An investment in our Equity Shares involves a high degree of financial risk. Prospective investors should carefully consider all the information in the Draft Prospectus, particularly the “**Financial Information of the Company**” and the related notes, “**Our Business**” and “**Management’s Discussion and Analysis of Financial Condition and Results of Operations**” on page 132, 91 and 179 respectively of this Draft Prospectus and the risks and uncertainties described below, before making a decision to invest in our Equity Shares.

The risk factors set forth below are not exhaustive and do not purport to be complete or comprehensive in terms of all the risk factors that may arise in connection with our business or any decision to purchase, own or dispose of the Equity Shares. This section addresses general risks associated with the industry in which we operate and specific risks associated with our Company. Any of the following risks, individually or together, could adversely affect our business, financial condition, results of operations or prospects, which could result in a decline in the value of our Equity Shares and the loss of all or part of your investment in our Equity Shares. While we have described the risks and uncertainties that our management believes are material, these risks and uncertainties may not be the only risks and uncertainties we face. Additional risks and uncertainties, including those we currently are not aware of or deem immaterial, may also have an adverse effect on our business, results of operations, financial condition and prospects.

This Draft Prospectus contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Draft Prospectus. The financial and other related implications of risks concerned, wherever quantifiable, have been disclosed in the risk factors below. However, there are risk factors the potential effects of which are not quantifiable and therefore no quantification has been provided with respect to such risk factors. 1. Some events may not be material individually but may be found material collectively.
2. Some events may have material impact qualitatively instead of quantitatively.
3. Some events may not be material at present but may be having material impact in future.

Note:

The risk factors as envisaged by the management along with the proposals to address the risk if any. Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify the financial implication of any of the risks described in this section.

In this Draft Prospectus, any discrepancies in any table between total and the sums of the amount listed are due to rounding off. Any percentage amounts, as set forth in “**Risk Factors**” on page 23 and “**Management Discussion and Analysis of Financial Condition and Results of Operations**” on page 179 of this Draft Prospectus unless otherwise indicated, has been calculated on the basis of the amount disclosed in the “**Restated Financial Statements**”.

1. **We are dependent on collaborations, agreements or authorizations received by our Company from third party manufacturers and suppliers. Such agreements are usually valid for a period of 3 to 5 years and if such agreements are terminated or not renewed at favourable terms, our operations may be adversely affected.**

We have entered into various collaborations, agreements or authorizations outside India for import/export of medical equipments and disposables like: entered into exclusive distribution agreement with JMS Co. Ltd., Japan for importing and marketing JMS Meditape in India, entered into technical collaboration agreement with JMS Singapore Pte. Ltd. for manufacturing Intravenous infusion set, appointed as sole agent of SWS Hemodialysis Care Co. Ltd. China to sell and do maintenance of SWS-4000A hemodialysis machines in West India on exclusive basis and exclusive distribution agreement with Hemant Phillipines Inc./ Mediply Inc. for supply of renal care equipment, medical devices and consumables for marketing the same in entire Phillipines We are subject to certain obligations and restrictive covenants in these agreements or authorizations that we have entered into with third party manufacturers and suppliers. Any failure to comply with these obligations and covenants may have a material adverse effect on our business, prospects, cash flows and financial condition. During the stub period ended on September 30, 2022 and Fiscals 2022, 2021 and 2020 our purchases from JMS Co. Ltd, Japan

and JMS Singapore Pte Ltd, Singapore accounted for 41.92%, 40.74%, 51.52% and 59.69% of our purchases for respective years.

There may be possibility that we may not be able to access such products, technology and know-how in the event of any discontinuation, disruption, termination or breach of these agreements resulting in an adverse impact on our business and financial condition. Our agreements are usually for a period of 3 years to 5 years of validity, therefore if these agreements are not regularly renewed we may not be able to continue our operations on favorable terms. Further these agreements may be terminated prematurely under various circumstances beyond our control. We have limited ability to negotiate terms of these contracts and may have to accept unusual or onerous provisions. Thus in the event of termination of the said agreements or in case of failure to procure new agreements or to renew the said agreements at favorable terms or failure to renew them at all, our business operations may be affected. For details of our agreements please refer section titled “*Our Business*” on page no 91 of the Draft Prospectus.

2. *We face risks relating to sourcing of raw materials and components for manufacturing and assembly of our medical equipments from third parties.*

We deal in variety of medical equipment used by the medical practitioners, hospital and diagnostic service providers etc. We currently do not have long term contracts or exclusive supply arrangements with all our suppliers. Although we have not encountered any significant disruptions in the sourcing of any raw material or component, we cannot assure you that such disruptions will not occur and/or we shall continue to be able to source the raw materials or components in a cost effective manner. Our top 10 suppliers for the stub period ended on September 30, 2022 and Fiscals 2022, 2021 and 2020 accounted for Rs 3614.50 lakhs, Rs 6135.48 lakhs, Rs 4018.04 lakhs, Rs 4249.37 lakhs constituting 84.97%, 76.98%, 83.78 % and 85.33% of our purchases for respective years.

Any failure to procure such raw material or components on a timely basis, or at all, from such third parties and on commercially suitable terms, could affect our ability to deliver finished products. Our dependence on a limited number of suppliers and manufacturers exposes us to risks of delays or inability to meet the demand for the raw material and components. We may also be unable to find any alternative in time, or at all, and at a suitable cost. Any such delay or inability could cause disruptions in our operations and adversely affect our business, financial condition and cash flows.

Moreover, if any of our suppliers suffer any damage to facilities, experience power outages, encounter financial difficulties, are unable to secure necessary raw materials from their suppliers or suffer any other reduction in efficiency, capacity limitations, shortages, work stoppages, labour or social unrest, transport bottlenecks and risks, weather emergencies, commercial disputes, government actions, riots, wars, sabotage, cyber-attacks, acts of terrorism, financial or operational instability of suppliers, we may experience significant business disruption. In the event of any such disruption, our Company would need to seek and source other suppliers, likely resulting in further delays and increased costs which could affect our business adversely.

3. *Loss of any of our key customers or significant reduction in demand from, our significant customers may materially and adversely affect our business and financial performance.*

Our key customers majorly include (i) hospitals and diagnostic centres; (ii) Distributors and dealers and (iii) independent doctors. Our top 10 customers accounted for approximately 39.68%, 39.03%, 33.26% and 35.25% of our revenue from operations in Stub period ended on September 30, 2022, Fiscals 2022, 2021 and 2020, respectively.

Since we are dependent on certain key customers for a significant portion of our sales, the loss of one or more of such customers or a reduction in demand from such customers, for any reason, including due to loss of contracts, delay in fulfilling existing orders, failure to negotiate or agree upon acceptable terms in negotiations, disputes or a loss of market share or a downturn in the spending on healthcare by them, if not suitably replaced with another customer, could adversely affect our business, financial condition and results of operations. Our revenues and profitability may also be adversely affected if there’s a significant reduction in the volume of our business with such customers, or if our customers prefer our competitors over us, and we may not remain the preferred products and solutions provider for certain of our customers.

For instance, if there is any change in the treatment methodology adopted by a medical practitioner, this may lead to cancellation of orders or loss of business and consequently reduce our sales and affect our estimates of anticipated sales, which could materially and adversely affect our business, financial condition and results of operations. Further, our future growth is also linked to the addition of new customers and failure to do so could materially and adversely affect our business, financial condition and results of operations.

4. *We depend significantly on customers and their spending in the healthcare industry and any decline in the spending on healthcare infrastructure in India, could adversely affect our business and profitability.*

To boost domestic manufacturing of medical devices and attract huge investments in India, the Department of Pharmaceuticals launched a PLI scheme for domestic manufacturing of medical devices, with a total outlay of funds worth Rs. 3,420 crore (US\$ 468.78 million) for the period FY21-28. The government also approved applications for nine eligible projects that are expected to lead to a total committed investment of ~Rs. 729.63 crore (US\$ 100.01 million) by the companies Siemens Healthcare Private Limited, Allengers Medical Systems Limited (AMSL), Allengers OEM Private Limited (AOPL), Wipro GE Healthcare Private Limited, Nipro India Corporation Private Limited, Sahajanand Medical Technologies Private Limited, Innvolution Healthcare Private Limited, and Integris Health Private Limited, and generate ~2,304 jobs. Any reduction in the budgetary allocation or support by the Central and/or the State Governments may have a significant impact on our business prospects. Our business is directly and significantly dependent on projects awarded by them. In the event of any adverse change in budgetary allocations or a downturn in available work in this sector resulting from any change in government policies or priorities, our business prospects and our financial performance, may be adversely affected. Factors that may result in a loss of a client include service of our healthcare products, its performance, reduction in budgets due to macroeconomic factors or otherwise, shift in policies and political or economic factors or changes in their outsourcing strategies. These factors may not be predictable or under our control and any adverse change may affect our operations.

5. ***We are significantly dependent on the sale of one of products viz: Meditapes imported from JMS Co Ltd. An inability to anticipate or adapt to evolving up gradation or inability to ensure product quality or reduction in the demand of such products may adversely impact our revenue from operations and growth prospects.***

Our financial performance is significantly dependent on our revenue from sales of one of our products viz: Meditapes, which represented 36.06%, 28.13%, 38.45% and 40.59% of our revenue from operations for the stub period ended on September 30, 2022 and Fiscal 2022, 2021 and 2020 respectively. We cannot assure you that we will increase our market share in the future for this product. Demand for these products depends primarily on healthcare practices in India and its development initiatives taken by Government of India. Further, the product may be substituted by product up gradation and our company may be unable to attain successful vendor approval registration for such upgraded product. We may not be able to introduce new product that are in faster-growing and more profitable categories. Any of these factors could have a material adverse impact on our financial condition and the results of operations. We may also be required to invest in updated technology and processes to develop upgraded product having the desired specification, qualities and characteristics, and continually monitor and adapt to evolving demand in the healthcare industry. In order to further expand into the said product line we intend to purchase additional machinery known as Surgical Tape Coating Machine from the Net Proceeds that would facilitate backward integration to further reduce cost, improve availability and consistency of the product.

