Banks provide double exposure against such Fixed Deposits created with the Banks.

8. *Our recently established step-down subsidiary has not initiated business operations due to the pending receipt of the license from IRDAI (Insurance Regulatory and Development Authority of India).*

Our step-down subsidiary company, PESB Insurance Broking Limited, was incorporated on August 25, 2022 under The Companies Act, 2013. It has applied for an insurance broking license from The Insurance Regulatory and Development Authority of India (IRDAI) on 26.04.2023 to initiate its business operations along with all the required documents.

Additionally, the necessary documents were provided to IRDAI as per their requirements in the email dated 23.08.2023. Currently, the application is awaiting processing on their end, and we have not encountered any obstacles so far.

However it's important to note that the timely approval from IRDAI is crucial for the commencement of operations for PESB Insurance Broking Limited. In the event that the approval is not obtained, there may be potential impacts on the company's ability to initiate its planned business activities. The company is actively monitoring the situation and will take necessary steps to address any challenges that may arise in the absence of the required approval.

9. *Our subsidiary's operational commencement is pending for the ~~due~~ process, even after receiving the approval from SEBI.*

Our subsidiary, Pune Estock Broking IFSC Limited, was incorporated on September 19, 2022 under The Companies Act, 2013, with the focus on broking services within the IFSC (International Financial Service Centre) in compliance with SEBI guidelines.

The company is proactively monitoring the situation and is prepared to implement requisite measures to mitigate challenges that may arise in future for not commencing the business timely.

A delay in commencement of business would impede our subsidiary company's ability to initiate business operations, potentially impacting the overall business operations and profitability of our company.

10. *We may extend credit to our clients for dealing in securities and any default by a client or any down turn in the market could result in substantial losses.*

We allow certain clients the option to engage in stock market trading, allowing them to initiate positions in specific stocks with an upfront margin deposit. These clients are then obligated to provide us with the remaining funds before the exchange's pay-in date. However, under certain circumstances, when clients are unable to meet this obligation on time, we may extend credit to facilitate the exchange pay-in. Given the inherent volatility of stock markets, during periods of significant market fluctuations or adverse movements in share prices, there is a risk that clients may not be able to fulfil their financial commitments. Allowing customers to purchase securities on margin exposes us to credit risk, particularly when the market experiences rapid declines, which could result in the collateral's value falling below the customer's debt.

In the event of unforeseen significant events, our business may be negatively affected due to an increase in bad debts and concurrent losses.

11. *Non-Utilization of IPO Proceeds for Proprietary Trading*

The company's IPO aims primarily to secure capital for designated growth initiatives as delineated in the DRHP. However, any diversion by the Company from the declared objective and utilization of any portion of the raised funds towards proprietary trading may affect the Company's financial stability and erode investor confidence. Proprietary trading per-se inherently involves the risk of loss and value diminution and may consequently result in loss of IPO proceed money in the capital market transaction.

Furthermore, the Company can also be subjected to disciplinary and penal proceedings for deviating from the objects of proposed Public Issue.

The Company hereby confirms that the IPO proceeds will not be utilized for proprietary trading.

12. *The Chief Financial Officer of our company serves as the Principal Officer in PESB Insurance Broking Limited.*

Also, the PESB Insurance Broking Limited can start its business operations after receiving the license from IRDA. Company’s business from Authorised Persons (AP) involves registration of the AP as per the requirements of SEBI & Stock Exchanges. SUMMARY OF INDUSTRY

The stock broking industry, a cornerstone of global financial markets, has undergone significant transformations over the years, shaped by technological advancements, regulatory changes, and shifting market dynamics. This industry plays a pivotal role in facilitating the buying and selling of financial instruments such as stocks, bonds, derivatives, and other securities. It serves as a bridge connecting investors, both individual and institutional, with the broader capital markets.

Overview of the Global Financial Markets

- Global growth is projected to fall from an estimated 3.5 per cent in 2022 to 3.0 per cent in both 2023 and 2024. While the forecast for 2023 is modestly higher than predicted in the April 2023 World Economic Outlook (WEO), it remains weak by historical standards.
- Global headline inflation is expected to fall from 8.7 per cent in 2022 to 6.8 per cent in 2023 and 5.2 per cent in 2024. Underlying (core) inflation is projected to decline more gradually, and forecasts for inflation in 2024 have been revised upward.
- The J.P. Morgan Global Composite PMI Output Index fell to 51.7 in July 2023 from 52.7 in June, 2023 registering its lowest reading since January. Manufacturing output and new orders declined across all three of the product categories covered by the survey (consumer, intermediate and investment goods). Meanwhile, the services sub-sectors covered – business, consumer and financial – all registered weaker expansions of both activity and new business.

Overview of the Indian Financial Markets

Within India's financial sector, the equity market stands out prominently for its advanced and globally aligned status. Over time, the Indian stock market has witnessed rapid growth, attaining a significant presence globally in terms of market capitalization, turnover, and the count of listed companies.

Despite the challenges posed by the pandemic and geopolitical tensions in the previous fiscal year, the equity market has exhibited remarkable strength and resilience.

The fiscal year 2023 saw a surge in IPO listings on exchanges, with companies raising record-breaking funds through initial public offerings. Simultaneously, robust domestic fund inflows were observed, marked by increased retail participation, even as foreign portfolio investor flows in equities diminished. This exceptional equity market performance can be attributed to three primary factors:

- Favourable monetary policy and lower interest rates, which rendered stock investment appealing for higher potential returns.
- Technological advancements that facilitated simplified market access.
- Convenient access to data and the internet.

India's share in the global market capitalization has been steadily increasing, positioning it as the 5th largest globally, following countries like the US, China, Japan, and Hong Kong.

However it's important to note that the timely approval from IRDAI is crucial for the commencement of operations for PESB Insurance Broking Limited. In the event that the approval is not obtained, there may be potential impacts on the company's ability to initiate its planned business activities. The company is actively monitoring the situation and will take necessary steps to address any challenges that may arise in the absence of the required approval.

Obtaining approval from SEBI for the allotment process is a crucial prerequisite before commencing business activities and is already applied for and is pending approval. Failure to obtain this approval could potentially impact the company's ability to

initiate planned business activities. The company is proactively monitoring the situation and is prepared to implement requisite measures to mitigate challenges that may arise in the absence of the necessary approval.

Further, there is also delay or non-filing or non-availability of certain forms or documents of our group entities.

Our company has made some clerical errors in documents and forms submitted to the Registrar of Companies. For instance, in the DIR-12 filed for the appointment of Mr. Daidipya Ghodnadikar, an inadvertent categorization occurred, designating him under the Promoter category instead of the intended Professional category. We are taking corrective measures to rectify this classification and ensure accurate documentation with the regulatory authorities.

Additionally subsequent to the company's transition from private to public status, several directors assumed roles as Non-Executive Directors. However, the required documentation to officially recognize the shift in directorial categorization from Executive to Non-Executive was not promptly submitted. We would like to inform stakeholders that these forms have now been duly submitted with the additional fees with the RoC.

Further, the company does not maintain the SH-4 for transfer of shares. However, during the process of Due Diligence the company has provided a certificate with respect to the transfer of shares certified by an independent secretarial consultant.

No show-cause notice in respect to the above has been received by our Company till date and except as stated in this Draft Red Herring Prospectus, no penalty or fine has been imposed by any regulatory authority in respect to the same. It cannot be assured, that there will not be such instances in the future or our Company may default or make delays or error in relation to its reporting requirements, and may be subjected to additional fees, penalties or fines by regulatory authorities in respect to the same. 14. *A copy of agreement entered with HDFC Bank Limited with respect to the sale and distribution of financial product is not traceable.*

Our company has entered into an agreement with HDFC Bank Limited, regarding the sale and distribution of financial products, particularly Fixed Deposits. We are unable to locate a copy of the agreement associated with this collaboration in our records. The absence of documented agreement could lead to misunderstandings, disputes, or potential legal challenges in case of disagreements or discrepancies between the parties which could impact the company's reputation, credibility and company's ability to track and manage its financial performance related to this agreement.

15. *The restated consolidated financial statements have been provided by peer reviewed chartered accountants who is not statutory auditor of our Company.*

16. *We have not made any provisions for decline in value of our investments.*

We have not made provisions for a potential decrease in the value of our investments. While the value of certain stocks may initially decline, it is subject to fluctuations and may eventually surpass its original acquisition price based on market dynamics. Consequently, we may carry investments on our financial statements at values below their book values without recognizing a provision for the decline in their worth. Profits or losses on investments are recorded only upon the final sale of these assets and the realization of sale proceeds.

As of June 30, 2023, our investment portfolio is valued at 1256.67 Lakhs, encompassing investments in subsidiary and associate companies, current investments, and those categorized under Stock in trade.

In the event that we are unable to realize the cost value and liquidate investments at a price below their cost value, there is a potential for incurring substantial losses in a specific period. Such occurrences could impact our share prices and financial conditions.

17. *In the ordinary course of our business, we are obligated to obtain specific approvals and licenses and adhere to rules and regulations. Failing to secure, maintain, or renew these approvals and licenses in a timely manner, as well as any lapses in compliance with regulatory requirements, can potentially disrupt our operations and have adverse consequences.*

To operate our business, we depend on various statutory and regulatory permits, licenses, and approvals. Many of these approvals come with fixed timeframes and necessitate periodic renewal. The failure to renew such permits and licenses would significantly impact our operations, potentially leading to material adverse effects on our business, financial condition, and operational results. There is no guarantee that the relevant authorities will issue these permits and approvals within our expected timeframes, if at all.

Further, we will apply for a Shop and Establishment registration certificate for a Branch Office located in Ahmedabad.

Further, some of these permits, licenses, and approvals are subject to specific conditions. We cannot assure continued compliance with these conditions or the ability to demonstrate compliance to the regulatory authorities. Non-compliance may result in the cancellation, revocation, or suspension of these permits and licenses. Failing to timely apply for, renew, maintain, or obtain required permits, licenses, or approvals, or to address cancellation or suspension, could lead to operational disruptions and have a material adverse impact on our business. For detailed information, please refer to the sections titled "**Key Industry Regulations and Policies**" and "**Government and Other Key Approvals**" on pages 127 and 204, respectively, of this Draft Red Herring Prospectus.

19. We have in the past entered into related party transactions and may continue to do so in the future.

After incorporation, our Company has entered into transactions with certain of our related parties. These transactions, inter-alia includes issue of shares, remuneration, rent payments, loans and advances, etc. Our Company has entered into such transactions due to easy proximity and quick execution. Our company belief that all our related party transactions have been conducted on an arm's length basis, but we cannot provide assurance that we could have achieved more favourable terms had such transactions been entered with third parties. Furthermore, it is likely that we will enter into related party transactions in the future. For details on the transactions entered by us, please refer to "**Annexure VIII Related Party Transactions**" in Section "**Financial Statements**" beginning on page RFS 28 of this Draft Red Herring Prospectus.

