

Markets end flat on profit-booking

FE BUREAU
Mumbai, February 16

AFTER MAKING a new high on Monday, equities ended Tuesday's session on a flat note. The range bound trading session was on account of profit-taking by the investors with Nifty ending the day down by 1.25 points (0.01%) to close at 15313.45 whereas, Sensex declined by 49.69 points (0.10%) to close at 52,104.17. Foreign portfolio investors (FPIs) have pumped in capital worth \$3.1 billion in total so far in February.

Metal stocks bucked the trend and gained on account of rising metal prices globally. Besides, metal companies also reported strong quarterly results with the brokerages stating that there is an upside to metal stocks left. The Nifty Metal rose by 2.89% on Tuesday, while shares of state-owned entities like ONGC and NTPC also rallied. Edelweiss Securities, in its report, said, "Going ahead, we expect a record quarter for ferrous companies as realisation is expected to increase by close to ₹6,000/tonne; domestic volume is expected to grow; and stable cost for iron ore integrated players." On the other hand, the shares of ONGC rose by 4.98% in the day's trading session after the public sector

Stimulus hopes lift US futures to all-time highs

US STOCK INDEX futures hit record highs on Tuesday with investors piling into economically sensitive stocks such as energy and banks on hopes of more fiscal aid to lift the world's biggest economy from a coronavirus-driven slump. Morgan Stanley, Goldman Sachs, JPMorgan Chase & Co, Citigroup and Bank of America rose between 1.2% and 1.5% in premarket trading as 10-year US Treasuries touched their highest since late March.

Oil stocks ExxonMobil Corp, Marathon Oil, Devon Energy Corp and shale-focused player Occidental

giant announced its third quarter results.

Shares of metal companies and public sector companies were the top gainers on the Nifty with Powergrid Corporation, ONGC, Tata Steel, Hindalco, and NTPC, rallying by 6.26%, 4.98%, 3.79%, 3.64%, and 2.78%. The biggest losers on the Nifty were ICICI Bank, Axis Bank, Eicher Motors, Nestle India, and Tata Motors,

Petroleum Corp gained between 2.7% and 4.6% after oil prices jumped to a 13-month high.

The benchmark S&P 500 and the blue-chip Dow scaled new highs last week as investors swapped growth-oriented stocks including technology, which led Wall Street's recovery from a Covid-19-induced crash last year, for under-priced value stocks that are poised to benefit from economic growth.

President Joe Biden has pushed ahead with his plan to pump an extra \$1.9 trillion in stimulus into the economy. —REUTERS

declining by 2.34%, 2.2%, 1.63%, 1.6%, and 1.3%.

The benchmark Nifty has rallied by 12.3% in February on account of a strong Budget announcement and buoyant global markets. While market experts believe that the current rally is expected to go on, helped by liquidity in the short term and strong corporate earnings in the medium term, they are also cautious on cor-

rections and heightened volatility that could arise after a strong upmove in the markets. "One should be prepared for increased volatility and correction after such an upmove. Overall, we are cautiously optimistic as direction of FII flows can be tricky and budget announcements are good but the real test is in implementation," said PGIM India MF.

Markets globally remained strong with Asian bourses in South Korea, China, and Hong Kong rallying by 0.5% to 1.9%. The markets in Europe were trading flat with benchmarks in the United Kingdom, Germany, and France up by 0.04% to 0.11%.

Rupee flat at 72.69

The Indian rupee settled just 1 paisa lower at 72.69 against the US dollar on Tuesday as importers' greenback purchases offset the impact of a weak dollar overseas.

At the interbank forex market, the local unit opened at 72.64 against the American currency and witnessed an intra-day high of 72.63 and a low of 72.85. It finally ended at 72.69, registering a fall of just 1 paisa over its previous close.

The dollar index, which gauges the greenback's strength against a basket of six currencies, fell 0.29% to 90.21. (With PTI inputs)

Sugarcane prices unchanged in UP for third year in a row

DEEPA JAINANI
Lucknow, February 16

THE UTTAR PRADESH cabinet has decided not to change the state advised price (SAP) of sugarcane for the current crushing year. The decision was taken late on Sunday night in a cabinet meeting.

So, for the current 2020-21 marketing year, the SAP would remain at ₹315 per quintal for the common variety, which accounts for more than half of the total sugarcane produce, while the prices for early variety and rejected varieties of cane would remain at ₹325 and ₹310 per quintal, respectively.