6. ***We are required to obtain, renew or maintain certain statutory and regulatory permits and approvals required to operate our business and if we fail to do so in a timely manner or at all and our business, financial conditions, results of operations, and cash flows may be adversely affected.***

We require certain statutory and regulatory licenses, registrations and approvals to operate our business, some of which our Company has either received, applied for or is in the process of application. Many of these approvals are granted for fixed periods of time and need renewal from time to time. Non-renewal of the said permits and licenses would adversely affect our operations, thereby having a material adverse effect on our business, results of operations and financial condition. There can be no assurance that the relevant authorities will renew such licenses, registrations and approvals in a timely manner or at all.

Our Company has presently obtained the requisite registrations, except that our company is yet to apply for Fire No-Objection Certificate for its manufacturing unit at Acchad Industrial Estate, for its Assembly units at Atgaon and Bhiwandi, Mumbai and for its registered office. Further our company has applied for factory license in respect of its assembly unit at Bhiwandi, Mumbai and for renewal of consent to operate under Maharashtra Pollution Control Board for its manufacturing unit at Acchad Industrial Estate and for its Assembly units at Atgaon, which is pending for approval. There can be no assurance that our Company will be granted such approvals or that such approvals will be renewed.

Further, these licenses, registrations and approvals are subject to several conditions, and we cannot assure that we will be able to continuously meet such conditions or be able to prove compliance with such conditions to statutory authorities, and this may lead to cancellation, revocation or suspension of relevant licenses, approvals and registrations. Failure by us to renew, maintain or obtain the required licenses or approvals, or cancellation, suspension, or revocation of any of the licenses, approvals and registrations may result in the interruption of our operations and may have a material adverse effect on our business, results of operations and financial condition. For further details of the approvals yet to be obtained by us, and please see the chapter titled “***Government and Other Statutory Approvals***” beginning on page 195.

7. ***Quality problems and product liability claims could lead to recalls or safety alerts, reputational harm, adverse verdicts or costly settlements, and could have an adverse effect on our business, results of operations, financial condition and cash flows.***

Quality is extremely important to us and our customers due to the impact on patients or due to the serious and potentially costly consequences of product failure. Our business exposes us to potential product liability risks that are inherent in the manufacturing, marketing and use of our products. In addition, some of our products are used in surgical and post-surgical care, with many of our products often used in intensive care settings with seriously ill patients.

Component failures, manufacturing nonconformance, unknown safety, efficacy concerns, unknown side effects, design defects, off-label use, or inadequate disclosure of product-related risks or product-related information with respect to our products, if they were to occur, could result in directly or indirectly, personal injuries or other adverse effects. If any of the aforementioned events were to occur, we may be required to recall and terminate sales of our products. We are exposed to product liability claims in the ordinary course of business. A product liability claim could require us to pay substantial damages. Product liability claims against us, whether or not successful, are costly and time-consuming to defend. Furthermore, concerns of potential side effects could arise among consumers or medical professionals, and such concerns, whether justified or not, could expose us to negative publicity and have an adverse effect on sales of our products and our reputation.

8. *Our business is dependent on our manufacturing facilities and assembly units. Obsolescence, destruction, theft, breakdowns of our machineries or failures to repair or maintain the same may affect our business, cash flows, financial condition and results of operations.*

We have one manufacturing unit located at Achhad Industrial Estate and two assembly units located at Atgaon and Bhiwandi. Our business is dependent upon our ability to manage our manufacturing and assembly facilities, which are subject to various operating risks, including those beyond our control, such as the breakdown and failure of equipment or industrial accidents and severe weather conditions and natural disasters. Any significant malfunction or breakdown of our machinery may entail significant repair and maintenance costs and cause delays in our operations. If we are unable to repair breakdown of machinery in a timely manner or at all, our operations may need to be suspended until we procure new machinery to replace the same. In addition, we may be required to carry out planned shutdowns of our facilities for cleaning and maintenance, statutory inspections and testing, or may shut down certain facilities for capacity expansion and equipment upgrades.

Obsolescence, destruction, theft or breakdowns of our machineries may significantly increase our machineries purchase cost and the depreciation of our plants and machineries, as well as change the way our management estimates the useful life of our plants and machineries. In such cases, we may not be able to acquire new plants or machineries or repair the damaged plants or machineries in time or at all. Some of our major machineries or parts may be costly to replace or repair. We may experience significant price increases due to supply shortages, inflation, transportation difficulties or unavailability. Such obsolescence, destruction, theft, breakdowns, repair or maintenance failures or price increases may not be adequately covered by the insurance policies availed by our Company and may have an effect our business, cash flows, financial condition and results of operations

9. *Restrictions on import and an increase in shipment cost may adversely impact our business, cash flows and results of operations.*

Most of the products, raw materials and components required in our manufacturing and assembly line process are imported. During the stub period ended on September 30, 2022 and Fiscal 2022, 2021 and 2020 the import purchases accounted for 77.80%, 75.72%, 69.10% and 76.02% of total purchases in the respective years. The import is regulated by the various regulatory requirements, which empowers the relevant authority to undertake any measures that it deems fit, particularly in relation to medical equipments, parts, components and disposables to be imported. Such measures include denying approval for import of such products. There can be no assurance that such regulations will not become more stringent in the future, which could potentially restrict our ability to import from other jurisdictions. Historically, we have been dependent on import from countries like: Japan, China and France etc

While our imports from such jurisdictions are not currently subject to any regulatory ban or restriction, there can be no assurance that such regulations will not evolve into more stringent regulations, which would place onerous requirements on us and consequently restrict our ability to import. There can also be no assurance that, under these circumstances, we will be successful in identifying alternate suppliers or we will be able to source such products, raw materials or components domestically at favourable terms in a timely manner. While we have not in the past experienced any significant challenge in importing products, there can be no assurance that we will not experience any such challenges in the future

Any adverse outcome from adjudication of these pending litigations (i) against the Company or the Promoters and Directors, (ii) initiated by the Company or the Promoters and Directors, in the future may have an impact on the Company’s profitability, revenue, operations, etc. Further there are few litigations where the quantum is not ascertainable, therefore any adverse outcome from adjudication of these pending litigations in the future may have impact on the Company’s profitability, revenue, operations, etc. If the courts or tribunals rule against our Company or our Promoters and Directors, we may face monetary and/or reputational losses and may have to make provisions in our financial statements, which could increase our expenses and our liabilities.

Further, our company inadvertently missed to enclose the Cash Flow Statements in the Form AOC-4 filed by the Company till F.Y. 2020-21.

The company being a public company had taken loan from relative of director in the past which is in non-compliance under Section 73 of Companies Act, 2013, however all such loan has been repaid as on date of this Draft Prospectus. We cannot assure you that any such proceedings will not have a material adverse effect on our financial condition or reputation.

Our company has not complied with certain Accounting Standards such as AS-15, AS-18 and AS-22 however the same have been duly complied by the company in the restated financial statements. Further, there are certain forms which are filed with delayed fees with RoC. Although, no show cause notice in respect of the above has been received by the Company till date, any penalty imposed for such non-compliance in future by any regulatory authority could affect our financial conditions to that extent.

12. *Inventories and trade receivables form a major part of our current assets. Failure to manage our inventory and trade receivables could have an adverse effect on our net sales, profitability, cash flow and liquidity.*

Our Company's business is working capital intensive and hence, inventories and trade receivables form a major part of our current assets. The results of operations of our business are dependent on our ability to effectively manage our inventory (raw materials and finished goods) and trade receivables. To effectively manage our inventory, we must be able to accurately estimate customer demand / potential orders and supply requirements and purchase new inventory accordingly. However, if we misjudge expected customer demand / potential orders, it could cause either a shortage of products or an accumulation of excess inventory. During the stub period ended on September 30, 2022 and FY 2021-22, 2020-21 and 2019-20 our inventories were Rs 1,657.41 lakhs Rs 1,284.30 lakhs Rs 1,483.69 lakhs Rs 1,479.92 lakhs. Further, if we fail to convert the inventory we purchase by manufacturing our products, we may be required to write-down our inventory or pay our suppliers without new purchases, or create additional vendor financing, all of which could have an adverse impact on our income and cash flows.

To effectively manage our trade receivables, we must be able to accurately evaluate the credit worthiness of our customers and ensure that suitable terms and conditions are given to them in order to ensure our continued relationship with them. However, if we fail to accurately evaluate the credit worthiness of our customers, it may lead to bad debts, delays in recoveries and / or write-offs which could lead to a liquidity crunch, thereby adversely affecting our business and results of operations. During the stub period ended on September 30, 2022 and FY 2021-22, 2020-21 and 2019-20 our trade receivables were Rs 1653.36 Rs 1565.53 lakhs, Rs 427.24 lakhs, Rs 541.28 lakhs. We also maintained Cash and Cash equivalents of Rs 2,322.03 lakhs, Rs 582.58 lakhs, Rs 151.65 lakhs and Rs 359.89 lakhs during the stub period ended on September 30, 2022 and FY 2021-22, 2020-21 and 2019-20 respectively. A liquidity crunch may also result in case of increased working capital borrowings and, consequently, higher finance cost which will adversely impact our profitability.

13. *Our success depends on stable and reliable logistics and transportation infrastructure. Disruption of logistics and transportation services could impair the ability of our suppliers to deliver raw materials or our ability to deliver products to our customers and/ or increase our transportation costs, which may adversely affect our operations*

We utilize third party transportation services by road for transportation of raw materials and our products from/ to our suppliers and customers. Further, we rely on the freight ships for the transportation of imported components and products. Transportation by road or ship, as the case may be, involves risks, including, collision, grounding, storm, fire, explosion, lightning, political instability, allotment of berths for cargo ships for our imports and operating

restrictions/ lockdown consequent to outbreak of infectious diseases, such as the COVID-19 pandemic. Any delay or disruption caused to the transportation of raw materials or our products could adversely impact our ability to procure the raw materials as well as to meet the delivery schedule of our products in an economical manner. To ensure timely delivery of our products, we may also be required to maintain relatively high level of inventory of raw materials and this may also resultantly increase our cost.

