## SECTION III - RISK FACTORS

*An investment in equity shares involves a high degree of risk. Investors should carefully consider all the information in this Draft Prospectus, including the risks and uncertainties described below, before making an investment in the Equity Shares. If any of the following risks, or other risks that are not currently known or are now deemed immaterial, actually occur, our business, results of operations, cash flows and financial condition could suffer, the price of the Equity Shares could decline, and you may lose all or part of your investment. In making an investment decision, prospective investors must rely on their own examination of us and the terms of the Issue including the merits and risks involved. Investors should consult their tax, financial and legal advisors about particular consequences to them of an investment in the Issue. The financial and other related implications of the risk factors, wherever quantifiable, have been disclosed in the risk factors mentioned below. However, there are certain risk factors where the financial impact is not quantifiable and, therefore, such financial impact cannot be disclosed in such risk factors. Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify the financial or other implications of any of the risks described in this section.*

*This Draft Prospectus also contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Draft Prospectus. See section “Forward-Looking Statements” beginning on page 12.*

*To obtain a complete understanding, prospective investors should read this section in conjunction with the sections “Our Business”, “Industry Overview” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” on pages 72, 62 and 131, respectively, as well as the other financial and statistical information contained in this Draft Prospectus.*

*Unless otherwise indicated or the context otherwise requires, the financial information for the period ended January 31, 2021 included herein is derived from our Restated Financial Information, included in this Draft Prospectus. For further information, see “Financial Information” on page 109.*

### INTERNAL RISKS

- 1. We have a very limited operating history of our operations, which may make it difficult for investors to evaluate our historical performance or future prospects. Further our restated financials reflects losses in the previous financial years.***

Our Company was originally incorporated on as a private limited Company under the Companies Act, 2013 with Registrar of Companies, Maharashtra at Mumbai through a certificate of incorporation dated July 29, 2020. Post which we started our business operations. We have very limited operating history from which one can evaluate our business, future prospects and viability. Our future revenues and profitability are difficult to estimate and could fluctuate significantly and as a result the price of our Equity Shares may be volatile. For further details, see the section titled “Our History and Certain Corporate Matters” and “Restated Financial Statements” on page 87 and 111, respectively of the Draft Prospectus.

- 2. We do not generally enter into long term supply agreements with our suppliers for supply of material accordingly may face disruptions in supply from our current suppliers.***

We are dependent on our suppliers for our materials requirements. However, we do not have any long-term supply agreements or contracts or commitments in relation to the same or for any other materials used in our fabrication process. Any interruptions in the manufacturing operations of the suppliers could affect our ability to receive an adequate supply of quality products at reasonable prices. Additionally, any price volatility of these materials and our inability to adjust to the same could adversely affect our results of operations and profitability. Further any deterioration in the quality of the material procured could adversely affect our results of operations and profitability.

- 3. We do business with our customers on purchase order basis and do not have long-term contracts with most of them.***

Our business is conducted on purchase order basis, depending on the requirements of the client preferences and demand. We do not have long-term contracts with our customers and there can be no assurance that we will continue to receive repeat orders from any of them. Further, even if we were to continue receiving orders from

our clients, there can be no assurance that they will be on the same terms, and the new terms may be less favourable to us than those under the present terms.

**4. *A significant portion of our revenues is derived from the exports of our products and any reduction in the exports may adversely affect our revenues, business, results of operations and prospects***

The exports of our products contributed 77.47% of our revenues from operations (net) for the period ended January 31, 2021. While we have experienced growth of our operations through exports, we currently, and expect to, continue for the short and medium term to, depend on our revenues from exports of our products. We may experience reduction in cash flows and liquidity, and our results of operations may be adversely affected, if our exports and revenues in this consumer sub- category are reduced for any reason.

**5. *Our top 10 customers contribute majority of our revenues from operations. Any loss of business from one or more of them may adversely affect our revenues and profitability.***

Our top 10 customers contributed 70.27% of our revenues for the period ended January 31, 2021 based on Restated Financial Statements. However, our top customers may vary from period to period depending on the demand and thus the composition and revenue generated from these clients might change as we continue to add new customers in normal course of business. Since our business is concentrated among relatively few significant customers, we could experience a reduction in our results of operations, cash flows and liquidity if we lose one or more of these customers or the amount of business, we obtain from them is reduced for any reason, including but not limited on account of any dispute or disqualification.

Accordingly, we cannot assure you that the customers which contribute to the major part of our revenue stream will pay us the amounts due to us on time, or at all. In the event any of our significant customers fail to fulfil their respective obligations, our business, financial condition and results of operations would be adversely affected. While we believe we have maintained good relationships with our customers. However, there can be no assurance that we will continue to have such long term relationship with them. We cannot assure that we shall generate the same quantum of business, or any business at all, from these customers, and loss of business from one or more of them may adversely affect our revenues and profitability.

**6. *We have working capital requirements, and the actual amount and timing of our working capital requirements may differ from our estimates for the same. We may require additional financing to meet those requirements, which could have an adverse effect on our business, results of operations and financial condition.***

Our Company requires working capital to finance the purchase of materials and other related work before payment is received from customers. The actual amount and timing of our future working capital requirements may differ from estimates as a result of, among other factors, unforeseen delays or cost overruns, unanticipated expenses, regulatory changes, economic conditions, and additional market developments. Our working capital requirements may increase if, under certain contracts, payment terms do not include advance payments or such contracts have payment schedules that shift payments toward the end of a project or otherwise increase our working capital burdens. All of these factors may result, or have resulted, in increases in our working capital needs. For further details on our working capital requirements, please see “*Objects of the Issue*” on page 53.

Our sources of additional financing, required to meet our working capital requirements may include the incurrence of debt or the issue of equity or debt securities or a combination of both. If we decide to raise additional funds through the incurrence of debt, our interest and debt repayment obligations will increase, and could have a significant effect on our profitability and cash flows and we may be subject to additional covenants, which could limit our ability to access cash flows from operations. Any issuance of equity, on the other hand, could result in a dilution of your shareholding. Accordingly, continued increases in our working capital requirements may have an adverse effect on our financial condition and results of operations.

