SECTION II: SUMMARY OF OFFER DOCUMENT

OVERVIEW OF INDUSTRY

Packaging is one of the fastest growing industries and stands at USD 700 billion globally. It has grown higher than GDP in most of the countries. In developing country like India, it grew at a CAGR of 16% in the last five years and touched ~USD 32 Bn in FY 15. The Indian packaging industry constitutes ~4% of the global packaging industry. The per capita packaging consumption in India is low at 4.3 kgs, compared to developed countries like Germany and Taiwan where it is 42 kgs and 19 kgs respectively. However, in the coming years Indian packaging industry is expected to grow at 18% p.a. wherein, the flexible packaging is expected to grow at 25 % p.a. and rigid packaging to grow at 15 % p.a.

Packaging in general is classified into two significant types i.e. Rigid Packaging and Flexible Packaging. As compared to rigid packaging, flexible packaging is one of the most dynamic and fastest growing markets in India. Flexible packaging anticipates a strong growth in the future. There has been increasing shift from traditional rigid packaging to flexible packaging due to numerous advantages offered by flexible packaging such as convenience in handling and disposal, savings in transportation costs etc. The packaging segment in India is an amalgamation of both organized and unorganized players ranging from very small players with limited presence to big players with large market share. Demand for this segment is anticipated to grow rapidly across all the players. Also, there is an increasing focus on innovative and cost-effective packaging materials. Thus, the industry players are keeping in track with the changing trends in packaging and making efforts to capture the market with higher technology orientation. Further with a viewpoint of health and environment friendliness, the growth in packaging industry has been leading to greater specialization and sophistication amongst the market players.

- 3. *Any significant decline in the demand for our products or introduction of alternative technology or consumer habits may adversely affect our profitability and business prospects***

Our product Corrugated boxes is mainly used in the packaging industry. Our customers' decision to seek alternative technology coupled with the development of more alternatives and our inability to respond to these changes, may adversely affect our business and results of operations. Our ability to anticipate changes in technology and to supply new and enhanced products successfully and on a timely basis will be a significant factor in our ability to grow and to remain competitive. In addition, our business, operations and prospects may be affected by various policies and statutory and regulatory requirements and developments that affect our customers' industry in India. In the event of a significant decline in the demand for our products, our business, results of operations and financial condition may be materially and adversely affected.

- 4. *An increase in the prices of our basic raw material i.e. Kraft Paper could raise our manufacturing costs and could adversely affect our profitability.***

We have no control on the prices of our basic raw material i.e. Kraft Paper. The prices of Kraft Paper could fluctuate due to availability and demand. In the recent past, there have been fluctuations in the prices of Kraft Paper both at domestic and international levels. Such fluctuations in prices of raw material and our inability to negotiate at optimum market rates may affect our profitability. We typically do not enter into any long-term supply agreements with our suppliers and our major requirement is met in the spot market. We may be unable to control the factors affecting the price at which we procure our raw material. We also face the risks associated with compensating for or passing on such increase in our cost of production on account of such fluctuations in prices to our customers. Upward fluctuations in the prices of raw material may thereby affect our margins and profitability, resulting in a material adverse effect on our business, financial condition and results of operations.

5. *Our top 5 customers contribute major portion of our revenues for the period ended June 30, 2019 and for the year ended March 31, 2019. Any loss of business from one or more of them may adversely affect our revenues and profitability.*

Our top five customers contribute to a substantial portion of our revenues for the period ended June 30, 2019 and for the year ended March 31, 2019. Further, these customers are generally wholesalers and retailers. Any decline in our quality standards, growing competition and any change in the demand for our service by these customers may adversely affect our ability to retain them. We believe we have maintained good and long-term relationships with our customers. However, there can be no assurance that we will continue to have such long-term relationship with them, also any delay or default in payment by these customers may adversely affect our business, financial condition and results of operations. We cannot assure that we shall generate the same quantum of business, or any business at all, from these customers, and loss of business from one or more of them may adversely affect our revenues and profitability. The contribution of our top 5 customers to our total revenue are as follows:

Particulars	For the period ended June 30, 2019	For the year ended March 31, 2019
% wise top 5 of total Sales	87.47	73.21

One of our major customers contributes around 51.24% of the total sales for the period ended June 30, 2019. Any future disruption may lead to significant decline in the revenue and profit of our company. There is over dependency on a single customer. We cannot assure that we shall generate the same quantum of business, or any business at all, from this customer, and loss of business from one or more of them may adversely affect our revenues and profitability.

6. *We are dependent on our Top 5 suppliers for uninterrupted supply of raw materials. Any disruption in supply of raw materials from these suppliers will adversely affect our operations.*

We are highly dependent on the suppliers of raw material for our products. We procure our raw materials from various domestic suppliers depending upon the price and quality of raw materials. However, our Top 5 and top 10 suppliers contribute significantly to supply of raw materials. While our company believes that we would not face difficulties in finding additional suppliers of raw materials, any disruption of supply of raw materials from these suppliers or our procurement of raw materials at terms not favourable to us can adversely affect our operations and financial cost. The contributions of our top 5 suppliers to our total supplies are as follows

Particulars	For the period ended June 30, 2019	For the year ended March 31, 2019
% wise top 5 of total Sales	96.11	94.14

7. *We generally do business with our customers on purchase order basis and do not enter into long term contracts with most of them.*

Our business is dependent on our continuing relationships with our customers. Our Company neither has any long-term contract with any of customers nor has any marketing tie up for our products. Further, our Company has not appointed any exclusive agents for handling its operations. Any change in the buying pattern of our end users or disassociation of major customers can adversely affect the business of our Company. The loss of or interruption of work by, a significant customer or a number of significant customers or the inability to procure new orders on a regular basis or at all may have an adverse effect on our revenues, cash flows and operations. We have not entered in any agreement with our customers, we work on the basis of purchase order basis.

8. *The shortage or non-availability of power facilities and back up facilities may adversely affect our manufacturing processes and have an adverse impact on our results of operations and financial condition*

Our manufacturing process requires substantial amount of power facilities. We meet the power requirements at our manufacturing facility by procuring the same from Adani Electricity Mumbai Limited (AEML) and Maharashtra State Electricity Distribution Company Limited (MSEDCL). The quantum and nature of power requirements of our industry and Company is such that it cannot be supplemented/ augmented by alternative/ independent sources of power supply since it involves significant capital expenditure and per unit cost of electricity produced is very high. Any disruption / non-availability of power shall directly affect our production which in turn shall have an impact on profitability and turnover of our Company.

9. *Any prolonged business interruption at our manufacturing facilities could have a material adverse effect on results of operation and financial conditions.*

Any material interruption at our manufacturing facilities like unexpected mechanical failure of equipment or if there is any break down in the machinery parts and failure of the fixation of the same could reduce our ability to produce and thereby impact earnings for the affected period.

Irregular or interrupted supply of water, electricity shortages or government intervention, are factors that could adversely affect our daily operations. If there is an insufficient supply of electricity or water to satisfy our requirements or a significant increase in electricity prices, we may need to limit or delay our production, which could adversely affect our business, financial condition and results of operations. We cannot assure that we will always have access to sufficient supplies of electricity in the future to accommodate our production requirements and planned growth.

Similarly, there is no assurance that those of our manufacturing facilities unaffected by interruption will have the capacity to increase their output to manufacture products to make up the affected manufacturing facilities. In the event of prolonged disruptions our manufacturing facilities, we may have to import various supplies and products in order to meet our production requirements, which could affect our profitability.