14. *Some of our Group Companies and Promoter Group Entities operate in the same line of business as us, which may lead to conflict of interest.*

Our Group Companies and Promoter Group entities, Ikigai Services Private Limited, Diaso Diagnostics LLP, Ikigai Medequipments Private Limited are involved in ventures which are in the same line of business as of our Company. Hence, we may have to compete with our Group Entities for business, which may impact our business, financial condition and results of operations. We cannot assure that our Promoters who have common interest in said entity will not favour the interest of the said entity. As a result, conflicts of interests may arise in allocating business opportunities amongst our Company and these Companies in circumstances where our respective interests' conflict. In cases of conflict, our Promoter may favour these companies in which our Promoters have interest. There can be no assurance that our Promoters or members of the Promoter Group will not compete with our existing business or any future business that we may undertake or that their interests will not conflict with ours. The interests of our Promoters may also conflict in material aspects with our interests or the interests of our Shareholders. However, our Company will ensure necessary procedures and practices as permitted by laws and regulatory guidelines to address situations of conflict of interest as and when they arise. Any such present and future conflicts could have a material adverse effect on our reputation, business, results of operations and financial condition which may adversely affect our profitability and results of operations. For further details, see "***Our Group Companies***" on page 202.

Further we share the same premises of our registered office with Our Group Companies and Promoter Group entities, Ikigai Services Private Limited, Diaso Diagnostics LLP, Lifesenz Cancer Research Labs Private Limited, Ikigai Medequipments Private Limited. There is no separate sub-lease agreement, rent sharing agreement or areasharing agreement. In case of any dispute we may suffer a disruption in our operations which could have an adverse effect on our business and operations. Any multiple or overlapping use of the said facilities may create some disruption which may affect our business operations.

15. *Fluctuation in foreign currency exchange rates could affect our financial condition and results of operations.*

Our business involves import and export transactions with foreign companies, which is paid or received in U.S. Dollars, Yen, JPY or other foreign currencies. A depreciation of Rupee against these foreign currencies would mean that our imports would become expensive and will impact our gross margins. During the stub period ended on September 30, 2022 and FY 2021-22, 2020-21 and 2019-20 the imports accounted for approximately Rs. 3,309.81 lakhs, Rs. 6,035.08 lakhs, Rs. 3,283.04 lakhs and Rs. 3,732.73 lakhs respectively. Similarly any appreciation of Rupee against these foreign currencies would adversely affect the export value of our products. During the stub period ended on September 30, 2022 and FY 2021-22, 2020-21 and 2019-20 the exports accounted for approximately Rs. 650.52 lakhs, Rs 797.41 lakhs, Rs. 547.47 lakhs and Rs. 458.80 lakhs respectively. The exchange rate between the Rupee and these foreign currencies has fluctuated substantially in recent years and may continue to fluctuate significantly in the future. The foreign exchange gain/(loss) during the stub period ended on September 30, 2022 and FY 2021-22, 2020-21 and 2019-20 accounted for Rs 86.34 lakhs, Rs 49.08 lakhs, Rs (45.30) lakhs and Rs (80.36) lakhs respectively. We bear the complete risk of currency exchange rate fluctuations.

16. *Our expansion plan towards backward integration relating to installation of additional plant and machinery is subject to the risk of unanticipated delays in implementation and cost overruns.*

We intend to use the Net Proceeds to install Surgical Tape Coating Machine for setting up a coating plant of Meditapes and to install Injection Moulding Machine, for moulding plastic parts of medical disposables. For further information, refer "***Objects of the Issue***" on page 66 of this Draft Prospectus. Our expansion plan remain subject to the potential problems and uncertainties including cost overruns or delays. Problems that could adversely affect our plans include labour shortages, the possibility of unanticipated future regulatory restrictions, incremental pre- operating expenses, taxes and duties, interest and finance charges, working capital margin and other external factors which may not be within the control of our management. There can be no assurance that the proposed capital expenditure towards installation of additional plant & machinery will be completed as planned or on schedule, and if they are not completed in a timely manner, or at all, our budgeted costs may be insufficient to meet our proposed capital expenditure requirements. If our actual capital expenditures significantly exceed our budgets, or even if our budgets were sufficient to cover these projects, we may not be able to achieve the intended economic benefits, which in turn may materially and adversely affect our financial condition, results of operations, cash flows, and prospects. There can be no assurance that we will be able to complete the expansion in accordance with the proposed schedule of implementation and any delay could have an adverse impact on our growth, prospects, cash flows and financial condition.

17. Our insurance coverage may not be adequate to protect us against all potential losses to which we may be subject and this may have a material effect on our business and financial condition.

While we have insured our manufacturing unit with FG Bharat Sookshma Udyam Suraksha for Building including Plinth & Foundation, Plant & Machinery, Furniture, Fixtures and Fittings. We also insured stock at our manufacturing and assembly units with Oriental Bharat Laghu Udyam Suraksha Policy and Bulgary- Floater policy. In addition to this, we have private car and commercial vehicle insurance policy, Two Wheeler Insurance Policy. However, we don't have any insurance policy for our registered office. We may not have sufficient insurance coverage to cover all possible economic losses, including when the loss suffered is not easily quantifiable. We have not insured our risks pertaining to Machinery Breakdown, Third party claims, Cash in transit, Keyman Insurance Policy and Employee Compensation Policy. The absence of such policies may affect our production facilities to halt, and may hinder our operations. Even if we have made a claim under an existing insurance policy, we may not be able to successfully assert our claim for any liability or loss under such insurance policy. Additionally, there may be various other risks and losses for which we are not insured either because such risks are uninsurable or not insurable on commercially acceptable terms. The occurrence of an event for which we are not adequately or sufficiently insured could have an effect on our business, results of operations, financial condition and cash flows. For further details of our Insurance Policies, please refer section titled **"Our Business"** beginning on page 91 of this Draft Prospectus.

18. The names of our Promoters Hanskumar Shamji Shah and Kaushik Hanskumar Shah were appearing in the list of disqualified directors in the past.

Our Promoters, Hanskumar Shamji Shah and Kaushik Hanskumar Shah were disqualified from directorship from November 01, 2016 to October 31, 2021 by Registrar of Companies, Delhi (ROC Delhi) under Section 164(2)(a) of the Companies Act, 2013 in relation to their past directorship in Millennium Industries Private Limited ("MIPL") as MIPL did not file financial statements or annual returns for continuous period of three (3) financial years. Hanskumar Shamji Shah had submitted his resignation from the directorship of MIPL in the year 2006 and Kaushik Hanskumar Shah had submitted his resignation from the directorship of MIPL in the year 2008 and their respective period of disqualification from directorship also ended on October 31, 2021.

Hanskumar Shamji Shah and Kaushik Hanskumar Shah had filed a writ petition bearing no. W.P. (C) 13189/2018 & CM Appls 51186-87/2018 before the Hon'ble High Court of Delhi at New Delhi challenging the disqualification list published/notified by ROC Delhi and inter-alia seeking quashing of the said list. The Hon'ble High Court of Delhi vide its Order dated December 07, 2018, inter-alia, stayed the aforementioned disqualification list till the next date of hearing and ordered that Director Identification Number ("DIN") and Digital Signatures of both Hanskumar Shamji Shah and Kaushik Hanskumar Shah be forthwith revived. Later, the said writ petition filed by Hanskumar Shamji Shah and Kaushik Hanskumar Shah was clubbed with other writ petitions filed by certain individuals aggrieved by the list of disqualification and the Hon'ble High Court of Delhi vide its Order dated July 07, 2022 disposed 489 writ petitions including the writ petition filed by Hanskumar Shamji Shah and Kaushik Hanskumar Shah and inter-alia held that since the period of disqualification has expired by efflux of time i.e. on account of lapse of five years, the petitioners are eligible for appointment/re-appointment as directors.

While Hanskumar Shamji Shah and Kaushik Hanskumar Shah are not presently disqualified to be directors, there is no assurance that statutory or regulatory actions or legal proceeding will not be initiated against any of them. In future, in case of any actual or alleged non-compliance with regulatory requirements, our Promoters could be subject to investigations and administrative or judicial proceedings that may result in substantial penalties and/ or diversion of management's attention, which could negatively affect our reputation and may have a material adverse effect on our business operations.

19. We also sell our products through network of distributors and dealers and any inability to expand or effectively manage our growing distribution and sales network may have an adverse effect on our business, results of operations and financial condition.

In addition to direct sales of our products to end user customers, we also have an extensive sales and distribution network. We are dependent on our channel partners for the distribution of our products. Our ability to expand and grow our product reach significantly depends on the reach and effective management of our distribution network. We continuously seek to increase the penetration of our products by appointing new distributors targeted at different markets and geographies. We cannot assure you that we will be able to successfully identify and appoint new distributors or effectively manage our existing distribution network. If the terms offered to such distributors by our competitors are more favorable than those offered by us, distributors may decline to distribute our products and terminate their arrangements with us.

20. Our assembly units are located on leased premises. If we are unable to renew these leases or relocate on commercially suitable terms, it may have a material adverse effect on our business, results of operation and financial condition

Our assembly units situated at Atgaon and Bhiwandi in Mumbai are located on leased premises. Though we have entered into lease agreements with respect to these units, such lease agreements may be terminated early in the event of a default or upon the expiry of their tenure and may not be renewed. For details, see **"Our Business - Property"** on page 91. Additionally, the

lease agreements require our Company to comply with certain conditions including prior consent of the lessor for certain actions such as making significant structural alterations, subletting, transferring or assigning the leased premises. If we fail to meet any such conditions, we may be required to incur additional liability.

If these agreements are terminated or revoked for any reason or if we are unable to renew these agreements on commercially reasonable terms or at all, we may suffer significant disruptions to our operations and incur considerable costs to relocate and move our operations elsewhere. In the event we are required to vacate the premises, we may need to do with short or no notice. Any inability on our part to timely identify a suitable location could have an adverse impact on our business.

21. *The logo used by our Company is not registered under the Trade Marks Act, 1999. Failure to protect our intellectual property rights may adversely affect our competitive business position, financial condition and profitability.*

Presently, our Company is using logo  and we have not applied for registration of the same under the Trade Marks Act, 1999. Therefore as on date we do not enjoy the statutory provisions that are accorded to a registered trademark. Further, we may not be able to detect any unauthorized use or infringement or take appropriate and timely steps to enforce or protect our intellectual property, nor can we provide any assurance that any unauthorized use or infringement will not cause damage to our business prospects. Further we cannot guarantee that the application made for registration of our trademark in future will be allowed. In case we are unable to obtain the registration for the said trademark in our name, our business revenues and profitability may be impacted.