**7. *We require a number of approvals, licences and registrations in the ordinary course of our business. Some of the approvals are require change of name pursuant to conversion of our Company as public limited company the failure to obtain or apply for such change of name in a timely manner may adversely affect our operations***

We require a number of approvals, licenses, registrations and permits for our business. Additionally, we may need to apply for renewal of approvals which expire, from time to time, as and when required in the ordinary course.

Any failure to renew the approvals that have expired, or to apply for and obtain the required approvals, licences, registrations or permits, or any suspension or revocation of any of the approvals, licences, registrations and permits that have been or may be issued to us, could result in delaying the operations of our business, which may adversely affect our business, financial condition, results of operations and prospects.

Our Company got converted from a private limited company to public limited company through a fresh certificate of incorporation dated April 12, 2021. We need to apply for change on name for the approvals, licences and registrations we have received so far. In case we fail to obtain the change in name of the public limited company, it may adversely affect our business or we may not be able to carry our business. We cannot assure you that the approvals, licences, registrations and permits issued to us would not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action.

**8. *We have made application for registration of our logo . We may be unable to adequately protect our intellectual property. Furthermore, we may be subject to claims alleging breach of third-party intellectual property rights.***

As such, we do not enjoy the statutory protections accorded to a registered trademark or logo as on date. There can be no assurance that we will be able to register the logo in future or that, third parties will not infringe our intellectual property, causing damage to our business prospects, reputation and goodwill. Our efforts to protect our intellectual property may not be adequate and may lead to erosion of our business value and our operations could be adversely affected. We may need to litigate in order to determine the validity of such claims and the scope of the proprietary rights of others. Any such litigation could be time consuming and costly and the outcome cannot be guaranteed. We may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect our intellectual property. We have limited experience and knowledge of carrying out such operations, and our foray into the same may be subject to high barriers to entry, including existing competition and market dynamics. Due to our limited experience, our entry into new business segments may not be successful, which could hamper our growth and damage our reputation. Venturing into a new product line may also require methods of operations and marketing and financial strategies different from those currently employed in our Company. We will be subject to the risks generally associated with new product introductions and applications, including unproven know-how, unreliable technology, inexperienced staff, delays in product development and possible failure of products to operate properly. We may also encounter other additional anticipated risks and significant competition in such markets. We cannot assure you that we will be able to successfully develop our new product lines, and may not be able to successfully develop or introduce new products on a timely basis or at all, or ensure that they are less costly than those of our competitors; or to offer customers payment and other commercial terms as favourable as those offered by our competitors. If our competitors outperform our business and develop superior products at a lesser cost in a timely manner, our growth and financial results could be adversely affected.

Furthermore, our new business or projects may turn out to be disruptive and may cause an interruption to our existing business as a result. We cannot assure you that the transition of our manufacturing facilities and resources

to fulfil production under new product programs will not impact production rates or other operational efficiency measures at our facilities. The exchange rate between the Indian Rupee and these currencies has fluctuated in the past and our results of operations have been impacted by such fluctuations and may be impacted by such fluctuations in the future. Appreciation or depreciation of the Indian rupee against the U.S. Dollar and other foreign currencies may affect our results of operations.

***15. Our failure to identify and understand evolving industry trends and preferences and to develop new products to meet our customers' demands may materially adversely affect our business.***

Changes in customer preferences, regulatory or industry trends or requirements may render certain of our products obsolete or less attractive. If we are unable to anticipate in a timely manner, or at all, we may be unable to effectively implement our strategies, and our business and results of operations may be adversely affected. Moreover, we cannot assure you that we will be able to achieve the technological advances that may be necessary for us to remain competitive or that certain of our products will not become unattractive.

Our failure to successfully and timely anticipate and offer new products in order to cater to the requirements of our customers and industry trends could have a material adverse effect on our business, financial condition, results of operations and future prospects.

Consequently, our funding requirements and deployment of funds may change, which may result in rescheduling of the proposed utilization of the Net Proceeds and increasing or decreasing expenditure for a particular activity, subject to compliance with applicable law and the investment policies approved by our management. Furthermore, pursuant to Section 27 of the Companies Act, 2013, any variation in the objects would require a special resolution to be passed by the shareholders of our Company and the promoter or controlling shareholders will be required to provide an exit opportunity to the shareholders who do not agree to such proposal to vary the objects in accordance with the Articles of Association of our Company and as may otherwise be prescribed by SEBI.

In the case of increase in actual expenses or shortfall in requisite funds, additional funds for a particular activity will be met by means available to us, including internal accruals and additional equity and/or debt arrangements. If actual utilization towards the objects of the Issue is lower than the proposed deployment, such balance will be used for future growth opportunities, and general corporate purposes. If estimated utilization of the Net Proceeds is not completely met in a fiscal year, it shall be carried forward.

Our management will have significant flexibility in temporarily investing the Net Proceeds and there can be no assurance that we will earn significant interest income on, or that we will not suffer unanticipated diminution in the value of, such temporary investments.

Employee or executive misconduct could also involve the improper use or disclosure of confidential information, which could result in regulatory sanctions and serious reputational or financial harm. It is not always possible to deter employee or executive misconduct and the precautions taken and systems put in place to prevent and detect such activities may not be effective in all cases. Any instances of such misconduct could adversely affect our reputation.

***19. If we fail to maintain an effective system of internal controls, we may not be able to successfully manage, or accurately report, our financial risks.***

Effective internal controls are necessary for us to prepare reliable financial reports and effectively avoid fraud. Moreover, any internal controls that we may implement, or our level of compliance with such controls, may deteriorate over time, due to evolving business conditions. There can be no assurance that deficiencies in our internal controls will not arise in the future, or that we will be able to implement, and continue to maintain,

adequate measures to rectify or mitigate any such deficiencies in our internal controls. Any inability on our part to adequately detect, rectify or mitigate any such deficiencies in our internal controls may adversely impact our ability to accurately report, or successfully manage, our financial risks, and to avoid fraud.