20. We do not have any documents evidencing certain information included in the Director biographies for some of our Directors under the section "Our Management" of this Draft Red Herring Prospectus.

For some of the Directors, we do not have documents evidencing certain information included in their respective biographies, under the section "**Our Management**" on page 140. Therefore, for the said Directors, the Information included in the section are based on the details provided by our Directors and are supported by an undertaking executed by them certifying the authenticity of the information provided. Accordingly, the Book Running Lead Manager to the Issue and us have placed reliance on declarations, undertakings furnished by them, to disclose the details of their education in this Draft Red Herring Prospectus and we have not been able to independently verify these details in the absence of primary documentary evidence. Further, there can be no assurances that they will be able to trace the relevant documents pertaining to their experience and education details in the future, or at all. Therefore, we cannot assure you that all or any of the information relating to their Educational Qualification included in "**Our Management**" on page 140 is complete, true and accurate.

21. The objects of the Offer include funding working capital requirements of our Company, which are based on certain assumptions and estimates

The objects of the Offer include funding working capital requirements of our Company, which are based on management estimates and certain assumptions in relation to inter alia required for the ordinary course of our business such as Margin Trading Facility (MTF), algorithmic-based trading, credit line or comparable initiatives that contribute to our overall business enhancement. For details, see "**Objects for the Issue**" on page 87 of this Draft Red Herring Prospectus.

Our working capital requirements may be subject to change due to factors beyond our control including force majeure conditions, an increase in defaults by our customers, availability of funding from banks or financial institutions. Accordingly, such working capital requirements may not be indicative of the actual requirements of our Company in the future and investors are advised to not place undue reliance on such estimates of future working capital requirements.

22. We may extend credit to our clients for dealing in securities and any default by a client or any down turn in the market could result in substantial losses.

We allow certain clients the option to engage in stock market trading, allowing them to initiate positions in specific stocks with an upfront margin deposit. These clients are then obligated to provide us with the remaining funds before the exchange's pay-in

date. However, under certain circumstances, when clients are unable to meet this obligation on time, we may extend credit to facilitate the exchange pay-in. Given the inherent volatility of stock markets, during periods of significant market fluctuations or adverse movements in share prices, there is a risk that clients may not be able to fulfil their financial commitments. Allowing customers to purchase securities on margin exposes us to credit risk, particularly when the market experiences rapid declines, which could result in the collateral's value falling below the customer's debt.

In the event of unforeseen significant events, our business may be negatively affected due to an increase in bad debts and concurrent losses.

23. *Risks pertaining to our branch network and authorized representatives.*

We encounter various risks tied to our branch network and authorized individuals. These risks revolve around factors such as their competence and financial capacity to function effectively and to stay in sync with our strategies, especially during periods of subpar performance. Additionally, we must consider the potential consequences for our organization if they encounter operational issues or project an image that contradicts our core values. This concern is particularly significant if our contractual rights and other remedies are restricted, expensive to enforce, or susceptible to legal disputes.

24. *Our risk management policies and procedures may leave us exposed to unidentified risks or unanticipated levels of risk which could lead to material losses.*

Our risk management methods, including statistical analysis and historical market behaviour, may not be entirely effective in mitigating our exposure to risks, particularly those we fail to identify or anticipate. Some of these approaches rely on historical data to quantify risk exposures, and these tools may not accurately predict future risks. Consequently, our actual losses may exceed what historical measures suggest. Our more qualitative risk management approaches may prove inadequate, potentially leading to unforeseen significant losses.

Additionally, some risk management methods depend on the evaluation of publicly available or accessible information related to markets, clients, or other factors. However, such information may be inaccurate, incomplete, outdated, or improperly assessed. Managing operational, legal, and regulatory risks entails establishing policies and procedures for the accurate recording and verification of numerous transactions and events.

While we aim to monitor and control our risk exposure through various financial, credit, operational, and legal reporting systems, the effectiveness of these measures cannot be predicted or guaranteed with absolute certainty. Unexpected and substantial market movements or unforeseen developments could significantly impact our financial condition and results of operations. These consequences may encompass losses due to adverse changes in asset values, reduced trading position liquidity, and heightened systemic risk volatility.

25. *Some of our Independent Directors has limited experience with respect to our business industry.*

A crucial consideration within our current board composition pertains to the expertise of specific independent directors, some of whom may lack significant industry experience and qualifications. This introduces a potential risk, as their proficiency is integral to the company's adept handling of industry intricacies. Investors are strongly advised to meticulously assess the repercussions of this factor on both strategic decision-making and overall corporate performance. The effectiveness of independent directors hinges on their ability to provide informed insights and maintain governance standards, aspects that are directly influenced by their depth of industry knowledge. Thus, evaluating the board's collective expertise becomes paramount for investors seeking assurance in the company's capacity to navigate the complexities inherent in its business environment. This scrutiny is instrumental in making informed investment decisions that align with the company's long-term success and sustainable growth.

26. *Compliance with data privacy norms may require us to incur expenditure, which may adversely impact its financial condition and cash flows.*

We are subject to data privacy laws, rules and regulations that regulate the use of customer data. Compliance with these laws, rules and regulations may restrict our business activities, require us to incur expense and devote considerable time to compliance efforts. The existing data privacy regulations limit the extent to which we can use personal identifiable information and limit our ability to use third-party firms in connection with customer data. Certain of these laws, rules and regulations are relatively new and their interpretation and application remain uncertain. Data privacy laws, rules and regulations are also subject to change and may become more restrictive in the future. For instance, the Personal Data Protection Bill, 2018 (“PDP Bill”), applies to processing of personal data, which has been collected, disclosed, shared or processed within India. It imposes

restrictions and obligations on data fiduciaries, resulting from dealing with personal data and further, provides for levy of penalties for breach of obligations prescribed under the PDP Bill. Changes or further restrictions in data privacy laws, rules and regulations could have an adverse effect on our business, results of operations and financial performance. The cost and operational consequences of implementing further data protection measures could be significant and this may have an adverse effect on our business, results of operations and financial performance.

27. *The operation of our businesses is highly dependent on information technology and we are subject to risks arising from any failure of cyber –attacks, or inadequacies and security breach in our information technology systems which may adversely affect our business.*

Our operational efficiency hinges on our capacity to handle a significant volume of daily transactions across our office network. Most of these offices are integrated through computer systems and servers connected to our central headquarters. Nevertheless, our financial, accounting, and other data processing systems are susceptible to operational deficiencies or potential disruptions beyond our control. This includes the risk of interruptions in electrical or communication services, especially in the predominantly rural and semi-urban markets where we conduct our primary operations.

The effectiveness of our information technology (IT) systems plays a critical role, as they are essential in accurately recording and processing the substantial daily transaction load promptly. This capability is paramount to delivering a seamless digital experience to our valued clients.

Our operations also rely on the secure processing, storage transmission of confidential and other information in our computer systems and networks. Our computer systems, servers, software, including software licensed from vendors and networks may be vulnerable to unauthorized access, computer viruses or other malicious code and other events that could compromise data integrity and security and result in identity theft including customer data, employee data and propriety business data, for which we could potentially be liable. Our business is particularly susceptible to such disruptions because of our reliance on technology platforms and tools and the higher cost of installation and implementation of technology in the rural and semi-urban markets. Our ability to operate and remain competitive will depend in part on our ability to maintain and upgrade our information technology systems on a timely and cost-effective basis. However, this uncertainty/probability of failure of IT or communication systems exists, and since we are a Company that is dependent heavily on both IT and communication systems.

Though, there are no instances of failure of IT or communication system or breach of cyber security and resultant material impact in the last 3 financial years, nor the Company has received any warning or penalty from any Exchanges or SEBI as of date in this regard. A prolonged disruption of, or failure of, our information processing or communications systems would limit our ability to process transactions. Any failure of, or inadequacies in our IT systems would impair our ability to service our clients and execute trades on behalf of clients, which could materially and adversely affect our competitiveness, financial condition, cash flows and results of operations.

28. *There are operational risks associated with the financial services industry which, if realized, may have a material adverse effect on our business, financial condition, cash flows, results of operations and prospects.*

Our business income is predominantly derived from our Broking business. We operate in financial services industry and offer various business services. There are various operational risks related to the business operations in the financial services industry, such as:

- Human and systems errors, including in the confirmation, entry or settlement of transactions, due to the complexity and high volume of transactions;
- Inadvertent deviations from defined processes and inadvertent errors due to the manual nature of processes;
- Delay or failure to timely transfer, pledge or un-pledge securities to and from depository participants;
- Failure to establish and maintain an effective controls and compliance oversight by our authorized person's network;
- Failure of technology in our processes, including risk management and settlement processes, causing errors or disrupting our operations;
- Inadequate technology infrastructure or inappropriate systems architecture;
- inadequate due diligence, including client verification, non-adherence to anti-money laundering guidelines, KYC processes and client needs analysis, in the sales process; etc.
- Loss of Client, change in Industry dynamics, etc;

- Changing market trends, change in regulations, etc;
- Non-compliance with timelines mentioned in SEBI Regulations, time escalation etc.

If any of the foregoing were to occur, it could have a material adverse effect on our reputation, business, financial condition, cash flows, results of operations and prospects. Although we have implemented internal control measures to prevent against the risk of operational failure, we may not be able to completely avoid the occurrence of or timely detect any operational failure.

We also face the risk of regulatory penalties in our brokerage business from the exchanges/regulators for failures of routine operational processes. In the past, we have been, and in the future may be, penalized by the regulators and stock exchanges for non-compliance with regulatory rules and bye-laws relating to operational failure, including in connection with cases of operation failure beyond our control. Please see the section entitled “*Outstanding Litigation and Material Developments*” on page 197 for further details.

29. *Market downturns or disruptions can lead to reduced transaction volumes, potentially impacting our business and profitability.*

Our financial performance, the extent of our operations, and ultimately our profitability are closely tied to favourable conditions in the capital markets, the regulatory and political landscape, investor sentiment, stock prices, and other factors influencing stock trading in India and interest in Indian business developments. Over recent years, both Indian and global securities markets have experienced significant fluctuations, and a market downturn could negatively affect our operational outcomes.

Prolonged periods of reduced trading volumes are likely to result in lower revenues, and if we cannot manage our expenses in line with declining revenues, our profit margins may suffer. Reduced trading activity and equity price declines could have an adverse impact on our business, financial position, and operational results on our company.

30. *Error in Punching of trade orders.*

Some of the orders by our clients are placed over the phone. Thus, we sometimes face the risk of making errors in punching the orders. The entire risk/ loss incurred by our client due to error on our part are to be borne by us. In case of any such event could have an adverse effect on our business operations, profitability and operations.

31. *A substantial reduction in our available liquidity may have adverse implications for our business and diminish customer trust in our organization.*

Maintaining sufficient liquidity is of utmost importance for our brokerage operations, encompassing vital functions such as transaction settlement, margin lending, and other activities with substantial cash requirements. We are subject to cash deposit and collateral obligations imposed by clearing houses and exchanges, which can vary significantly based on the trading activity of our customers. To address our liquidity needs, we primarily rely on cash generated from our operational activities and debt financing. A reduction in our liquidity could hinder our ability to trade on exchanges, impede our business growth, and erode customer confidence, potentially leading to a loss of customer accounts.