22. *Our contingent liabilities as stated in our Restated Financial Statements could affect our financial condition.*

23. *We face competition and may not be able to keep pace with the rapid technological changes in the industry.*

The healthcare and medical devices market is competitive and is characterized by rapid technological change. Our customers consider many factors when choosing suppliers, including product reliability, clinical outcomes, breadth of product portfolio, price and product services provided by the manufacturer, product availability and market share can shift as a result of technological innovation and other business factors. Major shifts in industry market share have occurred in connection with product problems, physician advisories and safety alerts, reflecting the importance of product quality in the medical health product industry, and any quality problems with our processes, goods and services could harm our reputation and erode our competitive advantage, sales and market share. Our competition varies by market, geographic areas and type of product.

We compete on the basis of our ability to fulfil our obligations for the secured orders including the quality and the timely delivery of the products. Our competitors may have substantially greater financial, management, research and marketing resources than we have as a result of which they may be able to utilise their resources and economies of scale to develop improved products, divert sales away from us by winning larger orders or they may hire our employees by offering more lucrative compensation packages. Increased competition may also lead to product price erosion as new companies enter the market or modify their existing products to compete directly with us or advanced technologies emerge. Growing competition in the domestic and/or international markets may subject us to pricing pressures and require us to reduce the prices of our products in order to retain or attract customers, which may have an adverse effect on our revenues and margins.

24. *If we are unable to manage our growth effectively, our business, future financial performance and results of operations could be materially and adversely affected.*

The success of our business will depend greatly on our ability to effectively implement our operational and growth strategies. As a part of our growth strategy, we aim to, among other things, continue to grow our businesses as and when opportunities exist including capitalise on industry tailwinds, focus on consistently meeting quality standards, deepen and expand our

geographical presence, strengthening up our business through effective branding, promotional and digital activities and focus on backward integration. In pursuing our growth strategy, we will require additional capital investments and cash outlays, which may have a material impact on our cash flows and results of operations. Our operating expenses and capital requirements may increase significantly pursuant to our expansion and diversification plans. Our ability to manage our growth effectively requires us to forecast accurately our sales, growth and manufacturing capacity and to expend funds to improve our operational, financial and management controls, reporting systems and procedures. An inability to implement our future business plan, manage our growth effectively or failure to secure the required funding on favourable terms or at all could have a material and adverse effect on our business, future financial performance and results of operations.

25. *We are dependent on our Promoters, our senior management and other key personnel, and the loss of, or our inability to attract or retain, such persons could affect our business, results of operations, financial condition and cash flows.*

Our performance depends largely on the efforts and abilities of our senior management and other key personnel. They have gained experience in this line of business and have over the years built relations with our suppliers, third party suppliers, customers and other persons who are connected with us and have been actively involved in the day to day operations and management, further we believe that the inputs and experience of our senior management, in particular, and other key personnel are valuable for successful delivery of products, our overall business operations and the strategic directions taken by our Company. For details in relation to the experience of our key management personnel, see **“Our Management”** on page 115 of this Draft Prospectus. We cannot assure you that these individuals or any other member of our senior management team will not leave us or join a competitor or that we will be able to retain such personnel or find an adequate replacements in a timely manner, or at all. We may require a long period of time to hire and train replacement personnel when qualified personnel terminate their employment with our Company. We may also be required to increase our levels of employee compensation more rapidly than in the past to remain competitive in attracting employees that our business requires. The loss of the services of such persons may have an effect on our business, results of operations, financial condition and cash flows.

26. *Our activities require deployment of labour and depend on availability of labour. In case of unavailability of such labour, our business operations could be affected.*

Our operations require deployment and our ability to retain labour. In case such labour workforce is unavailable, or we are unable to identify and retain such labour our business could be adversely affected. We cannot guarantee that we may be able to continue with the same on favourable terms or at all. Any such failure may impact the operations, business process and profitability. Additionally, there have been amendments in the Labour and Employment related laws, which may have a direct impact on our employee costs and consequently, on our margins. Further, latest amendments in labour laws in India may be lead to increasing cost of compliance, wages, social security, Occupational Safety, Health and Working Conditions. We cannot assure you that we will continue to comply with all these labour related laws and that as we continue to grow our business in the future, our labour and employee costs coupled with operating compliances and expenses will not significantly increase.

27. *Our Promoters and Promoter Group Members have provided personal guarantees for loan facilities obtained by our Company, and any failure or default by our Company to repay such loans in accordance with the terms and conditions of the financing documents could trigger repayment obligations on them, which may impact their ability to effectively service their obligations and thereby, impact our business and operations.*

Our Promoters Hanskumar Shamji Shah, Kaushik Hanskumar Shah and Hemant Praful Shah and our promoter group member Leena Hanskumar Shah have provided personal guarantee towards loan facilities taken by our Company from Standard Chartered Bank and Yes Bank Limited and may continue to provide such guarantees and other securities post listing. Any default or failure by us to repay the loans in a timely manner, or at all could trigger repayment obligations of our guarantors in respect of such loans, which in turn, could have an impact on their ability to effectively service their obligations, thereby having an effect on our business, results of operation and financial condition. Furthermore, in the event that these individuals or companies withdraw or terminate their guarantees, our lenders for such facilities may ask for alternate guarantees, repayment of amounts outstanding under such facilities, or even terminate such facilities. We may not be successful in procuring guarantees satisfactory to the lenders, and as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could affect our financial condition and cash flows. For further details, please refer to chapter titled **“Statement of Financial Indebtedness”** beginning on page 173 of this Draft Prospectus.

28. *Information relating to installed capacity of our manufacturing facilities included in this Draft Prospectus is based on various assumptions and estimates and our future production and capacity may vary.*

Information relating to the historical installed capacity of our manufacturing facilities included in this Draft Prospectus is based on various assumptions and estimates of our management, including assumptions relating to expected operations, operating days, availability of raw materials, expected unit utilization levels, downtime resulting from scheduled maintenance activities, downtime resulting from change in stock keeping units for a particular product, unscheduled breakdowns as well as expected operational efficiencies. Actual production volumes and capacity utilization rates may differ significantly from the estimated

production capacities and historical capacity utilization of our manufacturing facilities. Investors should therefore not place undue reliance on our historical installed capacity information for our existing manufacturing facilities included in this Draft Prospectus.

29. *Under-utilization of our manufacturing capacities may have an adverse effect on our business, future prospectus and future financial performance*

Our capacity utilization is affected by the availability of raw materials and components, industry and market conditions as well as by the product requirements of, and the procurement practice followed by, our customers. Currently our manufacturing facilities are underutilized and in the event that we are unable to achieve full capacity utilization of our current manufacturing facilities, this would result in operational inefficiencies which may have an adverse effect on our business, financial condition, cash flows, future prospects and future financial performance. Under-utilization of our manufacturing capacities over extended periods, or significant under-utilization in the short term, could adversely impact our business, growth prospects and future financial performance. In case of oversupply in the industry or lack of demand, we may not be able to utilize our capacity efficiently. For further details in relation to our capacity utilization, see **“Our Business – Capacity and Capacity Utilization”** on page 91.

30. *Excessive dependence on Standard Chartered Bank and Yes Bank Limited in respect of Loan facilities obtained by our Company.*

Our company has been majorly sanctioned credit facilities by Standard Chartered Bank and Yes Bank Limited. The Company is dependent on such facility for its Term loan, Working Capital, Cash Credit and Overdraft facilities and other funding requirement and any default under such arrangement with such lender may create problem for operation of the Company, which may affect the financial stability of the Company. At the same time this may result into difficulty in arranging for funds for re-payment and may also adversely affect the financial position of the Company.

31. *Our Company has during the preceding one year from the date of the Draft Prospectus allotted Equity Shares at a price which is may be lower than the Issue Price.*

In the last 12 months, we have made allotments of Equity Shares (other than bonus issue of shares) through right issue of shares to our promoters, which may be lower than the Issue Price. For details relating to number of shares issued, date of allotment etc. please refer to section titled **“Capital Structure”** on page 50 of this Draft Prospectus. The Issue Price is not indicative of the price that will prevail in the open market following listing of the Equity Shares.

32. *We are subject to certain restrictive covenants in debt facilities provided to us by our lenders.*

We have entered into agreements for availing debt facilities from lenders. Certain covenants in these agreements require us to obtain approval/permission from our lenders in certain conditions. In the event of default or the breach of certain covenants, our lender has the option to make the entire outstanding amount payable immediately. There can be no assurance that we will be able to comply with these financial or other covenants or that we will be able to obtain consents necessary to take the actions that we believe are required to operate and grow our business. For further details in this regard, please refer to chapter titled **“Statement of Financial Indebtedness”** beginning on page 173 of this Draft Prospectus.

33. *We have in the past entered into related party transactions and may continue to do so in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our Company’s financial condition and results of operations.*

Our Company has entered into various transactions with our Directors, Promoters and Promoter Group members. These transactions, inter-alia includes remuneration, loans and advances, rent expenses, reimbursement of expenses etc. For details, please refer to **“Annexure XXXI - Related Party Transactions”** under Section titled **“Financial Information of the Company”** and Chapter titled **“Capital Structure”** beginning on page 163 and 50 respectively of this Draft Prospectus. Our Company has entered into such transactions due to easy proximity and quick execution. While we believe that all such transactions have been conducted in the ordinary course of business, there can be no assurance that we could not have achieved more favorable terms had such transactions not been entered into with related parties.

Furthermore, it is likely that we may enter into related party transactions in the future. Any future transactions with our related parties could potentially involve conflicts of interest. Accordingly, there can be no assurance that such transactions, individually or in the aggregate, will not have a material adverse effect on our business, financial condition, cash flows, results of operations and prospects.

34. Changes in technology may render our current technologies obsolete or require us to make substantial investments.

Modernization and technology up gradation is essential to reduce costs and increase the output. Our technology and machineries may become obsolete or may not be upgraded timely, hampering our operations and financial conditions and we may lose our competitive edge. Although we believe that we have installed updated technology, we shall continue to strive to keep our technology, plant and machinery in line with the latest technological standards. In case of a new found technology in the industry in which we operate, we may be required to implement new technology or upgrade the machineries and other equipment employed by us. Further, the costs in upgrading our technology and modernizing the plant and machineries are significant which could substantially affect our finances and operations.