We may decide to retain all of our earnings to finance the development and expansion of our business and, therefore, may not declare dividends on our Equity Shares. We cannot assure you that we will be able to pay dividends at any point in the future. For details of dividend paid by our Company in the past, see “*Dividend Policy*” on page 108.

***21. We have, in the past, entered into certain transactions with related parties and may continue to do so in the future. Any related party transactions that are not on an arm's length basis may adversely affect our business, results of operation and financial condition.***

We have, in the past, entered into certain transactions with related parties and may continue to do so in the future. For further details, see “*Related Party Transactions*” on page 110. While we believe that all such transactions have been conducted on an arms-length basis, we cannot assure you that we would not have achieved more favourable commercial terms had such transactions not been entered into with related parties. Further, we may enter into related party transactions in the future, and such transactions may potentially involve conflicts of interest. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our results of operations and financial condition.

***22. Certain of our Directors, Promoters and members of our Promoter Group have interests in our Company other than reimbursement of expenses incurred and normal remuneration or benefits.***

Certain of our Promoters and Directors may be regarded as having an interest in our Company other than reimbursement of expenses incurred and normal remuneration or benefits. Certain Promoters, Directors and members of the Promoter Group may be deemed to be interested to the extent of Equity Shares held by them, as well as to the extent of any dividends, bonuses or other distributions on such Equity Shares. Additionally, we have, in the course of our business, entered into, and will continue to enter into, transactions with related parties. Certain of the key related party transactions entered into by us include the purchase of immovable property as well.

While, in our view, all such transactions that we have entered into are legitimate business transactions conducted on an arms' length basis, we cannot assure you that we could not have achieved more favourable terms had such arrangements not been entered into with related parties or that we will be able to maintain existing terms, in cases where the terms are more favourable than if the transaction had been conducted on an arms' length basis. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our business, prospects, result of operations, financial condition and cash flows, including because of potential conflicts of interest or otherwise. For more information on our related party transactions, see “*Related Party Transactions*”, “*Our Management – Interest of Directors*” and “*Our Promoter and Promoter Group*” on page 110, 94 and 101, respectively.

***23. Our Promoters and members of the Promoter Group will continue to retain significant shareholding in our Company after the Issue, which will allow them to exercise significant influence over us.***

After the completion of the Issue, our Promoters and members of the Promoter Group will hold approximately [●]% of our outstanding Equity Shares. Accordingly, our Promoters and members of the Promoter Group will continue to exercise significant influence over our business and all matters requiring shareholders' approval, including the composition of our Board of Directors, the approval of mergers, strategic acquisitions or joint ventures or the sales of substantially all of our assets, and the policies for dividends, lending, investments and capital expenditures. This concentration of ownership may also delay, defer or even prevent a change in control of our Company and may make some transactions more difficult or impossible without the support of our

Promoters and members of the Promoter Group. Further, the Takeover Regulations may limit the ability of a third party to acquire control. The interests of our Promoter, as our Company's controlling shareholder, could conflict with our Company's interests, your interests or the interests of our other shareholders. There is no assurance that our Promoter will act to resolve any conflicts of interest in our Company's or your favour.

**24. Our Company does not have any listed peer companies for comparison of performance and therefore, investors must rely on their own examination of accounting ratios of our Company for the purposes of investment in the Issue.**

Business models of some of the listed companies which undertake certain business, which may be considered similar to our business are not comparable to our business model based on (i) percentage of contribution made by their business activities to the total revenue of these listed companies; and (ii) nature and extent of activities in diverse sectors undertaken by these listed companies. Therefore, there are no listed companies that may be considered as the peer group of our Company. Therefore, investors must rely on their own examination of accounting ratios of our Company for the purposes of investment in the Issue.

**25. We have experienced negative cash flows from investing activities in previous periods and cannot assure you that we will not experience negative cash flows in future periods. Negative cash flows may adversely affect our financial condition, results of operations and prospects.**

Particulars	(₹ in Lakhs)

<b>Cash and cash equivalents at the beginning of the period / year</b>	<b>-</b>
<b>Cash and cash equivalents at the end of the period / year</b>	<b>109.15</b>

We may in the future experience negative cash flows as well. Negative cash flows over extended periods, or significant negative cash flows in the short term, could materially impact our ability to operate our business and implement our growth plans. This situation may have an adverse effect on our cash flows, business, future financial performance and results of operations.

For more information, see "Restated Financial Statements" and "Management's Discussion and Analysis of Financial Condition and Results of Operations" on pages 111 and 131, respectively.

**26. Our Promoters have limited or no experience in the businesses that we operate in.**

Our Promoters have limited or no experience in the in the businesses that we operate in. The industry in which we operate, and the sectors which we cater to, involve various risks, including regulatory risks. of matters relating to India and its economy are subject to the limitation that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete or unreliable.

## **EXTERNAL RISK FACTORS**

### ***Risks Related to India***

#### ***1. The outbreak of COVID-19, or outbreak of any other severe communicable disease could have a potential impact on our business, financial condition and results of operations.***

The outbreak, or threatened outbreak, of any severe communicable disease (particularly the COVID-19) could materially adversely affect overall business sentiment and environment, particularly if such outbreak is inadequately controlled. The spread of any severe communicable disease may also adversely affect the operations of our customers and suppliers, which could adversely affect our business, financial condition and results of operations. The outbreak of COVID-19 has resulted in authorities implementing several measures such as travel bans and restrictions, quarantines, and lockdowns. On account of the nationwide lockdown we experienced certain operational disruptions and we cannot predict the further impact COVID-19 may have on our operations, the operations of our customers, and those of our respective vendors and suppliers. A rapid increase in severe cases and deaths where measures taken by governments fail or are lifted prematurely, may cause significant economic disruption in India and in the rest of the world. The scope, duration and frequency of such measures and the adverse effects of COVID-19 remain uncertain and could be severe. Our ability to meet our ongoing disclosure obligations might be adversely affected, despite our best efforts. If any of our employees were suspected of contracting COVID-19 or any other epidemic disease, this could require us to quarantine some or all of these employees or disinfect the facilities used for our operations. In addition, our revenue and profitability could be impacted to the extent that a natural disaster, health epidemic or other outbreak harms the Indian and global economy in general.