10. *Our Promoters have diversified and have engaged themselves in a different line of business through a wholly owned subsidiary namely Sara Solutions Private Limited. Any hindrance in the new business due to lack of experience may hamper the financial position and profitability of the company.*

Our Promoters have diversified and have engaged themselves in different line of business through a wholly owned subsidiary namely Sara Solutions Private Limited, which is engaged in the business of providing the financial and investment consultancy services which is different from the manufacturing sector in which the issuer company engaged, hence any hindrance in the new business due to lack of experience in this field may hamper the financial position of the company and WOS company is also providing a major part of the revenue approx. 32% in consolidated financial statements, hence the business of the company may hamper the profitability of the company in future.

11. *Our Industry is labour intensive and our business operations may be materially adversely affected by strikes, work stoppages or increased wage demands by our employees or those of our suppliers.*

Our industry being labour intensive is dependent on labour force for carrying out its manufacturing operations. Shortage of skilled/unskilled personnel or work stoppages caused by disagreements with employees could have an adverse effect on our business and results of operations. Though we have not experienced any major disruptions in our business operations due to disputes or other problems with our work force in the past; however, there can be no assurance that we will not experience such disruptions in the future. Such disruptions may adversely affect our business and results of operations and may also divert the management's attention and result in increased costs.

India has stringent labour legislation that protects the interests of workers, including legislation that sets forth detailed procedures for the establishment of unions, dispute resolution and employee removal and legislation that

imposes certain financial obligations on employers upon retrenchment. We are also subject to laws and regulations governing relationships with employees, in such areas as minimum wage and maximum working hours, overtime, working conditions, hiring and terminating of employees and work permits. Although our employees are not currently unionized, there can be no assurance that they will not unionize in the future. If our employees unionize, it may become difficult for us to maintain, flexible labour policies, and we may face the threat of labour unrest, work stoppages and diversion of our management's attention due to union intervention, which may have a material adverse impact on our business, results of operations and financial condition.

12. *We do not own our corporate office premises, which we have taken on lease. Any termination of agreement may require us to vacate such premises and adversely affect our business operations.*

Our corporate office situated at 607, 6th Floor, Ijmima Towers Off Link Road, Malad (W) Mumbai Maharashtra India- 400064 is taken on lease from Mr. Amarnath Sharma, If such lease agreement under which we occupy the premises is not renewed on terms and conditions that are favorable to us, or at all, we may suffer a disruption in our operation which could have a material adverse effect on our business, financial condition and results of operations. If we do not comply with certain conditions of the lease, the lessor may terminate the lease, which could have an adverse effect on our operations and there can be no assurance that renewal of lease agreement with the owner will be entered into. In the event of non-renewal of lease, we may be required to shift our office to a new location and there can be no assurance that the arrangement we enter into in respect of new premises would be on such terms and conditions as the present one. 13. *Some of our corporate records including forms filed with the Registrar of Companies are not traceable.*

Our Company was incorporated in the year 1995 under the Companies Act, 1956, hence Company is unable to trace certain corporate and other documents in relation to our Company including forms filed with the Registrar of Companies prior to the year 2006. Due to change in methods of record keeping over the years, certain forms filed with ROC prior to the year 2006 like Return of Allotment, Registration of charges and modification of charges, Increase in Authorized Capital, etc., could not be traced by our Company. Further online filing of RoC documents was initiated in the year 2006 and all forms prior to the said year were physically filed, hence some of these forms could not be retrieved from Ministry of Corporate Affairs (MCA) portal. - Known trends or uncertainties that have had or are expected to have a material adverse impact on sales, revenue or income from continuing operations
- Future changes in relationship between cost and revenues in case of events such future increase in labour or material cost or prices that will cause material change;
- The extent to which material increases in net sales or revenue due to increased sales volume or increased prices;
- Total turnover of each major industry segment in which the Issuer Company operates.

All of the above factors may affect our revenues and therefore have an impact on our operating results.

21. *The Offer for Sale Proceeds will not be available to our company*

As on the date of this Prospectus, Mr. Amarnath Matadin Sharma, shareholder has specifically confirmed that he holds 36,44,750 Equity Shares and that he has consented to offer 17,00,000 at ₹13.00 each Equity Shares for sale in offer for sale.

For further details, please refer chapter entitled “*The Issue*” on page 46 of this Prospectus. The proceeds from the Offer for Sale will be remitted to the Selling Shareholder and our Company will not benefit from such proceeds.

22. *Our future success will depend on our ability to anticipate and respond to technological advances, new standards and changing consumer preferences.*

Our success will depend on our ability to anticipate technological advances, new standards and changing consumer preferences and develop new products to meet consumer needs. There is a significant shift towards the energy efficient products driven by the Governments’ drive to reduce energy costs. In several categories, products which are more energy efficient are being promoted and preferred.

Our future success in the corrugated boxes manufacturing segment depends upon our ability to keep up with the continuing evolution of technology to capture the growing market opportunity. The development and introduction of new products may result in additional product introduction expenses.

23. *Our operating expenses include overheads that may remain fixed in the medium term. In case there is any decline in our operating performance, we may be unable to reduce such expenses.*

Our operating expenses include various fixed costs, which are as such, not dependent on sales revenue. Any shortfall in sales may cause significant variations in operating results in any particular quarter, as we would not be able to reduce our fixed operating expenses in the short term. The effect of any decline in sales may thereby be magnified because a portion of our earnings are committed to paying these fixed costs. Accordingly, we believe that period-to-period comparisons of our results may not necessarily give a correct presentation of the performance and should not be relied upon as indications of future performance.

24. *If we are unable to raise additional capital, our business prospects could be adversely affected.*

We operate in a capital-intensive industry, which requires substantial levels of funding. We will continue to incur significant expenditure in maintaining and growing our existing infrastructure. We expect our long-term capital requirements to increase significantly to fund our intended growth.

We cannot assure you that we will have sufficient capital resources for any future expansion plans that we may have. While we expect our cash on hand, cash flow from operations to be adequate to fund our existing commitments, our ability to pay these amounts is dependent upon the success of our operations. Additionally, the inability to obtain sufficient financing could adversely affect our ability to complete expansion plans. Moreover, we cannot assure you that market conditions and other factors would permit us to obtain future financing on terms acceptable to us, or at all.

25. *Our insurance policies do not cover all risks, specifically risks like loss of profits, terrorism, etc. In the event of occurrence of such events, our insurance coverage may not adequately protect us against possible risk of loss.*

Our company has obtained insurance coverage in respect of certain risks. Our significant accounting policies consists of, amongst others, standard fire and special perils, earthquakes, etc. While we believe that we maintain insurance coverage in adequate amounts consistent with size of our business, our insurance policies do not cover all risks, specifically risks like loss of profits, terrorism, etc. There can be no assurance that our insurance policies

will be adequate to cover the losses in respect of which the insurance has been availed. If we suffer a significant uninsured loss or if insurance claim in respect of the subject-matter of insurance is not accepted or any insured loss suffered by us significantly exceeds our insurance coverage, our business, financial conditions and results of operations may be materially and adversely affected.

