Further, we have high inventories and outstanding amount due from our debtors which may adversely affect our cash flows and our business operations.

These transactions, inter-alia include issue of shares, remuneration, rent payments, loans and advances, etc. Our Company has entered into such transactions due to easy proximity and quick execution. However, there is no assurance that we could not have obtained better and more favourable terms than from transaction with related parties. If our arrangements for insurance or indemnification are not adequate to cover claims, we may be required to make substantial payments and our results of operations and financial condition may be affected. For further information, see the section titled "*Our Business*" beginning on page 97.

10. ***We have incurred significant indebtedness which exposes us to various risks which may have an adverse effect on our business and results of operations.***

Our ability to borrow and the terms of our borrowings will depend on our financial condition, the stability of our cash flows, general market conditions, economic and political conditions in the markets where we operate and our capacity to service debt. As on September 30, 2018, our total outstanding indebtedness was Rs. 223.23 Lakhs.

Our significant indebtedness results in substantial amount of debt service obligations which could lead to:

- increasing our vulnerability to general adverse economic, industry and competitive conditions;
- limiting our flexibility in planning for, or reacting to, changes in our business and the industry;
- affecting our credit rating;
- limiting our ability to borrow more money both now and in the future; and
- increasing our interest expenditure and adversely affecting our profitability.

If the loans are recalled on a short notice, we may be required to arrange for funds to fulfil the necessary requirements. The occurrence of these events may have an adverse effect on our cash flow and financial conditions of the company. For further details regarding our indebtedness, see the Section titled "*Financial Information of our Company*" beginning on page 138.

11. Intensified competition may result in content price escalation which may restrict our ability to access content and/or talent.

We face intense competition from both Indian and foreign competitors, many of which are substantially larger and have greater financial resources than us. Growth in entertainment industry in recent years has attracted new industry participants and competitors. The entry of such competitors may change the media and entertainment industry in ways that may not favour us. Domestic competitors of a scale similar to or greater than our own may impact our ability to attract creative and technical talent and other scarce resources including content, which could have a material adverse effect on our business, prospects, financial condition and results of operations.

12. Piracy of our content may adversely impact our revenues and business.

We are highly dependent on maintenance of intellectual property rights in the entertainment products and services we provide. Piracy of media products, including digital and internet piracy and the sale of counterfeit consumer products, may decrease revenue from the exploitation of our products.

13. Our ability to remain competitive may be adversely affected by rapid technological changes and our ability to access such technology.

The Indian media and entertainment industry continues to undergo significant technological developments. We may not be successful in adopting new digital dubbing and distribution methods or may lose market share to our competitors if the methods that we adopt are not as technologically sound, user-friendly, widely accessible or appealing to consumers as those adopted by our competitors. Further, advances in technologies or alternative methods or changes in consumer behaviour driven by these or other technologies, could have a negative effect on our business. Other larger competitor companies may have bigger budgets to exploit growing technological trends than the budgets we can make available. In order to remain competitive we could be required to upgrade our technology, and any failure to do so could have a material adverse effect on our business, prospects, financial condition and results of operations.

For details, please see the chapter titled "Financial Information of our Company" beginning on page 138. Any negative cash flows in the future could adversely affect our results of operations and consequently our revenues, profitability and growth plans.

17. We have made application for registration of our logo  and we do not own the "corporate logo" legally as on date. We may be unable to adequately protect our intellectual property. Furthermore, we may be subject to claims alleging breach of third party intellectual property rights.

We have made application for registration of our name and logo under the provisions of the Trademarks Act, 1999 and do not own the "corporate logo" used in our communications and other operations as on date. As such, we do not enjoy the statutory protections accorded to a registered trademark or logo as on date. Further, we cannot assure you that any application for registration of our logo in future by our Company will be granted by the relevant authorities in a timely manner or at all. Our efforts to protect our intellectual property may not be adequate and may lead to erosion of our business value and our operations could be adversely affected. We may need to litigate in order to determine the validity of such claims and the scope of the proprietary rights of others. Any such litigation could be time consuming and costly and the outcome cannot be guaranteed. We may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect our intellectual property.