35. The average cost of acquisition of Equity Shares by our Promoters, is lower than the face value of Equity Share.

The average cost of acquisition of Equity Shares of our Promoter is lower than the face value of Equity Shares i.e. ₹10/-. For further details regarding the average cost of acquisition of Equity Shares by our Promoter in our Company and build-up of Equity Shares of our Promoter in our Company, please see section titled "**Capital Structure**" beginning on page 50 of this Draft Prospectus.

36. We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be affective in all cases. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

37. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule.

The proposed fund requirement for installation of additional plant & machineries to facilitate backward integration at our manufacturing facility and funding working capital requirements, as detailed in the section titled "**Objects of the Issue**" is to be funded from the proceeds of this Issue. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule. We therefore, cannot assure that we would be able to execute our future plans/strategy within the given timeframe. For details, please refer to the Chapter titled "**Objects of the Issue**" beginning on page 66 of Draft Prospectus.

38. Any Penalty or demand raised by statutory authorities in future will affect financial position of our Company.

Our Company is engaged in the manufacturing business, which attracts tax liability such as Goods and Service tax and Income tax as per the applicable provisions of Law. We are also subject to the labour laws like depositing of contributions with Provident Fund, Employee State Insurance and Professional Tax. Any demand or penalty raised by the concerned authority in future for any previous year and current year will affect the financial position of the Company.

39. The Objects of the Issue for which funds are being raised, are based on our management estimates and have not been appraised by any bank or financial institution or any independent agency.

The deployment of funds will be entirely at our discretion, based on the parameters as mentioned in the chapter titled "**Objects of the Issue**". The fund requirement and deployment, as mentioned in the "**Objects of the Issue**" on page 66 of this Draft Prospectus is based on the estimates of our management and has not been appraised by any bank or financial institution or any other independent agency. These fund requirements are based on our current business plan. We cannot assure that the current business plan will be implemented in its entirety or at all. In view of the highly competitive and dynamic nature of our business, we may have to revise our business plan from time to time and consequently these fund requirements. The deployment of the funds as stated under chapter "**Objects of the Issue**" is at the discretion of our Board of Directors and is not subject to monitoring by any external independent agency. Further, we cannot assure that the actual costs or schedule of implementation as stated under chapter "**Objects of the Issue**" will not vary from the estimated costs or schedule of implementation. Any such variance may be on account of one or more factors, some of which may be beyond our control. Occurrence of any such event may delay our business plans and/or may have an adverse bearing on our expected revenues and earnings.

40. Our ability to pay any dividends will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures.

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not

declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our Dividend history refer to the Section “*Dividend Policy*” on page 131 of the Draft Prospectus.

41. *There is no monitoring agency appointed by Our Company to monitor the utilization of the Issue proceeds.*

As per SEBI (ICDR) Regulations, 2018, as amended, appointment of monitoring agency is required only for Issue size above Rs. 10,000.00 Lacs. Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds in terms of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the stock exchange and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

42. *Our Promoter and the Promoter Group will jointly continue to retain majority shareholding in our Company after the issue, which will allow them to determine the outcome of the matters requiring the approval of shareholders.*

Our promoter along with the promoter group will continue to hold collectively [●] of the post issue paid up share capital of the company. As a result of the same, they will be able to exercise significant influence over the control of the outcome of the matter that requires approval of the majority shareholders vote. Such a concentration of the ownership may also have the affect of delaying, preventing or deterring any change in the control of our company. In addition to the above, our promoter and promoter group will continue to have the ability to take actions that are not in, or may conflict with our interest or the interest of some or all of our minority shareholders and there is no assurance that such action will not have any adverse effect on our future financials or results of operations.

43. *We may require further equity issuance, which will lead to dilution of equity and may affect the market price of our Equity Shares or additional funds through incurring debt to satisfy our capital needs, which we may not be able to procure and any future equity offerings by us.*

Our growth is dependent on having a strong balance sheet to support our activities. In addition to the IPO Proceeds and our internally generated cash flow, we may need other sources of financing to meet our capital needs which may include entering into new debt facilities with lending institutions or raising additional equity in the capital markets. We may need to raise additional capital from time to time, dependent on business conditions. The factors that would require us to raise additional capital could be business growth beyond what the current balance sheet can sustain; additional capital requirements imposed due to changes in regulatory regime or significant depletion in our existing capital base due to unusual operating losses. Any fresh issue of shares or convertible securities would dilute existing holders, and such issuance may not be done at terms and conditions, which are favorable to the then existing shareholders of our Company. If our Company decides to raise additional funds through the incurrence of debt, our interest obligations will increase, and we may be subject to additional covenants, which could further limit our ability to access cash flows from our operations. Such financings could cause our debt - equity ratio to increase or require us to create charges or liens on our assets in favor of lenders. We cannot assure you that we will be able to secure adequate financing in the future on acceptable terms, in time, or at all. Our failure to obtain sufficient financing could result in the delay or abandonment of our expansion plans. Our business and future results of operations may be affected if we are unable to implement our expansion strategy.

Any future issuance of Equity Shares by our Company may dilute shareholding of investors in our Company; and hence affect the trading price of our Company’s Equity Shares and its ability to raise capital through an issue of its securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Company’s Equity Shares. Additionally the disposal, pledge or encumbrance of Equity Shares by any of our Company’s major shareholders, or the perception that such transactions may occur may affect the trading price of the Equity Shares. No assurance may be given that our Company will not issue Equity Shares or that such shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

44. *The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the issue price and you may not be able to sell your Equity Shares at or above the Issue Price.*

The issue price of the equity shares have been based on many factor and may not be indicative of the market price of our Equity Shares after the Issue. For further information, please refer the section titled “*Basis for Issue Price*” beginning on page 73 of the Draft Prospectus. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue

Price.

45. *Certain data mentioned in this Draft Prospectus has not been independently verified.*

We have not independently verified data from industry publications contained herein and although we believe these sources to be reliable, we cannot assure that they are complete or reliable. Such data may also be produced on a different basis from comparable information compiled with regard to other countries. Therefore, discussions of matters relating to India and its economy are subject to the limitation that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete or unreliable.

46. *Investors other than retail (including non-institutional investors and Corporate Bodies) are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Amount) at any stage after submitting an Application.*

Pursuant to the SEBI ICDR Regulations, Investors other than retail (including non-institutional investors and Corporate Bodies) are not permitted to withdraw or lower their Application (in terms of quantity of Equity Shares or the Amount) at any stage after submitting an Application. While our Company is required to complete Allotment pursuant to the issue within six Working Days from the issue Closing Date, events affecting the Applicants decision to invest in the Equity Shares, including material adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operation or financial condition, may arise between the date of submission of the Application and Allotment. Our Company may complete the Allotment of the Equity Shares even if such events occur, and such events limit the applicant's ability to sell the Equity Shares Allotted pursuant to the issue or cause the trading price of the Equity Shares to decline on listing.

EXTERNAL RISK FACTORS

47. *The extent to which the Coronavirus disease (COVID-19) may affect our business and operations in the future is uncertain and cannot be predicted.*

During the first half of calendar year 2020, COVID-19 spread to a majority of countries across the world, including India. The COVID-19 pandemic has had, and may have, significant repercussions across local, national and global economies and financial markets. In particular, a number of governments and organizations have revised GDP growth forecasts for calendar year 2020 downward in response to the economic slowdown caused by the spread of COVID-19. The global impact of the COVID-19 pandemic has been rapidly evolving and public health officials and governmental authorities have responded by taking measures, such as prohibiting people from assembling in large numbers, instituting quarantines, restricting travel, issuing "stay-at-home" orders and restricting the types of businesses that may continue to operate, among many others. On March 14, 2020, India declared COVID-19 as a "notified disaster" and imposed a nationwide lockdown beginning on March 25, 2020. The lockdown lasted until May 31, 2020, and has been extended periodically by varying degrees by state governments and local administrations. The lifting of the lockdown across various regions has been regulated with limited and progressive relaxations being granted for movement of goods and people in other places and calibrated re-opening of businesses and offices. Despite the lifting of the lockdown, there is significant uncertainty regarding the duration and long-term impact of the COVID-19 pandemic, as well as possible future responses by the Government, which makes it impossible for us to predict with certainty the impact that COVID-19 will have on our business and operations in the future. We are closely monitoring the impact of COVID-19 on our financial condition, liquidity, operations, suppliers and workforce. Any intensification of the COVID-19 pandemic or any future outbreak of another highly infectious or contagious disease may adversely affect our business, results of operations and financial condition.

48. *A slowdown in economic growth in India may adversely affect our business, financial condition, cash flows, results of operations and prospects.*

The performance and growth of our business are necessarily dependent on economic conditions prevalent in India, which may be materially and adversely affected by centre or state political instability or regional conflicts, a general rise in interest rates, inflation, and economic slowdown elsewhere in the world or otherwise. There have been periods of slowdown in the economic growth of India. India's economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports (oil and oil products), global economic uncertainty and liquidity crisis, volatility in currency exchange rates and annual rainfall which affects agricultural production. Any continued or future slowdown in the Indian economy or a further increase in inflation could have a material adverse affect on the price of our raw materials and demand for our products and, as a result, on our business and financial results. The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the U.S. and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and,

indirectly, in the Indian economy in general. Any worldwide financial instability, including the financial crisis and fluctuations in the stock markets and further deterioration of credit conditions in the U.S. or European markets, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our business and financial results.

49. *Changing laws, rules and regulations and legal uncertainties in India, including adverse application of tax laws and regulations, may adversely affect our business and financial performance.*

Our business and financial performance could be adversely affected by changes in law or interpretations of existing, or the promulgation of new, laws, rules and regulations in India applicable to us and our business. For further details please refer to the chapter “**Government and Other Approvals**” on page 195 for details of the laws currently applicable to us. There can be no assurance that the central or the state governments in India may not implement new regulations and policies which will require us to obtain approvals and licenses from the central or the state governments in India and other regulatory bodies or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the implementation of the new regulations may have a material adverse affect on all our business, financial condition and results of operations. In addition, we may have to incur capital expenditures to comply with the requirements of any new regulations, which may also materially harm our results of operations.