- 26. *We have not entered into long term contracts with the suppliers of raw material and components for our manufacturing facilities and with the vendors of the products marketed and sold by us. Our inability to obtain raw material and/or source our products from our suppliers/vendors in a timely manner, in sufficient quantities and/or at competitive prices could adversely affect our operations, financial condition and/or profitability.***

In case our suppliers/vendors are unable to supply (a) the raw material and/or components required for the manufacture of our products, and/or (b) the products that are marketed and sold by us, in sufficient quantities, or there is a loss of one or more significant suppliers/vendors, our ability to obtain our raw material, components and/or products at competitive rates could be adversely affected. In such event, our cost of purchasing such raw material/components/products from alternate sources could be higher thereby adversely affecting our operating margins and results of our operations. Further we do not enter into long term agreements with suppliers of raw material and components for our manufacturing facilities and with the vendors of the products marketed and sold by us. Any severance of our relations with these suppliers and/or vendors could adversely affect our operations and profitability.

- 27. *There are no alternate arrangements for meeting our working capital requirements for the Objects of the Issue. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.***

As on date, we have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. We meet our working capital requirements through our owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our working capital requirements, which in turn will negatively affect our financial condition and results of operations. Further we have not yet identified any alternate source of funding and hence any failure or delay on our part to raise money from this Issue or any shortfall in the Issue Proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details please refer chapter titled “*Objects of the Issue*” on page 81 of this Prospectus.

- 28. *The industry segments in which we operate being fragmented we face competition from other players, which may affect our business operations and financial conditions.***

The market in which our company is doing business is highly competitive on account of both the organized and unorganized players. Players in this industry generally compete with each other on key attributes such as technical competence, distribution network, pricing and timely delivery. Some of our competitors may have longer industry experience and greater financial, technical and other resources, which may enable them to react faster in changing market scenario and remain competitive. Moreover, the unorganized sector offers their products at highly competitive prices which may not be matched by us and consequently affect our volume of sales and growth prospects. Growing competition may result in a decline in our market share and may affect our margins which may adversely affect our business operations and our financial condition.

- 29. *Guarantees from Promoter, Directors as well as others have been taken in relation to the debt facilities provided to us.***

In an event any of the guarantors withdraws or terminates this guarantee, the lender for such facilities may ask for alternate guarantee/s, repayment of amounts outstanding under such facilities, or even terminate such facilities. We may not be successful in procuring guarantee/s satisfactory to the lender and as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could adversely affect our

financial condition. For more information please see the chapter titled “*Statement of Financial Indebtedness*” beginning on page 171 of this Prospectus.

30. *Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.*

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Additionally, under some of our loan agreements, we may not be permitted to declare any dividends, if there is a default under such loan agreements or unless our Company has paid all the dues to the lender up to the date on which the dividend is declared or paid or has made satisfactory provisions thereof. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, see “*Dividend Policy*” on page 154 of this Prospectus.

31. *Failure to manage our inventory could have an adverse effect on our net sales, profitability, cash flow and liquidity.*

The results of operations of our business are dependent on our ability to effectively manage our inventory and stocks. To effectively manage our inventory, we must be able to accurately estimate customer demand and supply requirements and manufacture new inventory accordingly. If our management has misjudged expected customer demand it could adversely impact the results by causing either a shortage of products or an accumulation of excess inventory. Further, if we fail to sell the inventory we manufacture or get manufactured by third parties on our account, we may be required to write down our inventory or pay our suppliers without new purchases or create additional vendor financing, which could have an adverse impact on our income and cash flows.

32. *Our lenders have charge over our movable and immovable properties in respect of finance availed by us.*

Our company has taken secured loans from banks by creating a charge over our movable and immovable properties in respect of loans/facilities availed by us. The total amount outstanding and payable by us for secured loans were ₹155.51 Lakh as on March 31, 2019. In the event we default in repayment of the loans/ facilities availed by us and any interest thereof, our properties may be forfeited by lenders, which in turn could have significant adverse effect on our business, financial condition and results of operations. For further detail please refer to chapter titled “*Financial Statements as Restated*” beginning on page 155 and financial indebtedness in chapter titled “*Statement of Financial Indebtedness*” on page 171 of this Prospectus.

33. *Our future funds requirements, in the form of fresh issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the shareholders depending upon the terms on which they are eventually raised.*

We may require additional capital from time to time depending on our business needs. Any fresh issue of shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favorable to the then existing shareholders. If such funds are raised in the form of loans or debt, then it may substantially increase our interest burden and decrease our cash flows, thus prejudicially affecting our profitability and ability to pay dividends to our shareholders.

34. *Our success depends largely upon the services of our Directors, Promoter and other Key Managerial Personnel and our ability to attract and retain them.*

Our success is substantially dependent on the expertise and services of our Directors, Promoter and our Key Managerial Personnel. They provide expertise which enables us to make well informed decisions in relation to our business and our future prospects. Our future performance will depend upon the continued services of these persons. Demand for Key Managerial Personnel in the industry is intense. We cannot assure you that we will be able to retain any or all, or that our succession planning will help to replace, the key members of our management. The loss of the services of such key members of our management team and the failure of any succession plans to replace such key members could have an adverse effect on our business and the results of our operations.

35. *Underutilization of capacity of our manufacturing facility may adversely affect our business, results of operations and financial conditions.*

We cannot assure that we shall be able to utilize our proposed manufacturing facility to their full capacity or up to an optimum capacity, and non-utilization of the same may lead to loss of profits or can result in losses, and may adversely affect our business, results of operations and financial condition. Even use of the proposed production capacity is subject to several variables like availability of raw material, power, water, proper working of machinery, orders on hand, supply/demand, manpower, etc.

36. *In addition to normal remuneration or benefits and reimbursement of expenses, some of our Directors, Promoters and Key Management Personnel are interested in our Company to the extent of their shareholding and dividend entitlement in our Company.*

Our Directors, Promoters and Key Managerial Personnel are interested in our Company to the extent of remuneration paid to them for services rendered and reimbursement of expenses payable to them. In addition, some of our Directors and Promoters may also be interested to the extent of their shareholding and dividend entitlement, if any and loan availed from them by our Company etc. For further information, see “*Capital Structure*” and “*Our Management*” on pages 65 and 131 respectively, of this Prospectus.

37. *We may not be successful in implementing our business strategies.*

The success of our business depends substantially on our ability to implement our business strategies effectively. Even though we have successfully executed our business strategies in the past, there is no guarantee that we can implement the same on time and within the estimated budget going forward, or that we will be able to meet the expectations of our targeted clients. Changes in regulations applicable to us may also make it difficult to implement our business strategies. Failure to implement our business strategies would have a material adverse effect on our business and results of operations.

38. *Changes in technology may render our current technologies obsolete or require us to make substantial capital investments.*

Modernization and technology up-gradation is essential to provide better products. Although we strive to keep our technology in line with the latest standards, we may be required to implement new technology or upgrade the existing employed by us. Further, the costs in upgrading our technology could be significant which could substantially affect our finances and operations.

39. *We could be harmed by employee misconduct or errors that are difficult to detect and any such incidence could adversely affect our financial condition, results of operations and reputation.*

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and cause serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees and agents may also commit errors that could subject us to claims and proceedings for

alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

- 40. Our lenders have imposed certain restrictive conditions on us under our financing arrangements. Under our financing arrangements, we are required to obtain the prior, written lender consent for, among other matters, changes in our capital structure, and formulation of a scheme of amalgamation or reconstruction and entering into any other borrowing arrangement. Further, we are required to maintain certain financial ratios.**

There can be no assurance that we will be able to comply with these financial or other covenants or that we will be able to obtain the consents necessary to take the actions we believe are necessary to operate and grow our business. Our level of existing debt and any new debt that we incur in the future has important consequences. Any failure to comply with these requirements or other conditions or covenants under our financing agreements that are not waived by our lenders or are not otherwise cured by us, may require us to repay the borrowing in whole or part and may include other related costs. Our Company may be forced to sell some or all of its assets or limit our operations. This may adversely affect our ability to conduct our business and impair our future growth plans. Though these covenants are restrictive to some extent to the Company however it ensures financial discipline, which would help the Company in the long run to improve its financial performance. We did not get most of the NOC from our lenders.