We provide margin-based products through our retail brokerage platform, requiring customers to deposit initial margins for transactions executed on their behalf, followed by settling the balance by a specified due date. Failure by customers to meet these obligations can impact our liquidity. In times of high market volatility or adverse share price movements, customers may not fulfil their commitments, potentially jeopardizing our ability to meet margin requirements and honor pay-in obligations to exchanges, which could harm our business, reputation, and profitability.

Several factors, including a significant upsurge in brokerage services, volatile market conditions, large transaction settlements on behalf of brokerage customers, and obligations arising from our underwriting activities, could negatively affect our liquidity. When operating cash falls short of meeting our liquidity and regulatory capital requirements, we must secure external financing. During periods of credit and capital market disruptions or shifts in the regulatory landscape, potential sources of external financing may be limited, and our borrowing costs could rise. While our management believes we have diversified sources of external financing, availability may be constrained or subject to unfavourable terms due to market disruptions, regulatory changes related to capital raising, our credit rating, general market conditions for capital raising, and other economic and political factors both within and outside India.

32. *Financial services firms are subject to increased scrutiny concerning perceived conflicts of interest which could elevate the risk of financial liabilities and damage to our reputation arising from unfavourable regulatory actions. Inadequate identification and resolution of conflicts of interest could have adverse consequences on our business.*

We are bound by numerous laws aimed at preventing insider trading, front-running, and addressing other potential conflicts of interest. Conflicts of interest can arise within our various departments, between us and our clients, among our clients, between us and our employees, or among our clients and our employees. While we have established internal controls and measures, we cannot guarantee that we, or our agents and intermediaries, will consistently manage these conflicts of interest in full compliance with the relevant laws and regulations. Moreover, there is a possibility of mis-implementation or the controls and measures not functioning as intended. Failing to effectively address these conflicts could tarnish our reputation and undermine client trust. Furthermore, potential or perceived conflicts of interest may lead to legal actions or regulatory proceedings. Any of these scenarios could substantially and negatively impact our business, financial standing, and operational results.

33. *We depend on third party vendors and service providers.*

We rely on third parties for some of our technological infrastructure that support our capital market businesses. Failure to continue to access these third party technologies on commercially acceptable terms could limit our ability to offer competitive service offerings and adversely impact our future operating results. We also rely on several local service providers for delivering our services and any failure to continue these arrangements on commercially acceptable terms could adversely impact our future operating results.

34. *We rely on the Indian stock exchanges for a significant portion of our business.*

A significant portion of our brokerage operations relies on Indian stock exchanges, including the NSE and the BSE, as well as clearing corporations. We utilize these platforms to execute and settle our clients' transactions as well as our own transactions, whether through our electronic brokerage platform or institutional systems. All client orders are processed through these exchanges. Any disruption in their operations or our connectivity to these exchanges could significantly impact our business and financial performance.

To access these stock exchange services, we must maintain membership registration, making us subject to various exchange regulations and periodic inspections. We cannot guarantee full compliance with these regulations or that inspections won't uncover any violations. Non-compliance may result in fines, penalties, and in extreme cases, the termination of our registration. If our registration with the stock exchanges is terminated, we would be unable to offer brokerage services, resulting in a substantial adverse effect on our business, financial position, and operational results. Additionally, our business activities are governed by regulatory constraints on brokerage fee rates and net worth requirements set by the stock exchanges.

35. *We are subject to extensive securities regulation and any failure to comply with these regulations could subject us to penalties or sanctions.*

The industry segments in which we operate viz; Capital Market Services (including dealing in Stocks, shares, derivatives, Mutual Funds and IPO's for our clients and proprietary trading) which is subject to extensive regulation by the SEBI, the RBI, and other governmental regulatory authorities. We are also regulated by stock exchanges and other Market Institutions like NSDL and CDSL. The regulatory environment in which we operate is dynamic and subject to changes and we may be adversely affected as a result of new or revised legislation or regulations imposed by the SEBI and other governmental regulatory authorities. If we are found to have violated an applicable regulation, administrative or judicial proceedings may be initiated against us that may result in fines, trading bans, deregistration or suspension of our business licenses, the suspension or disqualification of our officers or employees, or other adverse consequences. We could also be subject to constraints or conditions on operating our business activities and may incur fines, receive regulatory cautions or show cause notices and be barred from engaging in certain business activities. The imposition of any of these or other penalties or restrictions could have a material adverse effect on our business, reputation, financial condition and results of operations.

36. *We continue to explore the diversification of our business and the implementation of new services. These diversifications and our other strategic initiatives may not be successful, which may adversely affect our business and results of operations.*

In order to achieve our goal, we are constantly evaluating the possibilities of expanding our business through new models, or starting new services. Although we believe that there are synergies between our current business and our expansion plans, we do have experience or expertise in these new areas. These new businesses and modes of delivery and the implementation of our strategic initiatives may pose significant challenges to our administrative, financial and operational resources, and additional risks, including some of which we are not aware of. The early stages and evolving nature of some of our businesses also make

it difficult to predict competition and consumer demand therein. Our strategic initiatives require capital and other resources, as well as management attention, which could place a burden on our resources and abilities. In addition, we cannot assure you that we will be successful implementing any or all of our key strategic initiatives. If we are unable to successfully implement some or all of our key strategic initiatives in an effective and timely manner, or at all, our ability to maintain and improve our leading market position may be negatively impacted, which may have an adverse effect on our business and prospects, competitiveness, market position, brand name, financial condition and results of operations.

37. Credit risk exposes us to losses caused by financial or other problems experienced by third parties.

Our exposure to risk arises from the possibility that external parties who owe us money, securities, or other assets may not fulfil their obligations. This risk is particularly relevant concerning a range of entities, including our clients, counterparties, clearing agents, exchanges, clearing houses, and other financial intermediaries, as well as the issuers of the securities we hold. The reasons for potential defaults by these parties could include insolvency, liquidity constraints, operational breakdowns, government or regulatory interventions, and other factors. Substantial failures by third parties to meet their obligations to us, whether in a timely manner or not, have the potential to significantly and negatively impact our revenue, business operations, financial standing, and overall operational results.

38. If our services fail to meet client expectations, it could harm our professional reputation and expose us to legal liabilities.

As a service industry entity, our business heavily relies on maintaining strong client relationships to retain existing clients and attract new ones. Consequently, dissatisfied clients can have a more detrimental impact on our business compared to other industries. Our activities may expose us to the potential of facing substantial legal liabilities from clients and third parties who feel aggrieved.

In recent years, the service industry, especially financial intermediaries, has witnessed an increase in the volume of claims and the amounts sought in litigation and regulatory proceedings. This trend is attributable to stringent regulations and heightened investor awareness. Assessing or quantifying these risks can often prove challenging, with their extent and impact remaining uncertain for extended periods. Consequently, we may incur significant legal expenses when defending against legal actions. Substantial legal liabilities or significant regulatory actions against our company could have notable financial consequences and potentially damage our reputation, thus affecting our business operations.

39. The revenues earned from brokerage, investment and trading of securities business have been inconsistent in the past and may continue to be inconsistent due to the very nature of this business which is dependent on the overall volatility in the Capital Markets in India.

We are engaged in the business of investments and broking of securities. For instance, as on June 30, 2023 our brokerage income account for 74.30% of our total income and investment income account for 4.49% of our total income. Despite our efforts to earn favourable returns on our capital employed in these uncertain and volatile financial markets we cannot assure that we will be able to anticipate or predict the move of the Stock market. We propose to continue to invest in this vertical and depending on the overall period to period overall volatility in the Capital Markets in India our future revenues from this vertical could be volatile and inconsistent significantly and negatively impact our revenue, business operations, financial standing, and overall operational results.

40. Conflicts of interest may arise out of common business objects between our Company and Promoter Group Company.

Conflicts may arise in the ordinary course of decision-making by the Promoters or Board of Directors. Our Promoter and Promoter Group may have interest in our Group companies that undertake business similar to the business as our Company. Conflicts of interests may arise in the Promoters' allocating or addressing business opportunities and strategies among our Company and Promoter Group Company in circumstances where our respective interests diverge. In cases of conflict, there can be no assurance that our Promoter or Promoter Group will not favour their own interests over those of our Company. Our Promoter or Promoter Group has not signed any non-compete agreement with our Company as of date. Any such present and future conflicts could have an effect on our business, reputation, financial condition and results of operations. For further details, please refer section titled "**Our Promoter and Promoter Group**" beginning on page 161 of this Draft Red Herring Prospectus.

41. Loans availed by our Company have been secured on securities collateral of our company property and personal guarantee provided by our Promoter(s). Our business, financial condition, results of operations, cash flows and

prospects may be adversely affected in case of invocation of securities of the collateral provided by our Promoter and Promoter Group members.

Our Promoter(s) has provided their personal property as security and also given personal guarantee to secure a significant portion of our existing borrowings taken from Axis Bank Limited, and may continue to provide such security post listing. In case of a default under our loan agreements, the security may also be enforced, which could negatively impact the reputation and net worth of the Promoters. Also, we may face certain impediments in taking decisions in relation to our Company, which in turn would result in a material adverse effect on our financial condition, business, results of operations and prospects and would negatively impact our reputation.

In addition, our Promoter(s) may be required to liquidate their shareholding in our Company to settle the claims of the lenders, thereby diluting their shareholding in our Company. We may also not be successful in procuring alternate security satisfactory to the lenders, as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could affect our financial condition and cash flows. For further details regarding loans availed by our Company, please refer “*Statement of Financial Indebtedness*” on page no 195 of this Draft Red Herring Prospectus.

42. *Our Promoters and the Promoter Group will jointly continue to retain majority shareholding in our Company after the Offer, which will allow them to determine the outcome of the matters requiring the approval of shareholders.*

Our promoters along with the promoter group will continue to hold collectively [●] % of the equity share capital of the company. As a result of the same they will be able to exercise significant influence over the control of the outcome of the matter that requires approval of the majority shareholders vote. Such a concentration of the ownership may also have the effect of delaying, preventing or deterring any change in the control of our company. In addition to the above, our promoters will continue to have the ability to take actions that are not in, or may conflict with our interest or the interest of some or all of our minority shareholders, and there is no assurance that such action will not have any adverse effect on our future financials or results of operations.

43. *We have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. Further we have not identified any alternate source of financing the Objects of the Issue. Any shortfall in raising / meeting the same could adversely affect our growth plans, business operations and financial condition*

Our Company has not identified any alternate source of funding for our object of the Issue and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds can adversely affect our growth plan and profitability. The delay/shortfall in receiving these proceeds could result in inadequacy of funds or may result in borrowing funds on unfavourable terms, both of which scenarios may affect the business operation and financial performance of the company. Further the deployment of the funds raised in the issue will be entirely at the discretion of the management and any revision in the estimates may require us to reschedule our projected expenditure and may have a bearing on our expected revenues and earnings. For further details of our working capital requirement, please refer section titled “*Object for the Issue*” beginning on page 87 of this Draft Red Herring Prospectus.