This is the third straight year when the state government has decided not to hike the price of cane. The SAP was last increased by ₹10 per quintal in 2017, soon after the Yogi Adityanath government came to power.

"Sugar mills in Uttar Pradesh are already finding it tough to pay cane farmers their dues because of low sugar recovery this season, which has, in effect, pushed up the cost of production. So far in the current season, sugar recovery in the state is around 0.7% lower year-on-year. The drop in recovery rate has increased the cost of sugar production by approximately ₹200 per quintal. Added to this is the fact that ex-mill prices of sugar in the local markets have also declined due to a huge carryover stock.

The current prices of sugar are hovering around ₹31-32 a kg. In such a scenario, if the SAP is also increased, it would be the last nail in the coffin for the sugar mills, which are already struggling to make the payments as per last year's SAP," said a miller, requesting anonymity.

According to industry insiders, there was a lot of pressure on the state government to increase the SAP for the 2020-21 season, mainly, because there had been no increase for two years and also because the Centre had increased the fair and remunerative price (FRP) for cane for this season and farmers in the state were looking forward to a similar hike at the state level.

"The SAP in UP is a rather complex topic, one which is fraught with political connotations. The government of the day, usually weighs the pros and cons of hiking the SAP, especially when sugar prices are on a downward spiral and the recovery, too, is low. While there was a huge demand from the farmers to increase the SAP in view of the increased diesel and electricity prices, on the other hand was a scenario that if the prices are hiked, the mills, which are already facing payment issues, would default on payments, leading to huge arrears at the end of the season," said an official of the sugarcane department, adding that with an election looming ahead, this would have been a very tricky situation for the government.

"For the government, the SAP is a double-edged sword, especially because the state would be going into elections next year. If the SAP is increased and the mills are not able to clear a substantial part of it on time, the arrears would come back to haunt the government right in the middle of the elections," said a sugar sector insider, adding that by not announcing a hike this year, the government has also kept the window open for a substantial hike in an election year.

Elections in the state are scheduled to be held by March 2021, when the crushing would be in progress. "That also explains why the state government is going after the sugar mills to clear their dues at the earliest this year. If mills are allowed to pile up payments, the dues would appear monstrous by the end of this season," said another miller.

Oil prices hover near 13-month high level

SHADIA NASRALLA
London, February 16

OIL PRICES HOVERED near 13-month highs on Tuesday, supported by a US cold snap that shut wells in the oil-producing state of Texas, though gains were capped by a Norwegian wage deal that averted supply disruptions in Europe.

The global rollout of coronavirus vaccinations, fuelling expectations of a recovery in the global economy and oil demand, has also kept prices buoyant. Keenly watched US oil inventory data from the API industry association and Energy Information Administration (EIA) will be released this week on Wednesday and Thursday respectively, each delayed by a day after US markets were closed for a public holiday on Monday.

Benchmark Brent crude slipped 37 cents, or 0.5%, to \$62.93 a barrel by 1434 GMT but remained 13-month peak reached in the previous session. US West Texas Intermediate (WTI) crude futures gained 45 cents, or 0.8%, to \$59.92 after touching their highest since early January last year.

Swiss bank UBS increased its Brent price forecast, saying it expects the benchmark to reach \$68 a barrel in the second half of the year and \$70 by March 2022, with WTI trading at a \$3 discount. —REUTERS

Axis Bank, promoter United India Insurance settle cases with Sebi

AXIS BANK AND its promoter United India Insurance Company have settled with regulator Sebi cases of alleged disclosure lapses and have paid more than ₹51.5 lakh as total settlement amount.

The matter pertained to alleged lapses in disclosures with respect to change in promoter's shareholding in the private lender. The entities were alleged to have violated Prohibition of Insider Trading (PIT) norms, as per two separate settlement orders passed on Monday.

An investigation by Sebi found that during October 1, 2017 to September 30, 2018 period, the value of trades by United India Insurance Company in the securities of Axis Bank on each trading day was more than ₹10 lakh.

The promoter was required to make disclosures about such transactions to the private lender within two working days as required under PIT norms. However, in five instances, the said disclosures were made by United India Insurance Company to the lender with a delay of 10-17 days, Sebi noted.