For further information, see the chapter titled “*Statement of Financial Indebtedness*” on page 171 of the Prospectus.

- 41. Our future funds requirements, in the form of fresh issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the shareholders depending upon the terms on which they are eventually raised.**

We may require additional capital from time to time depending on our business needs. Any fresh issue of shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favorable to the then existing shareholders. If such funds are raised in the form of loans or debt, then it may substantially increase our interest burden and decrease our cash flows, thus prejudicially affecting our profitability and ability to pay dividends to our shareholders.

- 42. Our Company has a negative cash flow in its operating activities as well as investing activities in the past 3 years, details of which are given below. Sustained negative cash flow could impact our growth and business.**

Net Increase/ (Decrease) in Cash & Cash Equivalents	(1.64)	4.06	9.13	2.47

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flows in future, it may adversely affect our business and financial operations.

- 43. We have certain contingent liabilities that have not been provided for in our Company’s financials which if materialized, could adversely affect our financial condition.**

For further details please refer the chapter titled “*Financial Statements as Restated*” on page 155 of the Prospectus.

44. *Insufficient cash flows to meet required payments on our debts and working capital requirements could adversely affect our Company’s operations and financial results*

The business of our Company requires a significant amount of working capital to finance the payments for Man-power, day to day Expenses and term loans for establishment of office facilities and acquisition of equipments/ vehicles. The working capital requirements of our Company are also affected by the credit lines that our Company extends to its customers, in line with industry practice. Moreover, our Company may need to raise further term loans and working capital loans in the future to meet its capital expenditure and to satisfy its working capital requirements. There can be no assurance that our Company will continue to be successful in arranging adequate working capital and term loans for its existing or expanded operations on acceptable terms or at all, which could adversely affect our Company’s operations and financial results.

Hence an unsatisfied client may be more damaging in our business than in other businesses. Our activities may subject us to the risk of significant legal liabilities to our clients and aggrieved third parties. In recent years, the volume of claims and amount of damages claimed in litigation and regulatory proceedings against financial intermediaries have been increasing due to strict regulations and investor awareness. These risks often may be difficult to assess or quantify and their existence and magnitude often remain unknown for substantial periods of time. Hence, we may incur significant legal expenses in defending against litigation. Substantial legal liability or significant regulatory action against us could have material financial effects on our Company or could even cause significant harm to our reputation, which could harm our business prospects.

51. *If we are unable to source business opportunities effectively, we may not achieve our financial objectives.*

Our ability to achieve our financial objectives will depend on our ability to identify, evaluate and accomplish business opportunities. To grow our business, we will need to hire, train, supervise and manage new employees and to implement systems capable of effectively accommodating our growth. However, we cannot assure you that any such employees will contribute to the success of our business or that we will implement such systems effectively. Our failure to source business opportunities effectively could have a material adverse effect on our business, financial condition and results of operations. actions that are not in, or may conflict with, our interests or the interests of some or all of our creditors or minority shareholders, and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares.

Issue Specific Risks:

60. There are restrictions on daily/weekly/monthly movements in the price of the Equity Shares, which may adversely affect a shareholders' ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.

Once listed, we would be subject to circuit breakers imposed by all stock exchanges in India, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates

independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on circuit breakers is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchanges do not inform us of the percentage limit of the circuit breaker in effect from time to time and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

61. *After this Issue, the price of the Equity Shares may be highly volatile, or an active trading market for the Equity Shares may not develop.*

There has been no public market for the Equity Shares and the prices of the Equity Shares may fluctuate after this Issue. There can be no assurance that an active trading market for the Equity Shares will develop or be sustained after this Issue or that the price at which the Equity Shares are initially traded will correspond to the price at which the Equity Shares will trade in the market subsequent to this Issue.

62. *You will not be able to sell immediately on Stock Exchange any of the Equity Shares you purchase in the Issue until the Issue receives appropriate trading permissions.*

EXTERNAL RISKS

Industry Related Risks:

65. Changes in government regulations or their implementation could disrupt our operations and adversely affect our business and results of operations.

Our business and industry are regulated by different laws, rules and regulations framed by the Central and State Government. These regulations can be amended/ changed on a short notice at the discretion of the Government. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change adversely, we may incur increased costs or be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations.

66. Malpractices by some players in the industry affect overall performance of emerging Companies

The industry in which our Company operates is subject to risk associated with unethical business practices such as unethical marketing, dishonest advertising, questionable pricing practices, inaccurate claims with regards to safety and efficacy of the product etc. Consumers' attitude toward the industry today is dominated by a sense of mistrust, paving a way for regulators for stricter entry barriers and introduction of code of conducts; making the entire industry environment regulated and controlled. Malpractices by some players in the industry affects the overall performance of the emerging Companies like our as the industry norms are applicable to all at parity. Any unethical business practices by any industry player or intermediary may impact our business and results of operations.

Other Risks:

67. You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.

Under current Indian tax laws and regulations, capital gains arising from the sale of equity shares in an Indian Company are generally taxable in India. Any gain on the sale of shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India if the securities transaction tax ("STT") has been paid on the transaction. The STT will be levied on and collected by an Indian stock exchange on which equity shares are sold. Any gain on the sale of shares held for more than 12 months to an Indian resident, which are sold other than on a stock exchange and as a result of which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain on the sale of shares held for a period of 12 months or less will be subject to capital gains tax in India. Further, any gain on the sale of listed equity shares held for a period of 12 months or less which are sold other than on a stock exchange and on which no STT has been paid, will be subject to short term capital gains tax at a relatively higher rate as compared to the transaction where STT has been paid in India.

In Finance Bill 2017, section 10(38) was amended to provide that exemption under this section for income arising on transfer of equity share acquired on or after 1st day of October 2004 shall be available only if the acquisition of share is chargeable to Securities Transactions Tax (STT) under Chapter VII of the Finance (No 2) Act, 2004.

In case this provision becomes effective, sale shares acquired on or after 1st day of October 2004 on which STT was not charged will attract tax under provisions of Long-Term Capital Gains.

As per Finance Bill 2018, exemption under section 10(38) for income arising from long term gains on transfer of equity share shall not be available on or after 1st day of April 2018 if the long-term capital gains exceed ₹1.00 Lakh p.a. Such income arising from long term gains on transfer of equity share on or after 1st day of April 2018 in excess of ₹1.00 Lakh p.a. shall be chargeable at the rate of 10%. Capital gains arising from the sale of shares will be exempt from taxation in India in cases where an exemption is provided under a tax treaty between India and the country of which the seller is a resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdictions on gains arising from a sale of the shares subject to relief available under the applicable tax treaty or under the laws of their own jurisdiction.

68. Significant differences exist between Indian GAAP and other accounting principles, such as U.S. GAAP and IFRS, which may be material to the financial statements, prepared and presented in accordance with SEBI ICDR Regulations contained in this Prospectus.

Any reliance by persons not familiar with Indian GAAP on the financial disclosures presented in this Prospectus should accordingly be limited.

69. Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

70. Financial instability in Indian Financial Markets could adversely affect our Company's results of operation and financial condition.

In this globalized world, the Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, say in the United States of America, Europe, China or other emerging economies, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil. Any

prolonged financial crisis may have an adverse impact on the Indian economy, thereby resulting in a material and adverse effect on our Company's business, operations, financial condition, profitability and price of its Shares. Stock exchanges in India have in the past experienced substantial fluctuations in the prices of listed securities.

Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

72. Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency a magnitude, which may negatively affect our stock prices.

73. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

74. The extent and reliability of Indian infrastructure could adversely affect our Company's results of Operations and financial condition.

India's physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy; disrupt the transportation of goods and supplies, and costs to doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition.

75. *Natural calamities could have a negative impact on the Indian economy and cause Our Company's business to suffer.*

India has experienced natural calamities such as earthquakes, tsunami, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

76. *Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.*

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade the global equity as well markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

77. *The nationalized goods and services tax (GST) regimes implemented by the Government of India have impact on our operations.*

The Government of India has from July 01, 2017 has implemented the Goods and Service Tax a comprehensive national goods and service tax (GST) regime that combines taxes and levies by the Central and State Governments into a unified rate structure.

78. *Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

OVERVIEW OF GLOBAL ECONOMY

Global economic growth is projected to soften from a downwardly revised 3 percent in 2018 to 2.9 percent in 2019 amid rising downside risks to the outlook, the World Bank said on Tuesday. International trade and manufacturing activity have softened, trade tensions remain elevated, and some large emerging markets have experienced substantial financial market pressures.

Growth among advanced economies is forecast to drop to 2 percent this year, the January 2019 Global Economic Prospects says. Slowing external demand, rising borrowing costs, and persistent policy uncertainties are expected to weigh on the outlook for emerging market and developing economies. Growth for this group is anticipated to hold steady at a weaker-than-expected 4.2 percent this year.

“At the beginning of 2018 the global economy was firing on all cylinders, but it lost speed during the year and the ride could get even bumpier in the year ahead”, said World Bank Chief Executive Officer Kristalina Georgieva. “As economic and financial headwinds intensify for emerging and developing countries, the world’s progress in reducing extreme poverty could be jeopardized. To keep the momentum, countries need to invest in people, foster inclusive growth, and build resilient societies.”

The upswing in commodity exporters has stagnated, while activity in commodity importers is decelerating. Per capita growth will be insufficient to narrow the income gap with advanced economies in about 35 percent of emerging market and developing economies in 2019, with the share increasing to 60 percent in countries affected by fragility, conflict, and violence.

A number of developments could act as a further brake on activity. A sharper tightening in borrowing costs could depress capital inflows and lead to slower growth in many emerging market and developing economies. Past increases in public and private debt could heighten vulnerability to swings in financing conditions and market sentiment. Intensifying trade tensions could result in weaker global growth and disrupt globally interconnected value chains.

“Robust economic growth is essential to reducing poverty and boosting shared prosperity,” said World Bank Group Vice President for Equitable Growth, Finance and Institutions, Ceyla Pazarbasioglu. “As the outlook for the global economy has darkened, strengthening contingency planning, facilitating trade, and improving access to finance will be crucial to navigate current uncertainties and invigorate growth.”

Regional Outlooks:

East Asia and Pacific: East Asia and Pacific remains one of the world’s fastest-growing developing regions. Regional growth is expected to moderate to 6 percent in 2019, assuming broadly stable commodity prices, a moderation in global demand and trade, and a gradual tightening of global financial conditions. Growth in China is expected to slow to 6.2 percent this year as domestic and external rebalancing continue. The rest of the region is expected to grow at 5.2 percent in 2019 as resilient demand offsets the negative impact of slowing exports. Indonesia’s growth is expected to hold steady at 5.2 percent. The expansion of the Thai economy is expected to

slow in 2019 to 3.8 percent.

Europe and Central Asia: The lingering effects of financial stress in Turkey are anticipated to weigh on regional growth this year, slowing it to 2.3 percent in 2019. Turkey is forecast to experience weak activity and slow to a 1.6 percent pace due to high inflation, high interest rates, and low confidence, dampening consumption and investment. Growth in the western part of the region, excluding Turkey, is projected to slow. Poland is anticipated to slow to 4 percent as Euro Area growth slows. Growth in the eastern part of the region is also anticipated to slow as large economies including Russia, Kazakhstan, and Ukraine decelerate.

Latin America and the Caribbean: Regional growth is projected to advance to a 1.7 percent pace this year, supported mainly by a pickup in private consumption. Brazil is forecast to expand 2.2 percent, assuming fiscal reforms are quickly put in place, and that a recovery of consumption and investment will outweigh cutbacks to government spending. In Mexico, policy uncertainty and the prospect of still subdued investment is expected to keep growth at a moderate 2 percent, despite the fall in trade-related uncertainty following the announcement of the U.S.-Mexico-Canada Agreement. Argentina is forecast to contract by 1.7 percent as deep fiscal consolidation leads to a loss of employment and reduced consumption and investment.

Middle East and North Africa: Regional growth is projected to rise to 1.9 percent in 2019. Despite slower global trade growth and tighter external financing conditions, domestic factors, particularly policy reforms, are anticipated to bolster growth in the region. Growth among oil exporters is expected to pick up slightly this year, as GCC countries as a group accelerate to a 2.6 percent rate from 2 percent in 2018. Iran is forecast to contract by 3.6 percent in 2019 as sanctions bite. Algeria is forecast to ease to 2.3 percent after a rise in government spending last year tapers off. Egypt is forecast to accelerate to 5.6 percent growth this fiscal year as investment is supported by reforms that strengthen the business climate and as private consumption picks up.

South Asia: Regional growth is expected to accelerate to 7.1 percent in 2019, underpinned by strengthening investment and robust consumption. India is forecast to accelerate to 7.3 percent in FY 2018/19 as consumption remains robust and investment growth continues, Bangladesh is expected to slow to 7 percent in FY2018/19 as activity is supported by strong private consumption and infrastructure spending. Pakistan's growth is projected to decelerate to 3.7 percent in FY2018/19, with financial conditions tightening to help counter rising inflation and external vulnerabilities. Sri Lanka is anticipated to speed up slightly to 4 percent in 2019, supported by robust domestic demand and investment boosted by infrastructure projects. Nepal's post-earthquake momentum is forecast to moderate, and growth should slow to 5.9 percent in FY2018/19.

Sub-Saharan Africa: Regional growth is expected to accelerate to 3.4 percent in 2019, predicated on diminished policy uncertainty and improved investment in large economies together with continued robust growth in non-resource intensive countries. Growth in Nigeria is expected to rise to 2.2 percent in 2019, assuming that oil production will recover and a slow improvement in private demand will constrain growth in the non-oil industrial sector. Angola is forecast to grow 2.9 percent in 2019 as the oil sector recovers as new oil fields come on stream and as reforms bolster the business environment. South Africa is projected to accelerate modestly to a 1.3 percent pace, amid constraints on domestic demand and limited government spending.