44. *Major fraud, lapses of internal control or failures on part of the employees and could adversely impact the company’s business.*

Our Company is vulnerable to risk arising from the failure of employees to adhere to approved procedures, system controls, fraud, system failures, information system disruptions, communication systems failure and interception during transmission through external communication channels or networks. Although there are no instances of major fraud, lapse of internal control or failures on part of employees in the last 3 financial years, failure to protect fraud or breach in security may adversely affect our Company’s operations and financial performance. Our reputation could also be adversely affected by significant fraud committed by our employees, agents, customers or third parties.

45. *Our insurance coverage may not adequately protect us, which may adversely affect our business, results of operations and financial condition.*

We believe that the insurance coverage maintained, would reasonably cover all normal risks associated with the operation of our business, however, there can be no assurance that any claim under the insurance policies maintained by us will be met fully, in part or on time. In the event, we suffer loss or damage that is not covered by insurance or exceeds our insurance coverage, our results of operations and cash flow may be adversely affected. While there has been no instance of fire in the Company, except one such incidence in the erstwhile proprietorship concern where the stock was duly insured.

Further, our Company is required to renew these insurance policies on yearly basis and in the event, we fail to renew the insurance policies within the time period prescribed in the respective insurance policies or not obtain at all, our Company may face significant uninsured losses. If our Company suffers a large uninsured loss or if any loss suffered, significantly exceeds our insurance coverage, our business, financial condition and results of operations may be adversely affected.

For further details of our insurance policies, please refer section titled “**Business Overview**” beginning on 119 of this Draft Red Herring Prospectus.

46. *We face intense competition in our businesses, which may limit our growth and prospects.*

Our Company faces significant competition from other stock brokers. In particular, we compete with other Indian and foreign brokerage houses operating in the markets in which we are present. We compete on the basis of a number of factors, including execution, depth of product and service offerings, innovation, reputation and price. Our competitors may have advantages over us, including, but not limited to:

- Substantially greater financial resources;
- Longer operating history than in certain of our businesses;
- Greater brand recognition among consumers;
- Larger customer bases in and outside India; or
- More diversified operations which allow profits from certain operations to support others with lower profitability.

These competitive pressures may affect our business, and our growth will largely depend on our ability to respond in an effective and timely manner to these competitive pressures.

47. *If we are unable to establish and maintain an effective system of internal controls and compliances, our business and reputation could be adversely affected.*

We manage our internal compliance by monitoring and evaluating internal controls and ensuring all relevant statutory and regulatory compliances. However, there can be no assurance that in future no deficiency will be incurred. If we are unable to establish and maintain an effective system of internal controls and compliances, our business and reputation could be adversely affected.

48. *Our success depends largely upon the services of our Directors, Promoter and other Key Managerial Personnel and Senior Management Personnel and our ability to attract and retain them. Demand for Key Managerial Personnel & Senior Management Personnel in the industry is intense and our inability to attract and retain Key Managerial Personnel & Senior Management Personnel may affect the operations of our Company.*

Our success heavily depends upon the continued services of our Key managerial personnel and senior management, along with support of our Promoters. We also depend significantly on our Key Managerial Persons and Senior Management for executing our day to day activities. The loss of any of our Promoters, Key Management Personnel and Senior Management, or failure to recruit suitable or comparable replacements, could have an adverse effect on us. The loss of service of the Promoters and other senior management could seriously impair the ability to continue to manage and expand the business efficiently. If we are unable to retain qualified employees at a reasonable cost, we may be unable to execute our growth strategy. For further details of our Directors and key managerial personnel, please refer to Section “**Our Management**” on page 140 of this Draft Red Herring Prospectus.

49. *There is no monitoring agency appointed by Our Company to monitor the utilization of the Issue proceeds.*

As per SEBI (ICDR) Regulations, 2018, as amended, appointment of monitoring agency is required only for Issue size above ₹ 10,000.00 lakhs. Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds in terms of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the stock exchange and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

50. *Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.*

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing

arrangements. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, please refer to the Chapter titled “*Dividend Policy*” beginning on page 177 of this Draft Red Herring Prospectus.

- 51. *We have not commissioned an industry report for the disclosures made in the section titled ‘Industry Overview’ and made disclosures on the basis of the data available on the internet and such data has not been independently verified by us.***

We have not commissioned an industry report for the disclosures made in the chapter titled ‘*Industry Overview*’ beginning of page 104 and made disclosures on the basis of the data available on the internet and such data has not been independently verified by us. We have made disclosures in the said chapter on the basis of the relevant industry related data available online for which relevant consents have been obtained. Accordingly, investors should read the industry related disclosure in this Draft Red Herring Prospectus in this context.

- 52. *Certain data mentioned in this Draft Red Herring Prospectus has not been independently verified.***

We have not independently verified data from industry publications contained in the chapter “*Industry Overview*” beginning on page 104 of this Draft Red Herring Prospectus and although we believe these sources to be reliable, we cannot assure that they are complete or reliable. Such data may also be produced on a different basis from comparable information compiled with regard to other countries. Therefore, discussions of matters relating to India and its economy are subject to the limitation that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete or unreliable

- 53. *Our funding requirements and the proposed deployment of Net Proceeds have not been appraised by any bank or financial institution or any other independent agency and our management will have broad discretion over the use of the Net Proceeds.***

We intend to utilize the Net Proceeds of the Offer as set forth in “*Objects for the Issue*” beginning on page 87 of this Draft Red Herring Prospectus. The funding requirements mentioned as a part of the objects of the Offer are based on internal management estimates in view of past expenditures and have not been appraised by any bank or financial institution. This is based on current conditions and is subject to change in light of changes in external circumstances, costs, business initiatives, other financial conditions or business strategies and since we have not presently entered into any definitive agreements for the use of Net Proceeds. Various risks and uncertainties, including those set forth in this section, may limit or delay our efforts to use the Net Proceeds to achieve profitable growth in our business. For example, we may also use funds for future businesses and products which may have risks significantly different from what we currently face or may expect. Accordingly, use of the Net Proceeds for other purposes identified by our management may not result in actual growth of our business, increased profitability or an increase in the value of our business and your investment. For further details, please see “*Objects for the Issue*” beginning on page 87 of this Draft Red Herring Prospectus

- 54. *We have availed unsecured loans in past which were repayable on demand. In case, if our Company avails further unsecured loan in future then any demand for repayment of such unsecured loans, may adversely affect our cash flows.***

We have availed unsecured loan in the past, which were repayable on demand to the relevant lender. Further, these loans are not repayable in accordance with any agreed repayment schedule and may be recalled by the relevant lender at any time. Any such unexpected demand or accelerated repayment may have a material adverse effect on the business, cash flows and financial condition of the borrower against which repayment is sought. Any demand from lenders for repayment of such unsecured loans, may adversely affect our cash flows. For further details of unsecured loans of our Company, see “*Restated Financial Statements*” on page 178 of this Draft Red Herring Prospectus.

RISKS RELATED TO OUR EQUITY SHARES AND EQUITY SHARE HOLDERS

- 55. *In the event there is any delay in the completion of the Issue, there would be a corresponding delay in the completion of the objects / schedule of implementation of this Issue which would in turn affect our revenues and results of operations.***

The funds that we receive would be utilized for the Objects of the Issue as has been stated in the Chapter “**Objects of the Issue**” on page 87 of this Draft Red Herring Prospectus. The proposed schedule of implementation of the objects of the Issue is based on our management’s estimates. If the schedule of implementation is delayed for any other reason whatsoever, including any delay in the completion of the Issue, we may have to revise our business, development and working capital plans resulting in unprecedented financial mismatch and this may adversely affect our revenues and results of operations.

56. The requirements of being a public listed company may strain our resources and impose additional requirements.

With the increased scrutiny of the affairs of a public-listed company by shareholders, regulators and the public at large, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur in the past. We will also be subject to the provisions of the listing agreements signed with the Stock Exchange which requires us to file unaudited financial results on a half-yearly basis. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. As a result, management’s attention may be diverted from other business concerns, which could have an adverse effect on our business and operations. There can be no certainty that we will consistently meet our reporting requirements or promptly identify and report changes in our operational performance as swiftly as other listed companies.

In addition, we will need to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge and we cannot assure that we will be able to do so in a timely manner.

57. The price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not develop.

Prior to this Issue, there has been no public market for our Equity Shares. [●] is acting as Market Maker for the Equity Shares of our Company. However, the trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India’s fiscal regime, volatility in the Indian and global securities market, performance of our competitors, the Indian Capital Markets, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnerships, joint ventures, or capital commitments. In addition, if the stock markets experience a loss of investor confidence, the trading price of our Equity Shares could decline for reasons unrelated to our business, financial condition or operating results. The trading price of our Equity Shares might also decline in reaction to events that affect other companies in our industry even if these events do not directly affect us. Each of these factors, among others, could materially affect the price of our Equity Shares. There can be no assurance that an active trading market for our Equity Shares will develop or be sustained after this Issue, or that the price at which our Equity Shares are initially offered will correspond to the prices at which they will trade in the market subsequent to this Issue. For further details of the obligations and limitations of Market Makers, please refer to the Section at titled “**General Information**” on page 58 of this Draft Red Herring Prospectus.

58. There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder’s ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.

Once listed, we would be subject to circuit breakers imposed by stock exchange, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on circuit breakers is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

59. You will not be able to sell immediately on Stock Exchange any of the Equity Shares you purchase in the Issue until the Issue receives appropriate trading permissions.

The Equity Shares will be listed on the Stock Exchange. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and trading may commence. We cannot assure you that the Equity Shares will be credited to investor’s demat accounts, or that trading in the Equity Shares will commence, within the time periods specified in the Draft Red Herring Prospectus. Any failure or delay in obtaining the approval would restrict your ability to dispose of the Equity Shares. In accordance the Companies Act, 2013, in the event that the permission of listing the Equity Shares is denied by the stock exchange, we are required to refund all the monies collected to investors.

60. *Sale of Equity Shares by our Promoter or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.*

Any instance of sale of equity shares by our Promoter or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

61. *You may be subject to Indian taxes arising out of capital gains on sale of Equity Shares.*

Under current Indian tax laws and regulations, capital gains arising from the sale of Equity Shares in an Indian Company are generally taxable in India. Any gain realized on the sale of listed Equity Shares on a stock exchange will be subject to capital gains tax in India and also would also be subject to Securities Transaction Tax (“STT”). STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold.

For more details, please refer to “*Statement of Tax Benefits*” on page 102 of this Draft Red Herring Prospectus.