The outbreak has significantly increased economic uncertainty. It is likely that the current outbreak or continued spread of COVID-19 will cause further economic slowdown and it is possible that it could cause a global recession. The spread of COVID-19 has caused us to modify our business practices (including employee travel, employee work locations, and cancellation of physical participation in meetings, events and conferences), and we may take further actions as may be required by government authorities or that we determine are in the best interests of our employees, customers, partners, and suppliers. There is no certainty that such measures will be sufficient to mitigate the risks posed by the outbreak, and we cannot predict the future impact of COVID-19 on our ability to perform critical functions.

We are closely monitoring the impact of COVID-19 on all aspects of our business, but there can be no assurance that such monitoring will enable us to avoid part or all of any future impact from the spread of COVID-19 or its consequences, including downturns in business sentiment generally or in our sector in particular. The degree to which COVID-19 impacts our results will depend on future developments, which are highly uncertain and cannot be predicted, including, but not limited to, the duration and spread of the outbreak, its severity, the actions taken to contain the outbreak or treat its impact, and how quickly and to what extent normal economic and operating conditions can resume. The above risks can threaten the safe operation of our facilities and cause disruption of operational activities, environmental harm, loss of life, injuries and impact the wellbeing of our people.

Further in case the lockdown is reinstated, it could result in muted economic growth or give rise to a recessionary economic scenario, in India and globally, which could adversely affect the business, prospects, results of operations and financial condition of our Company.

#### ***2. Financial instability in other countries may cause increased volatility in Indian financial markets.***

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, particularly emerging market countries in Asia. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss of investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our business, our future financial performance and the prices of the Equity Shares.

The recent outbreak of COVID-19 has significantly affected financial markets around the world. Any other global economic developments or the perception that any of them could occur may continue to have an adverse effect on global economic conditions and the stability of global financial markets, and may significantly reduce global market liquidity and restrict the ability of key market participants to operate in certain financial markets. Any of these factors could depress economic activity and restrict our access to capital, which could have an adverse effect on our business, financial condition and results of operations and reduce the price of our Equity Shares. Any financial disruption could have an adverse effect on our business, future financial performance, shareholders' equity and the price of our Equity Shares.

**3. *The occurrence of natural or man-made disasters could adversely affect our results of operations, cash flows and financial condition. Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.***

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tsunamis, tornadoes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations, cash flows or financial condition. Terrorist attacks and other acts of violence or war may adversely affect the Indian securities markets. In addition, any deterioration in international relations, especially between India and its neighbouring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares. In addition, India has witnessed local civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

**4. *We are subject to regulatory, economic, social and political uncertainties and other factors beyond our control.***

We are incorporated in India and we conduct our corporate affairs and our business in India. Our Equity Shares are proposed to be listed on BSE. Consequently, our business, operations, financial performance and the market price of our Equity Shares will be affected by interest rates, government policies, taxation, social and ethnic instability and other political and economic developments affecting India.

Factors that may adversely affect the Indian economy, and hence our results of operations may include:

- any exchange rate fluctuations, the imposition of currency controls and restrictions on the right to convert or repatriate currency or export assets;
- any scarcity of credit or other financing in India, resulting in an adverse effect on economic conditions in India and scarcity of financing for our expansions;
- prevailing income conditions among Indian customers and Indian corporations;
- epidemic or any other public health in India or in countries in the region or globally, including in India's various neighbouring countries;
- macroeconomic factors and central bank regulation, including in relation to interest rates movements which may in turn adversely impact our access to capital and increase our borrowing costs;
- volatility in, and actual or perceived trends in trading activity on, India's principal stock exchanges;
- decline in India's foreign exchange reserves which may affect liquidity in the Indian economy;
- downgrading of India's sovereign debt rating by rating agencies; and
- difficulty in developing any necessary partnerships with local businesses on commercially acceptable terms and/or a timely basis.

Any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy or certain regions in India, could adversely affect our business, results of operations and financial condition and the price of the Equity Shares. For example, our manufacturing facilities are located in western India, hence any significant disruption, including due to social, political or economic factors or natural calamities or civil disruptions, impacting this region may adversely affect our operations.

**5. *If inflation were to rise in India, we might not be able to increase the prices of our services at a proportional rate in order to pass costs on to our customers and our profits might decline.***

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of salaries, and other expenses relevant to our business.

High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to pass on to our customers, whether entirely or in part, and the same may adversely affect our business and financial condition. In particular, we might not be able to reduce our costs or increase our rates to pass the increase in costs on to our customers. In such case, our business, results of operations, cash flows and financial condition may be adversely affected.

Further, the GoI has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

**6. *Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business, prospects and results of operations.***

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes may adversely affect our business, results of operations and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy. For example, the Government of India implemented a comprehensive national goods and services tax (“**GST**”) regime with effect from July 1, 2017, that combined multiple taxes and levies by the Central and State Governments into a unified tax structure. Our business and financial performance could be adversely affected by any unexpected or onerous requirements or regulations resulting from the introduction of GST or any changes in laws or interpretation of existing laws, or the promulgation of new laws, rules and regulations relating to GST, as it is implemented. The Government has enacted the GAAR which have come into effect from April 1, 2017.