GLOBAL PAPER & PAPERBOARD MARKET

Paper and paperboard trays have gained wide popularity in flexible packaging applications for food and beverages, consumer durables and electronics, personal care, and homecare and toiletries. Considered as semi-rigid structures, these containers are increasingly in demand for cost-effective applications, especially for the food and beverages and fast-moving consumer goods sectors. The striking sustainability and recyclability of paperboard trays makes them suitable for various packaging applications in the e-commerce sector in various parts of the

world. These containers allow amazing grease resistance and moisture barrier, significant sealability, and low pricing. The marked structural rigidity possible with a variety of polymer coating is a notable factor opening exciting applications of paper and paperboard trays. A number of manufacturers are focused on improving the operational efficiency in the supply chain by adopting innovative technology and material innovations.

The global paper and paperboard trays market is projected to rise from a valuation of US\$4,444.3 Mn in 2017 to reach a valuation of US\$5,893.9 Mn by 2022 end. The market is forecast to clock a CAGR of 5.8% from 2017 to 2022.

Corrugated Paper and Paperboard Trays to Witness Substantial Demand

The various materials types used in making paper and paperboard trays are corrugated board, boxboard/carton, and molded pulp. Of these, the corrugated board segment leads, holding a major share 57.5% in 2017, with an estimated valuation of US\$2,553.5 Mn. Expanding at a CAGR of 5.5%, the segment is expected to retain its dominance and reach US\$3,344.1 Mn by 2022 end, representing the leading share of 56.7%. The annual growth is pegged at US\$158.1 Mn over the course of the assessment period, representing an absolute growth higher than all other segments. The vastly rising demand for corrugated boards can be attributed to the marked recyclability of these containers and their versatility of applications. In addition, substantial advancements made in coating technologies also bodes well for the growth of this segment.

Asia Pacific excluding Japan to be at Forefront of Global Market

North America, the Middle East and Africa (MEA), Latin America, Asia Pacific excluding Japan (APEJ), Japan, and Europe are the various regional markets for paper and paperboard trays. Of these, Asia Pacific excluding Japan (APEJ) holds the leading share in 2017, vis-à-vis revenue, and is projected to stay ahead of the pack throughout the forecast period. The APEJ paper and paperboard trays market is predicted to register a CAGR of 6.2% from 2017 to 2022. The dominance of this regional market may be attributed to the rapidly rising demand for environmental-friendly, cost-effective, and recyclable packaging applications for various end-use industries. Numerous foreign companies are setting up their facilities in India on account of various government initiatives like Make in India and Digital India. Mr. Narendra Modi, Prime Minister of India, has launched the Make in India initiative with an aim to boost the manufacturing sector of Indian economy, to increase the purchasing power of an average Indian consumer, which would further boost demand, and hence spur development, in addition to benefiting investors. BAN ON SINGLE-USE PLASTICS IN INDIA

If India's proposed ban on single-use plastics is successful, the benefit is that we will reduce plastic pollution, but at the cost of worsening the cumulative environmental impact. Note that the Modi government's plan goes beyond plastic bags and includes banning plastic cups, plates and use of plastic in packaging. It is inconceivable that the alternatives to plastic will be any less environmentally damaging. I do not think anyone has worked out the sheer numbers involved. Given the environmental stakes, the responsible thing to do — before announcing a nationwide ban on plastics — would be to conduct a robust scientific study of the impact of replacing the billions of items of plastic that Indians use every day.

The economic benefits will mainly arise from new investments and innovations in the packaging industry and are likely to kick in over the medium term.

Depending on the terms of the ban, a large part of existing investments, machinery, business processes and jobs in the plastics industry will be destroyed. Businesses will find themselves stuck with proscribed equipment and will have to incur additional costs to replace old machinery. Big companies might be able to afford the additional capital required, but small and medium enterprises will find it a lot more difficult. This, at a time when there is an overall credit crunch in the economy.

The burden of a plastic ban will disproportionately affect the poor. From milk and biscuit packets to toiletry sachets and plastic bags, the low cost of plastic packaging makes a number of essential goods accessible and affordable to the poor. Any increase in packaging costs will directly affect the disposable incomes of the poor.

While your supermarket can well afford to charge you Rs 10 for the plastic bag, the fruit and vegetable vendor on the street cannot. At the margin, the additional friction and inconvenience of having to bring your own bag is likely to work against the small vendor. When we seek Western fads at Indian levels of income, the economic cost of our perceived moral rectitude will be borne by the poor.

INTRODUCTION TO INDIAN PACKAGING INDUSTRY

Packaging is one of the fastest growing industries and stands at USD 700 billion globally. It has grown higher than GDP in most of the countries. In developing country like India, it grew at a CAGR of 16% in the last five years and touched ~USD 32 Bn in FY 15. The Indian packaging industry constitutes ~4% of the global packaging industry. The per capita packaging consumption in India is low at 4.3 kgs, compared to developed countries like Germany and Taiwan where it is 42 kgs and 19 kgs respectively. However, in the coming years Indian packaging industry is expected to grow at 18% p.a. wherein, the flexible packaging is expected to grow at 25 % p.a. and rigid packaging to grow at 15 % p.a.

Packaging Industry Outlook (USD Bn)

Packaging in general is classified into two significant types i.e. Rigid Packaging and Flexible Packaging. As compared to rigid packaging, flexible packaging is one of the most dynamic and fastest growing markets in India. Flexible packaging anticipates a strong growth in the future. There has been increasing shift from traditional rigid packaging to flexible packaging due to numerous advantages offered by flexible packaging such as convenience in handling and disposal, savings in transportation costs etc. The packaging segment in India is an amalgamation of both organized and unorganized players ranging from very small players with limited presence to big players with large market share. Demand for this segment is anticipated to grow rapidly across all the players. Also there is an increasing focus on innovative and cost effective packaging materials. Thus, the industry players are keeping in track with the changing trends in packaging and making efforts to capture the market with higher technology orientation. Further with a viewpoint of health and environment friendliness, the growth in packaging industry has been leading to greater specialization and sophistication amongst the market players.

KEY DRIVERS

Retail Industry is one of the most dynamic industries in India. It has experienced high growth over the past years, with a gradual shift towards modern retailing formats. Indian retail market has attracted and increased the presence of multinational companies and therefore boosted demand in spaces such as F&B, consumers' products, cosmetics etc. Rising income levels is also stimulating the growth of organised retail which therefore increases the demand for innovative and attracting packaging concepts.

Indian Retail Industry Outlook (USD Bn)

In the retail segment, Food & Beverages are one of the key growing segments (Refer fig. 3). It falls amongst the biggest end users of packaging. Growth in F&B sector will drive the packaging demand and also demand for plastic packaging, as it ensures food safety, quality and long shelf life.

Indian Food & Beverage Industry Outlook (USD Bn)

Since packaged food is the fastest growing segment, it is expected to fuel the demand of plastic packaging in India. Spend on packaged foods is increasing (at inflexion point) due to Increase in per capita income, Urbanization and Increase in working woman population. The graph below indicates the per capita expense on the packaged food in India.

Packaged Food Spend (Per capita)

Besides Food & Beverage, pharmaceuticals’ are another major user of packaging. India's domestic pharmaceutical market is witnessing double digit growth. Pharmaceutical Packaging is now becoming the major part of the drug delivery system. Pharmaceutical companies rely more on packaging and labelling as media to protect and promote their products, increase patient compliance, and meet new regulations. Besides this, plastics have been gaining increasing importance in packaging of pharmaceutical goods due to properties such as barrier against moisture, high dimensional stability, high impact strength, resistance to strain, low water absorption, transparency, resistance to heat and flame etc.