50. *Instability in financial markets could materially and adversely affect our results of operations and financial condition.*

The Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States of America or Europe, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors’ reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. The global financial turmoil, an outcome of the sub-prime mortgage crisis which originated in the United States of America, led to a loss of investor confidence in worldwide financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil, evident from the sharp decline in SENSEX, BSE’s benchmark index. Any prolonged financial crisis may have an adverse impact on the Indian economy and us, thereby resulting in a material and adverse effect on our business, operations, financial condition, profitability and price of our Equity Shares.

51. *Natural calamities could have a negative impact on the Indian economy and cause Our Company’s business to suffer.*

India has experienced natural calamities such as earthquakes, tsunami, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall, drought or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

52. *Government regulation of foreign ownership of Indian securities may have an adverse effect on the price of the Equity Shares.*

Foreign ownership of Indian securities is subject to government regulation. Under foreign exchange regulations currently in affect in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the rupees proceeds from the sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the Income Tax authorities. There can be no assurance that any approval required from the RBI or any other government agency can be obtained.

53. *If certain labour laws become applicable to us, our profitability may be adversely affected.*

India has stringent labour legislations that protect the interests of workers, including legislation that sets forth detailed procedures for dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. Any change or modification in the existing labour laws may affect our flexibility in formulating labour related policies.

54. *Our performance is linked to the stability of policies and the political situation in India.*

The Government of India has traditionally exercised, and continues to exercise, a significant influence over many aspects of the economy. Our business, and the market price and liquidity of our Equity Shares, may be affected by interest rates, changes in government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Any political instability in India may adversely affect the Indian securities markets in general, which could also adversely

affect the trading price of our Equity Shares. Any political instability could delay the reform of the Indian economy and could have a material adverse affect on the market for our Equity Shares. There can be no assurance to the investors that these liberalization policies will continue under the newly elected government. Protests against privatization could slow down the pace of liberalization and deregulation. The rate of economic liberalization could change, and specific laws and policies affecting companies in the industrial manufacturing sectors, foreign investment, currency exchange rates and other matters affecting investment in our securities could change as well. A significant change in India's economic liberalization and deregulation policies could disrupt business and economic conditions in India and thereby affect our business.

Global Economic Environment

The Survey narrates about six challenges faced by the Global Economy. The three challenges like COVID-19 related disruptions in economies, Russian-Ukraine conflict and its adverse impact along with disruption in supply chain, mainly of food, fuel and fertilizer and the Central Banks across economies led by Federal Reserve responding with synchronised policy rate hikes to curb inflation, leading to appreciation of US Dollar and the widening of the Current Account Deficits (CAD) in net importing economies. The fourth challenge emerged as faced with the prospects of global stagflation, nations, feeling compelled to protect their respective economic space, thus slowing cross-border trade affecting overall growth. It adds that all along, the fifth challenge was festering as China experienced a considerable slowdown induced by its policies. The sixth medium-term challenge to growth was seen in the scarring from the pandemic brought in by the loss of education and income-earning opportunities.

The Survey notes that like the rest of the world, India, too, faced this extraordinary set of challenges but withstood them better than most economies.

In the last eleven months, the world economy has faced almost as many disruptions as caused by the pandemic in two years. The conflict caused the prices of critical commodities such as crude oil, natural gas, fertilisers, and wheat to soar. This strengthened the inflationary pressures that the global economic recovery had triggered, backed by massive fiscal stimuli and ultra-accommodative monetary policies undertaken to limit the output contraction in 2020. Inflation in Advanced Economies (AEs), which accounted for most of the global fiscal expansion and monetary easing, breached historical highs. Rising commodity prices also led to higher inflation in the Emerging Market Economies (EMEs), which otherwise were in the lower inflation zone by virtue of their governments undertaking a calibrated fiscal stimulus to address output contraction in 2020.

The Survey underlines that Inflation and monetary tightening led to a hardening of bond yields across economies and resulted in an outflow of equity capital from most of the economies around the world into the traditionally safe-haven market of the US. The capital flight subsequently led to the strengthening of the US Dollar against other currencies – the US Dollar index strengthened by 16.1 per cent between January and September 2022. The consequent depreciation of other currencies has been widening the CAD and increasing inflationary pressures in the net importing economies.

Overview of the Indian Economy

India to witness GDP growth of 6.0 per cent to 6.8 per cent in 2023-24, depending on the trajectory of economic and political developments globally.

The optimistic growth forecasts stem from a number of positives like the rebound of private consumption given a boost to production activity, higher Capital Expenditure (Capex), near-universal vaccination coverage enabling people to spend on contact-based services, such as restaurants, hotels, shopping malls, and cinemas, as well as the return of migrant workers to cities to work in construction sites leading to a significant decline in housing market inventory, the strengthening of the balance sheets of the Corporates, a well-capitalised public sector banks ready to increase the credit supply and the credit growth to the Micro, Small, and Medium Enterprises (MSME) sector to name the major ones.

It says, growth is expected to be brisk in FY24 as a vigorous credit disbursal, and capital investment cycle is expected to unfold in India with the strengthening of the balance sheets of the corporate and banking sectors. Further support to economic growth will come from the expansion of public digital platforms and path-breaking measures such as PM GatiShakti, the National Logistics Policy, and the Production-Linked Incentive schemes to boost manufacturing output.

The Survey says, in real terms, the economy is expected to grow at 7 per cent for the year ending March 2023. This follows an 8.7 per cent growth in the previous financial year.

Despite the three shocks of COVID-19, Russian-Ukraine conflict and the Central Banks across economies led by Federal Reserve responding with synchronised policy rate hikes to curb inflation, leading to appreciation of US Dollar and the widening of the Current Account Deficits (CAD) in net importing economies, agencies worldwide continue to project India as the fastest-growing major economy at 6.5-7.0 per cent in FY23.

India's Inclusive Growth

The Survey emphasises that growth is inclusive when it creates jobs. Both official and unofficial sources confirm that employment levels have risen in the current financial year, as the Periodic Labour Force Survey (PLFS) shows that the urban unemployment rate

for people aged 15 years and above declined from 9.8 per cent in the quarter ending September 2021 to 7.2 per cent one year later (quarter ending September 2022). This is accompanied by an improvement in the labour force participation rate (LFPR) as well, confirming the emergence of the economy out of the pandemic-induced slowdown early in FY23.

In FY21, the Government announced the Emergency Credit Line Guarantee Scheme, which succeeded in shielding micro, small and medium enterprises from financial distress. A recent CIBIL report (ECLGS Insights, August 2022) showed that the scheme has supported MSMEs in facing the COVID shock, with 83 per cent of the borrowers that availed of the ECLGS being micro-enterprises. Among these micro units, more than half had an overall exposure of less than Rs10 lakh.

Furthermore, the CIBIL data also shows that ECLGS borrowers had lower non-performing asset rates than enterprises that were eligible for ECLGS but did not avail of it. Further, the GST paid by MSMEs after declining in FY21 has been rising since and now has crossed the pre-pandemic level of FY20, reflecting the financial resilience of small businesses and the effectiveness of the pre-emptive government intervention targeted towards MSMEs.

Moreover, the scheme implemented by the government under the Mahatma Gandhi National Rural Employment Guarantee Act (MGNREGA) has been rapidly creating more assets in respect of “Works on individual’s land” than in any other category. In addition, schemes like PM-KISAN, which benefits households covering half the rural population, and PM Garib Kalyan Anna Yojana have significantly contributed to lessening impoverishment in the country.

The UNDP Report of July 2022 stated that the recent inflationary episode in India would have a low poverty impact due to well-targeted support. In addition, the National Family Health Survey (NFHS) in India shows improved rural welfare indicators from FY16 to FY20, covering aspects like gender, fertility rate, household amenities, and women empowerment.

So far, India has reinforced the country’s belief in its economic resilience as it has withstood the challenge of mitigating external imbalances caused by the Russian-Ukraine conflict without losing growth momentum in the process. India’s stock markets had a positive return in CY22, unfazed by withdrawals by foreign portfolio investors. India’s inflation rate did not creep too far above its tolerance range compared to several advanced nations and regions.

India is the third-largest economy in the world in PPP terms and the fifth-largest in market exchange rates. As expected of a nation of this size, the Indian economy in FY23 has nearly “recouped” what was lost, “renewed” what had paused, and “re-energised” what had slowed during the pandemic and since the conflict in Europe.

INDUSTRY

Medical Devices Industry

The Indian market for medical equipment is predicted to increase to US\$ 50 billion by 2025. As of 2020, the medical devices market is estimated to be at US\$ 12 billion in India. India is the 4th largest Asian medical devices market after Japan, China, and South Korea, and among the top 20 medical devices markets globally. India has an overall 75-80% import dependency on medical devices. Export of medical devices from India stood at US\$ 2.53 billion in FY21. The US, Germany, China, Brazil, Iran, etc. are a few key countries that import Indian medical devices. Gujarat, Maharashtra, Karnataka, Haryana, Andhra Pradesh, Telangana and Tamil Nadu are the manufacturing hubs for medical devices in India. In BioAsia 2021, key stakeholders in the panel discussion on medical technologies stated that India would become self-sufficient in domestic medical devices manufacturing by 2025-26. The panel observed that the government is taking supportive measures such as promoting indigenous manufacturing of high-tech medical devices, production-linked incentive schemes (PLIs) on medical devices, boosting new medical devices park, etc. to boost overall growth of the domestic medical devices market in India.

Growth in Medical Devices

As of 2020, the medical devices market is estimated to be at US\$ 12 billion in India. India is the 4th largest Asian medical devices market after Japan, China, and South Korea, and among the top 20 medical devices markets globally. However, it has the potential to surpass its peers in terms of size and scale; this is based on the government’s support the sector has received over the past several years. India’s medical devices market is projected to reach US\$ 50 billion by 2025. Between 2020-25, diagnostic imaging is likely to expand at a CAGR of 13.5%. The medical devices sector in India comprises large multinationals, and small and mid-sized companies. This sector, which is growing faster amid the pandemic, offers great opportunities for domestic players, particularly engineering MSMEs, to further penetrate the global markets. The Government of India (GOI) has commenced various initiatives to strengthen the medical devices sector, with emphasis on research and development (R&D) and 100% FDI for medical devices to boost the market. India added significant production capacity for various critical care items such as PPE kits, surgical gloves, sanitisers and N95 masks, and emerged as a significant destination for manufacturing of healthcare products and services.