The Government of India has announced the union budget for Fiscal 2021 and the Ministry of Finance has notified the Finance Act, 2020 (“**Finance Act**”) on March 27, 2020, pursuant to assent received from the President, and the Finance Act will come into operation with effect from July 1, 2020. There is no certainty on the impact that the Finance Act may have on our business and operations or on the industry in which we operate. We cannot predict whether any amendments made pursuant to the Finance Act would have a material adverse effect on our business, financial condition and results of operations. Unfavourable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment and stamp duty laws governing our business and operations could result in us being deemed to be in contravention of such laws and may require us to apply for additional approvals. Any such changes in interpretation of laws may have an impact on our results of operations. Further, a draft of the Personal Data Protection Bill, 2019 (“**Bill**”) has been introduced before the Lok Sabha on December 11, 2019, which is currently being referred to a joint parliamentary committee by the Parliament. We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current businesses or restrict our ability to grow our businesses in the future.

***Risks Related to the Equity Shares***

**7. *The requirements of being a publicly listed company may strain our resources.***

We are not a publicly listed company and have not, historically, been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the SEBI Listing Regulations which will require us to file audited annual and audited / unaudited half-yearly reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily

determine and accordingly report any changes in our results of operations as promptly as other listed companies. Further, as a publicly listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management attention will be required. As a result, our management's attention may be diverted from our business concerns, which may adversely affect our business, prospects, results of operations and financial condition. In addition, we may need to hire additional legal and accounting staff with appropriate experience and technical accounting knowledge, but we cannot assure you that we will be able to do so in a timely and efficient manner.

**8. *There is no guarantee that our Equity Shares will be listed on the BSE in a timely manner or at all.***

In accordance with Indian law and practice, permission for listing and trading of our Equity Shares will not be granted until after certain actions have been completed in relation to this Issue and until Allotment of Equity Shares pursuant to this Issue.

In accordance with current regulations and circulars issued of SEBI, our Equity Shares are required to be listed on the BSE within such time as mandated under UPI Circulars, subject to any change in the prescribed timeline in this regard. However, we cannot assure you that the trading in our Equity Shares will commence in a timely manner or at all. Any failure or delay in obtaining final listing and trading approvals may restrict your ability to dispose of your Equity Shares.

**9. *An investment in the Equity Shares is subject to general risks related to investments in Indian Companies.***

Our Company is incorporated in India and almost all of our assets and employees are located in India. Consequently, our business, results of operations, financial condition and the market price of the Equity Shares will be affected by changes in interest rates in India, policies of the Government of India, including taxation policies along with policies relating to industry, political, social and economic developments affecting India.

**10. *Under Indian law, foreign investors are subject to investment restrictions that limit our ability to attract foreign investors, which may adversely affect the trading price of the Equity Shares.***

Under foreign exchange regulations currently in force in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions), if they comply with the valuation and reporting requirements specified by the RBI. If a transfer of shares is not in compliance with such requirements and fall under any of the exceptions specified by the RBI, then the RBI's prior approval is required. Additionally, shareholders who seek to convert Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India require a no-objection or a tax clearance certificate from the Indian income tax authorities. Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020, issued by the Department for Promotion of Industry and Internal Trade, Government of India, investments where the beneficial owner of the Equity Shares is situated in or is a citizen of a country which shares land border with India, can only be made through the Government approval route, as prescribed in the Consolidated FDI Policy dated August 28, 2017. These investment restrictions shall also apply to subscribers of offshore derivative instruments. We cannot assure you that any required approval from the RBI or any other governmental agency can be obtained on any particular terms or at all.

**11. *Investors may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.***

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. Any gain realised on the sale of listed equity shares on a stock exchange held for more than 12 months will be subject to long term capital gains in India at the specified rates depending on certain factors, such as whether the sale is undertaken on or off the stock exchanges, the quantum of gains and any available treaty exemption. Accordingly, you may be subject to payment of long term capital gains tax in India, in addition to payment of Securities Transaction Tax ("STT"), on the sale of any Equity Shares held for more than 12 months. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Further, any gain realised on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India. Capital gains arising from the sale of the Equity Shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties

do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares. Additionally, the Finance Act, 2020 ("**Finance Act**") does not require dividend distribution tax ("**DDT**") to be payable in respect of dividends declared, distributed or paid by a domestic company after March 31, 2020, and accordingly, such dividends would not be exempt in the hands of the shareholders, both resident as well as non-resident.

***12. Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.***

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

***13. The Equity Shares have never been publicly traded, and, after the Issue, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Issue Price, or at all.***

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the BSE may not develop or be sustained after the Issue. Listing and quotation does not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. The Issue Price of the Equity Shares is proposed to be determined through a book-building process and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

***14. Fluctuation in the exchange rate between the Indian Rupee and foreign currencies may have an adverse effect on the value of our Equity Shares, independent of our operating results.***

On listing, our Equity Shares will be quoted in Indian Rupees on the BSE. Any dividends in respect of our Equity Shares will also be paid in Indian Rupees and subsequently converted into the relevant foreign currency for repatriation, if required. Any adverse movement in currency exchange rates during the time that it takes to undertake such conversion may reduce the net dividend to foreign investors. In addition, any adverse movement in currency exchange rates during a delay in repatriating outside India the proceeds from a sale of Equity Shares, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the proceeds received by equity shareholders. For example, the exchange rate between the Rupee and the U.S. dollar has fluctuated substantially in recent years and may continue to fluctuate substantially in the future, which may have an adverse effect on the trading price of our Equity Shares and returns on our Equity Shares, independent of our operating results.

***15. The Issue Price of the Equity Shares may not be indicative of the market price of the Equity Shares after the Issue.***

The Issue Price of the Equity Shares determined by our Company in consultation with the Lead Manager is based on numerous factors, as described under "*Basis for Issue Price*" on page 57 and may not be indicative of the market price for the Equity Shares after the Issue. The market price of the Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that the investor will be able to resell their Equity Shares at or above the Issue Price.