62. *Any future issuance of Equity Shares may dilute your shareholdings, and sales of the Equity Shares by our major shareholders may adversely affect the trading price of our Equity Shares.*

Any future equity issuances by our Company may lead to the dilution of investors’ shareholdings in our Company. In addition, any sale of substantial Equity Shares in the public market after the completion of this Issue, including by our major shareholders, or the perception that such sales could occur, could adversely affect the market price of the Equity Shares and could significantly impair our future ability to raise capital through offerings of the Equity Shares. We cannot predict what effect, if any, market sales of the Equity Shares held by the major shareholders of our Company or the availability of these Equity Shares for future sale will have on the market price of our Equity Shares.

63. *Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Amount) at any stage after submitting an Application.*

Pursuant to the SEBI ICDR Regulations, Non-Institutional Investors are not permitted to withdraw or lower their Application (in terms of quantity of Equity Shares or the Amount) at any stage after submitting an Application. While our Company is required to complete Allotment pursuant to the Offer within six Working Days from the Offer Closing Date, events affecting the Applicants decision to invest in the Equity Shares, including material adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operation or financial condition, may arise between the date of submission of the Application and Allotment. Our Company may complete the Allotment of the Equity Shares even if such events occur, and such events limit the applicant’s ability to sell the Equity Shares Allotted pursuant to the Offer or cause the trading price of the Equity Shares to decline on listing.

EXTERNAL RISK FACTORS

64. *General economic and market conditions in India and globally could have a material adverse effect on our business, financial condition, cash flows, results of operations and prospects.*

Our business is highly sensitive to the economic and market conditions prevailing in India. This includes factors like the overall economic health, government policies, industry-specific developments, mergers and acquisitions, financial and securities regulations, trends in household savings, the popularity of alternative financial instruments, market fluctuations, and various aspects of the financial sector.

Additionally, we are impacted by broader global economic and political conditions, which can in turn influence the Indian economy. The Indian capital markets have a history of rapid and substantial fluctuations. Market conditions can shift swiftly, and our business is affected by elements such as inflation, consumer sentiment, currency exchange rates, and interest rate changes. Furthermore, our ability to access short-term and long-term funding sources and the cost of that funding are crucial factors that can impact our operations. It’s essential to be aware of these variables and their potential effects on our business in this dynamic environment.

Our brokerage business relies heavily on the activity levels within the Indian securities markets, specifically the trading volumes of financial assets, and the number of listed securities, new listings, liquidity, and shifts in investor sentiment. Any negative changes in these factors, whether due to economic or market conditions or other factors, have the potential to significantly harm our business, financial health, cash flow, and operational results.

Furthermore, our business is highly vulnerable to economic downturns and adverse market conditions, which can have wide-ranging negative impacts on various aspects of our operations. These effects include:

- Reduced brokerage revenues due to lower trading volumes and increased market volatility.
- A higher risk of customer or counterparty defaults on their contractual obligations.
- Intensified competition across all our business segments, leading to reduced fees, commissions, and overall income.
- Potentially higher financing costs as limited access to liquidity and capital markets restrict our ability to raise the necessary funding for business development.
- Challenges in effectively executing our business plans and strategies.

It is crucial for us to remain vigilant about these factors and their potential impact on our business as we operate in a dynamic and ever-changing market environment.

It's important to note that any unfavourable shifts in these macroeconomic conditions or the performance of the Indian capital markets could potentially impede our future growth prospects and could adversely affect our financial conditions, our operations and profitability.

65. *Changes in government regulations or their implementation could disrupt our operations and adversely affect our business and results of operations.*

Our business and industry is regulated by different laws, rules and regulations framed by the Central and State Government. These regulations can be amended / changed on a short notice at the discretion of the Government. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change adversely, we may incur increased costs or be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations.

66. *Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws and regulations, may adversely affect our business and financial performance.*

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes, including the instances mentioned below, may adversely affect our business, financial condition, results of operations, cash flows and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy. For instance, the Companies Act 2013, several provisions of which (including rules issued thereunder) contain significant changes to Indian company law, including in relation to the issue of capital by companies, related party transactions, corporate governance, audit matters, shareholder class actions, restrictions on the number of layers of subsidiaries and corporate social responsibility. Compliance with such requirements may require significant financial and administrative resources, and any failure to comply may adversely affect our business and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future. If a determination is made that we were in violation of such laws, rules or regulations, including conditions in the permits required for our operations, we may have to pay fines, modify or discontinue our operations, incur additional operating costs or make capital expenditures and our business, financial positions, results of operations or cash flows could be adversely affected. For details on the laws currently applicable to the Company kindly refer the chapter titled “**Key Industry Regulations and Policies**” beginning on page 127 of this Draft Red Herring Prospectus.

67. *You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under current Indian tax laws and regulations, unless specifically exempted, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. A securities transaction tax (“STT”) is levied on and collected by an Indian stock exchange on which equity shares are sold. Any capital gain exceeding ₹100,000, realized on the sale of equity shares held for more than 12 months immediately preceding the date of transfer, which are sold using any other platform other than on a recognized stock exchange and on which no STT has been paid, are subject to long-term capital gains tax in India.

The Finance Act, 2019 amended the Indian Stamp Act, 1899 with effect from July 1, 2020 and clarified that, in the absence of a specific provision under an agreement, the liability to pay stamp duty in case of sale of securities through stock exchanges will be on the buyer, while in other cases of transfer for consideration through a depository, the onus will be on the transferor. The stamp duty for transfer of securities other than debentures on a delivery basis is specified at 0.015% and on a non-delivery basis is specified at 0.003% of the consideration amount. The Finance Act, 2020, has, among others things, provided a number of amendments to the direct and indirect tax regime, including, without limitation, a simplified alternate direct tax regime and that dividend distribution tax will not be payable in respect of dividends declared, distributed or paid by a domestic company after March 31, 2020, and accordingly, that such dividends not be exempt in the hands of the shareholders, both resident as well as non-resident, and that such dividends likely be subject to tax deduction at source. The Company may or may not grant the benefit of a tax treaty (where applicable) to a non-resident shareholder for the purposes of deducting tax at source from such dividend. Investors should consult their own tax advisors about the consequences of investing or trading in the Equity Shares.

Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India. In cases where the seller is a non-resident, capital gains arising from the sale of the equity shares will be partially or wholly exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Historically, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the equity shares.

Further, we cannot predict whether any tax laws or other regulations impacting it will be enacted, or predict the nature and impact of any such laws or regulations or whether, if at all, any laws or regulations would have a material adverse effect on our business, financial condition, results of operations and cash flows. The Government of India had announced the union budget for financial year 2024 and the Finance Act, 2023 received assent from the President of India on March 31, 2023. There is no certainty on the impact that the Finance Act, 2023 may have on our business and operations or in the industry we operate in.

68. *We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and exhibitions, conferences and events industry contained in this Draft Red Herring Prospectus.*

While facts and other statistics in this Draft Red Herring Prospectus relating to India, the Indian economy and the exhibitions, conferences and events industry has been based on various government publications and reports from government agencies that we believe are reliable, we cannot guarantee the quality or reliability of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

69. *The extent and reliability of Indian infrastructure could adversely affect our Company's results of operations and financial condition.*

India's physical infrastructure is in a developing phase, as compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition.

70. *Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.*

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of

economic liberalization could change, and specific laws and policies affecting the capital market, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

71. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

72. *Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

73. *A slowdown in economic growth in India and globally could cause our business to suffer.*

We are highly dependent on prevailing economic conditions in India and globally and our results of operations are significantly affected by factors influencing the Indian and global economy. A slowdown in the economy and per capita income could adversely affect our business, including our ability to grow our assets, the quality of our assets, and our ability to implement our strategy. Factors that may adversely affect the Indian and global economy and per capita income, and hence our results of operations, may include:

- any increase in Indian interest rates or inflation;
- any scarcity of credit or other financing;
- prevailing income conditions among Indian and global consumers and corporations;
- volatility in, and actual or perceived trends in trading activity on, India's principal stock exchanges;
- variations in exchange rates;
- changes in India's tax, trade, fiscal or monetary policies;
- political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighbouring countries;
- prevailing regional or global economic conditions; and
- other significant regulatory or economic developments in or affecting India and other countries.

Any slowdown in the Indian or global economy and per capita income or in the growth of the sectors we participate in or future volatility in global commodity prices could adversely affect our borrowers and contractual counterparties. This in turn could adversely affect our business and financial performance and the price of our Equity Shares.

74. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection / tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

75. *Natural calamities could have a negative impact on the Indian economy and cause our Company's business to suffer.*

India has experienced natural calamities such as earthquakes, tsunami and floods in recent years. The extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

76. *Regional hostilities, terrorist attacks, communal disturbances, civil unrest and other acts of violence or war involving India and other countries may result in a loss of investor confidence and adversely affect the financial markets and our business.*

Terrorist attacks, civil unrest and other acts of violence or war may negatively affect the Indian markets on which our Equity Shares will trade and also adversely affect the worldwide financial markets. In addition, the Asian region has from time to time experienced instances of civil unrest and hostilities among neighbouring countries. Hostilities and tensions may occur in the future and on a wider scale. Military activity or terrorist attacks in India may result in investor concern about stability in the region, which may adversely affect the price of our Equity Shares. Events of this nature in the future, as well as social and civil unrest within other countries in Asia, could influence the Indian economy and could have an adverse effect on the market for securities of Indian companies, including our Equity Shares.

77. *Instability in financial markets could materially and adversely affect our results of operations and financial condition.*

The Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States of America or Europe, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. The global financial turmoil, an outcome of the sub-prime mortgage crisis which originated in the United States of America, led to a loss of investor confidence in worldwide financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil, evident from the sharp decline in SENSEX, BSE's benchmark index. Any prolonged financial crisis may have an adverse impact on the Indian economy and us, thereby resulting in a material and adverse effect on our business, operations, financial condition, profitability and price of our Equity Shares.

1. To Meet Working Capital Requirement

We're strategically positioning ourselves to enter a segment that has already been explored by esteemed brokers and investors. Our intention is to allocate the proceeds from the mentioned Issue toward the working capital required for the below mentioned business activities. As a company, we perceive vast potential and promising opportunities within this segment, which fuels our confidence in its profitability.

- a. **Margin Trading Facility (MTF):** MTF stands for Margin Trading Facility whereby clients are being funded against a collateral called margin for the eligible & approved securities in the cash market. They are charged interest for the debit balances being funded & the security remains pledged with us until the debit gets cleared off. Company wishes to increase its MTF book from the issue proceeds to increase client base, revenue & profitability.
- b. **Algorithmic-based trading:** Algorithmic trading, also known as computer-directed trading, effectively reduces transactional costs while enabling investment managers to assume command over their trading processes. The ongoing innovation in algorithms continues to yield returns for enterprises capable of absorbing the associated costs and leveraging the benefits. Any strategy for algorithmic trading necessitates the identification of profitable opportunities leading to enhanced earnings or cost reduction. These trading strategies adhere to predefined rules, encompassing elements of timing, price, quantity, or various mathematical models. Beyond providing profit opportunities, algorithmic trading enhances market liquidity and institutes systematic trading by mitigating the emotional impact of human involvement in trading activities.