For further information, please refer to the chapters/section titled “*Our Business*”, “*Our Promoters and Promoter Group*” and “*Financial information of the Company-Related Party Transactions*”, beginning on pages 97, 132 and 138 respectively.

20. *If we are unable to attract new clients or our existing clients do not renew their contract, the growth of our business and cash flows will be adversely affected.*

Our top five clients contributed approximately 90.41% of our revenue from operations based on Restated Financial Statements for the period ended September 30, 2018. To increase our revenue and cash flows, we must regularly add new clients. If we are unable to generate sufficient sales leads through our marketing programs, or if our existing or new clients do not perceive our services to be of sufficiently high value and quality, we may not be able to increase sales and our operating results would be adversely affected. In addition, our existing clients have no obligation to renew their contracts, and renewal rates may decline or fluctuate due to a number of factors, including customers’ satisfaction with our services, our prices and the prices of competing service providers. If we fail to sell our services to new customers or if our existing customers do not renew their contracts, our operating results will suffer, and our revenue growth, cash flows and profitability may be materially and adversely affected.

21. *We are heavily dependent on our Promoters and Key Managerial Personnel for the continued success of our business through their continuing services and strategic guidance and support.*

Our success heavily depends upon the continued services of our Key Managerial Personnel, along with support of our Promoters. We also depend significantly on our Key Managerial Personnel for executing our day to day activities. The loss of any of our Promoters and Key Management Personnel, or failure to recruit suitable or comparable replacements, could have an adverse effect on us. The loss of service of the Promoters and other senior management could seriously impair the ability to continue to manage and expand the business efficiently. If we are unable to retain qualified employees at a reasonable cost, we may be unable to execute our growth strategy. For further details of our Directors and Key Managerial Personnel, please refer to chapter “*Our Management*” beginning on page 118.

22. *There may be potential conflicts of interest if our Promoters or Directors are involved in any business activities that compete with or are in the same line of activity as our business operations.*

Visual Reality, proprietorship firm of one of our Promoter, Mr. Manish Dutt and also a part of our promoter group is involved in similar line of business. Further, we have not entered into any non-compete agreement with the said proprietorship firm. We cannot assure you that our Promoter who has common interest in said entity will not favour the interest of the proprietorship firm. As a result; conflicts of interests may arise in allocating business opportunities amongst our Company and proprietorship firm in circumstances where our respective interests diverge. There can be no assurance that our Promoter or members of the Promoter Group will not compete with our existing business or any future business that we may undertake or that their interests will not conflict with ours. Any such present and future conflicts could have a material adverse effect on our reputation, business, results of operations and financial condition which may adversely affect our profitability and results of operations.

- 23. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule.**

The proposed fund requirement for our expansion plan, as detailed in the section titled "*Objects of the Issue*" is to be funded from the proceeds of this IPO. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule. We therefore, cannot assure that we would be able to execute our future plans/strategy within the given timeframe. For details, please refer to the Chapter titled "*Objects of the Issue*" beginning on page 74.

- 24. We may not be able to sustain effective implementation of our business and growth strategy.**

The success of our business will largely depend on our ability to effectively implement our business and growth strategy. In the past we have generally been successful in execution of our business but there can be no assurance that we will be able to execute our strategy on time and within the estimated budget in the future. If we are unable to implement our business and growth strategy, this may have an adverse effect on our business, financial condition and results of operations.

- 25. Our ability to pay any dividends will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures.**

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our Dividend history refer to the chapter titled "*Dividend Policy*" beginning on page 137.