***16. Any future issuance of Equity Shares, or convertible securities or other equity linked securities by us may dilute your shareholding and any sale of Equity Shares by our Promoter or members of our Promoter Group may adversely affect the trading price of the Equity Shares.***

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by us, may dilute your shareholding in our Company, adversely affect the trading price of the Equity Shares and our

ability to raise capital through an issue of our securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. We cannot assure you that we will not issue additional Equity Shares. The disposal of Equity Shares by our Promoter and Promoter Group, or the perception that such sales may occur may significantly affect the trading price of the Equity Shares. Except as disclosed in “*Capital Structure*” on page 41, we cannot assure you that our Promoter and Promoter Group will not dispose of, pledge or encumber their Equity Shares in the future.

***17. Holders of Equity Shares may be restricted in their ability to exercise pre-emptive rights under Indian law and thereby suffer future dilution of their ownership position.***

Under the Companies Act, a company incorporated in India must offer its equity shareholders pre-emptive rights to subscribe and pay for a proportionate number of equity shares to maintain their existing ownership percentages prior to issuance of any new equity shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by holders of three-fourths of the equity shares voting rights on such resolution. However, if the law of the jurisdiction that you are in does not permit the exercise of such pre-emptive rights without our filing an offering document or registration statement with the applicable authority in such jurisdiction, you will be unable to exercise such pre-emptive rights, unless we make such a filing. To the extent that you are unable to exercise pre-emptive rights granted in respect of our Equity Shares, your proportional interests in our Company may be reduced.

***18. QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Applications (in terms of quantity of Equity Shares or the Application Amount) at any stage after submitting a Bid.***

Pursuant to the SEBI ICDR Regulations, QIBs and Non-Institutional Investors are required to pay the Application Amount on submission of the Application and are not permitted to withdraw or lower their Applications (in terms of quantity of Equity Shares or the Application Amount) at any stage after submitting a Bid. Retail Individual Investors can revise their Applications during the Issue Period and withdraw their Applications until Issue Closing Date. While our Company is required to complete all necessary formalities for listing and commencement of trading of the Equity Shares on all BSE where such Equity Shares are proposed to be listed including Allotment pursuant to the Issue within six Working Days from the Issue Closing Date, events affecting the Applicants’ decision to invest in the Equity Shares, including material adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operation or financial condition may arise between the date of submission of the Application and Allotment. Our Company may complete the Allotment of the Equity Shares even if such events occur, and such events limit the Applicants’ ability to sell the Equity Shares Allotted pursuant to the Issue or cause the trading price of the Equity Shares to decline on listing.

## OBJECTS OF THE ISSUE

The Issue comprises fresh issue of Equity Share by our Company.

### Issue

Our Company proposes to utilise the Net Proceeds from the Issue towards funding the following objects:

1. Funding working capital requirements; and
2. General corporate purposes.

(Collectively, referred to herein as the “**Objects of the Issue**”)

The main objects and objects incidental and ancillary to the main objects, as set out in our Memorandum of Association, enable our Company to undertake our existing business activities and the activities for which funds are being raised by us through the Issue. In addition, our Company expects to receive the benefits of listing of Equity Shares on the BSE including enhancing our visibility and our brand image among our existing and potential customers and creating a public market for our Equity Shares in India.

### Net Proceeds

The details of the proceeds of the Issue are summarised in the table below:

Particulars	Amount*
Gross Proceeds from the Issue	[●]
Less: Estimated Issue related expenses in relation to the Issue	[●]
<b>Net Proceeds</b>	[●]

\* To be finalised upon determination of the Issue Price and updated in the Prospectus at the time of filing with the RoC.

### Utilization of Net Proceeds and Schedule of Implementation and Deployment

The Net Proceeds are currently expected to be deployed in accordance with the schedule set forth below:

Particulars	Amount which will be financed from Net Proceeds <sup>(1)</sup>	Estimated Utilization of Net Proceeds
		Fiscal 2022
Funding working capital requirements	[●]	[●]
General corporate purposes <sup>(2)</sup>	[●]	[●]
<b>Net Proceeds</b>	[●]	[●]

(3) To be finalised upon determination of Issue Price and updated in the Prospectus prior to filing with the RoC.

(4) The amount shall not exceed 25% of the Gross Proceeds

The deployment of funds indicated above is based on management estimates, current circumstances of our business and the prevailing market condition. The deployment of funds described herein has not been appraised by any bank or financial institution or any other independent agency. See “*Risk Factors – Our management will have broad discretion in how we apply the Net Proceeds, including interim use of the Net Proceeds, and there is no assurance that the Objects of the Issue will be achieved within the time frame expected or at all, or that the deployment of the Net Proceeds in the manner intended by us will result in any increase in the value of your investment.*” on page 23. Given the nature of our business, we may have to revise our funding requirements and deployment on account of a variety of factors such as our financial condition, business strategy and external factors such as market conditions, competitive environment and interest or exchange rate fluctuations and other external factors which may not be within the control of our management. This may entail rescheduling or revising the planned expenditure, implementation schedule and funding requirements, including the expenditure for a particular purpose, at the discretion of our management. Subject to applicable law, if the actual utilisation towards any of the Objects is lower than the proposed deployment, such balance will be used for general corporate purposes to the extent that the total amount to be utilized towards general corporate purposes will not exceed 25% of the gross proceeds from the Issue in accordance with Regulation 230(2) of the SEBI ICDR Regulations. In case of a shortfall in raising requisite capital from the Net Proceeds, business considerations may require us to explore a range of options including utilising our internal accruals and seeking additional debt from existing and future

lenders. We believe that such alternate arrangements would be available to fund any such shortfalls. Further, in case of variations in the actual utilization of funds earmarked for the purposes set forth above, increased fund requirements for a particular purpose may be financed by surplus funds, if any, available in respect of the other purposes for which funds are being raised in the Issue. To the extent our Company is unable to utilise any portion of the Net Proceeds towards the aforementioned Objects, per the estimated scheduled of deployment specified above, our Company shall deploy the Net Proceeds in subsequent Fiscals towards the aforementioned Objects.