The benefits of algorithmic trading include:

- Execution of trades at optimal prices
- Instant and precise placement of trade orders
- Accurate and instantaneous trade timing to avert significant price fluctuations
- Reduced transaction costs owing to diminished human intervention
- Simultaneous automated scrutiny of multiple market conditions
- Lowered risk of manual errors in trade placement
- Minimized potential for mistakes by human traders influenced by emotional and psychological factors

Predominantly, contemporary algorithmic trading constitutes high-frequency trading (HFT). This method seeks to capitalize on placing a multitude of orders at exceptional speeds across diverse markets, driven by pre-programmed instructions and multiple decision parameters.

- c. **Credit Line** - The Company aims to expand its credit line by leveraging a bank guarantee facility, facilitating the provision of Futures and Options (F&O) trading services to a broader client base. This strategic initiative is anticipated to contribute to increased revenue and profits. To secure the enhanced credit line, the company is required to furnish collateral as security to the partnering banks. It is noteworthy that a portion of the funds raised through the Initial Public Offering (IPO) will be allocated for the specific purpose of providing the necessary security to the banks, aligning with the company's objective of fortifying its financial position to support business expansion and capture additional market opportunities.

Working Capital Requirements will increase from F. Y. 2022-23 to F. Y. 2023-24 as there will be growth in the scale of Business. THE EVOLUTION, CURRENT STATE AND FUTURE OUTLOOK OF THE STOCK BROKING INDUSTRY

The stock broking industry, a cornerstone of global financial markets, has undergone significant transformations over the years, shaped by technological advancements, regulatory changes, and shifting market dynamics. This industry plays a pivotal role in facilitating the buying and selling of financial instruments such as stocks, bonds, derivatives, and other securities. It serves as a bridge connecting investors, both individual and institutional, with the broader capital markets. In this comprehensive overview, we will delve into the evolution of the stock broking industry, its present landscape, recent developments, and the potential future outlook.

Evolution of the Stock Broking Industry:

The history of stock broking dates back centuries, originating in coffeehouses where traders gathered to exchange securities in London during the 17th century. These informal gatherings eventually evolved into more structured exchanges, giving rise to the world's first stock exchange, the London Stock Exchange, in 1801. The industry continued to evolve through the 19th and 20th centuries with the advent of electronic trading systems, which significantly sped up the transaction process.

Current State of the Industry:

Today, the stock broking industry operates in a highly digitized and interconnected global marketplace. Key players include traditional brokerage firms, online trading platforms, and electronic communication networks (ECNs). Traditional brokerage firms offer a range of services, including research, advisory, and trade execution, while online platforms have democratized access to markets by providing self-directed investors with easy-to-use interfaces. ECNs enable direct electronic trading between market participants, fostering increased transparency and efficiency.

In recent years, the industry has witnessed a series of transformative trends:

1. **Technological Advancements:** The integration of cutting-edge technologies such as artificial intelligence (AI), machine learning, and block chain has revolutionized the industry. AI-driven algorithms facilitate automated trading, enabling firms to execute large volumes of trades with minimal human intervention. Block chain technology, on the other hand, has the potential to enhance transparency and security in settlement processes.
2. **Rise of FinTech:** The emergence of FinTech firms has disrupted traditional business models by offering innovative solutions such as robo-advisors, which provide algorithm-based investment recommendations, and peer-to-peer lending platforms that allow investors to directly lend to borrowers.
3. **Regulatory Changes:** Regulatory reforms, such as the Markets in Financial Instruments Directive (MiFID) in Europe and the Dodd-Frank Wall Street Reform and Consumer Protection Act in the United States, have aimed to enhance market transparency, investor protection, and competition. These changes have prompted brokers to adapt their operations and ensure compliance.
4. **Commission-Free Trading:** The movement towards commission-free trading has gained momentum, driven by online platforms offering zero-commission trades. This has put pressure on traditional brokerage firms to reassess their fee structures and enhance their value propositions.
5. **Globalization and Market Access:** Advances in communication and technology have facilitated global market access, enabling investors to trade securities listed on international exchanges. This globalization has spurred increased collaboration between stock exchanges worldwide.

GLOBAL ECONOMY: RECENT DEVELOPMENTS

- The Organization for Economic Co-operation and Development (OECD) revised its global GDP growth forecasts upward for 2023 from 2.7 to 3.0 percent, and revised India's real GDP forecast upwards for FY 2023-24 from 6.0 to 6.3 percent. The Morgan Stanley Capital International (MSCI) Index for the world decreased by approximately 1.1 percent. It remained flat for emerging markets, but increased by 2.9 percent approximately for India.
- The global economy is slowing under the impact of tight financial conditions, protracted geopolitical tensions and increasing geo-economic fragmentation. Headline inflation is easing but rules above the target in major economies. While major central banks are signaling a peaking of their rate hike cycle, there are indications that the tight monetary policy stance could persist for longer than anticipated earlier. Sovereign bond yields have firmed up, the US dollar has appreciated, and global equity markets have corrected.
- In USA, the Federal Open Market Committee kept the policy rate unchanged at 5.50 percent. Inflation in the UK decreased marginally after easing significantly last month. Inflation in Japan also declined slightly after remaining unchanged last month, and was higher than the target rate. IMF forecasts global inflation to decline steadily, from 8.7 percent in 2022 to 6.9 percent in 2023 and 5.8 percent in 2024.

Overview of the Global Financial Markets

- Global growth is projected to fall from an estimated 3.5 per cent in 2022 to 3.0 per cent in both 2023 and 2024. While the forecast for 2023 is modestly higher than predicted in the April 2023 World Economic Outlook (WEO), it remains weak by historical standards.
- Global headline inflation is expected to fall from 8.7 per cent in 2022 to 6.8 per cent in 2023 and 5.2 per cent in 2024. Underlying (core) inflation is projected to decline more gradually, and forecasts for inflation in 2024 have been revised upward.
- The J.P. Morgan Global Composite PMI Output Index fell to 51.7 in July 2023 from 52.7 in June, 2023 registering its lowest reading since January. Manufacturing output and new orders declined across all three of the product categories covered by the survey (consumer, intermediate and investment goods). Meanwhile, the services sub-sectors covered – business, consumer and financial – all registered weaker expansions of both activity and new business.

India

Amid global uncertainties and economic sluggishness, Indian economy remained better placed compared to major large economies as it posited higher growth rate than most of the Advanced and Emerging Market Economies. (According to IMF estimates, Indian economy witnessed growth of 6.8 per cent during 2022-2023; while as per MOSPI's estimates, GDP at constant (2011-12) prices increased by 7.2 per cent in 2022-23). Aggregate demand displayed resilience with Private Final Consumption Expenditure growing by 7.5 per cent driven by pick up in discretionary spending. On the investment front, Gross Fixed Capital Formation registered a growth of 11.4 per cent backed by the Government's thrust on capital expenditure. Exports grew sharply by 13.8 per cent on account of easing supply chain pressures during the second half of 2022-23. From the supply side, the growth in Gross Value Added (GVA) was broad based, facilitated by resilience of primary sector as well as sustained recovery in industrial and services sectors.

During 2022-23, CPI headline inflation averaged 6.7 per cent with inflation breaching the upper tolerance band for nine months. Headline inflation, which stood at 7.8 per cent in April 2022, declined to 6.7 per cent in July and then rose briefly to 7.4 per cent in September 2022 before easing again to 5.7 per cent in March 2023.

Overview of the Indian Financial Markets

Within India's financial sector, the equity market stands out prominently for its advanced and globally aligned status. Over time, the Indian stock market has witnessed rapid growth, attaining a significant presence globally in terms of market capitalization, turnover, and the count of listed companies.

Despite the challenges posed by the pandemic and geopolitical tensions in the previous fiscal year, the equity market has exhibited remarkable strength and resilience.

The fiscal year 2022 saw a surge in IPO listings on exchanges, with companies raising record-breaking funds through initial public offerings. Simultaneously, robust domestic fund inflows were observed, marked by increased retail participation, even as foreign portfolio investor flows in equities diminished. This exceptional equity market performance can be attributed to three primary factors:

- Favourable monetary policy and lower interest rates, which rendered stock investment appealing for higher potential returns.
- Technological advancements that facilitated simplified market access.
- Convenient access to data and the internet.

India's share in the global market capitalization has been steadily increasing, positioning it as the 5th largest globally, following countries like the US, China, Japan, and Hong Kong.

As of November 2022, Indian stock exchanges hold positions within the top 10 worldwide in terms of market capitalization. At present, India's market capitalization stands at approximately USD 3.5 trillion, roughly equivalent to its GDP. For comparison, the USA's market cap (USD 42 trillion) is nearly double its GDP. If India aims for a similar 2:1 market cap to GDP ratio as the USA, with a projected GDP of USD 40 trillion by 2047, India's market capitalization would need to reach USD 80 trillion. This entails a compound annual growth rate (CAGR) in market capitalization of around 14% over the next 24 years.

The fiscal year 2023 in Indian markets was characterized by stability, with major indices ending the year without significant changes. It began amidst ongoing geopolitical tensions between Russia and Ukraine, increased monetary tightening by major central banks, and fluctuations in commodity prices. Despite a downturn in the equity markets during the first quarter, there was a strong recovery, culminating in the Sensex and Nifty reaching record highs of 63,284 and 18,812, respectively, in December 2022. This bullish trend was driven by several factors, including robust domestic economic growth, strong corporate earnings, a positive growth outlook, and substantial investments from domestic institutional investors.

However, by March 2023, the Sensex and Nifty had retreated from their all-time highs, closing at 58,992 and 17,360, respectively. This decline was primarily attributed to a crisis in the US banking sector, leading to the insolvency of multiple banks. Despite this setback, India remained the second-best performing equity market among emerging markets in FY2023, trailing only behind South Africa.

Indian Capital Markets

The Indian capital markets play a crucial role in facilitating the transfer of funds from savers to borrowers and in mobilising savings. It provides a platform for investors to invest their savings in a variety of securities and earn returns, while corporations and governments gain access to the necessary capital to facilitate investment and promote growth. Due to digitalisation, the capital market industry has undergone a revolution, resulting in the development of novel financial products and services that employ technologies such as artificial intelligence (AI), machine learning (ML), and distributed ledger. These developments have increased the market's depth and liquidity, rendering it more efficient, transparent, and accessible to investors. Mobile applications and online trading platforms have further enhanced the customer experience. India is poised to evolve into a developed economy with a dynamic capital market due to the growing participation of individuals in the capital market.