Indian Pharmaceutical Market (USD Bn)

Therefore, due to increasing expertise in the packaging of F&B, medicinal, home & personal care and other heavy industrial products, plastic packaging segment is expected to capture the packaging demand. The overall packaging industry in India has a huge growth potential and is expected to reach ~USD 73 Bn in FY 20. Additionally, India is growing as a manufacturing hub and the exports are also growing. To cater to the international market, the packaging standards are being uplifted which calls for adopting better packaging methods, materials and machineries to make sure that the quality of end product and visual appeal is top notch. Moreover highly favourable demographic patterns in India such as increasing working age population, growing disposable income, growth in middle class, ongoing urbanisation and changing lifestyles etc. will further drive the growth of packaging industry in India.

CORRUGATED PACKAGING INDUSTRY OVERVIEW

The booming Indian economy and a flourishing organised retail have raised the expectations that consumption of corrugated packaging will begin to expand again as the number and volume of goods packaged in corrugated increases. MNCs are demanding corrugated boxes of international standards and the pattern of buying the packaging is changing.

Prices of corrugated sheet and converted boxes have remained low due to the over-capacity, manual operations and low productivity. Besides, transport constraints and high freight costs have meant that small to medium sized corrugated box plants are located near the customers.

The over 4,000 corrugated board and sheet plants are highly labour-intensive, employing over half a million people – both directly and indirectly. The industry is converting about 2 million tons of Kraft paper into corrugated boxes. Factories are spread out in all parts of India, even in the remote industrially backward areas.

This present scenario is already being challenged by the sweeping changes that are beginning to take shape. More and more in-line automatic plants are being set up, as corrugated box makers gear up to meet the new demands for high precision boxes with attractive graphics and large integrated production capacities.

Future Trends

- Increasing demand and high volumes will trigger consolidation and setting up of large automatic plants.

- Inline Automatic Board and Box making plants will ease out the present semi automatic production processes.
- Deployment of Folder Gluers, Rotary Diecutters will be on the increase.
- Use of corrugated for display/promotional packs, POPs and dispensers.
- Advances in multicolour, flexo printing will facilitate in-house flexo printing and do away with screen printing, contract printing on offset presses.
- The emergence of e-commerce, reverse bidding, concept of First Pak will give large scale units the advantage of competitiveness and the concept of locating corrugated box units nearer to user locations will become obsolete.
- Large Corporates and Bulk users of corrugated boxes looking for single/multiple alternative vendors – capable of meeting stringent specifications, offering alternative designs, test-in-time deliveries at optimum cost.
- Growing interest in machines made in China, Taiwan and other Asian countries.
- Many machinery manufacturers entering into alliances with Chinese, Taiwanese manufacturers for manufacturing/marketing.

CORRUGATION FUTURE TREND

The packaging industry in India has been registering a constant growth rate of 15%. The Corrugated packaging industry is however finding itself at the crossroads. Increasing prices of kraft paper, non-availability of international standard papers at affordable prices, resistance of corrugated box user industry to offer sustainable prices, increasing competition, non-viability of automatic plants is proving to be hurdles in the growth path.

Despite these adverse circumstances, the industry is all set to take on the challenges and look at the future opportunities. As global companies set up their manufacturing bases in India to meet the growing demand for consumer and white goods – the need for high quality boxes is appearing evident. Progressive Corrugators are setting up automatic board/box making plants to increase production and enhance performance of boxes. In house printing on corrugated is becoming imperative.

All this portends well for the industry. Insurgence of corrugated packaging machines from neighbouring China and Taiwan will prove to be a threat as well as a great opportunity considering the inherent capabilities and experience of Indian Corrugated Machinery Manufacturers. Strategic alliances with overseas machinery manufacturers are already happening and will soon become a norm.

HOW IS E-COMMERCE CONTRIBUTING TO THE GROWTH OF THE INDIAN PACKAGING INDUSTRY?

Packaging for E-Commerce products delivered from one place to another need to consider more factors like product safety, ease of storage & transportation, etc. and so has to be different from the usual retail industry. Receiving an E-Commerce package is almost like receiving a gift that one bought for oneself and this brings challenges and opportunities for the Packaging Industry.

Within E-Commerce, the retail category penetration has increased to 65 million unique visitors a month registering an annual growth of 55%. India's E-Commerce revenue is expected to jump from \$30 billion in 2016 to \$120 billion in 2020, growing at an annual rate of 51%, the highest in the world, according to a joint ASSOCHAM-Forrester study paper. Retail category penetration is registering an annual growth of 55%. Majority of the online shoppers are between the ages of 15-24 years and as it is well known, the younger generation comparatively pay more attention to appearance and are additionally more cautious about the quality of packaging of the products they buy.

At the moment, mostly plastic is the material used for Packaging in a variety of industries, e.g. in the FMCG and Pharmaceutical industries. Changing consumer lifestyles towards ready-to-eat products are driving growth of flexible Packaging, with food already accounting for 38% of the flexible Packaging market. If food or drinks are ordered online, the packaging should ensure no loss in quality. Conventionally, home-delivered food products in India are simply packed, but the increasing awareness of hygiene and demand for good quality food is now bringing about change in the packaging of food deliveries. Similarly, for products like apparel, which do not require rigid boxes for protection, E-Commerce offers possibilities for flexible Packaging with advantages, such as lightweight, energy saving due to less energy consumption of package production, possibilities to adjust it different products, small pack size and an ease of storage and disposal as compared to rigid packaging.

But with a growth in E-Commerce, the demand for rigid Packaging, such as cartons or corrugated boxes is also increasing as these are especially used when products such as electronics require firm packaging for protection – also considering poor road infrastructure in many parts of the country. Rigid packaging accounts for 80% of the Indian Packaging market.

When people order products online, they expect it to be delivered without any damage. For this, the retailers have to design qualitative Packaging that is easy to transport and not too heavy or spacious. With the increasing penetration of E-Commerce among traditional retailers, like groceries & pharmacies, Packaging becomes an important aspect for them as well.

Visually appealing Packaging is another factor that positively affects online sales. If a package is designed attractively, the product is assumed to be of high quality, the same way as premium products are expected to be packaged in an attractive and consumer friendly manner. According to a research, about 60% of consumers share the product image on social media if they liked it and this group may also recommend the product to others which consecutively improves sales. Sellers have to be aware that improper Packaging can lead to negative brand perception. Along with quality, the cost of Packaging is important for an online seller, thus the demand for good quality and economic Packaging is ever increasing. Adaptations and innovations in Packaging improve the economy in terms of preservation, maintenance of quality and prolonged shelf life. In a nutshell, packaging for E-Commerce products should secure the product, be easy to handle & transport, should enhance the brand image and must be cost effective.

On the other hand, an increase in Packaging also results in an increase of waste. In India, only a minority of waste gets recycled. But according to a survey, 94% of respondents would be willing to be part of E-Commerce Packaging recycling and reuse under the “Swachh Bharat” (Clean India) Mission in return of a small incentive. Some suggestions by respondents mentioned that online retailers should accept the return of their Packaging material in return for some discounts or for some reward points on the next purchase.

To overcome the labour shortage in the Packaging industry and train more qualified manpower, the Indian Institute of Packaging (IIP) plans to set up new campuses, e.g. in Gujarat. If the Institute gets its recognition to be ‘an institution of national importance’, NC Saha, Director of IIP, said, and added that it plans to introduce degree courses in Packaging Technology and Management in the academic year of 2017. The new academic workers could meet the challenges of rising product packaging needs due to the rise in E-Commerce.