### GLOBAL OUTLOOK

Although recent vaccine approvals have raised hopes of a turnaround in the pandemic later this year, renewed waves and new variants of the virus pose concerns for the outlook. Amid exceptional uncertainty, the global economy is projected to grow 5.5 percent in 2021 and 4.2 percent in 2022. The 2021 forecast is revised up 0.3 percentage point relative to the previous forecast, reflecting expectations of a vaccine-powered strengthening of activity later in the year and additional policy support in a few large economies.

The projected growth recovery this year follows a severe collapse in 2020 that has had acute adverse impacts on women, youth, the poor, the informally employed, and those who work in contact-intensive sectors. The global growth contraction for 2020 is estimated at -3.5 percent, 0.9 percentage point higher than projected in the previous forecast (reflecting stronger-than-expected momentum in the second half of 2020).

(Source: IMF Staff Estimates)

**Note:** AEs = Advanced Economies, EMDEs = Emerging Markets and Developing Economies, WEO = World Economic Outlook

The strength of the recovery is projected to vary significantly across countries, depending on access to medical interventions, effectiveness of policy support, exposure to cross-country spillovers, and structural characteristics entering the crisis as portrayed in the table above.

Strong multilateral cooperation is required to bring the pandemic under control everywhere. Such efforts include

bolstering funding for the COVAX facility to accelerate access to vaccines for all countries, ensuring universal distribution of vaccines, and facilitating access to therapeutics at affordable prices for all. Many countries, particularly low-income developing economies, entered the crisis with high debt that is set to rise further during the pandemic. The global community will need to continue working closely to ensure adequate access to international liquidity for these countries. Where sovereign debt is unsustainable, eligible countries should work with creditors to restructure their debt under the Common Framework agreed by the G20.

Multiple vaccine approvals and the launch of vaccination in some countries in December have raised hopes of an eventual end to the pandemic. Moreover, economic data released after the October 2020 WEO forecast suggest stronger-than-projected momentum on average across regions in the second half of 2020. Despite the high and rising human toll of the pandemic, economic activity appears to be adapting to subdued contact-intensive activity with the passage of time. Finally, additional policy measures announced at the end of 2020—notably in the United States and Japan—are expected to provide further support in 2021–22 to the global economy. These developments indicate a stronger starting point for the 2021–22 global outlook than envisaged in the previous forecast.

However, surging infections in late 2020 (including from new variants of the virus), renewed lockdowns, logistical problems with vaccine distribution, and uncertainty about take-up are important counterpoints to the favorable news. Much remains to be done on the health and economic policy fronts to limit persistent damage from the severe contraction of 2020 and ensure a sustained recovery.

Major central banks are assumed to maintain their current policy rate settings throughout the forecast horizon to the end of 2022. As a result, financial conditions are expected to remain broadly at current levels for advanced economies while gradually improving for emerging market and developing economies. Within this latter group, differentiation between investment-grade sovereigns (who have been able to issue external debt in large amounts in 2020) and high-yield borrowers (many of whom are constrained in their ability to take on additional debt and until recently have not accessed international markets during the pandemic) is expected to subside as the recovery takes hold. As noted in the January 2021 Global Financial Stability Report Update, markets remain upbeat about prospects for 2021, banking on continued policy support.

Reflecting the projected global recovery, oil prices are expected to rise in 2021 just over 20 percent from the low base for 2020, but will still remain well below their average for 2019. Non-oil commodity prices are also expected to increase with those of metals, in particular, projected to accelerate strongly in 2021.

**Note:** Real effective exchange rates are assumed to remain constant at the levels prevailing during October 23–November 20, 2020. Economies are listed on the basis of economic size. The aggregated quarterly data are seasonally adjusted. WEO = World Economic Outlook.

1. Difference based on rounded figures for the current and October 2020 WEO forecasts. Countries whose forecasts have been updated relative to October 2020 WEO forecasts account for 90 percent of world GDP measured at purchasing-power-parity weights.
2. For World Output, the quarterly estimates and projections account for approximately 90 percent of annual world output at purchasing-power-parity weights. For Emerging Market and Developing Economies, the quarterly estimates and projections account for approximately 80 percent of annual emerging market and developing economies' output at purchasing-power-parity weights.
3. Excludes the Group of Seven (Canada, France, Germany, Italy, Japan, United Kingdom, United States) and euro area countries.
4. For India, data and forecasts are presented on a fiscal year basis and GDP from 2011 onward is based on GDP at market prices with fiscal year 2011/12 as a base year.
5. Indonesia, Malaysia, Philippines, Thailand, Vietnam.
6. Simple average of growth rates for export and import volumes (goods and services).
7. Simple average of prices of UK Brent, Dubai Fateh, and West Texas Intermediate crude oil. The average price of oil in US dollars a barrel was \$41.29 in 2020; the assumed price, based on futures markets (as of January 4, 2021), is \$50.03 in 2021 and \$48.82 in 2022.
8. The inflation rate for the euro area is 0.9% in 2021 and 1.2% in 2022, for Japan is –0.1% in 2021 and 0.5% in 2022, and for the United States is 2.1% in 2021 and 2022, respectively.
9. Excludes Venezuela.

After an estimated 3.5 percent contraction in 2020, the global economy is projected to grow 5.5 percent in 2021 and 4.2 percent in 2022 as portrayed in the table above. The estimate for 2020 is 0.9 percentage point higher than projected in the October WEO forecast. This reflects the stronger than-expected recovery on average across regions in the second half of the year. The 2021 growth forecast is revised up 0.3 percentage point, reflecting additional policy support in a few large economies and expectations of a vaccine-powered strengthening of activity later in the year, which outweigh the drag on near-term momentum due to rising infections. The upgrade is particularly large for the advanced economy group, reflecting additional fiscal support—mostly in the United States and Japan—together with expectations of earlier widespread vaccine availability compared to the emerging market and developing economy group.