As a result of global investors reducing their allocation to equities, there was a significant outflow of capital from the majority of major equity markets, including India. Foreign institutional investors withdrew nearly US\$16.5 Billion from the Indian equity markets in 2022. Normally, a foreign portfolio equity outflow of this magnitude would have precipitated a severe

correction in the Indian equity market. However, substantial inflows from domestic investors, particularly under the systematic investment plan into equity mutual fund schemes, largely offset the outflow of foreign portfolio equity investment. Consequently, the Indian equity market was one of the few global markets which generated a positive return during 2022.

Debt Market

The Indian bond market has experienced significant volatility in recent years. Bond yields in India, as in the majority of other nations, fell sharply in 2020 as a result of large stimulus measures, such as liquidity infusion and rate cuts. In 2021, rates remained within a narrow range due to a largely accommodating monetary policy, the absence of a significant inflationary uptick, and a decrease in government market borrowing. In 2022, however, bond yields spiked due to a sharp increase in inflation, aggressive monetary tightening across the globe, including India, and the withdrawal of liquidity.

Indian Wealth Management Industry

The realm of Indian wealth management stands as a pivotal guardian of the financial fortunes of High Net-worth Individuals (HNIs) and Ultra High Net-worth Individuals (UHNIs), entrusted with the intricate task of overseeing a diverse portfolio encompassing financial assets, real estate holdings, gold reserves, and various tangible assets. Employing a tailored and methodical approach, wealth managers serve as navigators in the labyrinth of complex financial markets, adept at mitigating risks and enhancing returns on investments. Collaborating closely with their clientele, these professionals delve deep into understanding their financial aspirations, thereby delivering bespoke wealth management solutions aligned with their clients' enduring objectives.

Amidst the surging tide of India's expanding economy, there emerges an amplified clamor for efficient wealth management services. Recent times have witnessed an upsurge in the breadth of services offered within the Indian wealth management landscape, accompanied by the influx of new entrants and substantial investments geared towards pioneering technological advancements.

The trajectory of the industry charts an unprecedented growth trajectory spanning the last decade. This trajectory is propelled by the escalating number of domestic millionaires and billionaires, a cohort contributing significantly to the sector's momentum. Furthermore, the International Monetary Fund's prognostication earmarks India's GDP to clinch the third position globally by 2030, affirming the escalating potency of the country's economic prowess.

In parallel, the Indian Government's unwavering emphasis on fortifying the financial infrastructure and fortifying regulatory frameworks within the sector has cultivated an ecosystem ripe for investments and the amassing of private wealth. This concerted effort fosters an environment conducive to the thriving growth of the wealth management sphere, bolstering investor confidence and fortifying the industry's foundations.

ACTIVITY AND TRENDS OBSERVED IN THE SECURITIES MARKET

The capital market assumes a pivotal role in an economy's growth by facilitating long-term investments, offering investment opportunities, and fostering wealth creation. In India, various capital market segments have shown impressive development,

adapting to changing financial landscapes through innovation. The equity market, in particular, ranks fifth globally by market capitalization and has witnessed significant expansion supported by technology and regulations.

In recent quarters, brokerages have shifted gears, pivoting from aggressive client acquisition strategies to a more focused effort on sustaining profitability amidst the backdrop of escalating compliance costs. This shift has been facilitated by a concentrated effort towards enhancing unit economics.

The broking segment, particularly retail broking, has experienced a dynamic metamorphosis. The entry of new players, coupled with digitization, disruptive technologies, and regulatory changes, has completely reshaped the operational landscape. Consequently, brokers are reengineering their business strategies to diversify revenue streams. They're placing considerable emphasis on value-added services such as wealth management, research, advisory, asset management, and financial planning to deepen customer engagement and enrich the wealth creation journey of their clients.

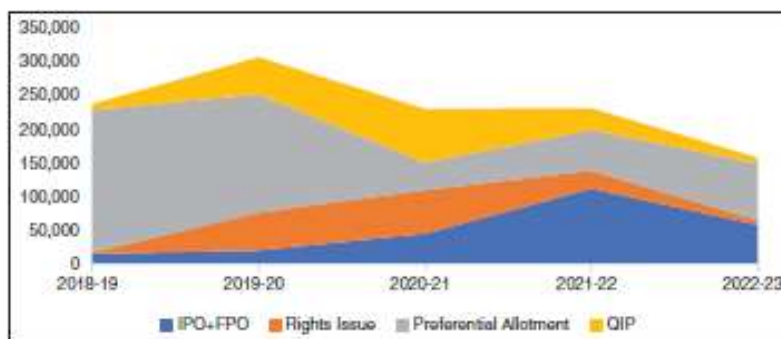

As per CareEdge projections, revenue growth for the broking industry was anticipated to moderate to approximately 10% in FY23, reaching a range of ₹ 28000–30000 crore, and remain relatively stagnant in FY24E. This forecast has been influenced by industry consolidation, which is poised to benefit traditional brokers to some extent.

Retail participation in India's stock market has notably improved, backed by SEBI's educational efforts and investor protection measures. Initiatives like the T+1 settlement cycle underscore India's progressive stance. While the government securities (G-Sec) market is liquid and well-established, the corporate bond market remains underdeveloped due to challenges like low retail engagement and regulatory constraints. SEBI and RBI are proactively working to enhance this market through measures like introducing market makers and improving liquidity.

The Indian commodity derivatives market has grown with new products and participants. Though reforms have deepened the market, more action is required for wider participation. Accelerating these market reforms aligns with India's vision of becoming a USD 40 trillion economy by 2047. The focus should be on utilizing data and technology to simplify compliance and encourage capital market engagement.

PRIMARY MARKET

Fund raising through public issues decreased by almost 50 per cent during 2022-23 compared to 2021-22, which was a peak year in fund mobilization through IPOs. The moderation in fund raising was possibly influenced by prevailing economic uncertainties, inflation, geo political tensions and monetary tightening – all of which affected companies' prospective IPO plans as valuations took a hit. However, there was a significant rise in number of companies newly listed, as the number of IPOs increased to 164 in 2022-23 as compared to 120 during 2021-22. This was on account of rise in listings in SME Platform and hence the average size of the IPOs was comparatively lower declining to Rs. 334 crore as against Rs. 938 crore during the same period. LIC, the largest IPO ever in India, was listed in 2022-23.

SECONDARY MARKET

During 2022-23, domestic stock markets were weighed down by recurring headwinds in the form of lingering impact of Ukraine-Russia conflict, possibility of looming global recession, elevated inflation, monetary tightening by central banks, FPI outflows, currency volatility and global banking crises. However, markets weathered the dampens and exhibited resilience on the back of strong macroeconomic fundamentals, regulatory support, supply-side interventions, robust corporate earnings and strong domestic institutional and individual investors participation.

Following two years of exceptional performance, the equity markets took a breather in 2022-23, with the benchmark indices Nifty 50 and Sensex ending the year on a flat note, posting -0.6 and 0.7 per cent returns respectively, over the previous fiscal's close. A slew of global geo-political and challenging macroeconomic conditions unfolded during the year, which impacted the markets. During the first three quarters of the fiscal, Indian equity markets exhibited resilience and outshone the global peers. Albeit, the performance of domestic equity markets moderated in the last quarter.

The fiscal was also marked by intermittent volatility, with the Nifty 50 registering its all-time high of 18,812 and intra-year low of 15,293. The Sensex too experienced a wide range of movement between 50,921 and 63,583 during the year.

Retail Involvement in Equity Market

Retail participation in the equity market experienced a substantial surge in FY21, particularly driven by tier-2 and tier-3 cities. This trend resulted from investors seeking higher returns amidst a low-interest rate environment, coupled with abundant liquidity both domestically and globally. The momentum continued into FY22, evident from a significant increase in the number of demat accounts, which escalated notably during the year. In FY22 alone, Indian investors opened an impressive 34.6 million demat accounts, nearly double the count from FY21. This trend can be attributed to factors like improved internet access, affordable smart devices, user-friendly interfaces provided by brokerages, and simplified KYC norms.

Additionally, a shift in turnover distribution among different client categories has occurred. Individual investors claimed a 45% market share in FY21, constituting nearly half of NSE's market turnover. This coincided with a decline in shares held by corporates, domestic institutions, and foreign institutional investors. While the share of individual investors was 41% in FY22, exceeding the pre-pandemic 5-year average of 37%, it dropped from the FY21 peak. This trend has persisted into the current year, accompanied by a rising proportion of foreign institutional investors. This shift could be attributed to increase selling by foreign portfolio investors, resulting in higher turnover and share.

Retail participation contributes to market liquidity and enhances the order book's depth. A diverse investor base, encompassing both retail and institutional investors, is crucial for market resilience in emerging economies, particularly during periods of volatile global flows. However, it may also introduce higher market volatility. Retail investors are often influenced by sentiment and engage in speculative trading, rather than adopting long-term investment strategies. This tendency could magnify market fluctuations. Consequently, regulatory bodies need to ensure that market participation is well-informed and educated.

DEMATERIALIZATION

Dematerialization is the process through which securities in physical form are converted to electronic form. Dematerialization allows investors to handle investments in an effective manner. Dematerialization of shares has been an important milestone in Indian capital markets as it has stirred the micro-structure of markets in general and of stock exchanges in particular. Since 2020, there has been a significant rise in the number of demat accounts opened at NSDL and CDSL. As on March 31, 2023, the number of demat accounts registered across both depositories was `11.4 crore. Number of investor accounts opened at CDSL and NSDL during 2022-23 registered growth of 31.8 per cent and 17.9 per cent, respectively, though the same has been lower as compared to growth rates of 2021-22. The number of listed companies signed up for dematerialization with CDSL and NSDL increased by 11.2 per cent (Y-o-Y) and 9.4 per cent (Y-o-Y), respectively, at the end of March 2023. The value of securities in the demat form at CDSL and NSDL increased marginally by 6.8 per cent and 0.1 per cent respectively, at the end of March 2023. At the end of 2022-23, NSDL had 88.4 per cent share in terms of market value of demat securities, while CDSL had a share of 11.6 per cent. (Chart 2).

Marginal Trading Facility

Margin funding, a means to generate interest-based income for Indian brokers, has observed healthy growth in the past two fiscal years amid increased volume and participation. Expectations for the margin funding book, especially for larger peers in the brokerage industry, suggest it will remain steady, continuing to significantly contribute to revenue.

Brokerages are increasingly focusing on value-added services such as wealth management, research, advisory, AMC, and financial planning to bolster customer engagement. Fund-based activities like margin funding and loans against shares are projected to be consistent contributors to earnings. Consequently, while top-line figures have surged, the share of revenue from pure broking has been on a gradual decline in the overall revenue mix.

Financialisation of Savings

The Financialisation of savings stands as a linchpin for India's sustained and long-term economic growth. However, recent trends indicate a moderation in India's aggregate saving rate, marking a decline in financial savings as a percentage of GDP, hitting its nadir at 11.1% in 2021-22, the lowest since 2017-18. Paralleling this downturn, there's been a noteworthy surge in household savings directed towards physical assets, witnessing an uptick from 10.9% of GDP in 2020-21 to 12.1% in 2021-22.