The Indian Packaging Industry has grown tremendously in recent years and is set to become the 4th largest worldwide with a revenue of \$24.6 billion in 2016. There is great potential for companies in the sector as India’s per capita consumption of Packaging is comparatively quite low. An increase in E-Commerce, higher disposable incomes and an affinity for online shopping will give the Indian Packaging industry the impetus to become one of the largest in the world.

Road Ahead

Services sector growth is governed by both domestic and global factors. The Indian facilities management market is expected to grow at 17 per cent CAGR between 2015 and 2020 and surpass the US\$19 billion mark supported by booming real estate, retail, and hospitality sectors. The implementation of the Goods and Services Tax (GST) has created a common national market and reduced the overall tax burden on goods. It is expected to reduce costs in the long run on account of availability of GST input credit, which will result in the reduction in prices of services.

OUR MANUFACTURING PROCESS

MANUFACTURING PROCESSING STEPS:

STEP- 1: Procuring of Raw Materials

Our manufacturing process starts with procurement of raw materials i.e. Kraft Paper, adhesive for Ply bonding, adhesive for glue tab and water-based ink. Kraft Paper is arranged from paper mills in the form of reels as per the requirement of customer based on the GSM requirement of carton. Adhesive for glue tab, stapling wires and water based inks are procured from vendors, depending on the demand of customer.

STEP- 2: Corrugation Machine

The second step is where the craft paper is inserted inside the corrugated machine; and the machine starts with placing kraft paper reels on the corrugated machine. Corrugated waves are produced through steam.

Figure (3)

Figure (4)

STEP- 3: Pasting Machine

The Sheet is then inserted in the pasting machine, where the machine puts the gules on the kraft paper. This glue is applied to the Tip of the corrugated fluting medium liner and is pasted to the 1st liner giving result to what is called a Single Facer Web. Once the kraft paper comes out of the pasting machine is ready for the next Step.

STEP- 4: Punching Machine

This Sheet is then passed through a set of pressurised rollers after which glue is applied to the tip of corrugated fluting medium and the third layer is attached to the Single Face Web. The result is a 3-ply single wall structure called a 3-Ply Board.

STEP- 5: Scoring Machine

Then that sheet will go to scoring machine where length, width and height of box will be designed on the sheet. The designed area would then be cut so that the sheet is in the condition to get pasted together in order to make the boxes.

STEP- 6: Slotting Machine

Then by using slotting machine, the slit and scored sheet is then passed through Cut Off where the sheet is cut as per the length and width requirements of the box and removes unwanted material if any.

STEP- 7: Stitching Machine

We prepare box after stitching of box, so the sheet which comes out of the slotting machine is then inserted into the stitching machine where the corners of the sheet are attached to each other by the machine so now the box is ready for the quality checks.

"The Consolidated Restated financial statements are prepared and presented under the historical cost convention and evaluated on a going-concern basis using the accrual system of accounting in accordance with the accounting principles generally accepted in India (Indian GAAP) and the requirements of the notified sections, schedules and rules of the Companies Act 2013 including the Accounting Standards as prescribed by the Companies (Accounting Standards) Rules, 2006 as per section 211(3C) of the Companies Act, 1956 (which are deemed to be applicable as Section 133 of the Companies Act, 2013 ("the Act") read with Rule 7 of Companies (Accounts) Rules, 2014).

Difference between the actual result and estimates are recognized in the period in which results are known/materialized."

(C) Significant Accounting Policies:

(a) Use of Estimates:

The preparation of Consolidated Restated financials statements in conformity with Indian GAAP requires management to make judgments, estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent liabilities on the date of Consolidated Restated financials statements and the reported amounts of revenue and expenses during the reported period. Although these estimates are based on management's best knowledge of current events and actions, uncertainty about these assumptions and estimates could result in the outcomes requiring a material adjustment to the Carrying amounts of Assets or Liabilities in future periods.

(b) Property, Plant and equipment:

Property, Plant and Equipment are stated at cost of acquisition or construction less accumulated depreciation and impairment loss, if any. The cost of an asset comprises of its purchase price and any directly attributable cost of bringing the assets to working condition for its intended use. Expenditure on additions, improvements and renewals is capitalized and expenditure for maintenance and repairs is charged to profit and loss account.

Depreciation is provided on straight line basis based on life assigned to each asset in accordance with Schedule II of the Act or as per life estimated by the Management.

The depreciation rates are derived as per useful life of asset estimated by management.

(c) Revenue Recognition:

Revenue is recognized when it is earned and no significant uncertainty exists as to its realization or collection. Revenue from sale of goods is recognized on delivery of the products, when all significant contractual obligations have been satisfied, the property in the goods is transferred for price, significant risk and rewards of ownership are transferred to the customers and no effective ownership is retained.

In the Consolidated Restated financials, revenue from operation does not include Indirect taxes like sales tax and/or Goods & service tax.

(e) Investments:

Investments, which are readily realizable and intended to be held for not more than one year from the date on which such investments are made, are classified as current investments. All other investments are classified as long-term investments.

On initial recognition, all investments are measured at cost. The cost comprises price and directly attributable acquisition charges such as brokerage, fees and duties.

Current investments are carried in the Consolidated Restated financials statements at lower of cost and fair value determined on an individual investment basis. Long term investments are carried at cost. However, provision for diminution in value is made to recognize a decline other than temporary in the value of Investments.

On disposal of investment, the difference between its carrying amount and net disposal proceeds is charged or credited to the statement of profit and loss.

(f) Inventories:

Inventories of raw materials, work in progress, finished goods are valued at lower of cost and net realizable value. Net realizable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and estimated costs necessary to make the sale.

(g) Employee Benefits:

Retirement benefit in the form of provident fund is a defined contribution scheme. The contribution to the provident fund is charged to the statement of profit and loss for the year when an employee renders the related services. The company has no obligations, other than the contribution payable to the provident fund.

Provision for Gratuity is provided on the basis of Actuarial Valuation Report of the Actuary.

(h) Taxation:

Tax expenses comprises of current and deferred tax. Current income tax is measured at the amount expected to be paid to the Tax Authorities in accordance with the Income Tax Act'1961 enacted or substantively enacted at the reporting date.

Deferred Tax Assets arising from timing differences are recognized to the extent there is a reasonable certainty that the assets can be realized in future.

(i) Borrowing Cost:

Borrowing Cost includes interest and amortization of ancillary costs incurred in connection with the arrangement of borrowings. Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalized as part of the cost of the respective asset. All other borrowing costs are expensed in the period they occur.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and Foreign Exchange Management Act, 1999 (“**FEMA**”). While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the Reserve Bank of India (“**RBI**”) and Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“**DIPP**”).

The Government of India, from time to time, has made policy pronouncements on Foreign Direct Investment (“**FDI**”) through press notes and press releases. The Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“**DIPP**”), has issued consolidated FDI Policy Circular of 2017 (“**FDI Policy 2017**”), which with effect from August 28, 2017, consolidates and supersedes all previous press notes, press releases and clarifications on FDI Policy issued by the DIPP that were in force. The Government proposes to update the consolidated circular on FDI policy once every year and therefore, FDI Policy 2017 will be valid until the DIPP issues an updated circular.

The Reserve Bank of India (“**RBI**”) also issues Master Circular on Foreign Investment in India every year. Presently, FDI in India is being governed by Master Circular on Foreign Investment dated July 01, 2015 as updated from time to time by RBI. In terms of the Master Circular, an Indian company may issue fresh shares to people resident outside India (who is eligible to make investments in India, for which eligibility criteria are as prescribed).