- 26. There is no monitoring agency appointed by our Company to monitor the utilization of the Issue proceeds.**

Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds in terms of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the stock exchange and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

- 27. Our Promoters and the Promoter Group will jointly continue to retain majority shareholding in our Company after the issue, which will allow them to determine the outcome of the matters requiring the approval of shareholders.**

Our Promoters along with the promoter group will continue to hold collectively almost [●]% of the Post Issue Equity Share Capital of our Company. As a result of the same, they will be able to exercise significant influence over the control of the outcome of the matter that requires approval of the majority shareholders vote. Such a concentration of the ownership may also have the effect of delaying, preventing or deterring any change in the control of our company. In addition to the above, our promoters will continue to have the

ability to take actions that are not in, or may conflict with our interest or the interest of some or all of our minority shareholders, and there is no assurance that such action will not have any adverse effect on our future financials or results of operations.

28. *The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the issue price and you may not be able to sell your Equity Shares at or above the Issue Price.*

The issue price of the equity shares have been based on many factor and may not be indicative of the market price of our Equity Shares after the Issue. For further information please refer the section titled “Basis for Issue Price” beginning on page 80. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price.

Such data may also be produced on a different basis from comparable information compiled with regard to other countries. Therefore, discussions of matters relating to India and its economy are subject to the limitation that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete or unreliable.

30. *You may be subject to Indian taxes arising out of capital gains on sale of Equity Shares.*

Under current Indian tax laws and regulations, capital gains arising from the sale of Equity Shares in an Indian Company are generally taxable in India. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Any gain realised on the sale of Equity Shares held for more than 12 months to an Indian resident, which are sold other than on a recognized stock exchange and on which no STT has been paid, will be subject to long term capital gains tax in India. However, any gain realized on the sale of listed Equity Shares held for a period of 12 months or less will be subject to short term capital gains tax in India. Further, any gain realised on the sale of listed equity shares held for a period of 12 months or less which are sold other than on a recognised stock exchange and on which no STT has been paid, will be subject to short term capital gains tax at a relatively higher rate as compared to the transaction where STT has been paid in India. For more details, please refer to “Statement of Tax Benefits” beginning on page 83.

31. *The price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not develop.*

Prior to this Issue, there has been no public market for our Equity Shares. Hem Securities Limited is acting as Market Maker for the Equity Shares of our Company. However, the trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India’s fiscal regime, volatility in the Indian and global securities market, performance of our competitors, the Indian Capital Markets, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnerships, joint ventures, or capital commitments. In addition, if the stock markets experience a loss of investor confidence, the trading

price of our Equity Shares could decline for reasons unrelated to our business, financial condition or operating results. The trading price of our Equity Shares might also decline in reaction to events that affect other companies in our industry even if these events do not directly affect us. Each of these factors, among others, could materially affect the price of our Equity Shares. Any instance of disinvestments of equity shares by our Promoters or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

There can be no assurance that an active trading market for our Equity Shares will develop or be sustained after this Issue, or that the price at which our Equity Shares are initially offered will correspond to the prices at which they will trade in the market subsequent to this Issue. For further details of the obligations and limitations of Market Maker, please refer to the section titled “*General Information – Details of the Market Making Arrangement*” for this Issue beginning on page 42.

EXTERNAL RISK FACTORS

32. Our business is dependent on the Indian economy.

The performance and growth of our business are necessarily dependent on economic conditions prevalent in India, which may be materially and adversely affected by centre or state political instability or regional conflicts, a general rise in interest rates, inflation, and economic slowdown elsewhere in the world or otherwise. There have been periods of slowdown in the economic growth of India. India’s economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports global economic uncertainty and liquidity crisis, volatility in exchange currency rates and annual rainfall which affects agricultural production. Any continued or future slowdown in the Indian economy or a further increase in inflation could have a material adverse effect on the price of our raw materials and demand for our products and, as a result, on our business and financial results. The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the U.S. and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors’ reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability, including the financial crisis and fluctuations in the stock markets in China and further deterioration of credit conditions in the U.S. or European markets, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our business and financial results.