## INDIAN OUTLOOK

### Introduction

India has emerged as the fastest growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

### Market size

India's GDP (at constant 2011-12 prices) was estimated at ₹ 33.14 trillion (US\$ 452.74 billion) for the second quarter of FY2020-21, against ₹ 35.84 trillion (US\$ 489.62 billion) in the second quarter of FY2019-20.

India is the fourth-largest unicorn base in the world with over 21 unicorns collectively valued at US\$ 73.2 billion, as per the Hurun Global Unicorn List. By 2025, India is expected to have ~100 unicorns by 2025 and will create ~1.1 million direct jobs according to the Nasscom-Zinnov report 'Indian Tech Start-up'.

India needs to increase its rate of employment growth and create 90 million non-farm jobs between 2023 and 2030's, for productivity and economic growth according to McKinsey Global Institute. Net employment rate needs to grow by 1.5% per year from 2023 to 2030 to achieve 8-8.5% GDP growth between 2023 and 2030.

India's foreign exchange reserves stood at US\$ 581.131 billion in the week up to December 18, 2020 according to data from RBI.

## Indian Economic Recovery

India has evolved through the pandemic on the back of strong policy initiatives by the government, along with an optimistic outlook for economic recovery. India has administered 4 million doses of COVID-19 vaccines in two weeks since January 16, 2021, becoming the fifth-largest inoculated country globally. India has become the world's vaccine hub and extended support to 90+ countries seeking to stock up vaccines.

Since March 2020, early lockdown, health-infra ramp-up, incremental unlocking, blanket testing, social distancing, tailored fiscal stimulus (to reduce supply-side disruptions and revive demand) and structural reforms initiated by the government have helped restrict the fatality rate in India to 1.2%—one of the lowest in the world. India is emerging as the world's fastest-growing major economy, with the IMF holding its growth forecasts as high as 6.8% for FY23. Also, the Economic Survey 2020-21 has drawn attention to the V-shaped economic growth—a testament to the burgeoning Indian economy and its intrinsic strength.

Sustained economic recovery was recorded in January 2021. Agriculture witnessed strong growth due to a healthy season of Rabi sowing. As of January 29, 2021, the total area sown under Rabi crops stood at 685 lakh hectares, a 2.9% YoY increase. Total area sown under Kharif stood at 1,117 lakh hectares, a 4.8% YoY increase. In December 2020, tractor sales increased by 41.2% YoY. For the 2020-21 Kharif season, total paddy procurement grew 17.75% YoY (as of February 4, 2021). From the ongoing Kharif Marketing Season (KMS) procurement operations, with MSP value worth ₹ 1.14 lakh crore (US\$ 15.71 billion), 89 lakh farmers have already benefitted.

Between April 2020 and January 2021, employment demand under the Mahatma Gandhi National Rural Employment Guarantee Scheme (MGNREGS) improved significantly (51.5% YoY). Until January 2021, 323.2 crore person-days' work was recorded under the scheme, a 46.8% YoY increase.

In January 2021, the Manufacturing Purchasing Managers' Index (PMI) in India stood at 57.7, compared with 56.4 in December 2020. This was driven by new orders and rising exports. In January 2021, merchandise exports rose 5.4% YoY. PMI Services Index also increased to 52.8 in January 2021, from 52.3 in December 2020. Overall business optimism improved in January 2021 owing to launch of the COVID-19 vaccination programme.

FDI remains a significant engine of economic growth and a key source of India's non-debt financing. Total FDI inflows stood at a record high of US\$ 58.37 billion between April 2020 and November 2020, a 22.4% increase over first eight months of 2019-20, supporting India's position as a favored global investor destination. Net FPI inflows stood at US\$ 1.23 billion in January 2021.

RBI kept the liquidity adjustment facility (LAF) policy repo rate unchanged at 4.0% from Feb. 3 to Feb. 5, 2021, because of the Monetary Policy Committee's (MPC) assessment of the current and evolving macroeconomic situation.

In the Union Budget 2021-22, capital expenditure for FY22 has been targeted to increase at 34.5% over FY21 (BE) and reach ₹ 5.5 lakh crore (US\$ 75.81 billion) to boost the economy.

Under the Aatmanirbhar Bharat (self-reliant India) Mission, structural reforms and policy push, along with a series of steps announced in the Union Budget 2021-22 to achieve broad-based inclusive development, are likely to reinforce the economy and put it back on a strong and sustainable growth path in the coming year. India's real GDP growth for FY22 is projected at 11% by the Economic Survey 2020-21. The January 2021 WEO update forecasts 11.5% growth in FY22 and 6.8% in FY23, closer to the potential growth rate for the economy. According to the IMF, in the next two years, India is also expected to emerge as the fastest-growing economy.

## Road Ahead

India's GDP is expected to reach US\$ 5 trillion by FY25 and achieve upper-middle income status on the back of digitization, globalization, favorable demographics, and reforms.

## RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is governed *inter alia* through the Industrial Policy, 1991 of the Government of India, FEMA and the FEMA NDI Rules. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The RBI and the concerned ministries/departments are responsible for granting approval for foreign investment.

The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases. The DPIIT issued the Consolidated Foreign Direct Investment Policy notified by the DPIIT File No. 5(2)/2020-FDI Policy dated October 15, 2020, with effect from October 15, 2020 (the “**FDI Policy**”), which consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT or the DPIIT that were in force and effect prior to October 15, 2020. The Government of India proposes to update the consolidated circular on FDI Policy once every year and therefore, the FDI Policy will be valid until the DPIIT issues an updated circular.

In terms of the FEMA NDI Rules, a person resident outside India may make investments into India, subject to certain terms and conditions, and provided that an entity of a country, which shares land border with India or the beneficial owner of an investment into India who is situated in or is a citizen of any such country, shall invest only with government approval.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company are under the automatic route under the foreign direct investment policy and transfer does not attract the provisions of the Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/RBI.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue.
