.

SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019 had extended the timeline for implementation of UPI Phase II till March 31, 2020. Further, SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020 dated March 30, 2020 decided to continue Phase II of UPI with ASBA until further notice. Under this phase, submission of the ASBA Form by RIBs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public Issue closure to listing would continue to be six Working Days during this phase.

Phase III: This phase has become applicable on a voluntary basis for all issues opening on or after September 1, 2023 and on a mandatory basis for all issues opening on or after December 1, 2023, vide SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 (“**T+3 Notification**”). The Issue is being made under Phase III of the UPI (on a mandatory basis).

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. Foreign investment is allowed up to 100% under automatic route in our Company.

The RBI and the concerned ministries/departments are responsible for granting approval for foreign investment. The Government has from time to time made policy pronouncements on foreign direct investment (“FDI”) through press notes and press releases. The Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (earlier known as the Department of Industrial Policy and Promotion) (“DPIIT”), issued the FDI Policy, which, with effect from October 15, 2020 consolidated, subsumed and superseded all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect prior to October 15, 2020. In terms of FDI Policy, FDI to an extent of 51% is allowed in multi brand retail trading with government approval. The FDI Policy will be valid until the DPIIT issues an updated circular. FDI in companies engaged in sectors/ activities which are not listed in the FDI Policy is permitted up to 100% of the paid-up share capital of such company under the automatic route, subject to compliance with certain prescribed conditions.

Under the current FDI Policy and the FEMA Non-Debt Rules, foreign direct investment is not permitted in companies engaged in (a) multi-brand retail trading, undertaking retail trading by means of e-commerce, and (b) inventory-based model of e-commerce. In accordance with the FEMA Non-debt Rules, participation by non-residents in the Issue is restricted to participation by (i) FPIs under Schedule II of the FEMA Non-debt Rules, subject to limit of the individual holding of an FPI below 10% of the post-Issue paid-up capital of our Company and the aggregate limit for FPI investment currently not exceeding the sectoral cap i.e. 51% of the post issue paid up share capital; and (ii) Eligible NRIs applying only on a non-repatriation basis under Schedule IV of the FEMA Non-debt Rules. Further, other non-residents applying on a repatriation basis, FVCIs and multilateral and bilateral development financial institutions are not permitted to participate in the Issue. As per the existing policy of the Government of India, OCBs cannot participate in this issue. See “*Issue Procedure*” beginning on page 243 of this Draft Red Herring Prospectus.

The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (DIPP), issued consolidated FDI Policy, which with effect from August 28, 2017 consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DIPP that were in force and effect as on August 27, 2017. The Government proposes to update the consolidated circular on FDI Policy once every year and therefore, the Consolidation FDI Policy will be valid until the DIPP issues an updated circular.

The transfer of shares by an Indian resident to a Non-Resident does not require the prior approval of the FIPB or the RBI, provided that (i) the activities of the investee company are under the automatic route under the Consolidated FDI Policy and transfer does not attract the provisions of the SEBI (Substantial Acquisition of Shares and Takeovers) Regulations, 2011; (ii) the non-resident shareholding is within the sectoral limits under the Consolidated FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI/RBI.

The foreign investment in our Company is governed by, inter-alia, the FEMA, the FEMA Non-debt Rules, the FDI Policy issued and amended by way of press notes.

Further, in terms of the FEMA Non-debt Rules, the aggregate FPI investment limit is the sectoral cap applicable to Indian company as prescribed in the FEMA Non-Debt Instruments Rules with respect to its paid-up equity capital on a fully diluted basis. See “*Issue Procedure*” beginning on page 243 of this Draft Red Herring Prospectus.

Further, in accordance with the FDI Policy, the Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the FEMA Non-debt Rules, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country (“Restricted Investors”), will require prior approval of the Government, as prescribed in the FDI Policy and the FEMA Non-debt Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made a similar amendment to the FEMA Non-Debt Rules. Each Bidder should seek independent legal advice about its ability to participate in the Issue. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Bidder shall intimate our Company and the Registrar in writing about such approval along with a copy thereof within the Bid/Issue

Period.