Households allocate their savings across financial instruments and physical assets. Financial savings typically encompass cash, bank deposits, mutual funds (MFs), insurance, and pension funds. Concurrently, savings in physical assets, notably gold and real estate, have undergone a substantial resurgence. Over the last five years (2015-16 to 2019-20), physical asset savings constituted 55-60% of household savings. However, the latest fiscal year saw a significant leap in the share of savings in physical assets, soaring from 49% in 2020-21 to 61%.

Real estate investments witnessed a robust surge, surpassing even the rise in gold investments in the previous year. There's been an evolving trend in financial savings, with households diversifying their portfolios, moving away from conventional avenues like bank deposits towards small savings, provident and pension funds, and mutual funds. Notably, mutual funds and equity emerged as pivotal instruments for financial savings in the latest fiscal year, reflecting a profound shift in households' saving and investment patterns.

The composition of gross financial savings has undergone a remarkable transformation over the past decade. In 2011-12, bank deposits dominated the landscape, contributing over half of household financial savings. However, by March 2022, their

contribution dwindled to a mere 30%. On the flip side, provident and pension funds experienced a gradual yet significant ascent, marking 22% of financial savings last year, signifying a substantial move towards a formalized economy. Life insurance funds and small savings followed suit in their contributions.

A notable paradigm shift was witnessed in the escalated share of mutual funds and equity in households' financial savings, particularly in 2021-22. The allocation towards mutual funds surged to 6.2%, marking a significant uptick of over 4% from the previous fiscal year. This substantial increase coincided with a buoyant stock market, bolstered by a surge in liquidity from global central banks, government stimulus packages, redirection of foreign investments from China to India, and a record number of Initial Public Offerings (IPOs), all encouraging greater retail investor participation.

The lacklustre inflation-adjusted returns from traditional instruments, such as bank deposits, acted as a catalyst, enticing investors towards the allure of stock markets. Direct exposure to equity instruments also witnessed sustained growth amid these evolving financial dynamics.

INTELLECTUAL PROPERTY LAWS

The Trademarks Act, 1999 (“Trademarks Act”)

Trademarks enjoy protection under both statutory and common law and Indian trademark law permits the registration of trademarks for both goods and services. The Trademarks Act governs the statutory protection of trademarks and the prevention of the use of fraudulent marks in India. Under the provisions of the Trademarks Act, an application for trademark registration may be made before the Trademark Registry by any person claiming to be the proprietor of a trademark, whether individual or joint applicants, and can be made on the basis of either actual use or intention to use a trademark in the future. Once granted, a trademark registration is valid for 10 years unless cancelled, subsequent to which, it can be renewed. If not renewed, the mark lapses and the registration are required to be restored. The Trademarks Act prohibits registration of deceptively similar trademarks and provides for penalties for infringement, falsifying and falsely applying trademarks. Further, pursuant to the notification of the Trademark (Amendment) Act, 2010 simultaneous protection of trademark in India and other countries has been made available to owners of Indian and foreign trademarks. The Trademarks Rules, 2017 have subsequently been enacted and implemented, which have overhauled the regime with respect to assignment and transmission, statement of use, well known trademarks, opposition proceedings, etc.

Foreign Exchange Management Act, 1999 (“FEMA”)

Foreign investment in India is governed by the provisions of Foreign Exchange Management Act, 1999 (“FEMA”), as amended, along with the rules, regulations and notifications made by the Reserve Bank of India thereunder, The Department for Promotion of Industry and Internal Trade (—DPIIT), Ministry of Commerce and Industry has issued the Consolidated FDI Policy which consolidates the policy framework on Foreign Direct Investment (“FDI Policy”), with effect from October 15, 2020. The FDI Policy consolidates and subsumes all the press notes, press releases, and clarifications on FDI issued by DIPP till October 15, 2020.

In terms of the FDI Policy, foreign investment is permitted (except in the prohibited sectors) in Indian companies either through the automatic route or the Government route, depending upon the sector in which foreign investment is sought to be made. In terms of the FDI Policy, the work of granting government approval for foreign investment under the FDI Policy and FEMA Regulations has now been entrusted to the concerned Administrative Ministries/Departments. FDI for the items or activities that cannot be brought in under the automatic route may be brought in through the approval route. Where FDI is allowed on an automatic basis without the approval of the Government, the RBI would continue to be the primary agency for the purposes of monitoring and regulating foreign investment. In cases where Government approval is obtained, no approval of the RBI is required except with respect to fixing the issuance price, although a declaration in the prescribed form, detailing the foreign investment, must be filed with the RBI once the foreign investment is made in the Indian company.

The FDI Policy permits foreign investment up to 100% of equity/FDI cap through the automatic route in companies that fall under the Other Financial Services' sector. Our Company is a stock broking company engaged in the financial services sector and is regulated by SEBI. Accordingly, foreign investment up to 100% of equity/FDI cap is permitted in our Company under the automatic route subject to compliance of certain conditions which are inter-alia as follows:

- (i) Minimum capitalization norms, inter alia shall be subject to conditionality's, as specified by the concerned Regulator/Government Agency.
- (ii) The financial services need to be regulated by one of the Financial Sector Regulators.
- (iii) Downstream investments by any of these entities will be subject to the extant sectoral regulations and provisions of Foreign Exchange Management (Transfer or Issue of Security by a Person Resident outside India) Regulations, 2017, as amended from time to time, now being the Foreign Exchange Management (Non-Debt Instruments) Rules, 2019 read with Foreign Exchange Management (Non-Debt Instruments) Regulations, 2019.

Deferred tax is recognized for all timing differences; being the differences between the taxable income and accounting income that originate in one period and are capable of reversal in one or more subsequent periods. Such deferred tax is quantified using the tax rates and laws enacted or substantively enacted as on the Balance Sheet date. The carrying amount of deferred tax asset/liability is reviewed at each Balance Sheet date and consequential adjustments are carried out.

Minimum Alternate Tax credit is recognized as an asset only when and to the extent there is convincing evidence that the Company will pay normal income tax during the specified period. The Company reviews the same at each balance sheet date and writes down the carrying amount of MAT Credit Entitlement to the extent there is no longer convincing evidence to the effect that the Company will pay normal Income Tax during the specified period.

(q) Impairment of Assets

The Management periodically assesses, using external and internal sources, whether there is an indication that an asset may be impaired. An impairment loss is recognized wherever the carrying value of an asset exceeds its recoverable amount. The recoverable amount is higher of the asset's net selling price and value in use, which means the present value of future cash flows expected to arise from the continuing use of the asset and its eventual disposal. An impairment loss for an asset is reversed if, and only if, the reversal can be related objectively to an event occurring after the impairment loss was recognized. The carrying amount of an asset is increased to its revised recoverable amount, provided that this amount does not exceed the carrying amount that would have been determined (net of any accumulated amortization or depreciation) had

Reportable Segments

A business segment or geographical segment should be identified as a reportable segment if

- (a) its revenue from sales to external customers and from transactions with other segments is 10 per cent or more of the total revenue, external and internal, of all segments; or
- (b) its segment result, whether profit or loss, is 10 per cent or more of :
 - (i) the combined result of all segments in profit, or
 - (ii) the combined result of all segments in loss,
 - (iii) its segment assets are 10 per cent or more of the total assets of all segments.

(n) Earning per share

Basic Earning Per Share is calculated by dividing the net profit or loss for the period attributable to equity shareholders by weighted average number of equity shares outstanding during the period.

For the purpose of calculating diluted earnings per share, net profit after tax during the year and the weighted average number of shares outstanding during the year are adjusted for the effect of all dilutive potential equity shares.

(o) Accounting for taxes on income

The accounting treatment for the Income Tax in respect of the Company's income is based on the Accounting Standard on Accounting for Taxes on Income" (AS-22). The provision made for Income Tax in Accounts comprises both, the current tax and deferred tax. Provision for Current Tax is made on the assessable Income Tax rate applicable to the relevant assessment year after considering various deductions available under the Income Tax Act, 1961

Deferred tax is recognized for all timing differences; being the differences between the taxable income and accounting income that originate in one period and are capable of reversal in one or more subsequent periods. Such deferred tax is quantified using the tax rates and laws enacted or substantively enacted as on the Balance Sheet date. The carrying amount of deferred tax asset/liability is reviewed at each Balance Sheet date and consequential adjustments are carried out.

Minimum Alternate Tax credit is recognized as an asset only when and to the extent there is convincing evidence that the Company will pay normal income tax during the specified period. The Company reviews the same at each balance sheet date and writes down the carrying amount of MAT Credit Entitlement to the extent there is no longer convincing evidence to the effect that the Company will pay normal Income Tax during the specified period.

(p) Impairment of Assets

The Management periodically assesses, using external and internal sources, whether there is an indication that an asset may be impaired. An impairment loss is recognized wherever the carrying value of an asset exceeds its recoverable amount. The recoverable amount is higher of the asset's net selling price and value in use, which means the present value of future cash flows expected to arise from the continuing use of the asset and its eventual disposal. An impairment loss for an asset is reversed if, and only if, the reversal can be related objectively to an event occurring after the impairment loss was recognized. The carrying amount of an asset is increased to its revised recoverable amount, provided that this amount does not exceed the carrying amount that would have been determined (net of any accumulated amortization or depreciation) had

no impairment loss been recognized for the asset in prior years. However, there is no such kind of Fixed Asset in the company which require impairment.

(q) Provisions and contingencies

A provision is recognized when the Company has a present obligation as a result of past event. it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Provisions are not discounted to their present value and are determined based on the best estimate required to settle the obligation at the reporting date. These estimates are reviewed at each reporting date and adjusted to reflect the current best estimates.

SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 08, 2019 (collectively the “UPI Circulars”) in relation to streamlining the process of public issue of equity

shares and convertibles. Pursuant to the UPI Circulars, UPI will be introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIBs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth 214 transition to the UPI Mechanism, the UPI Circular proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019, until March 31, 2019, or floating of five main board public issues, whichever was later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, an RII had the option to submit the ASBA Form with any of the Designated Intermediary and use his/her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.

Phase II: This phase has become applicable from July 1, 2019. SEBI vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019, had extended the timeline for implementation of UPI Phase II till March 31, 2020. Further, SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020 dated March 30, 2020, decided to continue Phase II of UPI with ASBA until further notice. Under this phase, submission of the ASBA Form by RIBs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds has been discontinued and is replaced by the UPI Mechanism. However, the time duration from public issue closure to listing would continue to be six Working Days during this phase.

Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing is proposed to be reduced to three Working Days.

All SCSBs offering the facility of making application in public issues shall also provide facility to make application using UPI. Our Company will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchange and NPCI in order to facilitate collection of requests and/or payment instructions of the Retail Individual Applicants using the UPI Mechanism.

For instance, assume a Price Band of ₹20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67 %
1,000	23	1,500	50.00 %
1,500	22	3,000	100.00 %
2,000	21	5,000	166.67 %
2,500	20	7,500	250.00 %

The price discovery is a function of demand at various prices.