Government Initiatives to Boost Demand

1. 100% FDI

100% FDI is allowed in the medical devices sector in India. Categories such as equipment and instruments, consumables and implants attract the most FDI. The Indian medical devices industry was granted the status of an ‘independent industry’ in 2014, and given the title of ‘sunrise’ sector under the Make in India scheme in 2014. In October 2021, the government announced a plan to draft a new drugs, cosmetics and medical devices bill to increase the acceptability of Indian medical devices in the global market. 100% FDI under the automatic route for both brownfield and greenfield setups in the sector is expected to boost the industry. Strong FDI inflows also reflect confidence among global players on the Indian medical devices market.

Over the last five years (2015-20), India received US\$ 600 million, with key investments from countries such as Singapore, the US, Europe and Japan. Categories such as equipment and instruments, consumables and implants have attracted the most FDIs. FDI inflow in the medical and surgical appliances sector stood at US\$ 2.41 billion between April 2000-March 2022. In the Union Budget 2022-23, Rs. 86,200 crore (US\$ 11.3 billion) was allocated as a budget for the pharmaceutical and healthcare sector.

2. Incentive Schemes

In July 2022, the government tabled a draft for the new Drugs, Medical Devices and Cosmetics Bill 2022, to assure and offer thorough legal protections to ensure that the medical items sold in India are reliable, efficient, and up to required standards. To boost domestic manufacturing of medical devices and attract huge investments in India, the Department Of Pharmaceuticals launched a PLI scheme for domestic manufacturing of medical devices, with a total outlay of funds worth Rs. 3,420 crore (US\$ 468.78 million) for the period FY21-28.

Healthcare Industry

India climbed to the 63rd rank among 190 countries in the World Bank's 'Ease of Doing Business' rankings in 2020. As of 2021, the Indian healthcare sector is one of India's largest employers as it employs a total of 4.7 million people. The sector has generated 2.7 million additional jobs in India between 2017-22 --over 500,000 new jobs per year. The Asian Research and Training Institute for Skill Transfer (ARTIST) announced plans to create around one million skilled healthcare providers by 2022.

The Indian healthcare sector is expected to record a three-fold rise, growing at a CAGR of 22% between 2016- 22 to reach US\$ 372 billion in 2022 from US\$ 110 billion in 2016. As of August 23, 2022, more than 210.31 crore COVID-19 vaccine doses have been administered across the country. By FY22, Indian healthcare infrastructure is expected to reach US\$ 349.1 billion. The e-health market size is estimated to reach US\$ 10.6 billion by 2025.

The Government of India aims to increase healthcare spending to 3% of the Gross Domestic Product (GDP) by 2022. Two vaccines (Bharat Biotech's Covaxin and Oxford-AstraZeneca's Covishield manufactured by the Serum Institute of India) were instrumental in medically safeguarding the Indian population and those of 100+ countries against COVID-19. In November 2021, the Government of India, the Government of Meghalaya and the World Bank signed a US\$ 40 million health project for the state of Meghalaya. Per capita healthcare expenditure has risen at a fast pace

This is due to rising income, easier access to high-quality healthcare facilities and greater awareness of personal health and hygiene. Greater penetration of health insurance aided the rise in healthcare spending, a trend likely to intensify in the coming decade. Economic prosperity is driving the improvement in affordability for generic drugs in the market. In the Economic Survey of 2022, India's public expenditure on healthcare stood at 2.1% of GDP in 2021-22 against 1.8% in 2020-21 and 1.3% in 2019-20. The Government is planning to increase public health spending to 2.5% of the country's GDP by 2025.

Rising income, ageing population to be key healthcare demand driver

Rising income means a steady growth in the ability to access healthcare and related services. Per capita GDP of India is expected to reach US\$ 3,277.28 in 2024 from US\$ 1,761.63 in 2016. Moreover, changing demographics will also contribute to greater healthcare spending. This is likely to continue as the size of elderly population is set to rise from the current 98.9 million to about 168 million by 2026. Per capita GDP at current prices for FY20 stood at US\$ 2,181.14.

The regulations and policies set out below may not be exhaustive, and are only intended to provide general information to the investors and are neither designed nor intended to be a substitute for professional legal advice. The Company may be required to obtain licenses and approvals depending upon the prevailing laws and regulations as applicable. For details of such approvals, please see the section titled “**Government and other Statutory Approvals**” on page 195 of this Draft Prospectus.

This chapter has been classified as under:

- A. Business and Trade related regulations
- B. Statutory and Business laws
- C. Laws relating to Labour and Employment
- D. Environmental Laws
- E. Tax Laws
- F. Intellectual Property Legislation
- G. Regulation for Import & Export

A. BUSINESS AND TRADE RELATED REGULATIONS

Drugs and Cosmetics Act, 1940 (“DCA”) and Drugs and Cosmetics Rules, 1945 (“DCR”)

The DCA regulates the import, manufacture, distribution and sale of drugs and cosmetics and prohibits the manufacture and sale of certain drugs and cosmetics which are, inter alia, misbranded, adulterated, spurious or harmful. The primary objective of the act is to ensure that the drugs and cosmetics sold in India are safe, effective and conform to state quality standards. The Central Government has also passed the DCR in exercise of powers conferred under the DCA. Medical Devices in India are regulated as drugs by the Central Drugs Standards Control Organization as per the provisions of the Drugs and Cosmetics Act, 1940. The DCR specify the requirement of a license for the manufacture or sale of any drug or cosmetic including for the purpose of examination, testing or analysis. It further mandates that every person holding a license must keep and maintain such records, registers and other documents as may be prescribed which may be subject to inspection by the relevant authorities.

Medical Device Rules, 2017 (“MDR”)

The Indian Government introduced the MDR which came into effect on January 1, 2018. The rules have been drafted with the intention to distinguish medical devices from pharmaceuticals for the purpose of regulation. Only the devices notified by the Government are regulated and falls under the provisions of regulations as per MDR. In tune with the global practice, the 2017 Rules has introduced a risk based classification system for regulation of medical devices including Low risk (Class A) Low Moderate (Class B) Moderate High (Class C) and High Risk devices classified as (Class D).

The Medical Device (Amendment) Rules, 2020 have introduced two changes to MDR. The first is introduction of a new chapter for registration of Newly Notified Medical Devices by their respective manufacturers and importers. The second is an exemption for the 37 categories of already regulated or notified medical devices from the requirement of registration introduced by the new chapter.

Essential Commodities Act, 1955 (“ECA”)

The ECA gives powers to the Government of India to, among other things, regulate production, distribution and quality of essential commodities including drugs, for maintaining or increasing supplies and for securing their equitable distribution and availability at fair prices. Using the powers under it, various ministries/departments of the Government have issued control orders for regulating production, distribution, quality aspects, movement and prices pertaining to the commodities which are essential and administered by them. The state governments have issued various control orders to regulate various aspects of trading in essential commodities.

National Pharmaceuticals Pricing Policy, 2012 (the “2012 Policy”)

The 2012 Policy replaces the drug policy of 1994 and presently seeks to lay down the principles for pricing of essential drugs specified in the National List of Essential Medicines – 2011 (—NLEMII) declared by the Ministry of Health and Family Welfare, Government of India and modified from time to time, so as to ensure the availability of such medicines at reasonable price, while providing sufficient opportunity for innovation and competition to support the growth of the Industry. The prices would be

regulated based on the essential nature of the drugs rather than the economic criteria/market share principle adopted in the drug policy of 1994. Further, the 2012 Policy will regulate the price of formulations only, through market based pricing which is different from the earlier principle of cost based pricing. Accordingly, the formulations will be priced by fixing a ceiling price and the manufacturers of such drugs will be free to fix any price equal to or below the ceiling price.

The Drugs (Price Control) Order, 2013 (“DPCO 2013”)

The DPCO 2013, inter alia, provides that the Central Government may issue 94 directions to the manufacturers of active pharmaceutical ingredients or bulk drugs and formulations to increase production or sell such active pharmaceutical ingredient or bulk drug to such manufacturer of formulations and direct the formulators to sell the formulations to institutions, hospitals or any agency, procedures for fixing the ceiling price of scheduled formulations of specified strengths or dosages, retail price of new drug for existing manufacturers of scheduled formulations, method of implementation of prices fixed by Government and penalties for contravention of its provisions. The Government has the power under the DPCO 2013 to recover amounts charged in excess of the notified price from the manufacturer, importer or distributor and the said amounts are to be deposited in the Drugs Prices Equalization Account. The DPCO 2013 prescribes certain instances in which case the provision of the DPCO 2013 will not be applicable. The Factories Act, 1948 (“Factories Act”)

The Factories Act requires the ‘occupier’ of a factory to ensure the health, safety and welfare of all workers in the factory premises. Further, the “occupier” of a factory is also required to ensure (i) the safety and proper maintenance of the factory such that it does not pose health risks to persons in the factory premises; (ii) the safe use, handling, storage and transport of factory articles and substances; (iii) provision of adequate instruction, training and supervision to ensure workers’ health and safety; and (iv) cleanliness and safe working conditions in the factory premises. The COPRA provides a mechanism for the consumer to file a complaint against a product manufacturer, seller or service provider in cases of unfair contract or trade practices, restrictive trade practices, defected goods, goods which are hazardous or likely to be hazardous to life being sold in contravention to safety standards, deficiency in services and price charged being unlawful. It provides for a three-tier consumer grievance redressal mechanism at the district, state and national levels. Non-compliance of the orders of the redressal commissions attracts criminal penalties. The COPRA will, inter alia, also introduce a Central Consumer Protection Authority to regulate matters relating to violation of rights of consumers, unfair trade practices and false or misleading advertisements, which are prejudicial to the interests of public and consumers and promote, protect and enforce the rights of **consumers**.