33. Regional hostilities, terrorist attacks, communal disturbances, civil unrest and other acts of violence or war involving India and other countries may result in a loss of investor confidence and adversely affect the financial markets and our business.

Terrorist attacks, civil unrest and other acts of violence or war may negatively affect the Indian markets on which our Equity Shares will trade and also adversely affect the worldwide financial markets. In addition, the Asian region has from time to time experienced instances of civil unrest and hostilities among neighboring countries. Hostilities and tensions may occur in the future and on a wider scale. Military activity or terrorist attacks in India, may result in investor concern about stability in the region, which may adversely affect the price of our Equity Shares. Events of this nature in the future, as well as social and civil unrest within other countries in the world, could influence the Indian economy and could have an adverse effect on the market for securities of Indian companies, including our Equity Shares.

34. *Changing laws, rules and regulations and legal uncertainties in India, including adverse application of tax laws and regulations, may adversely affect our business and financial performance.*

Our business and financial performance could be adversely affected by changes in law or interpretations of existing, or the promulgation of new, laws, rules and regulations in India applicable to us and our business. For further details please refer to the chapter “Government and Other Approvals” beginning on page 186 for details of the laws currently applicable to us. There can be no assurance that the central or the state governments in India may not implement new regulations and policies which will require us to obtain approvals and licenses from the central or the state governments in India and other regulatory bodies or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the implementation of the new regulations may have a material adverse effect on all our business, financial condition and results of operations. In addition, we may have to incur capital expenditures to comply with the requirements of any new regulations, which may also materially harm our results of operations. For instance, the Government has proposed a comprehensive national goods and services tax (“GST”) regime that will combine taxes and levies by the Central and state Governments into a unified rate structure. Given the limited availability of information in the public domain concerning the GST, we are unable to provide any assurance as to the tax regime following implementation of the GST. The implementation of this new structure may be affected by any disagreement between certain state Governments, which could create uncertainty. Any such future amendments may affect our overall tax efficiency, and may result in significant additional taxes becoming payable.

35. *Instability in financial markets could materially and adversely affect our results of operations and financial conditions.*

The Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States of America or Europe, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors’ reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. The global financial turmoil, an outcome of the sub-prime mortgage crisis which originated in the United States of America, led to a loss of investor confidence in worldwide financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil, evident from the sharp decline in benchmark index of stock exchanges i.e. NSE-NIFTY and BSE-SENSEX. Any prolonged financial crisis may have an adverse impact on the Indian economy and us, thereby resulting in a material and adverse effect on our business, operations, financial condition, profitability and price of our Equity Shares.

36. *Natural calamities could have a negative impact on the Indian economy and cause our Company’s business to suffer.*

India has experienced natural calamities such as earthquakes, tsunami, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

37. *Government regulation of foreign ownership of Indian securities may have an adverse effect on the price of the Equity Shares.*

Foreign ownership of Indian securities is subject to government regulation. Under foreign exchange regulations currently in effect in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the rupees proceeds from the sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the Income Tax authorities. There can be no assurance that any approval required from the RBI or any other government agency can be obtained.

38. *If certain labour laws become applicable to us, our profitability may be adversely affected.*

India has stringent labour legislations that protect the interests of workers, including legislation that sets forth detailed procedures for dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. Any change or modification in the existing labour laws may affect our flexibility in formulating labour related policies.

39. *Our performance is linked to the stability of policies and the political situation in India.*

The Government of India has traditionally exercised, and continues to exercise, a significant influence over many aspects of the economy. Our business, and the market price and liquidity of our Equity Shares, may be affected by interest rates, changes in government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Since 1991, successive Indian governments have pursued policies of economic liberalization and financial sector reforms. The current Government has announced its general intention to continue India's current economic and financial sector liberalization and deregulation policies.

However there can be no assurance that such policies will be continued and a significant change in the government's policies in the future could affect business and economic conditions in India and could also adversely affect our business, prospects, financial condition and results of operations.

Any political instability in India may adversely affect the Indian securities markets in general, which could also adversely affect the trading price of our Equity Shares. Any political instability could delay the reform of the Indian economy and could have a material adverse effect on the market for our Equity Shares. There can be no assurance to the investors that these liberalization policies will continue under the newly elected government. Protests against privatization could slow down the pace of liberalization and deregulation. The rate of economic liberalization could change, and specific laws and policies affecting companies in the industrial equipment manufacturing sectors, foreign investment, currency exchange rates and other matters affecting investment in our securities could change as well. A significant change in India's economic liberalization and deregulation policies could disrupt business and economic conditions in India and thereby affect our business.

OVERVIEW OF GLOBAL ECONOMY

Moderating activity and heightened risks are clouding global economic prospects. International trade and investment have softened, trade tensions remain elevated, and some large emerging market and developing economies (EMDEs) have experienced substantial financial market pressures. Against this challenging backdrop, EMDE growth has stalled, with a sharply weaker-than-expected recovery in commodity exporter's accompanied by a deceleration in commodity importers. Downside risks have become more acute. Disorderly financial market developments could disrupt activity in the affected economies and lead to contagion effects. Trade disputes could escalate or become more widespread, denting activity in the economies involved and leading to negative global spillovers. To confront this increasingly difficult environment, the most urgent priority is for EMDE policymakers to prepare for possible bouts of financial market stress and rebuild macroeconomic policy buffers as appropriate. Equally critically, policymakers need to foster stronger potential growth by boosting human capital, removing barriers to investments, and promoting trade integration within a rules-based multilateral system. Such efforts would also help address the challenges associated with informality.

FIGURE 1.1 Summary – Global prospects

Global growth is moderating, as industrial activity and trade decelerate, negatively impacting investor sentiment and equity prices. The recovery in EMDEs has stalled, owing to softening external demand, tighter external financing conditions, and heightened policy uncertainties. Many EMDE central banks have raised interest rates to fend off currency pressures. Per capita growth will remain anemic in several EMDE regions.

A. Global growth

B. Global industrial production and new export orders

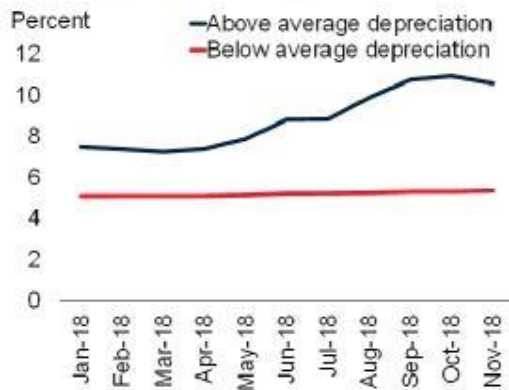

C. Global and EMDE equity prices

D. Growth in EMDEs

E. EMDE policy interest rates, by extent of currency depreciation against the U.S. dollar

F. Per capita growth, by region

Global growth is moderating as the recovery in trade and manufacturing activity loses steam . Despite ongoing negotiations, trade tensions among major economies remain elevated. These tensions, combined with concerns about softening global growth prospects, have weighed on investor sentiment and contributed to declines in global equity prices. Borrowing costs for emerging market and developing economies (EMDEs) have increased, in part as major advanced-economy central banks continue to withdraw policy accommodation in varying degrees. A strengthening U.S. dollar, heightened financial market volatility, and rising risk premiums have intensified capital outflow and currency pressures in some large EMDEs, with some vulnerable countries experiencing substantial financial stress.