Indian contract deals with the enforcement of these rights and duties upon the parties. The Indian Contract Act also lays down provisions of indemnity, guarantee, bailment and agency. Provisions relating to sale of goods and partnership which were originally in the Act are now subject matter of separate enactments viz., the Sale of Goods Act and the Indian Partnership Act. The Sale of Goods Act, 1930 (Sale of Goods)

The law relating to the sale of goods is codified in the Sale of Goods Act, 1930. It defines sale and agreement to sell as a contract whereby the seller transfers or agrees to transfer the property in goods to the buyer for a price and provides that there may be a contract of sale between part owner and another and that the contract of sale may be absolute or conditional. According to the provisions of this Act, a contract of sale is made by an offer to buy or sell the goods for a price and the acceptance of such offer.

The Act further provides that the contract may provide for the immediate delivery of the goods or immediate payment of the price or both or for the delivery or payment by installments or that the delivery or payment or both shall be postponed. Provisions are made in this Act for existing or future goods, perishable goods, ascertainment of price, conditions and warranties, effects of the contract, delivery to courier, duties of seller and buyer, buyer’s right of examining the goods, liability of buyer for neglecting or refusing the delivery of goods, rights of unpaid seller, suits for breach of the contract, sale, etc.

C. ACCOUNTING CONVENTION

The Company follows the mercantile system of accounting, recognizing income and expenditure on accrual basis. The accounts are prepared on historical cost basis and as a going concern. Accounting policies not referred to specifically otherwise, are consistent with the generally accepted accounting principles.

The following significant accounting policies are adopted in the preparation and presentation of these financial statements:

1. Revenue Recognition

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured.

Sale of Goods

Sales of goods are recognized on transfer of significant risks and rewards of ownership to the buyer, which generally coincides with the delivery of goods to customers.

Income From Services

Revenue from services is recognized when services have been rendered and there should be no uncertainty regarding consideration and its ultimate collection.

Interest Income

Interest income is accrued on a time proportion basis, by reference to the principle outstanding and the effective interest rate applicable.

2. Property, Plant and Equipment

- a) Property, Plant and Equipment are stated as per Cost Model i.e., at cost less accumulated depreciation and impairment, if any;
- b) Costs directly attributable to acquisition are capitalized until the Property, Plant and Equipment are ready for use, as intended by the management;
- c) Subsequent expenditures relating to Property, Plant and Equipment are capitalized only when it is probable that future economic benefits associated with these will flow to the Company and the cost of the item can be measured reliably. Repairs & maintenance costs are recognized in the Statement of profit & Loss when incurred;
- d) The cost and related accumulated depreciated are eliminated from the financial statements upon sale or retirement of the asset and the resultant gains or losses are recognized in the Statement of Profit or Loss. Assets to be disposed of are reported at the lower of the carrying value or the fair value less cost to sell;
- e) Depreciation on Tangible Assets in case of company is provided in such a manner so that the cost of asset (Net of realizable value) will be amortized over their estimated remaining useful life on SLM basis as per the useful life prescribed under Schedule II to the Companies Act 2013.
- f) Depreciation methods, useful lives, and residual values are reviewed periodically, including at each financial year end;

3. IMPAIRMENT

The Management periodically assesses, using external and internal sources, whether there is an indication that an asset may be impaired. An impairment loss is recognized wherever the carrying value of an asset exceeds its recoverable amount. The recoverable amount is higher of the asset's net selling price and value in use, which means the present value of future cash flows expected to arise from the continuing use of the asset and its eventual disposal. An impairment loss for an asset is reversed if, and only if, the reversal can be related objectively to an event occurring after the impairment loss was recognized. The carrying amount of an asset is increased to its revised recoverable amount, provided that this amount does not exceed the carrying amount that would have been determined (net of any accumulated amortization or depreciation) had no impairment loss been recognized for the asset in prior years.

4. INVENTORIES

Inventories are valued after providing for obsolescence, as follows:

Raw Materials -Lower of cost and net realizable value. However, materials and other items held for use in the production of inventories are not written down below cost if the finished products in which they will be incorporated are expected to be sold at or above cost. Cost is determined on Weighted Average Cost basis.

5. RETIREMENT BENEFITS & OTHER EMPLOYEE BENEFITS

Defined-contribution plans:

All short term employee benefits are accounted on undiscounted basis during the accounting period based on services rendered by employees.

The Company's contribution to Provident Fund and Employees State Insurance Scheme is determined based on a fixed percentage of the eligible employees' salary and charged to the Statement of Profit and Loss on accrual basis.

The Group has made provision for payment of Gratuity to its employees. This Provision is made as per the method prescribed under the Payment of Gratuity Act. The cost of providing gratuity under this plan is determined on the basis of actuarial valuation at year end. Under the Gratuity Fund Plan, the holding company contributes to a LIC administered Group Gratuity Fund on behalf of employees.

6. FOREIGN EXCHANGE TRANSACTIONS

Foreign-currency denominated monetary assets and liabilities if any are translated at exchange rates in effect at the Balance Sheet date. The gains or losses resulting from the transactions relating to purchase of current assets like Raw Material or other products, are included in the Statement of Profit and Loss. Revenue, expense and cash-flow items denominated in foreign currencies are translated using the exchange rate in effect on the date of the transaction.

7. CASH FLOW STATEMENT

Cash flows are reported using the indirect method, whereby profit before tax is adjusted for the effects of transactions of a non- cash nature, any deferrals or accruals of past or future operating cash receipts or payments and item of income or expenses associated with investing or financing cash flows. The cash flows from operating, investing and financing activities are segregated.

8. BORROWING COSTS

Borrowing costs that are directly attributable to the acquisition or construction of a qualifying asset are capitalized as part of the cost of that asset till such time the asset is ready for its intended use. A qualifying asset is an asset that necessarily takes a substantial period of time to get ready for its intended use. Costs incurred in raising funds are amortized equally over the period for which the funds are acquired. All other borrowing costs are charged to profit and loss account.

9. INCOME TAX

The accounting treatment for the Income Tax in respect of the Company's income is based on the Accounting Standard on 'Accounting for Taxes on Income' (AS-22). The provision made for Income Tax in Accounts comprises both, the current tax and deferred tax. Provision for Current Tax is made on the assessable Income Tax rate applicable to the relevant assessment year after considering various deductions available under the Income Tax Act, 1961.

Deferred tax is recognised for all timing differences; being the differences between the taxable income and accounting income that originate in one period and are capable of reversal in one or more subsequent periods. Such deferred tax is quantified using the tax rates and laws enacted or substantively enacted as on the Balance Sheet date. The carrying amount of deferred tax asset/liability is reviewed at each Balance Sheet date and consequential adjustments are carried out.

10. EARNINGS PER SHARE

Basic earnings per share is computed by dividing the net profit after tax by the weighted average number of equity shares outstanding during the period. Diluted earnings per share is computed by dividing the profit after tax by the weighted average number of equity shares considered for deriving basic earnings per share and also the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares.

The diluted potential equity shares are adjusted for the proceeds receivable had the shares been actually issued at fair value which is the average market value of the outstanding shares. Dilutive potential equity shares are deemed converted as of the beginning of the period, unless issued at a later date. Dilutive potential equity shares are determined independently for each period presented.

11. PROVISIONS AND CONTINGENT LIABILITIES

A provision is recognized if, as a result of a past event, the Company has a present legal obligation that is reasonably estimable, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by the best estimate of the likely future outflow of economic benefits required to settle the obligation at the reporting date.

Where no reliable estimate can be made, a disclosure is made as contingent liability. A disclosure for a contingent liability is also made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. Where there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made.

12. CASH & CASH EQUIVALENTS

Cash and cash equivalents comprise cash and cash on deposit with banks. The Company considers all highly liquid investments with a remaining maturity at the date of purchase of three months or less and that are readily convertible to known amounts of cash to be cash equivalents.

The time duration from public issue closure to listing would continue to be six Working Days.

Phase II: This phase commenced on completion of Phase I and will continue till March 31, 2020. Under this phase, submission of the Application Form by a Retail Individual Applicant through intermediaries to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. 1. The total number of Shares to be allocated to each category as a whole shall be arrived at on a proportionate basis i.e., the total number of Shares applied for in that category multiplied by the inverse of the over subscription ratio (number of applicants in the category X number of Shares applied for).

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and Foreign Exchange Management Act, 1999 ("FEMA"). While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the Reserve Bank of India ("RBI") and Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India ("DIPP").

The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases. The DPIIT issued the Consolidated Foreign Direct Investment Policy notified by the DPIIT File No. 5(2)/2020-FDI Policy dated October 15, 2020, with effect from October 15, 2020 (the "FDI Policy"), which consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT or the DPIIT that were in force and effect prior to October 15, 2020. The Government of India proposes to update the consolidated circular on FDI Policy once every year and therefore, the FDI Policy will be valid until the DPIIT issues an updated circular.

In terms of the FEMA NDI Rules, a person resident outside India may make investments into India, subject to certain terms and conditions, and provided that an entity of a country, which shares land border with India or the beneficial owner of an investment into India who is situated in or is a citizen of any such country, shall invest only with government approval.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company are under the automatic route under the foreign direct investment policy and transfer does not attract the provisions of the Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI / RBI.

Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country ("Restricted Investors"), will require prior approval of the Government, as prescribed in the Consolidated FDI Policy and the FEMA Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made a similar amendment to the FEMA Rules. Pursuant to the Foreign Exchange Management (Non-debt Instruments) (Fourth Amendment) Rules, 2020, a multilateral bank or fund, of which India is a member, shall not be treated as an entity of a particular country nor shall any country be treated as the beneficial owner of the investments of such bank of fund in India. Each Bidder should seek independent legal advice about its ability to participate in the Offer. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Bidder shall intimate our Company and the Registrar to the Offer in writing about such approval along with a copy thereof within the Offer Period.

As per the existing policy of the Government of India, OCBs cannot participate in this Offer and in accordance with the extant FDI guidelines on sectoral caps, pricing guidelines etc. as amended by Reserve bank of India, from time to time. Investors are advised to confirm their eligibility under the relevant laws before investing and / or subsequent purchase or sale transaction in the Equity Shares of our Company. Investors will not offer, sell, pledge or transfer the Equity Shares of our Company to any person who is not eligible under applicable laws, rules, regulations, guidelines. Our Company, the Underwriters and their respective directors, officers, agents, affiliates and representatives, as applicable, accept no responsibility or liability for advising any investor on whether such investor is eligible to acquire Equity Shares of our Company.