EMDE growth edged down to an estimated 4.2 percent in 2018—0.3 percentage point slower than previously projected—as a number of countries with elevated current account deficits experienced substantial financial market pressures and appreciable slowdowns in activity. More generally, as suggested by recent high-frequency indicators, the recovery among commodity exporters has lost momentum significantly, largely owing to country-specific challenges within this group. Activity in commodity importers, while still robust, has slowed somewhat, reflecting capacity constraints and decelerating export growth. In low-income countries (LICs), growth is firming as infrastructure investment continues and easing drought conditions support a rebound in agricultural output. Central banks in many EMDEs have tightened policy to varying degrees to confront currency and inflation pressures.

In all, global growth is projected to moderate from a downwardly revised 3 percent in 2018 to 2.9 percent in 2019 and 2.8 percent in 2020-21, as economic slack dissipates, monetary policy accommodation in advanced economies is removed, and global trade gradually slows. Growth in the United States will continue to be supported by fiscal stimulus in the near terms, which will likely lead to larger and more persistent fiscal deficits. Advanced-economy growth will gradually decelerate toward potential, falling to 1.5 percent by the end of the forecast horizon, as monetary policy is normalized and capacity constraints become increasingly binding.

The projected gradual deceleration of global economic activity over the forecast horizon could be more severe than currently expected given the predominance of substantial downside risks. A sharper-than-expected tightening of global financing conditions, or a renewed rapid appreciation of the U.S. dollar, could exert further downward pressure on activity in EMDEs, including in those with large current account deficits financed by portfolio and bank flows. Government and/or private sector debt has also risen in a majority of EMDEs over the last few years, including in many LICs, reducing the fiscal room to respond to shocks and heightening the exposure to shifts in market sentiment and rising borrowing costs.

Moreover, facilitating the expansion of small- and medium-sized enterprises, including by improving their access to international markets and finance, would also spur productivity and stimulate growth-enhancing investments. For many EMDEs, there is scope to further liberalize trade and improve the extent to which they are integrated into global value chains, which would foster a more efficient allocation of resources, job creation, and export diversification. Policies that help improve outcomes in these areas would also contribute to address the challenges associated with informality, thus reinforcing the basis for future productivity growth.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and Foreign Exchange Management Act, 1999 ("FEMA"). While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the Reserve Bank of India ("RBI") and Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India ("DIPP").

The Government of India, from time to time, has made policy pronouncements on Foreign Direct Investment ("FDI") through press notes and press releases. The DIPP, has issued consolidated FDI Policy Circular of 2017 ("FDI Policy 2017"), with effect from August 28, 2017, which consolidates and supersedes all previous press notes, press releases and clarifications on FDI Policy issued by the DIPP that were in force. The Government proposes to update the consolidated circular on FDI policy once every year and therefore, FDI Policy 2017 will be valid until the DIPP issues an updated circular.

The RBI also issues Master Circular on Foreign Investment in India every year. Presently, FDI in India is being governed by Master Circular on Foreign Investment dated July 01, 2015 as updated from time to time by RBI. In terms of the Master Circular, an Indian company may issue fresh shares to people resident outside India (who is eligible to make investments in India, for which eligibility criteria are as prescribed). The Indian company making such fresh issue of shares would be subject to the reporting requirements, inter-alia with respect to consideration for issue of shares and also subject to making certain filings including filing of Form FC-GPR.

In case of investment in sectors through Government Route, approval from competent authority as mentioned in Chapter 4 of the FDI Policy 2017 has to be obtained.

The transfer of shares between an Indian resident to a non-resident does not require the prior approval of the RBI, subject to fulfilment of certain conditions as specified by DIPP/RBI, from time to time. Such conditions include:

- (i) where the transfer of shares requires the prior approval of the Government as per the extant FDI policy provided that:
 - (a) the requisite approval of the Government has been obtained; and

 - (b) The pricing for the transaction is compliant with the specific/explicit, extant and relevant

SEBI regulations/guidelines (such as IPO, Book building, block deals, delisting, exit, open offer/substantial acquisition/SEBI SAST); and Chartered Accountants Certificate to the effect that compliance with the relevant SEBI regulations/guidelines as indicated above is attached to the form FC-TRS to be filed with the AD bank; and
